NICHOLS RELATES OF 60 YEARS PAST

W. Nichols Friday, in reviewing the history of Benton, Ky., in the past 60 years, said that President Grover Cleveland was inaugurated in 1896. Nichols started a subscription at Benton with 24 names, five of whom are still living. Nichols, Mrs. Ursula C. E. Phillips, of this city and Allie McGee, of Lexington, Ky., were the only ones who returned with him. Nichols said that on the third day of the subscription, "Well I went to school, learn some and make something of it," this he made good.

Calvert Wildcats Win District Tournament In Murray Saturday

The Calvert Wildcats took on all comers at Murray this past week and came out victorious to win the District Crown away from Murray High School 55 to 45.

Coach Lucian Cornwell's Wildcats, who whopped Sharpe earlier in the tournament, took only 12 shots at the basket during the evening but made 21 for an even 500 shooting average from the floor. The 'Cats took only six shots during the last period, making four of them. They tried only one shot in the last six minutes of the fracas.

Murray high's defense proved very good, but it just couldn't halt slippery Gene McLemore, driving Gene Tarkington, and smooth Ray Solomon. Calvert's biggest trouble came in halting the Murray guard assault, plus big Joe Pat Hackett.

The Calvert team, still basking in glory after its 31-27 victory over Sharpe's Green Devils, mastered Benton's improved Indians by 45-33 with Jerry Capps throwing in 21 points. Murray high and certain of a new state champion being crowned by overthrowing Brewster's Redmen 49-40.

Big Jerry Capps tossed in 21 points and was easily the big cog in the Calvert wheel. Gene McLemore contributed 13 markers.

JACK EDWARDS ENTERS RACE FOR COUNTY JUDGE

Jack Edwards, well-known Marshall county farmer and a former sheriff of this county from 1938 to 1942, is today announcing his intentions of making the race for County Judge of Marshall County.

Mr. Edwards' formal announcement of his candidacy is as follows: "To the citizens and democratic voters of Marshall County:

"With full appreciation and sincere gratitude toward your full and sovereign authority as our elected representatives, I hereby announce my candidacy for the office of Judge of Marshall County for your consideration and election in the Democratic Primary Election on August 6, 1949.

I am not unmindful of the vast and important duties and responsibilities of this high office. I recognize that the state statutes provide for certain executive administrative and probative powers placed within your county government. These great powers and functions of this office, through your County Court, fiscal and probate courts, involve jurisdictions covering the many phases of civil and criminal cases in our county, along with all fiscal planning and authority for roads, our unfortunates et al, and all business and expenditures for the county.

"May I respectfully suggest therefore that the office of County Judge should command the highest and most competent administration. This is my native birth and my life-long experience among you as farmer, general building contractor, and your county sheriff, impel me to feel that again at this time I am well qualified to ably and faithfully serve you as your County Judge with sincere integrity of purpose.

"No one could be more appreciative of the honor you gave me in electing me to serve you as Sheriff from 1938 to 1942. The records of my term of office, I consider an unblemished 'any way, make me forever thankful to you for your loyal cooperation in everything tending to make this record good.

It is my belief that within the coming years just ahead great opportunities for our material growth are to be recognized and developed, but greater still perhaps, the opportunity also for intelligent and wholesome administration of law and order that must uphold moral and spiritual growth so necessary for good citizenship.

I humbly submit that this is the kind of service I crave to render to you and impartially to all people as your County Judge. It is my purpose to work steadily to accomplish this.

"I trust your full support and loyal influence may be extended to me and that I may be privileged to see and personally talk with you during the coming campaign."

Sincerely yours
Jack Edwards.

2 Named For Mail Carriers

2 YOUNG BENTON MEN
ACCEPT POSITION HERE
TO START APRIL 1st.

Everything is in readiness for the inauguration of City Delivery of the Mails for Benton and an announcement by Postal officials this week named the two carriers who will deliver mail to the homes in the city limits of Benton.

Julian Jones and Smith Dunn have been appointed to these two new positions and will begin their duties when City Delivery starts on April 1st.

As a part of the change incident to the establishment of free delivery it is contemplated that the office will be closed on Saturday afternoon as are all other offices of the same or higher classification.

