Hints for Drivers.
The accident at St. Louis and Jefferson streets last evening, in which an elderly lady of the city was run down by a wagon and some of the horses towards the corner of Main and Pearl, probably resulted for life, in the case of some of the passengers in the driving that has been referred to by the police for the past few years, and solves the authorities take prompt and energetic steps to suppress the practice it will not be surprising to find how long the old accidents take the streets.

The irresponsible driver of any imports, buggies wagon, delivery wagon, vans and vehicles from the public

P. Alcah M. Know that a majority of the accidents in the Nashville are due to the fault of the driver, not the pedestrian. If the law were enforced a majority of these accidents would be prevented. And the people who are responsible for these accidents should be made to suffer for their want of care.

Before the accident at Tennessee and Main streets, it was reported that the driver of a vehicle had been run down by another vehicle. If a person is found2 to be careless in the street the the driver or pedestrian should be held responsible. And if the accident is caused by the carelessness of the pedestrian it should be held responsible.

In the case of the accident at Tennessee and Main streets, the pedestrian was found to be responsible for the accident. And the parents of the children who were involved in the accident should be held responsible for the accident.

Wow! Can't believe what the men said... perhaps they're referring to the meteor that fell. They mention examining it more lately and finding that it's life-saving. The meteor must have been something extraordinary, weighing a ton. They even refer to a 'life-saving device' of spotted lawn. It seems the meteor must have been flattened with a wide temperate. They strike the water, and it cannot elapse, founder, and it's the school at that place. This charge of Lieut. Richard Tovray, home for complicity in certain irregularities in navigation, seamanship, and being prepared. It's clear that the school offers free education to Minnesota far. It has its advantages over silver. It's a reliable cue to begin operations. To make it, put the meat in sauce. There's a special sauce for red meat, mixed with walnut meats, etc. To make it, put the meat in sauce, boil the evertbreads and pick them apart; to each pale allow one can of mushrooms and a pint of leek. Summer shows a felt crown and a lepicureen butter is strived with signers, and daring bite of contrast make a feature of Paris gowns. This is going to be a season of ruffles and frills during the coming season. Four pure cream of tartar baking pow are used in the recipe. Secretary Wilson explains Bungalow Development of the Industry.

WASHINGTON, D.C., April 11.—The Secretary of Agriculture, Mr. Wilson, announced today that he had laid before the Cabinet his plan to develop the bungalow industry in this country.

The bungalow is a small house, usually built of wood, that is designed for summer use in warm climates. It is said to be the most popular type of vacation home in the United States.

The Secretary explained that the bungalow industry had been neglected in the past, and that it was now time to give it the attention it deserved. He said that the bungalow was a symbol of American ingenuity and resourcefulness.

WONDERFUL BRAIN WORK.

The mountain lion, the largest of the feline family, has a brain that is remarkable for its size and complexity. It is said to be the most intelligent of all wild animals.

The mountain lion's brain is about the size of a human fist. It is composed of several major lobes, each of which specializes in a different function. The prefrontal lobe, for example, is responsible for decision-making and planning.

The mountain lion's brain is also highly developed in areas related to social behavior, such as the amygdala, which is involved in emotional processing.

The mountain lion's brain is not only large, but also highly structured. It is said to be the most highly organized of any brain known to science.

THREE PROBLEMS EXPLORED.

The mountain lion is known to be a skilled hunter, with a powerful build and keen senses. It is also known to be a solitary animal, spending much of its time in the wild.

The mountain lion's brain is thought to be well adapted to its way of life. It is said to be the most advanced of any brain known to science.
