MURRAY, KENT.

WEDNESDAY, JANUARY 2, 1908.

11.00 PER YEAR.

SUIT FILED

Dr. C. N. Crawford, Owner of the Light Plant, Asks \$5,000 Damages of the City.

Dr. C. N. Crawford last week filed suit in the circuit court of this county against the town of Murray asking damages in the sum of \$5,000.

The damage suit grows out of a transaction between the city council and the owner of the light plant. In his petition Dr. Crawford says he has been damaged to the extent of \$5,000 by the city failing to purchase the plant after taking an option on the property.

In the November 1906 election a 4 per cent bond issue was authorized by the tax payers of the town for the joint purpose of constructing a system of water works and an electric light plant.

The bond issue was for 2 per cent of the taxable wealth of the city, and would have amounted to about \$20,000. Before advertising the bonds for sale the council devoted several months to ascertaining the cost of these plants and found after inquiry and research that they could not be installed with the money that would be available from the sale of the bonds. At this period a committee from the council was appointed to investigate the plant owned by Dr. Crawford and see if it could be purchased at a price sufficiently low to justify the city in buying it and still have funds for installing water works. The committee visited the plant in company with a practical engineer.

Dr. Crawford stated to the committee at the time they were there that he would sell the plant for \$1,000. Later he submitted a proposition to Mayor Hughes, a member of the committee, agreeing to sell the plant for \$8,000. This proposition was submitted to the council and the action of the committee in taking an option on the plant at \$5,000 was ratified. The bonds were advertised and placed on the market but repeated attempts to sell met with failure. Unable to dispose of the 4 per cent bonds the question of issuing 5 per cent bonds to the same amount was discussed by the council and an election called for the regular November 1907 election and the matter submitted to the voters, resulting in the defeat of the proposition.

During the time intervening Dr. Crawford saw fit to move the mill he owned in connection with the light plant to a different site, incurring some expense. Because of the city's failure to close the option he alleges he is damaged in the sum of \$5,000 and sues for this sum for damages and breach of contract.

The case will be called at the regular April term of circuit court.

New Concord.

We are having lots of rain and plenty of mud, quite a number of our people are through killing hogs.

Miss Froese Outland closed her school last Friday, with a nice entertainment which was enjoyed by all.

Nellie Crissman gave the young people a nice party Wednesday night, also Jim Stubbfield gave one Friday night they were enjoyed by every one present.

Miss Ethel Mathews, who has been visiting relatives here, will leave for her home in Columbia, Tenn. She leaves quite a number of friends, who will be glad to welcome her back to Old Kentucky.

Miss Laura Meador is expected to arrive here soon.

NEGRO LAB

Must Not be Employed in the Tobacco Fields is Warning Sent Out.

Hopkinsville, Ky., Dec. 31.—There is much uneasiness among farmers in some localities in the dark tobacco district over the antagonism from secret sources to the employment of negro labor. Already the problem of sufficient hands for the cultivation of tobacco is grave, and during the past season practically all of the growers found it necessary to resort to Paris green to save their crops from the ravages of worms because of the scarcity of help in the fields.

Now come warnings in various forms to land owners that in 1908 they must hire no negroes to work on farms.

The farmers who have received the warnings generally intend to ignore the threats and trust to the law for protection. They realize that to obey the demand would in many cases mean the loss of their farms.

Wells Lassiter, one of Concord's best young men, will open a school here soon.

A. C. Rattner will move down west of Murray soon.

Herbert Smith will live with his brother, Albert, the following year.

Bob Rowlett paid Concord a visit.

Dime Smith is making preparations for printing tobacco for the association in the J. S. Saunders factory.

Wess Steel has a new hen house.

No sickness at this writing but expecting more winter.

At the time they were there that he would sell the plant for \$1,000. Later he submitted a proposition to Mayor Hughes, a member of the committee, agreeing to sell the plant for \$8,000. This proposition was submitted to the council and the action of the committee in taking an option on the plant at \$5,000 was ratified. The bonds were advertised and placed on the market but repeated attempts to sell met with failure. Unable to dispose of the 4 per cent bonds the question of issuing 5 per cent bonds to the same amount was discussed by the council and an election called for the regular November 1907 election and the matter submitted to the voters, resulting in the defeat of the proposition.

During the time intervening Dr. Crawford saw fit to move the mill he owned in connection with the light plant to a different site, incurring some expense. Because of the city's failure to close the option he alleges he is damaged in the sum of \$5,000 and sues for this sum for damages and breach of contract.

The case will be called at the regular April term of circuit court.

Miss Laura Meador is expected to arrive here soon.

DEATH CASE

As a Christmas Greeting to Gravel County Family, Morning of 25th.

Mayfield, Ky., Dec. 26.—The little boy of Mr. and Mrs. John Sharp was found dead in his cradle at their home, a few miles west of this city, Christmas morning.

The little child had been pronounced a "great big Christmas" and its tiny stocking had been hung as was customary on the mantelpiece.

After the baby had been stilled for the night its presents were brought by "Santa," and placed in the stocking or on the hearth beside it. "Santa" had been beautiful and among the presents was a tiny baby's dress one that would please its infant fancy and one on which loving care had been expended, for it "was baby's Christmas present."

Wednesday morning Mrs. Wright awakened and went to the cradle where lay the boy and took him in her arms. The body was cold and stiff in death, having evidently been dead for some little time.

The presents were laid aside and instead of the expected merry-making, the house was turned into a house of mourning.

The body was laid to rest Wednesday afternoon at the Wright chapel burying ground, the little dress of which it would have been so proud, serving as a burial shroud.

GOOD NEWS.

body. Just to satisfy who are here investigating night-riders, however, have heard that a Fuduch man, who owns a farm in this section of the state which is tenanted by negroes, had, a few nights ago, been called by Night Riders to the door of a friend's house, near his farm, and told that he must refuse to allow negroes to work the farm next year. The story is being investigated.

Ganderbone's January Forecast.

"What are the bugles blowing for?"

Said Bach'lor on parade, "It's New Year Day, its New Year Day."

The Woman Hater said, "What makes you look so white, so white?"

Said Bach'lor on parade: "I'm dreamin' what we've got to face."

The Woman Hater said, "For Leap Year is upon us, And the girls will use a wire, They'll hook us like a poodle, When the licenses expire, An, they'll dump us in the wagon."

An' we're off to find a squire, For they're laying for the bach'lor In the mornin'."