On the initiation of this new service the patrons are kindly asked to remember the work is new to us all and that in due course we through experience will render better service. Postal officials asked.

and will be glad to furnish any required information. In the meantime it is assumed that the patrons are not overlooking the requirement that a box or proper receipt must be provided before mail may be delivered to their respective homes and places of business (business houses are not required to have boxes if some one will always be on hand to receive the mails at the time of delivery), the announcement stated.

PLANS MADE TO INTEREST YOUTH IN 'BIG SINGING'

Seek To Enlist Youth Of
County To Study
Old Harmony Singing

The Marshall County Ministerial Association has started plans for a singing supper for the purpose of getting the youth of Benton together for a study of Old Southern Harmony songs.

An effort will be made to enlist the youth of this community and help them learn the old songs used on Big Singing day.

The place of the first meeting has not definitely been decided upon, but the date will be April 29, at 6:30 P. M., according to the Rev. T. G. Waller, of the Association. Young people of all churches are invited to take part and learn the songs used on Marshall county's outstanding day.

Parents are also urged to support the movement and help to keep alive the old Southern Harmony Singing.

She wore a matching halo and mitts and carried a colonial arrangement of tulips, snapdragons and gladioli in spring shades.

The bridesmaids, Miss Lucy Garrigan and Mrs. W. C. Sloan of Fulton, also sisters of the bride, were dressed in identical models of aqua and rose marquisette with halos and mitts matching their frocks and colonial nosesays of the same blossoms. All wore single strands of pearls, gifts of the bride.

The little flower girl, Dee Anna Garrigan, niece of the bride, wore a dainty frock of pale yellow marquisette trimmed with white lace. She wore a white satin bow in her hair and carried a small white basket filled with rose petals.

Latter in the evening, the couple left on a wedding trip to New Orleans where they attended the Mardi Gras. Nagel was dressed in a two-piece ensemble of iridescent taffeta with navy accessories and the orchid from her bridal bouquet.

They will make their home in Emmenton, Pa., where Mr. Nagel is associated with the Emmenton Reins Company as a chemical engineer.

Fritz Nagel of Emmenton, Pa., attended his brother as best man. Groomsmen were Hunter M. Garrigan of Union City, brother of the bride.

Mrs. Garrigan, the bride's mother, was attired in a spring dress of heavy printed silk with which she wore a gray hat, black accessories and a corsage of pink delight rosebuds. Mr. Nagel, mother of the groom, was dressed in a brown and yellow figured

One of Kentucky's greatest proven Holstein sires. His twelve daughters in the past average 15,111 pounds of milk and 575 pounds of butterfat in 305 days on 2 time milking. The dams of these daughters averaged 12,448 pounds of milk and 411 pounds of fat in 305 days on 2 time milking. Thus, Double begu increased the production of his daughters an average of 2,663 pounds of milk, 100 percent test and 144 pounds of fat over the production of these dams. Several daughters have made over 100 pounds of fat and one has 90 pounds of fat, all of 2 1/2 lbs. a day milking Double. See a Holstein 1917 Grand and his daughters have good type.

School Notes

Basketball season is over and I'm sure that the school is proud of its team. They came out in the tournament with two wins and a loss. Of course that loss was the last game of the season.

For their effort and good sportmanship, the cheer leaders who have led for two years will receive a free sweater. All the boys and cheer leaders will receive a letter.

Stan Williams says that he is very glad that the ball team showed up as well as it did at the last and also that he was very happy to cheer for them for five months. "I won't take all the credit for yelling," he says, "after all, if you listened hard enough you could hear the rest of the school. Of course, the team was inspired by my gallant fight for them, and made point after point for me." Thank you.

Six weeks test are over, too. It seems as if the averages are a little lower this time. Of course we won't know the bad news until later.

The Spanish Club is planning a chips supper at Harvey's Cafe. It will be sometime this month. A few days ago the Spanish Club met at the local theatre to see a movie with a Spanish setting. It was very interesting the movie that is.

Speaking of Harvey's Cafe, that is where the Teen Canteen meets. Mr. Harvey Jones has been very kind considerate and generous by offering to let us use his basement for our meetings for the price of keeping it clean.

