## Weak Heart Action

There are certain nerves that control the action of the heart. When they become weak, the heart action is impaired. Short breath, pain around heart, choking sensation, palpitation, fluttering, feeble or rapid pulse, and other distressing symptoms follow. Dr. Miles Heart Cure is a medicine especially adapted to the needs of these nerves and the muscular structure of the heart itself. It is a strengthening tonic that brings speedy relief. Try it.

"For years I suffered with what I thought was stomach trouble, when the doctors told me I had heart trouble. I had tried many remedies, when the Dr. Miles' Heart Cure came into my hands, and I concluded to try Dr. Miles' Heart Cure. I have taken three bottles, and now I am not suffering at all. I am cured and this medicine did it. I write this in the hope that it will attract the attention of others who suffer as I did."

## EFFECTS OF DRUGS

VARIED VISIONS FOLLOW USE OF MEXICAN MISCAL.

Feeling Throughout is One of Enjoyment — Alternate Delight and Despair Attend the Indulgence in Maschisch.

An experimenter with the Mexican drug miscal is rewarded by many and varied visions. Before him flit myriads of dainty butterfly forms, glistening, iridescent, fibrous wings of insects, revolving vessels on whose highly polished concave surface of mother-of-pearl many strange and vivid hues play. There are elaborate sweetmeats in endless and appealing variety, and living arabesques of gorgeous hues and superhuman design.

He may take up a pen for the purpose of making notes, but will find himself unable to use it. A pencil, however, proves easy of manipulation. As he writes his paper is covered with a soft, golden light, and his hands, seen indirectly, appear bronzed, scaled, fantastically pigmented and flushed with red.

Tiring of the visions, he may light the gas, which immediately fills the room with a glorious radiance, while wonderfully colored shadows of red, green and violet fill here and there. Generally, it is said, no feeling of depression or physical discomfort follows the dream.

A medical experimenter in Kentucky, soon after taking a large dose of maschisch, began to feel very excited; a feeling of finer joyousness possessed him; all fatigue seemed banished forever, and his mind ran riot, one bizarre idea after another rapidly passing through his mind. Later his brain seemed split in two parts, one of which urged him to the performance of some adventure, while the other as insistently hinted an impending death, and suggested restraint and instant medical advice.

While waiting for a doctor he experienced alternate spells of lucidity, and periods when all connections between himself and the outside world seemed to be severed, when a chaos of disjointed ideas and wild reveries obsessed him. The duration of these latter periods was never longer than two minutes, but each seemed an eternity. It appeared a hopeless task to follow the minute hand of his watch during its infinite round; long before the 60 seconds had elapsed he gave up the stupendous task in deep despair. The departure of the doctor, synchronized with the return of the feeling of impending death, now most horribly intense.

He imagined himself surrounded by grotesque, menacing, cruel-visaged monsters. He felt himself expanding, dilating, dissolving into space, as he ascended steep precipices, covered with "greenish creatures some-

## CHINESE DOCTOR'S OFFICE.

Methods of Examination and Administering Medicines in Vogue There.

The method of treating sick persons adopted by Chinese doctors in some cities is similar to that of the other physicians of the United States and those of Great Britain. They depend much, however, on the examination of the pulse, says Chambers' Journal. Their sense of touch is so wonderfully developed that it is said they can determine the condition of the heart as well as some of the other organs merely by the feeliness or strength of the beats, but they say there are no less than 12 different movements of the arteries in the human body, all of which can be detected by feeling the fingers, wrist and arm.

When a patient calls on him for examination the doctor first presses the arm, wrist and fingers, touching nearly every part. Sometimes 10 or 15 minutes is occupied with this examination. Then he may ask if the patient is married or single, and also his age; but this is about the limit of the examination. Apparently he can feel the nature of the disease without questioning further, and if the caller wishes a prescription he writes one in the ordinary Chinese characters on a generous sized square of paper.

Ring a bell, he hands the prescription to the Chinese attendant who enters, for each physician has his own shop, filled with the ingredients which he uses in treatment. If he has a large practice he may employ a native chemist, who makes up the prescription.

One of the curious features of Chinese medical treatment is the way in which the physicians administer their remedies. Nearly all the offices of the principal doctors have what may be called a tea room attachment. This is a spacious apartment, well lighted, frequently ornamented with oriental pottery and pictures and containing small tables, each with two or three chairs. If the invalid does not wish to take his medicine at home, he is ushered into this room, and while seated at one of the tables drinks his prescription as he would a cup of tea or a glass of wine. With but few exceptions the medicine is in liquid form and served hot in dainty Chinese bowls, for most of it is composed of a decoction of herbs.

Each table contains a bowl of raisins, and when the attendant brings in the medicine he also brings in a glass of tepid water. If the drink is bitter, as it usually is, the patient can eat some of the raisins to remove the taste, while with the water he rinses his mouth and throat. Then he is ready to go home, returning the next day for another examination and dose.

A Three-Mile Circle Is the Average Limit in Their Quest for Sweet.

## CREATING FORESTS.

TREES TO BE PLANTED IN CALIFORNIA BY GOVERNMENT.

Large Areas of Land Will Be Rendered Productive by Re-foresting and Extensive Irrigation.

California and other western states have proved the efficacy of irrigation in promoting agriculture, but there are millions of acres of fertile land unused through lack of sufficient water. Much of this land will be reclaimed by the gigantic irrigation works planned by the national government, but the scope of this work is limited by the amount of water available. The influence of forests in conserving a limited rainfall is recognized, but they are often wanting where most needed. Thus forest planting is often necessary.