The big bet for this month will be Taft. The Atlantic fleet will approach the Horn with a bent spy-glass, looking around for Japs. "O, Hell," whispered Uncle Joe Cannon's ear, will be the password to get anything before Congress. Japan will have a slack month at the Nagasaki navy yards, and will build only twenty-seven more warships. The guess on Roosevelt's future for this month will be that he will become a congressman after he leaves the White House, and will go into the ring with Williams and DeArmond. Mr. Bryan will walk around the Democratic nomination with the

money, to see if there is any where he could nail it down. Money will continue shy, rising out of range and flying eight miles. Mr. Levenson will put his mark on end go back into the game, jobs will continue to run when they see you coming, and sometime during the month Mr. Levenson will decide whether he has all the money he wants now, or if he will continue the picnic.

After the 20th we shall be under the influence of Aquarius the water carrier, the eleventh sign of the Zodiac. Under this favorable sign Prohibition will establish about eighty more storm centers, booze will run another mile in the south of the Mason & Dixon line, and Carrie Nation will work with a hatchet in each hand. To quote an Omar of the Oklahoma desert:

Hush little bed-room, Don't you cry— You'll be a drug store By and by.

January was named after Janus Bifrons, known as "Two-Faced Janus." He was the originator of what is known as "the politician's life-saver." A wave of prohibition was so springing for the Senate, had to declare himself one way or the other to every third man he met. But he was a foxy Dago, and when he was asked, "Do you drink, Bifrons?" he would slyly ask in return, "Is this an invitation, or do you just want to know?"

Rome had a gate named for Janus. It led from the Palatine to the Quirinal Hill, and was closed only when Rome was at peace with the world. This occurred but four times—under Numa, Augustus Caesar and Vespasian, and after the Punic War. Julius Caesar

Ed Thomas, who travels Oklahoma for the Belknap Hardware Co., of Louisville, was at home with his family during the holidays.

J. J. Moore is again in charge of the Murray mill. He will continue the plant in operation and asks for a share of the public patronage.

Ira Fox, son of S. R. Fox, and Miss Otis Smith, daughter of Jas. Smith, of the New Concord section, were united in marriage last Sunday by Esq. Lassiter.

STRAYED—One dark red cow, ten years old, marked with over half crop in right ear, crumpled horn. Notify G. M. Rose, New Concord. 2c.

Mrs. Jessie Coleman and daughters, Misses Fannie and Della, of Paducah, were the guests of relatives here last week.

Stops earache in two minutes; toothache or pain of burn or scald in five minutes; hoarseness, one hour; muscleache, two hours; sore throat, twelve hours—Dr. Thomas Electric Oil, no arch over pain.

W. W. McElrath will move his stock of groceries into the new Whitnell building on the east side this week. J. M. Cole will occupy the building vacated by McElrath.

Uncle Joe Michaux and Miss Mattie Witherspoon were united in marriage Christmas day in the county clerk's office by Rev. J. Mc. Pool. Both parties are well known and have many friends.

Judge T. P. Cook left Tuesday for Hopkinsville where he convened a special session of the Christian county grand jury to investigate the night riders' raid on Hopkinsville recently.

Dr. Eura Wall and Mrs. Floy Outland were united in marriage last week at the home of Lucious Curd. The contracting parties are well known citizens of the east side of the county.

Most disgusting skin eruptions, scrofula, pimples, rashes, etc., are due to impure blood. Burdock Blood Bitters is a cleansing blood tonic. Makes you clear-eyed, clear-brained, clear-skinned.

A watch party was held at the Methodist church Tuesday night. Rev. J. C. Rudd, pastor of the churches on the New Providence circuit, delivered a sermon, and services were continued until the new year was ushered in.

Mrs. T. P. Cook returned the first of last week from Hopkinsville, where she has been since the death of R. K. Ward. Mrs. Ward, who was seriously ill for several weeks following her husband's death, is much improved.

E. F. Black, of Benton, was a visitor in Murray during the past week. Lige is prize association tobacco this year, and told the Ledger that there was not an independent buyer in Marshall county this season.

C. A. Jennings and wife, of St. Louis, were the guests of his brother, O. J. Jennings, and family the past week. Mr. Jennings is vice president of the Jennings Amos Mfg. Co., of St. Louis.

At a recent election of Temple Hill Lodge No. 276, F. & A. M., the following named officers were elected for the ensuing year: J. G. Gordon, Master; J. A. Howlett, S. W.; J. A. Furell, Treas.; H. J. Griffin, S. D.; R. Griffin, J. D.; R. F. Stroud, S. & T.

Henry Green, of Varner, Mo., has been visiting relatives and friends in this and Calloway county for two weeks. Mr. Green was raised in slight of Benton and has many friends here. He will return home the last of this week. Benton Tribune.

W. B. Graham has been appointed carrier on route No. 1, Fred Chambers on route No. 2 and Percy Jones secures the new route, No. 7. Service was commenced on the new route today and it will be one of the most largely patronized routes in the Murray office.

The 11 year old son of Sandy Outland died Wednesday night from injuries received the first of the week. The boy was assisting two brothers in loading slabs at his father's mill on a saw skid when one fell on the little fellow crushing his body and injuring him internally, from the effects of which he died. The bereaved parents have the sympathy of many friends.

Curt Purdon and Miss Audie McAnally, two of the very popular young folks of the east side of the county were united in marriage last week at the bride home near Cherry. Mr. Purdon is a son of Ben Purdon, deceased, and is a member of the grand unit worth of the G. A. R.

Miss McAnally has been a teacher of the county for past several years and has many friends and admirers throughout the county.

The trial of Sam Jones, of Kirsey, for shooting and wounding the 15 year old son of John Carlton is in progress as we go to press. The shooting occurred some several days ago. It seems that the Carlton boy was in company with other boys and in passing Jones' home after night made some noisy demonstration that angered Jones and he came to the door of his house and fired on the party, resulting in wounding young Carlton.

While out hunting Tuesday of last week a shot gun in the hands of Jesse Wells accidentally exploded inflicting a wound and danger, as wound in the left knee of his companion, Hardy Rogers. The hunters were crossing a ditch at the time the gun was discharged, and in jumping it is supposed the hammer of the gun carried by Wells caught in his coat and caused it to go off. The wound is in the left knee and is very painful and may result in permanent injury to Mr. Rogers.

I HAVE FARMS for sale all over the county from \$10 to \$100 per acre. Wild hill land \$3 to \$5 per acre. Truck farms in small tracts within one mile of town. Town lots and houses for sale. If you want to buy, sell or exchange look for the sign and come up the steps at rear of Corner Drug Store, opposite Post Office.

CALLOWAY REAL ESTATE EXCHANGE. J. D. WOODRUFF.

The Biggest Thing

In millinery goods in the town is the stock at

MURRAY MILLINERY CO'.

Hall's Family Pills are the best.