When the new tables arrive for the upstairs, the booths will be moved downstairs for us. The place will be decorated and will be about the nicest place Benton ever had for its youth to meet on week-day nights. Of course, new chaperones will have to be secured and we would like to have some volunteers to agree to stay with us at least

one night a week. Therefore if we get enough, no one will be overworked.

The Jaycee's have moved a piano down there and they gave us permission to use it. With all these improvements, the prices will go down. The new prices will be seventy five cents for six months, and a nickel to come each night. The members who joined at the first will have membership for a year instead of a half a year, for they paid twice as much to join in the beginning. We hope to have more members! Join as soon as possible. Won't you? There's fun for everyone.

Well, I guess that's about all for this week. I'll be back next week, (maybe) that is!

Essay On Smoking Written by Palma 6 Grade Student

How is a copy of an Essay written by Dwalin D. Green, a 6 grade student in the Palma School.

Essay is written on the subject of "Disadvantages of the Habit of Smoking."

The habit of smoking, which spread all over the world, first started by the Indians. Cigarettes are very harmful to the entire body. They affect the heart by making it beat faster. Therefore, they slowly pull down the heart. They affect the eyes, nose and brain to some extent and irritate the throat. Tobacco poison may cause color blindness.

The poison in nicotine also affects the adrenal glands causing the pulse to beat a little faster. It also causes the blood pressure to rise slightly. Anyone who smokes can not do as well in athletic games. They will tire easily and become short winded. Those irregularities of the heart may cause death before one is very old. These irregularities of the heart can be cured only by a physician. If it isn't too bad to be cured.

Too much smoking will harm the nerves and if one smokes too much, they can expect some trouble.

Since smoking will irritate the throat, people who usually cough a lot and seem to have more colds than those who do not smoke.

Chewing tobacco is harmful also, not only to the body but may spread germs by disposing of the saliva.

Another disadvantage of smoking is the danger of starting fires that sometimes cause great destruction. A lighted cigarette tossed aside might start a fire that would do a lot of damage to valuable property such as forests, grain fields, livestock, hotels and other buildings and take the life of many innocent people.

Tobacco may be very harmful when used in any form.

Tom Green, of Route 3, was in town Saturday.

Mrs. Lila Green, of Route 1, was a visitor here Saturday.

By TED KESTING

It is painful for a fisherman even to admit that he has been outwitted by some funny gamester. Yet on many occasions we have been unable to cope with bass, trout, bluegills and other fresh water battle. Always these defeats have been attributed to our failure in properly presenting an artificial lure or baited hook, never have we thought that the fish were just too smart for us.

Now, however, we may have to change this reasoning for a fellow in Illinois offers the suggestion that in certain instances the fish are older too smart for the fisherman to catch. This fellow also believes that certain species are smarter than others, and to prove his theories on the I. Q. of fish he and his assistant are conducting daily experiments.

Dr. George Bennet, veteran aquatic biologist with the Illinois Natural History Survey, long has preached that more lakes are overstocked with fish than understocked. This partially results, he thinks, from the fish reaching such a high mental status that they learn to tell the difference between natural food and an artificial lure or a hook with bait on it.

The job of conducting these tests has fallen to Arthur Witt Jr., Dr. Bennet's assistant, and daily he goes fishing in a fish bowl in the Survey's glass testing ground. The experiments follow this pattern:

First, Witt takes some unsuspecting fish and puts it in the bowl; then he tosses in a free worm for the finny guinea pig to nibble on and to work up a little appetite. Follow this Witt tosses in a hook baited with a worm and if the fish bites at it, he gets the shock of his life. Actually an electric current is venetated into the hook and this gives the fish a little shock. If the fish does not take another bite within 10 minutes and the electrified hook and worm, Witt figures the fish has learned his lesson well, tosses in a free worm for compensation, and then starts all over again with another "student."

If the experiments bear out Dr. Bennet's theories that certain species are smarter than others, the biologist has the rest all figured out too. And his

A Plan for the Future Or A Plan for the Present

THE BURLEY has a combination living-dining room which divides the service part of the house. This includes the sleeping room and attached garage. To increase wall space, there are two high double-hung windows on one wall of each bedroom. In addition to a standard window. Each of the rooms, also has twin wardrobes. The bedroom hall has a linen and a general storage closet.

