Fulton Has the Purest Water Between the Great Lakes and Gulf of Mexico, South

# FULTON ADVERTISER

Vol. 2 No. 31

FULTON, KY., JUNE 25, 1926

R. S. Williams, Publisher

## Fulton Water Unsurpassed

Sparkles With a Bluish White,  
of Exceptional Purity

Fulton has a just right to feel proud of its water supply that flows from two deep wells. One well has a depth of 680 feet while the other is 672 feet deep. The quality of the water is unsurpassed and sparkles with a bluish white of exceptional purity. An analysis of this water made by the bacteriologist of the Kentucky Board shows that it is pure—is absolutely free from any organic impurities and that the percentages of sodium chloride, sodium sulphate and magnesium carbonate contained in the Fulton water makes it very wholesome for drinking purposes. Indeed, Fulton water is naturally so cool, clear and palatable that it is a pleasure to drink it in midsummer. It has been pronounced the best and most healthful water between the great lakes of the north and the Gulf of Mexico, south. No diseases like typhoid fever, or others that are caused by impure water, have occurred in Fulton since the city erected and began operating its excellent waterworks in 1893.

The plant originally cost \$30,000. It was, perhaps, the best investment the municipal government ever made. It is at present worth about \$100,000. Improvements have been made at the plant from time to time. The mains have been extended and new hydrants located in various parts of the city, and the supply increased with new wells, in keeping with the city's growth.

A report received by Mayor Shankle and the County Health Department this week from the State Health laboratories on samples submitted from the city water supply, says it is pure, and up to the usual standard.

Monday night the reservoir at the water plant was thoroughly cleaned out with the usual precaution and care of keeping the water up to its deserved reputation of purity.

The supply of water is not only ample to meet the city's present needs, but the future needs of the city has been anticipated for many years.

The mayor and water works committee of the city council are ever watchful for the best interests of our citizens and it can safely be said that through their efforts the plant and the entire water works system has reached the pinnacle of perfection.

It may be said, too, that Fulton people enjoy a low rate, if not a lower rate, than the average city of this size.

## FINISHING TOUCHES TO EDGEWOOD-FULTON CUT- OFF BEING MADE

The Fulton End Has Practically  
Been Completed and Sev-  
eral Miles of Steel Laid

The H. W. Nelson Company is to be congratulated on the splendid work done on the Illinois Central cut-off line, and the rapidity in which they are completing their part of the contract. This company is among the largest contractors in the country and are well equipped to handle big contracts on short order as the recent work accomplished demonstrates.

Since starting the work in January, 1925, they have maintained offices in Fulton with an efficient and clever office force, circulating thousands and thousands of dollars thru the regular business channels.

The work of grading, etc., at this end of the cut-off has practically been completed and several miles of steel laid.

When completed, the line

will be 166 miles in length, extending in almost a straight line from Edgewood, Ill., to Fulton. It is said the grades on the new line will be reduced from 42 feet to 16 feet per mile and save 22 miles in distance, as compared with the grades and length of the existing line. Hence it is properly called a cut-off. The curvature will also be reduced from the present maximum of five degrees and all told there will be a reduction of 2,780 degrees in curvature and 700 feet in rise and fall. These results, we are informed, are made possible by departing widely from the present route, as the new line parallels the existing one at a distance of about 20 or 25 miles to the east, and opening up a good deal of new territory, and with short branch line construction, it will have access to the extensive coal mining district in Franklin County, Ill., affording marked advantages in the haul to Chicago and other northern points over the routing from this locality over the present line.

Details of the construction features have previously been published. One of the remarkable features about this construction is three tunnels thru rock, one exceeding a mile and a half in length and another upwards of 3,000 feet. Another feature, is that the new line will have no grade crossings with other railroads crossed, and crossings with public highways at grade will largely be avoided.

About twenty-two years ago the existing line was double-tracked, so when the new line is completed, the Illinois Central will have practically a three track road covering 166 miles. Such an arrangement affords an improved route one way for the tonnage trains or fast passenger traffic, and the old route may be retained for service.

## BOY SCOUTS WILL ENJOY OUTING

Dr. Hughes and Dr. Read went to Camp Buwath this week to make arrangements for the summer camp of the Boy Scouts, which will open on July 24, when the first section will be inaugurated, continuing for ten days. On August 2, the second section will start, running till August 11, when the camp will close.

The general committee of the Boy Scouts will have one or more members in the camp during the two sessions and there will be a number of experienced camp leaders present at all times to instruct the boys in camp lore and duties.

Cots, tents and cooking utensils will be furnished, but each boy will be obliged to furnish his own blankets and other bedding. The cost will be sixty five cents per day per boy, as was the case last year.