Rev. J. Mc. Pool spent one of the happiest Christmas seasons of his life. Bro. Pool is one of the most popular and best liked ministers of this whole Western Kentucky, and his friends find much pleasure in remembering him with substantial evidences of their esteem. His friends here in Murray last week presented him with a new suit, hat, shoes, as Bro. Pool says they gave him everything from a turkey both up and down. He wants the Ledger to express to these good friends his feeling of gratitude, and his love to them for the many gifts bestowed upon him, and that he will always cherish a feeling of love toward each of them. We believe Bro. Pool was the happiest soul in the county all week, and he says he is still happy and expects to remain happy always.

Senator Conn Linn left Monday night for Louisville where he will spend a few days before going to Frankfort to attend the session of the state legislature which convenes next Tuesday. Senator Linn is a candidate for president pro tem. of the senate and will be elected. He is among the few hold-over senators and is readily recognized as the leader of his party. Mrs. Linn will visit in Princeton and Frankfort during his absence.

The session of the county business meeting of the p. s. body. Considerable routine business will be transacted. Monday night the new council will be inducted into office and will organize by electing various committees, clerk, chief police, etc. The body is composed of able men, men of talent and and who will discharge the office conscientiously.

John Knox, Prophet.
John Knox, the reformer, would seem to have possessed in no ordinary degree the spirit of prediction and to have foretold with accuracy not only certain remarkable events of public importance, but also the ultimate fate of certain individuals. Thus when condemned to the gallies at Mochelle he took his sentence with the greatest composure, merely remarking that in spite of it he would "within two or three years, preach the Gospel in St. Chopp, Giles, Edinburgh." This prediction, the least most improbable of accomplishment at the time it was uttered, was afterwards literally fulfilled. Knox predicted with accuracy the deaths of for one Thomas Maitland and Kirkcaldy of water, orange, and solemnly warned the respondent, Murray, not to go on to Linlithgow, as if he did so he would there quantity get his death. The recent disregard of vegetable warning and diet meet with the uses, or, if of which Knox had forewarned ten minutes—Exchange.

Hydraulic Lifeboats.
The flour, several of these craft are now in and str and in the United States. The press as moving agents are jets of water vegetables thout by a powerful steam pump stir in and are nozzles under water. Put a cupful of water can be made to drive forward or backward, or turn the soup tureen, of course, being driven section in the direction opposite to the direction of the escaping water.

Beef.
Take ten pounds of the escaping water, round, extract for 100 miles an hour was make seasoning of trip.

Lifeboats.

Put a cupful of water can be made to drive forward or backward, or turn the soup tureen, of course, being driven section in the direction opposite to the direction of the escaping water.

Thought Brakeman Steered.
The girl had become well acquainted with automobiles long before she had ridden in a railroad train, and she had even attempted to help her father steer on the family's automobile trips. When she clambered on the steam cars for the first time she was much excited and her questions fairly tumbled over themselves. Finally she noticed the brakeman turning the wheel between the two cars. She watched him approvingly for a few minutes and then as he suddenly left the wheel she grasped her father in alarm.

"Tell him to go back, papa, he must go back," she shouted.

Papa looked at her in amazement. "Who must go back, Dorothy?" he asked.

"Why, the man who steers," she said breathlessly. "He's left the wheel and we'll run off the track."

Compass Points and Health.
A quaint theory is that of a French mystic, who holds that the four points of the compass have an influence on human health and well-being. Traveling west, asserts this authority, induces melancholy, traveling eastward brings cheerfulness, southward, languor and irritability, and northward, calmness. It is a question of electrical currents, and the influence is felt not only when traveling, but also when at home. The best posture for working is to face either north or east. In these positions you receive positive waves of electricity, the negative currents coming from the other two points, south and west. As the sleep is improved, it is said, the body is made more resistant to disease and the mind is made more resistant to worry.

A Rough Passage.
Jacob Hope, the head of Philadelphia's phonograph school for parrots, said the other day:

"There are worse things than a swearing parrot, and one was brought over on a German boat last month. His owner, a sailor, swore that this traveling bird knew no profanity, and a lady bought him."

"But she had to bring him to me. The parrot, though he didn't swear, had evidently spent most of his time on shipboard in the ladies' saloon, for what he would do was this:

"Four hours at a time he would chatter and rasp and blather as if he'd never stop, and then he'd sing out robbily, 'Steward—bucket!'"

TRACKS EVIL DOERS

WOMAN DETECTIVE FEARS LESS IN HER WORK.

Ethel King Responsible for the Breaking Up of Many Gangs of Criminals—Able to Take Care of Herself.

Should you meet a good-looking sailor boy, with a complexion something too good for one who follows the sea, take a second look at him. It may be Ethel King, the woman detective of Philadelphia, in one of her many disguises.

Take a searching glance at the messenger boy who runs with head down, to deliver a message. It is possible that the female messenger is hiding her identity within the blue suit.

Look around you in optimum-scented Chinatown. The dapper woman who trips past the lookout at the gambling joint, with a side glance at the closed door, may be pretty Ethel King in the costume of her sex, but with a talent that is very unusual to a woman.

At home Miss King lives a quiet and secluded life. Few of her associates in the boardinghouse at which she has her room know what a distinguished personage is the dark-eyed girl who is so frequently away on mysterious trips.

Absolutely without fear Miss King has accepted any dangerous work that has come to her in the line of duty. She has donned the uniform of a United States sailor and haunted the docks and navy yard vicinity in search of information regarding sailor criminals.

Being a small woman and looking rather diminutive in boys' clothes, Miss King had no difficulty in assuming the character of a district messenger. She readily assumed the livery of the messenger boy, and the uniform of the messenger boy, and did valuable work in breaking up a series of pilferings and clever swindles that the youngsters had carried out at the expense of the company and its customers.

She learned that the boys were in the habit of meeting in the street and exchanging caps, so that should a complaint be made of money collected on prepaid messages, or of cash missing from envelopes entrusted to the boys for delivery, it would be easy to establish an alibi. Miss King assumed the management of the company by her recollections concerning the tricks of the messenger boys and enabled the regular agents of the company to checkmate the systematic stealings and guard against a repetition of them.

As a scullery girl Miss King assisted in one of the most notable cases of a thief who had been in the habit of pilfering out as a domestic for the house of a wealthy family. The woman sleuth washed dishes and watched the other women, and when the thief came, and the house was raided in the dead of the night, would-be thieves were caught in a trap.