An example of what the bureau of forestry is doing in this direction is furnished by the nursery which it is establishing 15 miles from Santa Barbara, in Southern California. This is the fourth forest nursery which the bureau has established within western forest reserves. Nowhere in California is water needed so much as in Santa Barbara. To cover large areas with new tree growth, however, in regions where the forest can not naturally restore itself, is a difficult matter. Unless great care is used in the selection of species and in the cultural methods employed, the work is likely to prove a failure. Methods which would succeed on a small plantation are impracticable on a large scale on account of the expense.

The nursery in the Santa Barbara reserve will be planted with seed of trees likely to flourish in that region. Coulter and yellow pine will be most largely planted. The seedlings will be ready to transplant to their permanent locations two years hence.

The first attempt at reforesting will be made on the upper watershed of the Santa Ynez river, which supplies the town of Santa Barbara with water. This town of only 16,000 inhabitants is spending \$600,000 to secure a good water supply. A dam and reservoir for its purpose are now under construction. The Santa Ynez watershed is now bare or poorly covered with chaparral. A good forest growth is necessary both to conserve the water and to prevent the washing down of silt, which if unchecked would eventually fill and ruin the reservoir.

The success of the transplanting will depend largely upon the season. In excessively dry years good results can not be expected, and the bureau must take advantage of a wet season. Preparations for the transplanting will be begun immediately, so that quick work can be done the first favorable season after the seedlings are old enough.

Then he is ready to go home, returning the next day for another examination and dose.

## RANGE OF HONEY-BEES.

A Three-Mile Circle Is the Average Limit in Their Quest for Sweets.

The Habits of Wolves.  
The range of a pair of wolves is an area of from six to ten miles square. When the hunter learns that wolves have been seen and heard in a certain locality it may take several days of scouting before the dogs can be got on the trail. The hunter must look sharp for signs in soft or sandy places and along creeks and streams.

The old lady wolf will, as a rule, go to the nearest water to drink when leaving the den, or go to get a drink as she returns from the hunt before going to the den, and its locality is often found on account of that habit. A wolf track can be distinguished from that of a dog, because the two front toes are set further ahead, making the track more pointed. When wolves are running and especially if frightened, these toes spread apart, making a track that at a hasty glance looks very much like the track of a deer.—Pur News.

In Shakespeare's Time.  
The big yellow moon climbed above the trees.

"Be careful, Romeo," cautioned the fair Juliet, "if papa hears you there will be trouble."

"But what objection has he to me?" said Romeo, somewhat piqued. "Didn't you tell him I move in the best of society?"

"Yes, dear, but he insists that you are only a climber."

And then and there Romeo decided to cut out the balcony scene and make love out on the lawn.

## New Answers to Old Questions.

Restaurant Patron—What is good today, Otto?

Waiter—Nothing, sir. The table d'hôte is a rehash of yesterday's menu, and the à la carte has been in the icebox since Thursday. But you can get some nice chops and steaks in Smith's cafe. Going, sir? Good day, sir.—Puck.

## Awkward Mistake.

Mrs. Upmore (making a call)—Why, this is your latest photograph, isn't it? It's an excellent likeness of you, but it isn't so good of the baby. Wasn't he—

Mrs. Highmus—The idea! Did you think the little darling in my lap was baby? That's Fido!

## Had Only One Think.

Mrs. Benham—Second thoughts are best.

Benham—I know it. I thought only once when I asked you to marry me.

## MURRAY MILLINERY CO'.

place of business. They have the biggest display of fine millinery ever shown in the town. Hats at all prices, from the cheapest to the best. You can buy a hat from us at any old price. A big lot of carried hats that you can buy at first cost. A big line of ready to wear hats now on sale, fresh from the market. Don't forget this great display of fine millinery at Murray Millinery Co. In fact we are in shape to give you anything in headgear. Don't forget our line of \$1 hats. Over 200 to select from; your choice for \$1.

## Murray Millinery Co.

### General Warning Posted.

A notice of warning has been posted on the public highway about one mile north of Kirksey which has aroused considerable interest in that section of the county, and is causing much apprehension among tobacco growers who are not members of the association.

The notice was printed with a lead pencil and nailed to a fence rail and was stood against a picket fence.

The warning contained is as follows:

TAKE NOTICE TO THIS.

We have come to tell you all that has sold their tobacco you had better not deliver it. We are watching you all. If you take it off you will think hell has been taken you. There is 480 night riders in 8 miles of say. Its no boys work it is mans. It is talked all over the county that it is boys work. You will think boys if we come after you. Now friends we are working for your interest as same as our.

PLEASE DON'T TEAR THIS DOWN.

The notice has been read by scores of persons and some alarm is felt by non-association growers of the section where the notice was posted.

When the Stomach, Heart, or Kidney nerves get weak, then these organs always fail. Don't drug the Stomach, nor stimulate the Heart or Kidneys. That is simply a makeshift. Get a prescription known to Druggists everywhere as Dr. Shoop's Restorative. The Restorative is prepared expressly for these weak inside nerves. Strengthen these nerves, build them up with Dr. Shoop's Restorative—tablets or liquid—and see how quickly help will come. Free sample test sent on request by Dr. Shoop, Racine, Wis. Your health is surely worth this sample test. Sold by H. D. Thornton & Co.

Its no trouble to make rich class photos with inexperienced help if you know how yourself. For first class work, cheaper than you ever heard of see BRAY & SLAUGHTER, Loves old stand.

Why should your baby suffer? When he is fretful and restless, don't experiment on him and use any old thing your neighbor recommends. Buy a bottle of White's Cream Vermifuge, greatest known worm medicine and cure for all children's diseases. It is mild in its action, builds up the system, makes thin puny babies fat. Mrs. J. C. Smith, Tampa, Fla., writes:

"My baby was thin and sickly, could not retain its food and cried all night. I used one bottle of White's Cream Vermifuge and in a few days baby was laughing happy and well." Sold by Dale & Stubblefield and H. D. Thornton.