The kitchen has corner windows which give a two-way view over the sink and L-shaped cabinets. There is a large general closet and a storage cabinet on the inside wall and space for a breakfast set under the wide window. The Burley's side vestibule serves as a buffer between the garage directly into the basement. A coat and house proper. It leads to closet in the front vestibule and garage complete the storage space on the first floor.

The exterior walls of The Burley are finished with siding or

shingles. The roof is covered with asphalt shingles.

by 26 feet. There is a full base. Overall dimensions are 44 feet most. Exclusive of the garage, the plan contains 982 square feet and 19,149 cubic feet.

Observations

Since quite a few of my two readers have inquired about my dentures, plates, false teeth, and wanted to know if I was still alive. Yes, barely have had the "fit" also and don't know which is the hardest on a constitution, teeth or influ—enza.

One difference is that one is infu and the other is at times. Once or twice I have thought the plates would outflow. But, begorra, I haven't have them whipped and I have conditionally accepted the things as part of my other mechanical devices that sometimes help make a fellow look like a human being.

By the time a fellow puts on a pair of beeper's specs, denture plates, hearing device, a wig, perhaps, and a pair of crutches, he is almost a walking mechanical person anyway. If only someone would invent something to do our thinking as our brain becomes dull as the years go by. Maybe someday somebody will invent a new brain cell that will work as good, if not better, than those we now have. Instead of going to mental institutions, step over a block or two and have a new set of thinkers moulded to fit the cranium.

Anyway, dentures, plates, or false teeth, never forget that first few hours of trial and tribulation. How can so small a thing feel so big for a few hours then melt down to where they begin to seem like they are a part of you—sort of human like. But, boy that first hour! I had to walk a few steps, burp, grab my jaws in order to keep those horse collar, from jumping out of my eyes as if I had lost my best friends (the old molars), but it wasn't many hours until the funeral was over and I began to bite at everything in site.

Will Ely can tell it better than I can. It seems someone gave him a piece of what he thought was a chocolate candy, but the inside was camel. He took a good hard plunge and what do you think—yep, he was stuck—upper and lower together, and with no room left for prying with his finger. A case knife would have come in better, but there was no case knife or screw driver handy what did he do? What do you think and what do you guess I did about the pork chop that had more and bigger pulling power?

Didn't know they had so much turtle in them—get hold and refuse to open up. What kind of predicament is a fellow in at a banquet where they serve thick steak or pork chops? What is courteous to do when a friend offers you gum drops or camel candy? Is it illegal to kill him? A book of etiquette for plates. Perhaps later I shall try to write users, or a book on what not to bite for folks who have lost their chompers. And, in addition, thick a pork chop should be cut, and make it against the law for one person to give, sell, or force upon a plate user such as pork things as gum drops, camel, and other things that cause false teeth users to have lock jaw.

Before writing such a book I want your advice, reaction and opinions, because I am still an amateur—but learning fast.

God's Signature

Lesson for March 12, 1938

IN A STRANGE city you may find a sign that is identified. Some suspicious clerk wants to know if your signature is genuine. It is a fair challenge for so many have been in circulation. Jesus himself had to furnish identification. No less a person than John the Baptist had grown uneasy. After you the One we are looking for," he said. Foreman quired, "For what?"

We look for him also. Jesus answered to John was not to discuss the theology of the incarnation, or anything of that sort. He just went about his usual day's work.

In the course of that day he carried a good many sick people, and preached to some very poor people. He said, "go back and tell John what you have seen and heard." What those men saw that day was what Jesus at another time called the "finger of God." The genuine divine signature.

Jesus wasn't too poor, as let us even; he wrote in action, and his acts were the handwriting of God. It is important to see where Jesus understood that writing. It is in the words and deeds that we are all made plain. But Jesus did not care to let us see that he was.

What he asked John to notice was simply this: the blind see, the lame walk, the lepers are cured, the deaf hear, the dead are raised, and the poor have good news.

The signature of God, in short, is not sheer power. It is using what power one has to help people in trouble. That was the sort of person Jesus was.

