Do You Ever Need a New HARRICK Refrigerator?

There are two reasons for this double economy. The first is the HARRICK design, which insures a constant, self-perpetuating circulation of cold dry air through the interior of the refrigerator. The second reason is the construction of the HARRICK. From the kiln dried solid oak used for the cabinet, the HARRICK helps to keep cold in and warm air out, and strengthens its resistance to the symptoms of rapid wear and tear.

Your old ice box will be taken as part payment on a New HARRICK.