In buying a cough medicine for children, never be afraid to buy Chamberlain's Cough Remedy. There is no danger from it, and relief is always sure to follow. It is intended especially for coughs, colds, croup and whooping cough, and there is no better medicine in the world for these diseases. It is not only a certain cure for croup, but, when given as soon as the croupy cough appears, will prevent the attack. Whooping cough is not dangerous when this remedy is given as directed. It contains no opium or other harmful drugs, and may be given as confidently to a baby as to an adult. For sale by Dale & Stubblefield.

### New millinery received daily.

The best goods for the least money.—GILLIS WILKINSON MILLINERY CO.

STRAYED.—Red heifer yearling, crop off of right ear. Left last August. Notify G. W. LAWSON, Hazel, RFD, No. 2.

We have just received the third lot of new Dress Goods, Silks, Laces and Wraps for this winter. Come and see them while our stock is new. Asher Graham.

### How's This.

One Hundred Dollars Reward for anyone who can cure a case of Catarrh that cannot be cured by any other medicine. We have known F. J. Cheney for the past 10 years, and believe him perfectly honest in all his business transactions. His Family Pills are the best. Sold by all druggists. Testimonials free. Hail's Family Pills are the best.

At the annual stockholders meeting of the Citizens Bank, Murray, Ky., which meeting was held at the office of the bank Jan. 17th, the following directors were elected for the year 1908: James B. Hay, F. P. Stum, A. J. Wilson, J. M. Imes, Barber McElrath, L. Y. Woodruff and E. D. McGeehee. At the annual directors meeting of said bank, which was held the same day, Former Cashier F. P. Stum was duly elected vice president to succeed B. F. Clayton, deceased.

### Notice.

Mr. B. H. Pitman is now associated with the Calloway County Produce Co., in the old stand formerly occupied by T. J. Holcomb back of New Murray Hotel and will give all his old patrons the best of attention, and the highest market prices at all times. Phone 118 or write us before selling.

CALLOWAY CO. PRODUCE CO. C. C. PACE, Mgr.

Chamberlain's Cough Remedy a Safe Medicine for Children.

Children grand-children and other relatives and friends tendered Mrs. A. V. Tutt a very agreeable surprise last Monday, by gathering in large numbers at her home and bringing with them a royal feast. Mrs. Tutt was 84 years of age, but despite her advanced years she was one of the jolliest and liveliest of all the happy party, and the occasion brought her much to make it one of the most enjoyable of her life. During the afternoon Photographer Bray made a picture of the crowd and when the guests parted for their homes it was with long and happy wishes to the hostess for many returns of the happy day.

### Wear-Colson Nuptials.

At the home of the bride's parents in Call, Texas, last Sunday afternoon, occurred the marriage of W. Nolan Wear, late of Murray, Ky., to Miss Inez May Colson, of the former town. The wedding was a quiet affair, only a few of the most intimate friends of the family and contracting parties being present.

After the ceremonies were performed Mr. and Mrs. Wear came up to Newton on the train, where they will make their future home. They were met down at the "Y" by a number of young gentlemen, their friends, of course, who proceeded to christen them by sprinkling rice on them until they reached their boarding house, and about midnight the boys got all the guns and together and joyfully celebrated the addition to the family of The Newton News.

Mr. Wear is a son of A. M. Wear, of Murray, Ky., is a printer by trade and has been in the employ of this paper for the past three months; is sober, energetic and industrious, with bright prospects for the future.

The bride is the daughter of Mr. G. C. Colson, of Call, Texas, foreman of the Kirby Lumber Company's big mill at that place. She is an amiable and accomplished young lady and the groom is to be congratulated upon his good fortune acquisition of such a help-meet.

The News feels almost, if not quite, as proud of the addition to its family as Mr. Wear could, and wish the young couple a long, prosperous and happy voyage over the ocean of life.—Newton, Texas, News.

### Why Colds Are Dangerous.

If you would be immune from disease, keep the system healthy. Each successive cold weakens the constitution and renders infection-diseases more liable. Chamberlain's Cough Remedy will cure your cold promptly and restore the system to its normal condition. For sale by Dale & Stubblefield.

## A Sprain or Strain must have immediate attention

# Sloan's Liniment

is invaluable in an emergency of this kind. It quickly relieves the soreness and congestion, reduces the swelling and strengthens the weak muscles.

Because of its antiseptic and healing properties, Sloan's Liniment is the best remedy known for cuts, wounds, bruises, stings, burns and scalds.

**PRICE 25¢ 50¢ & \$1.00.**

**Dr. Earl S. Sloan. Boston, Mass.**

**Fresh Butter.**

If cooperative dairies were started throughout England, and their butter was sent to the towns the same day as it is made, breakfast would have a new savor, and the kitchen, farmer would have a new and enlarged profit. Good butter, direct from the churn, is a food for the gods. Its flavor lingers enticingly on the palate.—Yorkshire Post.

**The Best Things of Life.**

When we look back at the end of the journey of life we shall consider not how much pleasure we had in it, but how much service we gave in it; not how full it was of success, but how full it was of sacrifice; not how happy we were, but how helpful we were; not how ambitious was gratified, but how love was served.—Hugh Black.

**Building with Cinders.**

The cinders from the waste burned in English municipal destroying plants are made into building material by crushing, mixing with cement and molding into bricks, slabs, etc. These have door and window openings and even an interior iron framework for holding them in place, and some weigh as much as 11 tons. The frames are built together, the joints being closed with cement.

**Alloy Sought by Builders.**

Suppose that one could find an alloy that would bear the same relation to aluminum that steel does to carbon or bronze to tin, says the Engineering Record. The result would be a new structural material of immense importance in mechanical work. The building and machinery engineers are looking for it.

**Commissioners Sale.**

Calloway Circuit Court.  
L. C. West et al., Plffs.,  
vs.  
Adell Milan et al., Defs.

