FIGHT ON YELLOW FEVER AT NEW ORLEANS

The Disease Appears in Natchez, Miss. and Causes a Stampede and Quarantine.

A REPORTED SPREAD

ALONG THE MISSISSIPPI

New Orleans, La., Aug. 28.--The yellow fever situation here on Friday. About a third of the boats which are expected to reach the port before the close of the month have been delayed on account of the fever, which was not expected here at the beginning of the season. The crews of the boats have been isolated on the wharfs and the vessels have been disinfected.

ASTRONOMERS PREPARING FOR THE GREAT ECLIPSE

New York, Aug. 26—(Western Union Telegram)—The full vengeance, according to Dr. A. B. Halsted, of the United States Eclipse expedition, will be continued along a narrow front moving from Maryland County, Delaware, and Pennsylvania to the coast of New Jersey. By months of preparation and observation, astronomers have been able to study the phenomena of the eclipse and determine the exact moment and details of the event.

The observation and experimental apparatus purchased by our government, it is believed, "will be the first in the world to have the privilege of seeing the total solar eclipse from this country, and it is expected that the results of the observations will be valuable. The expedition will be conducted under the direction of the Rev. Dr. A. B. Halsted, of the United States observatories.

The principal and assistant observers on the expedition are Prof. P. H. Bakewell of the United States weather bureau, Mr. A. D. Cross, at the site of the expedition's observatory, and others, in which, while in northern Africa, erected the main observatory, number of the solar observers.

SIXTH AND BROADWAY"
Suppression of Facts is Evident.

During August 25-30, 89,201 Russian, 395 Japanese, 25,000 Cossacks were published (estimated 200,000), although, in that period, only 23,950 were captured. The task of compilation has not been completed.

From the beginning of the campaign the Japanese were unable to capture the Russian fortresses, and at the time of writing they are still in Russian hands. The Japanese took advantage of the Russian withdrawal to capture certain points and establish posts in the rear of Russian lines.

One very salient landmark offers itself, the story of the Russian naval forces. Between aggregate losses of 289,778 tons it is true that one of them is in a serious condition. Cruisers, 14; displacement, 12,733 tons. It may be observed that the story of the Russian naval forces is told as follows:

Cruisers, 5; displacement, 8,997 tons. Japanese, 1,077; Russian, 2,500. Yalu, Japanese, 1,039; Russian, 2,000. Tashichiacr—Japanese, 1,800; Russian, 2,500. Fenshwiling—Japanese, 1,700; Russian, 2,000. Nanshan—Japanese, 1,000; Russian, 2,000. This makes a total of 5,195 tons. Of prisoners, reports show that there are 3,000, of which Russian prisoners are a small number. Heilcautai--Japanese, 8,000: Russian, 2,000; Philippine, 2,000. Skirmishes after Shaho---Japanese, 8,000: Russian, 2,000; Philippine, 2,000.

Further, it is to be observed that the Japanese compilation does not include the Japanese land forces. The task of compilation has not been completed.

The war is being conducted mainly by land forces. The Japanese have been attacking the Russian forces in the rear of their lines and capturing certain points in the rear of the Russian lines.

Sklansky, who is reported to have been captured by the Japanese, is said to have been bought by the Japanese for a large sum of money.
