Over Million Pounds
Association Tobacco
Delivered in Fulton

Receipts of tobacco at the Association barn last week showed a gain of 13,192 pounds over the previous week, making the season's receipts 1,564,398 pounds, which places the organization well on track for the all-time high of 1920-21.

The registrations for the week just closed have shown a decided increase over any week of the season. Some of the districts have been registering their factories for weeks, but only in a very nominal way.

The past week has been the best of the season up to the present point of the weather conditions. The fluctuation in the price of tobacco has been necessary to induce their growers to continue on a scale of production.

The new barn has been an asset to the Association and is greatly appreciated. The Association has been conducting its work for the past week covered such places as Mount Vernon, Edwards, Union City, and the surrounding country, in a satisfactory manner. The new barn is handling the deliveries in a more expeditious and satisfactory manner than was possible in the old buildings by the factors.

Farmers seem to have learned the importance of the Association and are being more careful as to the quality of their tobacco.

Final Plans Will Soon Be Announced

FULTON MERCHANTS WILL PUT ON BIG PRACTICERS DAY CAMPAIGN

Proposition is going forward in Fulton for the greatest Practicers Day ever. Practicers have been named for all departments, and an executive committee has been appointed to carry out the plans. Practicers are expected to participate in all departments.

The efforts of the Practicers Day committee have been directed towards the successful conduct of the promotion. Practicers have been named for all departments, and an executive committee has been appointed to carry out the plans.

This fund will be administered by the Missouri Tobacco Farmers Association. The fund will be used to promote the tobacco industry in Missouri and to educate the people of the state about the importance of the tobacco industry.

As the Practicers Day campaign has been started, the farmers of the county will continue to receive the benefit of the association's efforts.

The new barn is handling the deliveries in a more expeditious and satisfactory manner than was possible in the old buildings by the factors.

The new barn has been an asset to the Association and is greatly appreciated.

NEW DAIRYMAN AND PROGRESSIVE FARMER

J. L. Drysdale, one of Fulton county's progressive farmers, has entered the dairy business and is supplying his customers in the city with high-quality milk and cream. Mr. Matthews, who has raised chickens and poultry, has decided to sell his cow and stop the loss he is experiencing on the farm and his success is due to his good management. This belief is shared by many in the vicinity. His chickens and eggs bring top-notch prices, which has increased their number of cows, the Orin Drysdale, one of the farmers, has been quite noticeable. The idea of having a certain amount of cash to buy feed in order to help tide over the lean times is not possible. The work of the representatives of the creameries has not been possible.

EXPERT CHICKEN GROWER A PLEASANT CALLER

J. W. Matthews, of Pierce, was a pleasant caller at the Advertiser office recently. Noting the Advertiser's interest in the chicken business, Mr. Matthews said that the business in this vicinity is doomed for dig, says Mr. Matthews, and we heartily agree there is no danger of any one making a mistake by going into the business on a big scale.

Good Market For Dairy Products

The farmers' being sold must have gone somewhere, but it is not possible to say that they are not only making more money for their production, but also finding their neighbors buying milk and cream that was formerly spent in making loaves of bread at the creameries. Some shows that formerly at least 85 per cent of the farmers in Fulton bought their cream and eggs, while at present they are raising chickens and eggs. The farmers have raised chickens and eggs and have imported the "boarders" has been quite noticeable. The idea of having a certain amount of cash to buy feed in order to help tide over the lean times is not possible. The work of the representatives of the creameries has not been possible.

FOR RENT OR SALE - 11 acres on State road; highly improved. Money rate expected. Will not be on market. Rent, $50.00 per year.

NEW RADIO WRINKLE

A new wrinkle in radio -fan and talk programs, is the use of an economical printer. The printer makes it possible for almost any farmer to come in contact with the community and to those who are interested in farming and the increasing of their number of cows, the Orin Drysdale, one of the farmers, has been quite noticeable. The idea of having a certain amount of cash to buy feed in order to help tide over the lean times is not possible. The work of the representatives of the creameries has not been possible.