By virtue of a judgment and order of sale of the Calloway circuit court rendered at the November term thereof 1907, for the purpose of a division, I shall proceed to offer for sale at the court house door in Murray, Ky., to the highest bidder at public auction on the 27th day of January, 1908, between 10 o'clock a. m. and 4 p. m., being court day, upon a credit of six months, the following described lands lying in Calloway county, Ky., to-wit:

Beginning at the southwest corner of section 23, township 3, range 1, east; thence south 87½ degrees east, 84 poles more or less to a rock the section corner; thence north 4 degrees west, 151 poles more or less to a stake; thence south 87½ degrees east, 51 poles more or less to a stake; thence north 4 degrees west, 15 poles more or less to a stake; thence south 87½ degrees east, 190 poles more or less to a rock in the center of the road; thence south 4 degrees east, 190 poles more or less to the place of beginning, containing 36 acres more or less, lying in the southwest, northwest and northeast quarters of section 23, township 3, range 1, east. Except 4½ acres more or less of the same and being a part of the northwest quarter of section 23, township 3, range 1, east, and bounded as follows: Commencing at the west line 71 poles and 1 foot north of the southwest corner of said quarter at a stake; thence north 62 rods to a stake; thence west 11 rods to the section line; thence south down the section line to the beginning. Sold by W. F. West to L. C. West, Nov. 25, 1891; deed book No. 9, page 448. All of the above land sold subject to the dower and homestead rights of L. R. A. West.

For the purchase price, purchaser must execute bond, bearing legal rate of interest from day of sale until paid, and having the force and effect of a judgment. Bidders will be prepared to comply promptly with these terms.

L. Y. WOODRUFF, M. C.

### ONE DOLLAR A WEEK.

#### How to Make It Grow and Double Up if Carefully Used.

According to the annual report of the New York savings banks the number of depositors is now 2,753,245, and the total of their deposits is over \$1,400,000,000, an amount greater than the bonded debt of the United States.

These depositors, who outnumber the inhabitants of Manhattan Island, are to be commended for their wisdom. If all men of small means were to follow their example, the community as a whole would be much better off. There was not one savings bank failure in the past year. There is not a single savings bank now whose report is not creditable to its management, and whose solvency is not beyond question.

In these days of get-rich quick schemes, of mining stocks, of speculation in bucketshops, poolrooms, on the curb and in the stock exchange, it is most timely to turn to the savings banks and to point out the superiority to every man of small earnings and limited means of devising a definite surplus regularly at interest.

For a rich man to speculate is one thing. He can afford to lose some money. He has time for personal investigation of the risk, and he has the power to enforce his legal rights. He may win or he may lose, but in either case the transfer of wealth is not a vital matter.

To all the men who work for wages or on salaries their only hope for a peaceful old age and a life free from racking money worries is to provide for it. "Well, then," exclaimed an old man, "if the country it was, should take no risk. When that the coffee they stake their family's future and their own peace of mind against a few dollars. Even were the chances equal—and in the case of a small man the odds are always against him—the risk which he takes is vastly disproportionate to any possible gain."

**Origin of Mr. and Mrs.**

In earlier times the ordinary man was simply William or John—that is to say, he had only a Christian name without any kind of "handle" or surname after it. Some means of distinguishing one John or William from another John or William became necessary. Nicknames derived from more wealth than the bulk of his fellow-laborers, became perhaps a landed proprietor or an employer of hired labor. Then he began to be called in the Norman-French of the day the "maistre" of this place or that, of these workmen or of those. In time the "maistre" or "maister," as it now became, got tacked on before his name, and he became Maister Smith and his wife Maistress Smith. Gradually the sense of possession was transferred upon any kind-by mere possession of wealth or holding position of more or less consideration and importance.

**Habit.**

It is the law of habit that makes roads everywhere through the pathless in this universe; whereas, wherever there is a made road, there was the law of habit active—honored in its degree. Granted the road is not the best, yet how much better it is than no road!—Thomas Carlyle.

**Peculiar Damage Suit.**

In a certain town in Indiana a man brought suit against a hardware company for \$10,000 damages. He claimed that a rope he had bought to commit suicide with broke and thus foiled his plans. After the rope broke, he said, he could not get up courage enough to try it over.—Judge.

**An Excess of Anatomy.**

The noble families of Prussian Poland have become so numerous as almost to swamp the common people of the province. The priest of Konitz replied to a circular issued by the government that every one of the 50 families in his congregation was of noble birth.

### OUR CHEWING GUM.

#### HABIT THAT HAS BECOME ALMOST NATIONAL.

Effect on the Users Rather Beneficial Than Harmful—Source of Supply of the Substance.

Now and then one sees men as well as women chewing the cud in public with a steady persistency that exercises a certain fascination upon others in their neighborhood, as, for instance, in the cars. They are not masticating candy, and the men are not slaves to the tobacco habit. Presently one comes across a man who is properly fed and manipulated, propel small slabs of chewing gum, are by no means patronized by children alone; they are there for adults also.

Chewing of gum has become almost a national habit. To its use may be set down the fact that among men it has to a great extent driven out the chewing of tobacco. Chewing itself tends to have some obscure necessity behind it, as if like the exercise of the teeth in squirrels, rats, mice and other rodents, it were an instinctive act for the purpose of keeping the teeth sharp and in good condition. Perhaps our teeth and the world's teeth are probably the tendency of the teeth to become loose and gradually drop out. In Ireland, for instance, the peasant is said to lose his teeth early in life owing to a potato diet. At any rate, we must give the chewing gum the benefit of the doubt.