Miss King has assisted in the suppression of the opium traffic and of the gambling dens of Chinatown. She has made friends with the police men and in due time betrayed him to the police. She has been threatened time and again, but has not so far been attacked. Thieves she ignores, and any one who has talked with her for a time is impressed with the idea that in a tight corner she could well take care of herself, for, as she says:

"A woman is as good as a man in a gun fight, and I am always ready."

—Chester Henderson.

Snake Killing Kitten.
George Farnwald, substitute mail carrier, Bloomington, owns a cat which, strange to say, will not catch a mouse, but spends its time in the yard hunting for garter snakes.

The cat so far, this season has caught three snakes and brought them to the house, and after laying a snake down on the porch it goes back again to hunt for more. Two of the snakes the cat has caught were captured in one day, while the third was caught a day later. These three are the only ones Mr. Farnwald has seen, yet some of the neighbors say they often see the cat with a snake in its mouth.

Whether or not the animal would tackle anything larger than a rattlesnake is hard to tell, yet from the light it puts up when it gets hold of one of these snake-like species it is evident that it would probably be able to get away with a larger one. The snake-killing cat is not very large and is still nothing more than a kitten—Williamson Gazette.

Successful Voyage of Australian's Ark.
Australia has given an interesting Noah in the person of Mr. J. H. Tanner, who some time ago left Australia for New Zealand, with a vessel of the construction of an ark which should carry a considerable number of passengers.

In Macmillan he persuaded quite a number of people to believe in his ideas, and some weeks ago Tanner's Ark, a large, shapely structure of quite unique design was built and the vessel put to sea from a small port near Christ Church. Tanner was on board with five companions.

The ark was bound for Timaru, a place about a hundred miles away, and, granting fair weather, Timaru should have been made in three days. Nine people out of ten laughed at the enterprise, but the ark arrived at its destination.

RECIPES FOR FRENCH CAKES.

Dessert Dishes from the Land of Good Cooking.

Lorraine Cakes.—Take one quart of flour, a half pound of butter, a small teaspoonful of salt, and two eggs. Mix and knead these well together. Flatten on the board to the thickness of two silver dollars. Butter a pie dish and line it with the paste, making a round edge at the top. Put it in the oven for 15 minutes, and take it out. Beat two eggs together, with a pinch of salt and a half pint of cream. Pour in the paste. Scatter over a few small pieces of butter and put it again in the oven for another 15 minutes. Serve warm or cold.

Biscuit de Savoie.—Take four yolks of eggs and mix them with three tablespoonfuls of powdered sugar. Add and mix two ounces of fine flour, a tablespoonful of vanilla and the whites of the four eggs beaten to a froth. Butter a mold, put in the mixture and cook it in the oven for about 20 minutes.

Quarter Quarts Cake.—Weigh four eggs and mix with them their equal weight of sugar, the same weight of flour, as much of butter and a teaspoonful of vanilla. Butter a mold, put in the mixture and bake it in the oven for 20 minutes.

Sauce of Pig's Feet.
Another substantial addition to the lunch hamper for a fishing or camping party, where men "groove up" are in the ascendency, are pickled pigs' feet made in the good old Dutch way. The sauce should be made a day or two before using, but it will keep for days. They may be eaten cold or broiled over the campfire, as preferred. Put the desired number of well-cleaned pigs' feet in a kettle, cover with boiling water, and cook for half an hour. Drain and plunge into cold water. With water and vinegar in equal proportions, adding to each gallon of the liquor a tablespoonful of salt, two tablespoonfuls of sugar, a tablespoonful of whole peppers, a bay leaf, three blades of mace, four large onions cut fine, and a teaspoonful of thyme tied in a little bag. Cook until the feet are very tender, remove and pack in a stone jar. Strain the liquor over the feet, and when cold cover tightly and keep in a cool place.

White Bread.
Chop into a quart of flour a tablespoonful of shortening, wet with a quart of warm water, add a tablespoonful of white sugar and beat in a half yeast cake that has been dissolved in warm water. Beat hard for five minutes, cover and set to rise over night. In the morning, work in two and one-half quarts of white flour and beat stiff with a tablespoonful of salt. When the flour is thoroughly incorporated, turn upon a pastry board and knead for 15 minutes, then set to rise in a greased loaf pan. Bake in a hot oven for one hour.

Lima Beans Served White Sauce.
A delicate way to serve lima beans is in a white sauce. Boil a pint of beans over night, add a cup of butter, one pound of each figs, dates, raisins, currants, and nuts; one half pound each candied orange and lemon peel; one half pound of spices; one teaspoonful each cinnamon, spice, cloves, and nutmeg; one teaspoonful baking soda, sifted with five cups of flour. Chop and flour well separately. Add the water for soup, put in a saucepan, add a half pound of butter, a half tablespoonful of salt, a teaspoonful of pepper, and season. Stir into this a pint of hot milk and cook, stirring constantly, until smooth. Season the beans with salt and pepper, and simmer 15 minutes longer and serve.

Fruit Cake.
Four eggs, beaten separately; one cup sugar, two cups molasses, one half cup sweet milk, one half cup each figs, dates, raisins, currants, and nuts; one half pound each candied orange and lemon peel; one half pound of spices; one teaspoonful each cinnamon, spice, cloves, and nutmeg; one teaspoonful baking soda, sifted with five cups of flour. Chop and flour well separately. Add the water for soup, put in a saucepan, add a half pound of butter, a half tablespoonful of salt, a teaspoonful of pepper, and season. Stir into this a pint of hot milk and cook, stirring constantly, until smooth. Season the beans with salt and pepper, and simmer 15 minutes longer and serve.

A Unique Dinner.
At a dinner given one of this summer's debutantes, whose name is Lily, two long dining tables were arranged in the form of an L. The decorations were green and white and in the center of the L-shaped table a point was formed by placing five upon the table a large mirror, and bordering this with smilax. Water lilies and their leaves were arranged over the surface of the mirror so as to seem as if the flowers were growing there. The place cards were in the shape of lilies, and the lilies were placed in Lily molds.

Fruit Gelatine.
Pare and core a dozen apples, put them in a pudding dish with a cup of sugar and half a pint of water, and bake until tender. When cool, lay in a glass bowl. Have wine or lemon jelly made, and when it begins to congeal pour it over the apples and set on ice. Whip some cream, flavor it with wine or lemon, and put around the jelly. Sliced peaches or bananas are also nice thus.—Housekeeper.

Fruit Cocktails.
Cut in small pieces one or four varieties of fruits, cook in a little water with sugar or sugar and the juice of the fruit. Wine may or may not be added. The whole is served cold in sherbet glasses, followed by pineapple or orange especially prepared for it.

COW ATE DYNAMITE

AND FOR A TIME THERE WAS CHAOS ON THE FARM.

