Sat On By Board

CONTRACTORS CANNOT TEAR UP MORE BLOCKS OF STREET

At yesterday's meeting of the board of public works the question of tearing up more blocks of street was discussed at some length. The board had received a request from Rowlandtown, and stealing some of the property owners, to tear up the street between Third and Fourth streets, and then Extras. The request came from the property owners, who said that they had been notified by the city engineer that the street was in a dangerous condition, and that it was necessary to tear it up in order to make it safe. The board of public works was of the opinion that the request was well-founded, and that the street should be torn up and repaired as soon as possible. The work of tearing up the street was to be done by the city's own labor, and the cost of the work was to be charged against the property owners. The work was to be done without delay, and the property owners were asked to make all necessary arrangements for the repair of the street as soon as the work was completed.