There is a story told in the country it has been a habit with children to collect the gum from cherry and peach trees for their private use and profit, but with the tremendous increase of the habit enterprising makers of chewing gum have ransacked the world for the best substitutes for and improvements on the crude product of the farm. And in the States of Georgia, Central and South America, a wild tree, called in some places the Chio Zapote, they have discovered a gum called chicle, which fills the bill in the senses than one.

For the manufacturers of chewing gum, there are very few places where this tree grows in abundance, as in the case of the rubber tree, there has not been time enough to ascertain with certainty if when cultivated the sap can be relied on to keep up to the standard. Hence they have had to depend for their supplies of chicle on the Indians, who would not or could not bring the material out of the woods in sufficient quantities to meet the demand. Therefore the price of chicle has been rising, although manufacturers do all they can to economize and slip substitutes into the sticky mass so much loved by school children.

There is one part of one province of Mexico, namely Yucatan, where the Chio Zapote grows in great quantities. This is the district called Quintana Roo, bordering on the Caribbean sea just north of British Honduras, a new capital called by the Maya Indians Chan Santa Cruz, but now baptized Santa Cruz de Bravo after Gen. Bravo, who opened up this wild region for conflicts with the Indians. It is proposed to continue this line down to Belize. Meantime, it has opened up what apparently is the richest sector for chicle in all America. In fact the tree is so abundant in this region that the greater part of the ties laid by the government engineers were cut from the Chio Zapote trees along this track.

**Current Sherbet.**

Pick over and squeeze in cheese-cloth enough currants to obtain two cupfuls of juice. Add to this two cups of water and two cups of sugar. When the sugar is dissolved stir in the beaten whites of two eggs and freeze. Serve in sherbet glasses and put on each glass a spoonful of very cold custard, in which a few chopped pistachio nuts have been stirred.

**Cleaning Kitchen Utensils.**

Wet a coarse cloth with hot water, soap it well and apply to copper. Sprinkle powdered borax over it and polish with a dry cloth.

### LAST OF STONE AGE MAN.

#### Tasmanian Aborigines Not Appreciated Until It Was Too Late.

The visitor to Tasmania can have an experience that is novel—he can call on the last of the native race of the land. She is Trucanini, and she holds her place in a glass case in the National Museum.

There is only the skeleton left, but judging from that she was a well-groomed little body of about four feet. The Tasmanian aborigine was a clean sort of person, moving every day, so as not to have the dirt or grime of yesterday in his camp. He made was neat hair for men, seven braids for women. Both wore at times a necklace and also on occasions tied a strip of fur around the calves of their legs. They seemed to get along very well with this, even though the winters were cold.

Then came the white man with his gun and his modesty. Between the gun and the blanket and some other clothes and the permanent shelter, there was only one left in the '70s, and she—Trucanini—died at about the age of 70 years in 1876, and her bones, well articulated and polished, stand in state today.

When this had disappeared the "paleo-people" discovered that these Tasmanian aborigines were probably the world's only specimens of the people of the stone age. But the discovery came too late. The folk who had mixed up to give the world a very good, to say nothing of reliable, record of the inner characteristics of this extra primitive people, were not there to do so.

Their principal record left is that they did not worry—a fact from which it may be reasoned that bald heads and gray hairs were probably not known in the days when slabs of granite were legal tender.

### MAGGIE WAS AN OPTIMIST.

#### She Would Persist in Looking on the Bright Side of Things.

Maggie's mind is so organized that recognizing trouble is, for her, next to impossible. Indeed, Mr. Carter maintains that if ever a cloud does contrive to catch Maggie's attention, it straightway turns itself inside out, the result being that it exists for Maggie as a "silver lining" only.

Maggie's sunniness was a distinctly grateful feature of the domestic atmosphere—following two sub-vivacious, grumpy parlor maids. Indeed, it was a quality that repeatedly saved her from discharge, for neat, smiling, domestic little Maggie, alas, would break things!

When her ravages—for it amounted to that—included a rare and valuable vase, Mrs. Carter felt that the time had come when, in desperate defense of the bric-a-brac, as well as for Maggie's future good, she must adopt severe measures.

"Maggie," she said, "this vase cost \$400."

"The saints forbid, ma'am," cried poor Maggie, quite overcome.

"Yes! But I shall count only half that amount against you. I dislike dreadfully to do this, Maggie, but I must teach you to be careful, so I'm going to keep back one dollar every week from your wages until the \$20 are paid."

Tears—not wholly for the shattered ornament—flowed freely, for one dollar a week is a formidable drain on some incomes. Then Maggie was herself again.

"Anyhow," she said, half-heartily, as her characteristic smile made its way out, "I do be thinkin', ma'am, that I'm sure of me nice job here wid you for some time ahead!"—Youth's Companion.

**Getting Together.**

"There's altogether too much side-stepping these unorthodox days," remarked the devil. "The deep sea and I will have to get together some way."

**New York City's Flat-houses.**

New York city has provided new bathhouses for 558,000 tenants during the last five years.

**Sure Sign of Wisdom.**

The most manifest sign of wisdom is continued cheerfulness.—Montaigne.

### A SNAKE-BITE CURE.

#### ANTIDOTE FOR POISON TAKEN FROM THE REPTILE.

The Secret of Mexican Convicts in Arizona Prison—Opinion of the National Museum Physiologist.

The Moki Indian is still a lap ahead of his civilized brother on the subject of rattlesnakes. That is, he is strong in suspicion, of having an almost to a certainty, of having an antidote for rattlesnake poison, while the white man has been able to find none. There is a fortune and fame awaiting the man who will find an antidote for the poison, for while the mortality from rattlesnake bites is by no means so large here as the death rate from poisonous snakes, especially the cobra, in India, the rattler is the most dreaded snake in this country, and is found in one form or another all over the warmer portions of the United States.