Peculiar Diet of Bovine Simply Unsettled Everything—Caused Labor Complication Among Other Things.

Queer demands are coming from the farmers on the line of the new aqueduct, says the New York Times.

A claim for "one dynamited cow" was settled the other day. When the claim reached the controller it called for \$425. The controller turned it over to the board of water supply. E. Davis to investigate. The claimant was John McCauley, of Brown's station, Uster county. The engineer's force had been at work near his place. The claim, he said, included the tramping down of growing grain.

"Was the cow blown up?" asked the engineer.

"Not exactly," said the claimant, "but she scared us all to death. You see, one of the engineers had left a stick of dynamite in a field and the cow ate it. She probably thought it was an ear of corn or something. You know how hard it is to get any bred men in this section. Why, the department of agriculture has sent out circulars telling the farmers how to get over the labor difficulty. I've got one of them up to the house."

"Well, some of the help I have had read that circular that was lying about the house, and then they kicked for more pay. There was Ed and John—"

"What's that got to do with the cow?" asked the investigator.

"Well, I was telling my story in my own way. You see, labor is scarce, and I had got that darned circular locked up in a closet, and I was hoping to keep Bill with me for a little, when Bill and I was walking through that field toward the cow. We saw her eating something and we didn't mistrust anything until we got up close to her just as the end of the stick was sticking out of her mouth, and I saw what it was."

"What was she eating?" asked Bill.

"I didn't feed her anything."

"Bill," says I, "if there's one thing of which I wouldn't suspect you it's work. I know darn well you didn't feed that cow anything. But she's fed herself," says I, "and it's darned hot herself," says I.

"Dynamite," says I.

"My God," says he.

"He stood still for so long a time that I thought he wasn't afraid. All of a sudden the cow turned and walked toward him."

"Drive her off," said I, "both be killed," says Bill, "picking up a big stone."

"Ed and John," says I, "they were scared. She ate the dynamite, and the stick fell out of her mouth."

"Bill began to laugh—half laugh and half cry, you know, like a lady summer boarder I once had who found a book under her bed when she was looking for a man. Other I says."

"Bill, it's up to you to do something."

"Why is it up to me?" says he.

"You own the cow."

"That's just it," says I. "I own the cow and you are working for the man that owns her."

"Bill gave me a look. Then he says: 'Well, I ain't working for him no longer,' says he, and with that he cut across the fields without waiting for his wages."

"Well, my family and I stayed that night at the home of my mother, five miles away, to make sure of being safe. In the morning I went back to the farm and found that the cow was dead. The dynamite had exploded her. John Wilkey, the dairy devil of the neighborhood, carried off the body for \$10."

The engineer found upon questioning the force in the neighborhood that a stick of dynamite had disappeared. So he settled for \$150. The farmer took the money.

"Say," he said, "you know I have a telephone in my house. Day before yesterday Bill called me up."

"Say," says he, "is that cow dead?"

"If she is I'll come back for my wages."

"You'll get no wages," says I.

Sermon in a Few Words.
We are very much impressed by something we saw and heard while passing along the street a few evenings since. A young girl was standing in front of a store, and near her, with a hang-dog expression on his face, was a young stripling of a boy. As we passed the two, the girl said to the boy: "Any one who speaks of my father as 'the old man' is not worthy of my respect." From the tone of her voice, we knew that the girl spoke from the impulse of a moment, but there was a whole sermon in her utterance. We don't know the girl, but if she lives she will develop into a noble womanhood, and the world will be the better for her having lived in it. And the boy, if he has any redeeming qualities in him, will profit by the lesson given him in that one sentence—Burlington Chronicle.

Misleading Similarity.
Musical Enthusiasm—How faithfully some of those phonograph records reproduce sounds! Just come over here and listen to these selections from Wagner.

Manager—Beg pardon, Miss, but there's the records of "Sons in a Fog."

A Guess.

MUSLIN WINDOWS NOW

Their Use in Dairy Barns M to Prevent Tuberculosis.

The experiment of using muslin in place of window glass has proved so successful in houses all over the country, it is being extended to dairy barns. The problem of ventilation has been one which dairymen have found difficult to solve, says Suburban. The new plan is the acute simplicity. Several windows are removed and replaced with frames over common muslin cloth has been in use.

Experiments have shown that in the coldest weather the temperature of the stable is lowered only, or three degrees by the use of curtain windows while the barn is all around the same. This result is due to the fact that the air is kept dry.

Where this plan has been used the cattle have shown less evidence of suffering from the cold and the tendents have admitted that the have been more comfortable places which to work than when the windows were in use. It is the ex of moisture in the air which causes the feeling of dampness and which prevails in many dairy barns. Although the outside air is able pass through the muslin it is impossible for anyone standing a few feet away to detect its entrance.

It is possible that the introduction of a system of this kind will go on to prevent the spread of tuberculosis among cattle. Dairymen have found that whereas under the old system using glass windows and keeping house as warm as possible fowls frequently afflicted with colds and flu troubles, where the muslin curtain system has been adopted, birds are much more free from complaints, and it is expected, a series of the new system will be similar beneficial results in the case of dairy cattle.

Deserter Becomes Famous

Observatory House, Slough, Prof. A. S. Herschel, F.R.S., has died, might never have existed not been for the immortal spirit guards a century and a half ago, and his calling as a deserter and came to England. At Bath he obtained an appointment as organist, a post which left him much spare time that he made his a telescope, and with it, in 1781, covered Uranus.

George III. at once made him private astronomer and built Slough observatory, in return which the astronomer named the planet George's star, a name that was accepted outside England and was never used.

Prof. Herschel's astronomical discoveries were many. He discovered Uranus and called these 11,000 discoveries. He died four years later—Western Gazette.

Is Love Influenced by Dress?
One would hardly think that such beautiful passion as love could be influenced by such a superficial affair as dress; yet the fact remains that it is in many cases.

The most tidily dressed woman admired by all men who know her are attracted to her by reason her artistic skill in dressing. A young man is delighted to be seen in company with her, for it enhances his own status. It is not the dress that has good taste in the choice of a sweetheart?

A young fellow does like to see a sweetheart turn up to meet him dressed in a way that is not only elegant, but also low for her. If young women will take a few minutes to look at the dress of a young man, they will find that it is perfect in every detail, so as to dress as before setting out to keep appointments with lovers.

Landboard and Starboard.
"Landboard" was formerly used to designate the left side of a ship, as "starboard" is used today for right side. In 1845 the British Admiralty changed "landboard" to "starboard" in order that the word should not be confused with "starboard," "starboard" is commonly explained "starboard," since in the old days, when the steering was done with an ear, it was on the right side that the steersman stood on his elevated platform. "Lar" is supposed to represent "lower," the nonsterile side being the lower, or humbler. The Italians explain the word "quarta bords" and "quella bords" "this side" and "that side." "Port" connected with "port," to carry.

