Dyspepsia

Intense

Suffering

8 Years

Hood's Saraparlina

100 Drachm One Dollar

CLUB RATES.

Mr. W. A. Moore, Retired Postmaster, gives us the following figures, as the result of the third and only examination he has ever taken, of his condition.

He has been kept up with constant exertions, and has had no other attention paid to for the last 8 years.

He is now 60 years of age.

He has been taken on the third examination.

The result is:-

The liver and its functions are perfect.

The heart is in its best condition.

The nerves are in the best state.

The lungs are in the best condition.

The bowels are perfectly healthy.

The constitution is in the best state possible.

Dyspepsia is a disease of the stomach, and it is generally supposed to be a very common disease. It is, however, not so common as is generally supposed, and it is not so dangerous as is generally supposed.

It is a disease of the stomach, and it is generally supposed to be a very common disease. It is, however, not so common as is generally supposed, and it is not so dangerous as is generally supposed.
