THE DEATH BATTLE. FRIGHTFUL LARGE.

New York, July 7th. — There is a great deal of excitement here over the extension of the battle of Gettysburg. The city has been thrown wide open, and it is reported that the battle is raging fiercely around the city. The hospitals are filled with soldiers and the strain of continued fighting is great.

The battle has been going on for several hours, and it is said that the Yankees have suffered great losses.

From windows, where they were looking out, citizens can see the smoke and fire of the battle. The streets are filled with anxious people, and the city is in a state of great excitement.

The sulfuric acid which had been exhauster and exhaled from the plant in a normal condition, has been captured by the air blast in the form of a fine mist. The acid mist is carried away by the blast and is thus prevented from reaching the plant's atmosphere. The same mist which was captured by the blast will carry the acid mist to the point of origin, where it will cool and settle, thus preventing it from reaching the atmosphere.
