L. A. Downs says:

The American Optical Co. in N.Y. has on the market a new type of

transporting frame which has revolutionized optical work. It is

far safer and more accurate than any other instrument ever

made. The new frame is built on the same principle of

a camera, the prints being made on the screen.

For persons of all ages, eye strain is a thing of the past.

For those who wear glasses,

opticians, eyeglass makers, need no concern for your eyes.

The American Optical Co. has made it possible for

opticians to do their work with safety.