The latest story as to an antidote for the poison came out of Arizona. It was reproduced in the Washington Star some time ago, and purported to tell how H. F. Daniel, superintendent of the territorial prison, had found at last, through the agency of three Mexican convicts, a certain cure for the snake bite. It was not a whiskey remedy. The Mexicans in question explained that there was a small gland in the interior of the snake filled with a brownish black fluid. This fluid, applied at once to a bite, was said to entirely neutralize the poison. It was quite a long and circumstantial story, both ingenious and interesting.

The Star submitted the question to the National Museum. None of the officials particularly connected with the reptile poison research happened to be in town, and it was suggested that the question be submitted to Dr. Weir Mitchell, considered the greatest authority on reptile poison in this country. Dr. Mitchell kindly replied, but said that the antidote in question was one of a number of "paper remedies," all alike worthless. It seems that the small sac referred to does actually exist. It is the bile gland of the snake, but it has no curative properties.

Dr. Mitchell has been at work on the snake poison problem for over 40 years and has tried every civilized and uncivilized antidote that has come his way, but without finding anything which seems a specific for the poison. He has even shown that alcohol is by no means a specific, and that rabbits in an advanced state of intoxication fall easier victims to the venom than those not drunk. At the same time it would be hard to convince any old westerner that whiskey did not come near to being the only real and sure snake medicine. The theory on which whiskey is so highly prescribed is that the snake poison, being as a blood disintegrant, and the whiskey being a stimulant, keeps the body action going till the crisis in the poisoning is past.

There have been a number of supposed antidotes tried, perhaps of potash, carbolic acid, and neutralizers the poison. In fact, it has been found that while carbolic acid, applied immediately to the wound, and cleanse the wound, it is as deadly in the system as the snake poison itself. One out of three who have been bitten by a snake and applied carbolic acid to the wound, have died.

Meanwhile the Moki Indian, after all along and handle the venom, without suffering any ill effects, and all the ingredients for the last 50 years addressed to finding what it is that the Mexican government has tried to buy from them, but they have always evaded the request. A great many white men have tried to penetrate the secret without success. Dr. J. Miller for years ago added the dances every season, and was finally admitted to the Moki prison. He was permitted every year to the next year he would be initiated into the secret of the antidote, but he died without finding it out.

There is just one story on which it is possible the Moki Indians might have found during their experiments that pigeons could be trained to the poison so that they could stand a dose 20 times strong enough to kill them when the treatment first commenced. In fact, one pigeon was brought to stand 50 times the lethal dose, though this was an exceptional case. It is possible that during the period of initiation, when the Mokis are being prepared for the dance, they are inured by repeated small doses of the poison. This, however, is mere speculation. If true, it would show that a man in the rattlesnake country could be at least temporarily vaccinated, as it were, against the venom. Whether or not the protection would endure is another question.

**Even.**

He-Blank told me that he never lets his wife know how much money he earns for fear she'll spend it all. She—And Mrs. Blank told me she had never let her husband know that she has a fortune in her own name for fear he'll lose it all.—Detroit Free Press.

**Conformed to Circumstances.**

A story is told in Paris of a diplomat who represented a South American republic a few years ago. There had been so many revolutions at home that the financiers there had no time to send him his salary. But he took this misfortune philosophically, sold all the furniture of the location except a bed, a table and some chairs and occupied one room with his principal attaché, who cooked the meals.

### THINGS THAT ARE RACERS.

#### The Mackerel King of Tien Ah, with Speed of Sixty Miles an Hour.

Study of the speed of fishes is embarrassed by unavoidable difficulties. It is not possible, as with birds, to set up tall poles at intervals of a quarter of a mile, and with the help of stop watches, time them as they go by. Nevertheless, says the Saturday Evening Post, recent investigation of the subject goes to show that the mackerel, if not the champion racer of the briny deep, comes pretty near carrying off the honors. Unquestionably it travels sometimes as fast as an express train at high speed—say, at the rate of 60, or possibly 70, miles an hour.

Other things being equal, the larger the fish, the faster it swims—just as the huge steamship is able to travel at a speed much greater than the little harbor tug. Undoubtedly the energy employed by a fish of great size, such as a 20-foot shark, when traveling at its best gait, is something tremendous. An ordinary tug, which represents a maximum energy in a minimum bulk, utilizes about 500 horsepower. Of course, it is only a guess, but it would not seem to be over the mark to suppose that a 70-foot whale makes use of 500 horsepower when it propels its huge bulk through the water at a rate of 30 miles an hour. A whale—which is a mammal, and not a fish—might be compared to a freight train, but it can beat the fastest "ocean grayhound" in a speed contest.

If there is a fish that can travel faster than a shark, it must be a tarpon, which can probably "hit her up" to the tune of 80 miles an hour, if pressed for time. Generally speaking, it may be said that finny creatures which live near the surface of the sea are swift swimmers, as compared with those that dwell in the depths. Thus the cod, which is a deep-water species, is sluggish, and would stand no show at all in a race with the mackerel or herring. These latter, which are distinctively pelagic, depend for their living upon their activity in pursuing agile prey, and they must be quick in their movements in order to escape their own enemies.

If the mackerel were as big as a good-sized shark, it would probably be the speed champion of the ocean. No fish is better shaped for rapid going. Some years ago a yacht builder in New York constructed a sloop with a hull patterned exactly after the under body of a Spanish mackerel. She was called the Undine, and, if tradition does not lie, she never was beaten. Like the fish after which she was modeled, she had her greatest breadth of beam forward, in the hulling. One may say, indeed, that all modern water craft are more or less fishlike in their make-up; yet, on the whole, it is surprising that marine architects have not striven more earnestly than they have to obtain hints from nature's own illustrations of aquatic speed-making principles.