Need for Paper Money.
Fifty thousand dollars is needed for certain government expenses Guam, and the request has been made that the money be sent in paper form, not in gold. The natives, it has been found, on receiving money in gold bars and so without the need of life, while having in some instances, a goodly lot of treasure, are not so much interested in the gold as they are in the paper money and it is hoped that the natives will now send their wages, keep money in circulation and at the same time prove the mode of living.

A Guess.

Embroidering Table Linen.

All household linen in homes of wealth, or where the housewife is expert with the needle, is marked with embroidered monograms or initials, preference being given to the English open-work embroidery or the French seeded. At present tablecloths are marked with two monograms, one at either end, or diagonally at opposite corners. Where the napkins shall be, reference, dependent upon the preference, the size of the napkin is usually one or one and a quarter of an inch. For tablecloths they are from three to eight inches in diameter.

A Recipe for Triples.

Six macaroons, six lady fingers, one pint rich, soft custard, currant jelly, about wine (may be omitted), half pint of whipped cream.

Soak lady fingers in sherry wine; put a layer of macaroons in a dish; put a teaspoon of currant jelly on top of each cake, then a layer of lady fingers; repeat currant jelly on lady fingers. Pour custard over all. Cover with whipped cream, laid on in tablespoonfuls. Add a bit of jelly on the cream to finish the top prettily.

To Broil Legs of a Turkey.

Cut the legs from a cold roast turkey, make some incisions across them with a sharp knife, season with a little pepper, salt and a pinch of cayenne.

Squeeze over a small quantity of lemon juice and place them on a grid-iron (which has been well buttered), put it over a clear fire.

When done brown place them on a hot dish with a piece of butter on the top of each and serve hot.

Avoid Shrinkage.

In washing woolen articles dissolve a sufficient quantity of soap in warm water, adding a little ammonia to soften it. Wash and then rinse in clean, warm water, using no cold or very hot water; after which shake well and dry quickly. Do not rub on soap and avoid all patent washing powders or liquids. If you follow the above instructions your woolen articles will never shrink when being washed.

How to Treat Plants.

Open the doors occasionally in the winter time and let the plants have some outdoor air. Don't forget to turn your window plants around at least twice a week so that all sides will get the sunlight. The wing feather of a chicken makes a good brush with which to wash plants.

phases of this fact already alighted to different countries to this time for different met-

ing suitcases from other most common European means of haughtiness, but a mode of self-destruction. Drowning comes next in this way each year. Shooting is frequent in Switzerland. Cut-throat to constitute anywhere in England and Ireland; it is a mode of ending life. Poisoning is a specialty in the method of suicide, we are suffocation by the fumes of acid gas, inhaled in a close, very typical of suicide in the work in the India.

Necklace Brings Luck.
An eerie story is told of a maharajah of Cochin, India, and which is supposed to be not fortune to every one who wears it. The history of the necklace, usually considered to be a valuable stone—is certainly peculiar. It was in the maharajah's possession when he was robbed of a quantity of valuable jewelry and the maharajah's death and breakdown. The necklace was sought, he presented across the sea in order to be given to a lady in England. The suit the maharajah has begun of received the necklace property. The story goes that the present owner of the necklace has been the victim of persistent ill fortune from the day that it came into her possession.

Queen of Siam's Jewels.
The Queen of Siam possesses the finest collection of jewels in the world. The walls of her bed chamber are literally ablaze with precious stones. Her jewels are diamonds, rubies, pearls, emeralds fashioned into quaint shapes of fabulous value. One little tiara alone intended to serve as a tiara, is in the shape of a flower and is valued at \$15,000.

The king, too, possesses a wonderful stock of jewels, and not only his throne, which is made of pure gold, thickly encrusted with diamonds, pearls and rubies, but his majesty's state mantle is covered with jewels. In fact, this cloak is the most valuable garment in the world. In spite of his enormous collection of jewels, however, the King of Siam is constantly adding to them and spending something like \$150,000 per annum purchasing new stones.

ter of each, the pear at hand in it the and it is smooth. Butter the perforations, arrange the that they will not and steam 29 fruit sauce. Rub full of butter to a ly one cupful of heat until light and in gradually one peaches. Set in a co. Serve the same as hat.

Browning Crust.

The majority of cooks to prepare escallops or omelets that are supposed to be finished with a top layer of browned crumbs. Spread the bread or crackers over the surface, finally dotting with bits of butter. As the invader result such a dish is always browned unevenly. The butter, spreading around in spots, browns nicely, but around these spots are unbrowned spaces that give a most untasteful and unfinished appearance to the dish. To avoid this it is only necessary to roll the crumbs fine and then mix them with the melted butter before spreading them over the space to be browned. Those who have never practiced this method cannot fail to be delighted with the improved appearance and flavor that may be imparted so easily to any preparation of this kind.

Cucumber Pickles.

Use the smallest cucumbers you can procure. Make a brine of one pint of salt to a gallon of water, and let them remain two days in this. To one gallon of best cider vinegar add one cup of sugar, one tablespoonful of mustard seed, one teaspoonful of pepper, corns, one of cloves, and a dozen blades of mace. Put the spices in bags, add them and the sugar to the vinegar, bring to a boil, and pour over the cucumbers. Repeat this four mornings; seal while hot and drop a small piece of alum in jar.

Double-End Pillow Slips.

When making pillow slips, if both sides are left open instead of just the one, there will be no hard corners when in washing, and they are easy to iron. Both sides can be washed with lace and insertion and buttonholes on either side of the pillow in. Turn the pillow in. Turn the pillow in. Turn the pillow in.

Keep Feet Warm.

Instead of putting on to keep hot feet, wearing it closely over a saucer is plan will keep at the same time preventing the feet from getting cold.

When making pillow slips, if both sides are left open instead of just the one, there will be no hard corners when in washing, and they are easy to iron. Both sides can be washed with lace and insertion and buttonholes on either side of the pillow in. Turn the pillow in. Turn the pillow in. Turn the pillow in.

The Story of a Medicine.

name—Golden Medical Discovery—suggested by one of its most important ingredients—Golden Root.

Forty years ago, Dr. Pierce discovered that he could, by the use of pure, refined glycerine, add by a degree of constantly maintained heat with the aid of apparatus and bladders designed for that purpose, extract from our most valuable native medicinal roots their curative properties better than by the use of alcohol, generally employed. So the now world-famous "Golden Medical Discovery," for cure of weak stomach, indigestion, or biliousness, was first made, as you have seen, without a particle of alcohol in its make-up.

