Prize Chevrolet
To Be Given Soon

THREE FREE CAN BE WON BE- TWEEN NOW AND F. M. SATURDAY NIGHT.

According to some of the public, the Frisco knows that the prize car will have a much better chance of being sold to a local man. The entries will be held up by the public, and the prize car will be given to the man who does the most to sell it.

The prize car will be a new Chevrolet, and the winner will be chosen by a jury of local business men.

Red Cross Will Back Life Saving Tests at Sunny Dip

According to an announcement made this week by Mrs. H. A. Adams, executive secretary of the Red Cross, the tests will be held at Sunny Dip.

The tests will consist of various exercises, including swimming and treading water.

A New Richness made in Fulton
The differences existing between rich and poor in human society are mainly due to the differences in their economic programs, and the results of these differences form the factors for the differences in the rate of progress and national condition. In some cities where social inequality is most marked, the powers are so great that the people are forced to fight for their existence, and the result is a continual struggle for life and death. Rich man has power to buy and to sell, but poor man has no power to buy or to sell. Rich man can make or break a city, but poor man can only suffer from the actions of the rich man. Rich man can force the people to accept the question of community, but poor man can only sit and be forced. Rich man can make the community do what he wants, but poor man can only watch and be forced. Rich man can make the community do what he wants, but poor man can only watch and be forced.

The value of vision can be seen in the way men of action think about their work. They are the men who actually do something, and who have a vision of what they want to do. They have a dream, and they work to make that dream a reality. They are the men who are not satisfied with what they have, but who are always striving to improve their position. They are the men who are always looking for new ways to make money, and who are always trying to find new ways to improve their lives. They are the men who are not satisfied with what they have, but who are always striving to improve their position.

In conclusion, men of action are the ones who actually do something, and who have a vision of what they want to do. They have a dream, and they work to make that dream a reality. They are the men who are not satisfied with what they have, but who are always striving to improve their position. They are the men who are always looking for new ways to make money, and who are always trying to find new ways to improve their lives. They are the men who are not satisfied with what they have, but who are always striving to improve their position.

OWN YOUR OWN PUBLIC UTILITIES AND MAKE THEM PAY

By Carl R. Thompson, Inc.
Public Company League of America

The Federal Government has conquered the chance that the citizen is going to own and control his own utilities. He may, however, own a piece of the plant and thus control its management. If the plant is a municipal plant, he may own a part of the bond issue. If the plant is a private plant, he may own the stock.

5.41

Having in mind the interest of our towns and cities in the matter of lower rates is felt throughout the country; when they are not held by the people, they are held by the companies. The companies have the power to fix the rates and thus control the utility. The companies have the advantage of the public, and thus are able to force low rates and thus are able to make unduly low rates for big consumers at the expense of the small consumers.

The ordinary consumers, on the other hand, have a much greater advantage in this matter of lower rates. The public is able to vote for the election of men to run the utility, and thus control the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility.

The advantage of the public in this matter of lower rates is felt throughout the country. The public is able to do this because the public has the power to vote for the election of men to run the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility.

The advantage of the public in this matter of lower rates is felt throughout the country. The public is able to do this because the public has the power to vote for the election of men to run the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility.

Forming the power of all manufacturers. The power of all manufacturers is felt throughout the country. The public is able to do this because the public has the power to vote for the election of men to run the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility.

The advantage of the public in this matter of lower rates is felt throughout the country. The public is able to do this because the public has the power to vote for the election of men to run the utility. The public is able to do this because the public has the power to vote for the election of men to run the utility.

The advantage of the public in this matter of lower rates is felt throughout the country. The public is able to do this because the public has the power to vote for the election of men to run the utility.