### Why the Bears Fought.

C. M. Russell, the western painter, tells an amusing story of a bear fight which he thinks is funnier than any humorous sketch he has ever seen portrayed on a vaudeville stage. He had been out with a guide all day, and toward evening they saw, far down the road, two bears sauntering along, quite oblivious of the presence of his man being, as the wind was in the wrong direction. Russell and his guide quickly jumped behind a small thicket, and when the bears were within shooting distance, the painter lef and struck one of them fair in the side. The shot stunned the animal for a moment, and he was under the impression that his mate had struck him a terrific blow when he was not looking. As there appeared to be no reason for this chastisement, he proceeded to retaliate by attacking the other bear. About this time the guide took a shot at the assaulted animal, with the result that the brute was infuriated and imagined he had been struck with undue force by his comrade. Upon this the two bears set to and had a terrific fight.—Success Magazine.

### He Was Not Overcome.

A dusky dame of Nanquandland jilted her swain. A wife out there has a certain financial value, and in a short time she received a letter from the youth's lawyer, threatening an action for breach of promise. She replied in the following conciliatory terms: "Nababeg, Feb. 22, 1905:—Mr. G. W. Mallett—Sir: To answer just a few word you on Klaas Cloete words what he came to Mr. Mallett for, of me what I can answer on these words is that the love what I did had for Klaas Cloete did break of my heart from him that is the only reason I got to say against Klaas Cloete and to break the love is God in Heaven and what God done I can't help, so I don't want him for an am. I am yours truly (sd.), Margaret Ackers. When the letter was read to Klaas he replied, philosophically: "There's more in his girl's"—Cape Town (Africa) Owl.

### Conformed to Circumstances.

A story is told in Paris of a diplomat who represented a South American republic a few years ago. There had been so many revolutions at home that the financiers there had no time to send him his salary. ## MOTHER BELIEVES IN PERUNA.

Mrs. K. Kane, of Chicago, Uses Pe-ru-na in her family of five children, Grace, Myrtle, Edward, Reeves and George.

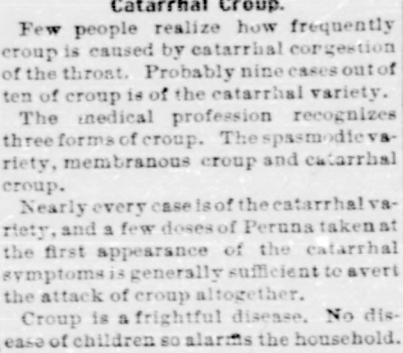

GRACE

**Pe-ru-na in the Home.**  
After all, experience is the best teacher. Some doctors may write in favor of Pe-ru-na. Other doctors may write against it. But it is the testimony of the mothers and fathers who are rearing families, who love their children, who must economize as to doctor bills, who are raising little boys and girls into men and women of the future, it is the testimony of such people that really counts.

There is no way to positively ascertain how many families in the United States rely upon Peruna for the many climatic ailments to which the family is subject. The number must be a great one. Several millions perhaps. They have learned how to use Peruna for ordinary ailments, and in that way are guarding their homes against more serious diseases.

Such ailments as coughs and colds, sore throat and catarrh, croup and colic, indigestion and loss of appetite, anemia and nervousness, all these ailments are promptly relieved by a few doses of Peruna at the right time.

Millions of provident mothers and fathers are guarding the interests of the home by using Dr. Hartman's great remedy, and profiting by his medical booklets and personal advice.

MYRTLE

**Catarrhal Croup.**  
Few people realize how frequently croup is caused by catarrhal congestion of the throat. Probably nine cases out of ten of croup is of the catarrhal variety. The medical profession recognizes three forms of croup. The spasmodic variety, membranous croup and catarrhal croup.

Nearly every case of the catarrhal variety, and a few doses of Peruna taken at the first appearance of the catarrhal symptoms is generally sufficient to avert the attack of croup altogether.

Croup is a frightful disease. No disease of children so alarms the household.

EDWARD

### A HEALTHY FAMILY

**Kept the Children Well.**  
Mrs. K. Kane, 196 Sebor St., Flat 1, Chicago, Ill., writes: "Peruna has been used so long in our family that I do not know how I could get along without it."

"I have given it to all of my five children at different times when they suffered with croup, colds and the many ailments that children are subject to, and am pleased to say that it has kept them in splendid health."

"I have also used it for a catarrhal difficulty of long standing, and it cured me in a short time, so I have every reason to praise Peruna."

It is impossible to estimate how many homes have been protected against croup by the proper use of Peruna.

**Household Remedies.**  
There is no remedy in the world which has proven so popular for catarrh as Peruna. It has been used for more than thirty years and cured thousands of cases, as proven by our testimonials.

In the early history of this country every family had its home-made remedies. Herb teas, blitters, laxatives and tonics were to be found in almost every house, compounded by the housewife.

sometimes assisted by the apothecary or the family doctor.

Furnishing medical compounds direct to the people, through the druggists, is simply the extension of the practice begun by the people themselves.

**Nervous System a Wreck.**  
John G. Hardier, Garfield, Kan., writes: "On December 2, 1899, I was injured by a fall on the Santa Fe R. R., and my entire nervous system was impaired by the same. The help of a physician was useless. I believe I tried every one in the vicinity, but all were alike and I remained without strength."

"I then tried Peruna, and after using it for three months was totally well. I am seventy-one years old, and my work on the railroad is hard and tedious, but I can work like a young man in all kinds of weather, heat, cold, rain, snow or storm alike."

"Peruna is the purest and best medicine, and if used according to directions, it will help any person and cure any disease for which it is recommended. I recommend this medicine by my own experience to any one suffering from an ailment on the order of mine."

**For Himself and Children.**  
Mrs. Aline DePasse, 226 E. 16th St., New York, N. Y., writes: "It gives me pleasure to testify to the curative qualities of Peruna and Manalin."

FATHER AND CHILD.