Not by Bread Alone. "BREAD EXPRESSION," "bread people," nowadays suggests people who haven't enough to eat or wear. Jesus helped such people, but he saw well that the man's needs go beyond well-cared-for bodies. There was the poor man from the grave yard, for example—he was happy enough. He didn't want clothes, and he was strong enough to steal all the food he could get. All he wanted in fact, was to be let alone. But Jesus knew that what he needed above all was a new mind, a mind no longer run over and trampled by a regiment of devils.

When Jesus got through with him he was clothed, but that was not the last part of it. He was in his right mind. So God's signature is not only written in a sound body, it is in the sound mind. Again, at Jericho when Jesus invited himself to dinner with that pious scribe, Zacchaeus, Jesus did not go just for the meal. He went because he knew that Zacchaeus needed some thing.

We do know that after Jesus, Zacchaeus was a changed man. He was going to give back every dishonest penny, with interest, and since he could not locate every one he had cheated, he was going to give away half of his holdings for the benefit of the poor.

What Jericho needed was a new administration, an honest one; they needed a new sign, and Jesus was going to give it to them. But that of all Zacchaeus had needed a new heart—and Jesus gave him that. Again it was the genuine signature of God.

We live in a world around us is a troubled one. Some men, seeing it, infer there is no God. Others conclude that if there is one, he must be bad or weak. The truth is that the signature of God is not to be found in the evil and the confusion of the world. It is to be seen where over freedom is standing against slavery, wherever truth is pushing back ignorance, where diseased hearts are being healed, where sanity replaces madness.

More people would believe in God if they could see more of the handwriting of God. Do you want to help?

We cannot always do things as simply as Jesus did. Curing the diseased is not for us a simple matter of saying, Be well. A Christian woman, distressed by what she had learned of the plight of the inmates in her backward state, was asking the head of the state hospital (himself a church officer), "What can we Christians do?" "Get behind the legislature," he said.

Look at the Label

A lot of persons who like to read that they think are busy about a couple of terms that mean less than a whole lot to a whole lot of people. I refer to the terms "liberal" and "reactionary." May I cut in my two cents worth in hope that you may know these modern labels better.

What I mean is this: armchair commentators and amateur spell-binders throw these terms at you without any apology. But you can see for it or against it by the way their lips are curled and their eyes are turned. But that's not enough. We must know what the label mean. A man can't think straight unless he can know his mind as he goes through it.

The Best Test. Jesus said of false teachers: "By their fruits ye shall know them." That is still the best way to size up a man and his mind. It is even possible to put that test to labels. That way a man cannot call himself one thing and be another.

The word "liberalism" comes from the same best word that gave us the term "liberty." The accusers of the label, therefore, are of the best blood. The term has the finest possible background, for it implies all sorts of freedoms and puts strong stress upon human rights. It claims to be in line with the doctrine of the Bible, as their doctrine is found waving the banner for the very worst enemies of all liberty!

State Supreme. We Americans declare that we hold sacred the right to life, liberty, and the pursuit of happiness. We have said that man is to be as free as possible, while also being responsible. The nation's founding fathers clearly wanted that government must be set up to serve man, and not man to serve the government.

But here and now we have the sorry mess of the liberals today wanting to change all this. They propose to improve the government by planning us into either a fascist or a communist or a fascist country in which all signs of human freedom must certainly vanish. These planners and planners would have the society government or state to be supreme in all things. Even God they would replace by their brain.

A New Accident. What need would we then have to guarantee personal rights and freedoms, if the state is to assume all the responsibility for everybody? No need, at all, if the state is supreme. These liberals it is now applying the label best to their workers, care nothing for the Constitution. They are all totalitarian at heart. Their aim is political power to suppress the personal liberty that belongs to the individual. Here we have the strange spectacle of dangerous "liberals."

What else is the expectation, when those who love to call themselves liberals denounce as "reactionary" anybody who distrusts the pulpit state and would halt the trend to totalitarianism? A "reactionary," strictly speaking, is one who objects to progress and desires to turn back the clock. We must conclude then, that the real reactionaries of today are those liberals who would reduce us to the slavery of the state. They would make the coming century a new Dark Age.
