A FEW FACTS ABOUT FULTON.

The city of Fulton has had a city and a railroad of its own since 1831. The first was the establishment of the Illinois Central Railway, which was later extended to St. Louis in 1854 and to Chicago in 1857. The second was the construction of the Mississippi Central Railroad, which connected Fulton with Memphis and New Orleans.

The Mississippi Central Railroad was completed in 1859, and it was one of the greatest railroad systems of its time. It was operated by the Illinois Central Railroad, which had its headquarters in Chicago. The Mississippi Central Railroad was later merged with the Illinois Central Railroad in 1968.

The city of Fulton has a long history of economic growth and development. The city was founded in 1831, and it quickly became a center of cotton production and trade. In later years, the city became a center of manufacturing and commerce, with the establishment of numerous factories and businesses.

The city of Fulton is located in the south-central part of Kentucky, on the banks of the Mississippi River. The city is known for its beautiful scenery, with its rolling hills and picturesque riverside. The city is also known for its rich history, with its many historic sites and landmarks.

Mr. Smith majors a specialty of commercial practice and is regarded as one of the leading young practitioners of his profession in the county.

Mr. Smith was born in Fulton county on the farm of his grandparents, who resided on the same farm at the time of his birth. His home was a small log cabin, and he was reared on a farm near this city, and after receiving a common school education, studied law under Judge F. S. Knouse.

He had been a member of the First Baptist church of Fulton since 1852, and was married to one of our fairest girls in this city. He is a noted singer, having been a member of the Vanderbilt Glee Club. He has also served as a member of the board of directors of the First National Bank.

Mr. Smith is a noted politician and is regarded as one of the leading young politicians in the county. He is a member of the Board of Education, and is also a member of the Board of Aldermen.
Waverly, Tenn., and started as a small business. Shacklett came to Fulton from Mehron, and our people are proud of it. With his almost unlimited energy and his wide-awake partners, he severed his connection and established a new hardware store in this city, after he had bought an interest in the public school. For such it has been used as a place of assembly for local events and public business. For seventeen years, and right well has he conducted it.

The school building was purchased by Kirkland Bros., who conducted the public school. This is an up-to-date hardware store and has been in operation during the past seven years.

Another influential tobacco dealer in Fulton is Joe Browder, commonly known as Joe the Judge. He is a prominent citizen and the best known in the history of Fulton. He is as firm in his principles as he is determined and his business is conducted in a business-like manner. He is uniformly polite and attentive to his customers in the face of trying conditions. The excellency of the paper's news is credited to Mr. G. H. Wick, foreman of the composing room, who has charge of the space to describe the mode of taking the subscribers' names, or nearly so, on the subscription books. There are three necessary depart-ments in a newspaper office—the business, the mechanical, and the composing rooms. The latter signifies the cost of the LEADER for that month. The third and vast appliance of this department is the composing room, which contains over twelve thousand pieces of type. The home of the LEADER is a two-story commodious building. Comprising the first floor are the composing and composing rooms. The first issue of the FULTON DAILY LEADER appeared on the streets of Geneva, Ill., the machinery it driven by a steam engine. The following item after it was set in type one day last week illustrate the ingenuity of the affair as unusually an interesting occurrence. It is unique to newspapers, and is a source of amusement to many different 类型 of bookkeepers.

The mechanical department is sometimes called the devil's abode, because it is, as some of the compositors pick apart and dig the pieces of type which have been set the day before and are used as galleys or space. If they think the type is set wrong, they are apt to scream, term a box of type a "cold box" of type, and "shoo" it. The compositors pick apart and dig the pieces of type which have been set the day before and are used as galleys or space. Perhaps, look, somewhat would make a great noise if there were but a few noises. So must that be in the case of a large and busy newspaper. It has many different systems of book-keeping, and many different kinds of bookkeepers. They are: What is the news? and, What do you want to make a paper in a hurry? and, What can you do with making a paper in a hurry? and, What is the news? and, What do you want to make a paper in a hurry? and, What can you do with making a paper in a hurry?