Mr. J. M. STANSBERRY AND DAUGHTER

**Catarrh of Stomach.**  
Mr. John M. Stansberry, Amarillo, Tex., writes: "For several years I had catarrh of the stomach. I was hardly able to do anything, and could not eat with any satisfaction."

"When I commenced using Peruna, I weighed only 110 pounds. I took six bottles, commencing in the spring, and by the following winter I had gained 63 pounds."

"I owe it all to Peruna. It cannot be praised too highly. I am forty-five years old, and my occupation is that of architect and builder."

"I was afflicted for over seven years with catarrh of the head, throat and digestive organs. I consulted many physicians, but they did me no good."

"One day I happened to read some testimonials in your Peruna Almanac. I decided to try Peruna and Manalin. I bought a bottle of each and after taking them for a week, I noticed a change for the better. So I kept it up and after using twelve bottles I was perfectly cured."

"I also gave the medicine to my children and they had the same beneficial result. I would never be without these remedies in the house."

"I highly recommend Peruna and Manalin to all my friends, and, in fact, to everybody."

"If families have learned to rely on Dr. Hartman's judgment on his remedy, Peruna, they are doing well."

**We are well equipped for pressing, cleaning and altering clothing at all times. Charges very reasonable and all work guaranteed. Bring your suit to the barber shop.**—GAUS ADAMS.

**Cured of Lung Trouble.**  
"It is now eleven years since I had a narrow escape from consumption," writes C. O. Floyd, a leading business man of Kershaw, S. C. "I had run down in weight to 135 pounds, and coughing was constant, both by day and by night. Finally I began taking Dr. King's New Discovery, and continued this for about six months, when my cough and lung trouble were entirely gone and I was restored to my normal weight, 170 pounds."

Thousands of persons are healed every year. Guaranteed at H. D. Thornton & Co.'s drug store, 59c and \$1.00. Trial bottle free.

**We have the millinery goods you want and we make the price to suit.**—GILLIS WILKINSON MILLINERY CO.

York City, Nov. 25th, Thomas B. Yuille, head of the leaf-buying department of the Tobacco Trust, admitted all this. At the same time Caleb C. Dula, another officer and vice-president of the Tobacco Trust, swore that he had practically destroyed all business opposition, that its principal competitors were now "out of business or had been absorbed."

As demonstrating that it is speaking by the records and not from mere words of mouth, the Times calls attention to this most recent evidence of the outlawry of the Trust.

It is a matter of certainty that, for several years, the Trust took the farmers' tobacco at whatever price it chose to pay for it. That he was robbed goes without saying and is beyond dispute. Dark tobacco sold at from 75 cents to \$3.25, and Burley tobacco suffered cruelly. Tobacco growers were financially snuffed out. Hundreds of them were forced to the wall, and wreck and ruin trod fast upon each others' heels through all the tobacco districts.

As a last resort the farmers banded themselves together to fight the Trust. How well they succeeded is known of all men. Dark tobacco moved up from 75 cents and \$3.25 to \$6, \$8 and \$9. Burley heartened up amazingly. In a large measure, the Trust was forced to come to terms by the farmers.

The events thus briefly and imperfectly sketched were the forerunners of those now occurring. The Tobacco Trust is attempting to break down farmers' protective associations of all descriptions. They are fighting to recover their lost ground and to re-establish an era of low prices of starvation and ruin to producers. It is confidently predicted by their agents and emissaries that, within six weeks, tobacco

every newspaper in Kentucky owes it to itself and to the public to review the past as well as the present; to review all the facts, fairly and squarely, and to denounce the robber Tobacco Trust as unsparingly as it does the victims of the Trust—who are its friends and neighbors.

The Hopkinsville Kentuckian of last week contained the following very graphic account of the arduous duties of the great and holy army of tobacco grower killers stationed at Hopkinsville by His Majesty, Governor Angus I. The awful perils and hardships of the soldiers is shown by reading the article:

"Nobody in the town is having as much sport as Co. H. When not on duty they kill time throwing ball, boxing, footracing, etc. One of the lieutenants put on the

itself on being the first paper in the state to demand the repeal of the law, and feels that it was largely instrumental in creating the sentiment that will bring it about:

"The dog law seems doomed, and without Ed Croan, the author of the famous measure, to fight for it in the House it now seems probable that it will be repealed. A bill repealing it will be introduced in one or both Houses early in the game and from the way those members who were in Louisville yesterday talked the repealing bill will be passed. To the law is charged the loss of many Democratic votes, and some are inclined to blame the defeat of the Democratic ticket on the dog law."

Farmers, put it up to the Governor and find out how many troops he ever sent out after the tobacco trust violators of law?

## H. L. NANCE & COMPANY, PRIZERS FOR ASSOCIATION Hazel, Kentucky.

We have rented the renovated tobacco factory of Mr. Osbron, at Hazel, Ky., and are now ready to receive and prize your tobacco. We will ship your tobacco to any place you want it shipped. We have employed Mr. Bates Richardson for our book-keeper. He has had experience in book-keeping for the association. We have also employed Mr. Will Clapton as foreman in the factory. He has worked for the association every season since it was organized, and he hopes that his friends and others will bring us their tobacco. Not only out of sympathy to him for the hard times he has had this year but mainly because we have the very best laborers that can be produced for pricing your tobacco to the very best advantage. We will pay our very best attention to your tobacco because at the end of the season we want our patrons and all to say H. L. Nance & Co. are the best.

## H. L. NANCE & COMPANY.

## For that Dandruff

There is one thing that will cure it—Ayer's Hair Vigor. It is a regular scalp-medicine. It quickly destroys the germs which cause this disease. The unhealthy scalp becomes healthy. The dandruff disappears, had to disappear. A healthy scalp means a great deal to you—healthy hair, no dandruff, no pimples, no eruptions.

The best kind of a testimonial—Sold for over sixty years.