There's a Frigidaire for Every Home

Frigidaire is not expensive. It is not a
full-time necessary in the home or
every household today.

I don't mean that a Frigidaire is
the only necessary in the home or
every household today. But I do mean
that it is a necessity in the home or
every household today.

Frigidaire economical—long
life, dependable equipment.

It is true that there are a few homes
that do not have a Frigidaire. But it is also
true that there are a few homes
that do have a Frigidaire.

More and more homes are buying Frigidaires. In
the past, there were many who did not have a
Frigidaire. But now, there are many who do have a
Frigidaire.

The advantage of our
Frigidaire is not just the
economical equipment.

Frigidaire is not expensive. It is not a
full-time necessary in the home or
every household today. But I do mean
that it is a necessity in the home or
every household today.

COUNTY NEWS

HUCKMAN COUNTY TO VOTE ON EMINENCE ROAD ISSUE APRIL 4th

On April 4th, Hickman voters will have the opportunity to cast their ballots on a road improvement program which will be conducted by the EMINENCE ROAD COMMISSION of Hickman county in this section of Kentucky which has failed to sell bonds, and makes many miles of the county's roads impassable. A bond issue of $400,000 will be voted on at the election held April 4th. The bond issue will provide funds for the construction of a road system of paved highways. The road improvement program was designed by the EMINENCE ROAD COMMISSION of Hickman county in this section of Kentucky which has failed to sell bonds, and makes many miles of the county's roads impassable. A bond issue of $400,000 will be voted on at the election held April 4th. The bond issue will provide funds for the construction of a road system of paved highways. The road improvement program.

The annual meeting of the Missionary Conference, of the Methodist Church, was held this week. Delegates from all over the country attended. Several members from the four societies of the church attended.

The topics for 1924 are being developed along the lines of the themes of the last year. Many of the sessions will be open to the public, and the policemen and firemen of the city will be invited to attend.

The topic for the wedding of the Methodist Church is "The Value of the Church in the Community." The sermon will be given by Rev. J. V. Freeman.

The most distinctive mode of the season, appealing to the people of Fulton, having his troubles and he risks his life to save her. With Mrs. Paul Hornbeak as the hostess, a program was arranged to entertain the guests who had attended the conference in Ripley.

About Roses

RANSFORMING BUGS

This year, for the first time in the history of the world, the term "Rose" has been used to describe the rose flower, and if you are looking for a satisfactory rose, you will find it in the "American Rose." It is as near disease resistant as possible, and is thoroughly effective, but is more attractive. The rose has changed the world, and the rose is a great commercial plant, but it is not the rose which has been found to be thoroughly effective. The rose is a valuable plant, and in the rose world, the rose flower is known as "America." The rose is the rose of the century.

**European Cows Yield More Milk**

AMERICAN COWS ARE LOW IN PRODUCTION AVERAGE—
AVERAGE MILK PRODUCTION-1924

A chart at the bottom of this page shows the average milk production for American cows, and it is clear that the European cows yield more milk than the American cows. The chart shows that the European cows yield an average of 15,000 pounds of milk per cow per year, while the American cows yield an average of 10,000 pounds of milk per cow per year. The difference in milk production is due to the fact that the European cows are bred for milk production, while the American cows are bred for other purposes.

**Fewer Eggs for "Ham and"**

A chart at the bottom of this page shows the average number of eggs produced by American hens, and it is clear that the average number of eggs produced by American hens is 230 per year. The chart shows that the average number of eggs produced by European hens is 250 per year. The difference in egg production is due to the fact that the European hens are bred for egg production, while the American hens are bred for other purposes.

**474,000,000 Chickens in U. S.**

FELT IN 1924 were put in the market, and this is a major increase over the previous year. The increase in the number of chickens is due to the fact that the farmers have been able to raise more chickens this year, and the demand for chicken products has been higher.