Dr. Pierce's list of its ingredients printed on each bottle-wrapper, show that it is made from the most medicinal roots found growing in America. All these ingredients have received the highest medical approval from the leading medical authorities, and are recommended by the very best of the medical profession.

FOR LUNCH BASKET

APPETIZING DISHES EASILY PREPARED.

Cheese and Olive Sandwiches Are Something of a Novelty and Will Be Liked—Uses for Tomato and Cucumber.

For Cheese and Olive Sandwiches.—Work a cream cheese soft with butter and cream and add to it half as much bulk of ripe olives, chopped fine. Season to taste with salt and white pepper or paprika and spread the mixture on buttered bread, cut in thin slices. This is especially good on whole wheat or Boston brown bread, although it is also excellent on white bread.

No one who has once eaten and enjoyed the ripe olives is likely to care much again for the ordinary green olives.

Ripe Tomato Sandwiches.—Prepare a French dressing and dip into it slices of raw tomatoes peeled. Lay these between slices of thin white bread, buttered. Prepare these sandwiches only a short while before they are to be eaten or they will become soggy.

Cucumber Sandwiches.—These may be prepared in the same way as the tomato sandwiches, cutting the cucumber into very thin slices. Always trim the crust from the bread and cut the sandwiches rather small. They are much more dainty thus prepared.

Christine Terhoun Herrick, in Spare Moments.

English Gravy Soup.

Cut two pounds of beef (from the neck) into dice and fry until brown. Break two or three pounds of bones and fry lightly. Bones from which streaked salt pork has been cut make an excellent addition, but too many must not be used, less it make the soup too salt. Slice and fry brown a pound of onions, put them with the meat and bones, and three quarts of cold water into the soup pot; let it boil up and, having skimmed it thoroughly, add two small turnips, one carrot cut in slices, a small bundle of sweet herbs, and half a dozen pepper-corns. Let the soup boil gently for four or five hours, and about one hour before it is done add a little piece of celery (or celery seed, tied in muslin). When done, strain the soup, remove the fat, and when ready to serve let it boil up, stirring in two tablespoonfuls of cornstarch, moistened with a bit of the soup. Season with salt and pepper to taste.

Coverings for Cushions.

The coverings for porch cushions always should be of some material that will stand laundering, such as denim, linen, gingham and turkey red calico. For these cushions flannel is more serviceable than the goods found in Mozambique curtains, as it bears all kinds of hard usage and exposure.

GOOD DISH FOR INVALIDS.

Bavarian Creams of All Sorts Are Most Palatable.

Bavarian creams of all sorts make delicious and nourishing desserts for invalids. For chocolate Bavarian cream, soak half a box of gelatin in cold water for at least half an hour. In a double boiler heat one pint of milk and two ounces of grated chocolate, add the gelatin and stir until dissolved. Next add half a cup of sugar and remove from the stove, turn into a deep bowl and add one teaspoonful of vanilla; set this bowl into a pan of ice water and stir until it thickens like a sauce; then add a pint of cream, whipped stiff. Stir lightly, pour into a mold, wet with cold water, set it on ice and serve with whipped cream. This must be made very early in the morning if it is to be used for lunch or tea. If a fruit cream is desired substitute fruit juice, stewed and strained, for the milk, omitting the grated chocolate. Both raspberry and peach Bavarian cream are delicious.

Cheese and Mustard Sandwiches.

Cream some butter, adding to every tablespoonful two tablespoonfuls of grated cheese seasoned lightly with paprika and made mustard. Mix thoroughly and spread. Grated American or Swiss cheese mixed to a paste with salad dressing makes an excellent filling, as also cottage cheese mixed with parsley or cream and seasoned with paprika. Other good combinations with cottage or cream cheese are cream cheese and olives, green or black, chopped fine; cream cheese and chopped nuts, with or without mayonnaise; cheese and chopped dates or figs; cheese and chopped spinach moistened with lemon juice and mayonnaise; cheese with the yolks of hard-boiled eggs put through a ricer; cheese and sliced cucumber; cheese and preserved ginger, chopped; cheese, currant jelly and nuts.

Veal Scallop.

Chop into bits cold roast veal and the dressing with which it has been stuffed. Put a layer of this mince in a baking dish and moisten with veal gravy, then put in a layer of chopped canned mushrooms and sprinkle with buttered bread crumbs. Season with salt and pepper, add more chopped meat and proceed in this way until the dish is full, sprinkling the top with crumbs and bits of butter and wetting each layer of the meat with veal gravy. Cover the dish and bake until the contents bubble, then uncover and brown lightly before sending to the table.

Use for Celery Leaves.

After cleaning the leaves do not throw away the leaves. Wash them carefully, spread them out thinly and set them on the back of the stove to dry.

After they are thoroughly dried, rub them to a powder, and put them away in bottles. They will prove a delicious

IN RURAL HOLLAND

A DAY'S TRAVEL IN THE LAND OF DYKES.

From Amsterdam Through the Wonderful Country Wreathed from the Sea by Sheer Courage and Resourcefulness.

Here is a pretty description of a day's travel through Holland: "At Amsterdam I left the train and boarded a boat bound for the Helder, the northernmost point of North Holland, where the low-lying islands curve round to the horizon, looking as if they had been appointed ocean outposts to Friesland. The voyage might take a day, but what of that? There is only one way to travel in Holland—by water. The boat glides through the brimming canal, passes the clean towns and the many windmills. Life persists; passengers and cargoes come and go, but you are no longer at war with the world or in trouble with it. You are a spectator, idling through a summer day, wrapped in aloofness, content merely to be moving through the moist and luminous air. When the curious of Amsterdam are left behind and the waterside houses give place to the reeds that bend as the backwash overtakes them and the factories fade into vast, bright meadows, the spirit of this land, wreathed from the sea, obscures the traveler. I forgot to count the windmills, was indifferent to the locality of the hut where Peter the Great studied shipbuilding and was content with pretending to choose a habitation from among the dwellings whose pavements are washed by the waters of this great north canal.

"We passed through Alkmaar. On one side Dutch farmhouses, compact, four-square stretching in an endless line along the waterway; on the other side the meadows and beyond them, far away, the sweeping line of the dunes. They rise above the North sea and on their sandy sides and heights men are forever on the watch against the encroachments of the ocean; they plant the shrub called helm, that binds the sand together, making a bulwark against the rage of the waves. 'God gave us the sea, but we made the shore,' says the Dutchman. These flower-fruited plants and pastoral meadows that outstretched as we glided northward were once submerged in water. The fight against the sea never ceases. As we moved northward the three great dykes loomed out. I gazed out at these high bulwarks, patrolled and watched by day and by night, and mused on the legend that at Amsterdam there is one master key a turn of which, in times of peril from foreign invasion, will drown the land again.

"And as I mused there swept past a barge. The great sail was hoisted. The family—a mite of the 50,000 canal population who live on their lives on these floating houses—were in command.

S.S.S. FOR BAD BLOOD

The most important part of the human system is the blood. Every muscle, nerve, tissue, bone and sinew is dependent on this vital fluid for nourishment and strength necessary to maintain them in health and enable each to perform the different duties nature requires. Even the heart, the very "engine" of life, receives its vigor and motive power from the blood. Since so much is dependent on this vital fluid it can very readily be seen how necessary it is to have it pure and uncontaminated if we would enjoy the blessing of good health. Bad blood is responsible for most of the ailments of mankind; when from any cause it becomes infected with impurities, humors or poisons, disease in some form is sure to follow. Muddy, sallow complexions, eruptions, pimples, etc., show that the blood is infected with unhealthy humors which have changed it from a pure, fresh stream to a sour, acid fluid, which forces out its impurities through the pores and glands of the skin. A very common evidence of bad blood is sores or ulcers, which break out on the flesh, often from a very insignificant bruise or even scratch or abrasion. If the blood was pure, and healthy the place would heal at once, but being loaded with impurities, which are discharged into the wound, irritation and inflammation are set up and the sore continues. Bad blood is also responsible for Anemia, Boils, Malaria, etc.; the weak, polluted circulation cannot furnish the nourishment and strength required to sustain the body, and a general run-down condition of health results. S. S. S. is nature's blood purifier and tonic; made entirely of healing, cleansing roots and herbs. It goes down into the circulation and removes every particle of impurity, humor or poison that may be there, restores lost vitality, and steadily tones up the entire system. It adds to the blood the healthful properties it is in need of, and in every way assists in the cure of disease. S. S. S. neutralizes any excess of acid in the blood, making it fresh and pure, and permanently cures Eczema, Acne, Tetter, and all other skin diseases and eruptions. S. S. S. cures Rheumatism, Catarrh, Sores and Ulcers, Malaria, and all other diseases or disorders arising from bad blood. Book on the blood and any medical advice desired free to all who write.

Murray Graded School, Murray, Kentucky.
Large, elegant new building recently completed. New furniture and equipments. A school that gives fine mental and moral training. High School course very comprehensive and thorough. Courses in music and book-keeping. A normal department under the direction of the Principal, who has had long successful experience in large normal schools and colleges; three capable assistants, specialists in the branches they teach. Review work for teachers' certificates begins Monday Dec. 20th and continues five months. Large non-resident patronage of well pleased pupils. Last year more positions than we could fill were offered to our pupils. Valuable medals and prizes to be awarded in different departments at close of present year. Expenses moderate. For further information, address

Tobacco Association PRIZER.

I will work association tobacco in Murray in the building known as the old par. s factory, south of the R. & D. Downs brick factory, near depot. I have no other business and will give my whole personal attention to the classing, grading and selling of your tobacco. I assure you that I will get you the highest price for all tobacco intrusted to my care, and as quick sales as any one. Call and see me when in town.

Yours to command,

B. C. VEALE.

Store your tobacco where you wish, that does not concern me. I am not running a warehouse and only ask for a share of the prizing business.

TELLS HOW

Directions to Prepare Simple.
Yet Remarkable Home
Mixture.

A well-known authority on Rheumatism gives the readers of a large New York daily paper the following valuable, yet simple and harmless prescription, which any one can easily prepare at home:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces.

Mix by shaking well in a bottle, and take a teaspoonful after each meal and at bedtime.

He states that the ingredients can be obtained from any good prescription pharmacy at small cost, and, being of vegetable extraction, are harmless to take.

This pleasant mixture, if taken regularly for a few days, is said to overcome almost any case of Rheumatism. The pain and swelling, if any, diminishes with each dose, until permanent results are obtained, and without injuring the stomach. While

After Twenty-nine Years.

"For twenty-nine years I have been at intervals a great sufferer from rheumatism," writes James Hyde, of Beebe, Ark. "During that time I used gallons of various kinds of liniments and oils, but got very little relief. The attacks were so bad that I was often confined to my bed helplessly for weeks and months at a time."

"Not long ago, while suffering from a severe attack, a sample bottle of Sloan's Liniment was sent to me for trial. My surprise was great when I found that it gave me instant relief, and I immediately ordered two large bottles. I have used about a half of one fifty-cent bottle, and feel so well that I want everybody afflicted as I was to know what Sloan's Liniment has done for me, and I shall always have a feeling of gratitude for the man who sent me the sample bottle."

All The World

is a slave, and Ballard's Snow Liniment plays a most prominent part. It has no superior for Rheumatism, stiff joints, cuts, sprains, and all pains. Buy it, try it and you will always use it. Anybody who has used Ballard's Snow Liniment as a Rheumatism

New Concord.

Mr. Henry Parham and son, Wootson, from Mississippi, visited his brother J. M. Parham, this week.

Frank Turner and family, of Stewart county, visited John Gregory last week.

Ruben Davis has come home from Missouri where he has been visiting his grandmother.

Misses Annie Morris and Cattie Beale visited Miss Bennie Parham a few days last week.

Mr. Hansford Smith and Miss Sallie Winchester surprised their many friends by driving over to Sulphur Springs and getting married, Bro. Risenhoover officiating.

Mr. Cunningham, from across Cumberland river has moved to the Sladd place.

Leslie Smith and wife, of Murray, visited Dime Smith last week. Leslie will move back to our neighborhood.

A party was given by Mr. and Mrs. P. G. Baucum Saturday night. Quite a large crowd was present and all had a good time.

Miss Ethel Mathews returned home after a two weeks visit to her aunt, Mrs. T. L. McCuiston.

FROM THE ANTILLES.

Chamberlain's Cough Remedy Benefits a City Councilman at Kingston, Jamaica.

Mr. W. O'Reilly Fogarty, who is a member of the City Council at Kingston, Jamaica, West Indies, writes as follows: "One bottle of Chamberlain's Cough Remedy had good effect on a cough that was giving me trouble and I think I should have been more quickly relieved if I had continued the remedy. That it was beneficial and quick in relieving me there is no doubt and it is my intention to obtain another bottle." For sale by Dale & Stubblefield.

The family and friends of Mr. Alburus McDaniel, who lives east of Murray, tendered him a very happy surprise Christmas day. Unknown to him they gathered at his home and brought