Instruction in swimming and first aid to drowned will be a prominent feature of the instruction, and the usual hikes, campfire stunts and other amusements will keep the boys busy and interested.

These camps are of great benefit to the boys, both from a health and character building point of view, and every scout who possibly can should be in one or the other of the two sections.

## Foolish Season Is Here

## Big Night Show Feature Of 1926 Fair

The Fulton County Fair opens this year on Tuesday, August 24, and great interest is already being manifested not only by the several hundred stockholders scattered over five counties adjoining Fulton, but by the entire population of surrounding towns.

This is the first year that the Fair Association has announced a night show which is meeting with the hearty approval of many who are not able to attend the day exhibitions. The directors are exerting every effort to give the people of Fulton and surrounding country, the best fair in its history, and several free attractions have already been contracted to entertain the crowds.

The purses for harness races have been increased this year and are attracting the attention of horsemen over the country, and a number of fast pacers and trotters have already been booked.

The association has the best half mile clay track in Western Kentucky, or Tennessee, assuring fast races and good time. The grounds are abundantly supplied with the purest and best artesian water and other conveniences.

To miss a visit to the fair this year, is to miss the best ever, as there will be something doing from the moment the big gates swing open on Tuesday morning, August 24, until it closes, Saturday night, Aug. 28.

Tell your friends to be sure and meet you at the Fulton County Fair and enjoy the big event with you.

The grounds are only one block from the passenger depot and three blocks from the business section of the city, so there will be no inconvenience or delay in getting to and from the grounds.

## STATE AGRICULTURAL COLLEGE DONATES TO FULTON POUL- TRY SHOW

The State Agricultural College has made a donation of twenty-five dollars to the fund of the Fulton Poultry Association, which will be used for prizes at then County Fair Exposition this fall.

The officials of the Poultry

Association, particularly Superintendent Watkins, are working steadily to have everything in readiness for the biggest poultry show that Fulton has ever seen, and unless all signs fail, there will be more birds shown and more owners represented, than were supposed to be in this part of the country.

While it is impossible to learn just how many have gone into the chicken business this year, it is evident that there are a number of beginners, as we have learned from time to time, of those who have purchased 100 to 500 chicks this last spring.

This is an encouraging sign, and the association members feel that their efforts to interest the farmers in the raising of better poultry is beginning to bear fruit, and are correspondingly gratified.

Any information desired on the subject of poultry raising will be cheerfully furnished by the officers of the Fulton Poultry Association.

## THREE WOMEN BURN TO DEATH AT MAYFIELD

Mother, Daughter and Their  
Guest Die in Fire at Will  
Dunn Residence

Three women, a mother, her daughter and their guest, Mrs. F. E. Webb, 58, Miss Rebecca Webb, 26 and Mrs. William Parker, 66, of Wingo, were burned to death early Monday morning in a fire that destroyed the residence of Will Dunn on North Fifth street, Mayfield, Ky.

Mr. Dunn was aroused about 2 o'clock by the coughing and strangling of his wife, caused by smoke, and gave the alarm to the other occupants of the house. Mrs. J. T. Broadnax, of Atlanta, Georgia, who occupied a front room, escaped thru a window. Mrs. Webb and her daughter occupied an apartment on the north side of the house and Miss Webb called out that they would be out in a minute, when Mrs. Dunn called to them.

Runs Back Into House  
Later Miss Webb was seen on the front porch but went back into the house evidently to get her mother and friend.

Mrs. Webb was found lying on the bed with her feet hanging over the side. The body of her daughter was found near the front window with the body of Mrs. Parker across it. Miss Webb, it appeared, had given her life in an attempt to rescue her mother and friend.

Send the Advertiser to a friend one year—only \$1.00.

## FULTON DRUGGIST HONORED

In the May issue of The Kentucky Druggist, published at Louisville, a good likeness of Mr. Joe Bennett, Sr., our local druggist, is the central figure on the front cover page. On the fourth page of the same issue the editor has the following:

JOE BENNETT, Sr.

"Mr. Bennett, whose picture we feature on our cover page, was born May 29, 1866, on the farm of his parents, near Fulton, Kentucky. After serving an apprenticeship of two years under Dr. A. B. Whayne, a popular physician and owner of a drug store on Lake street, Fulton, Kentucky, Joe Bennett then attended Chicago College of Pharmacy and took the Kentucky State Board examination July 26, 1889, and J. H. Wiley, B. Johnson, J. W. Fugler and Dr. Rodgers, going to each one respectively at his place of business in Louisville, Kentucky.

August 1, 1890, Joe Bennett, and his older brother, Samuel A. Bennett, began business at Fulton, Kentucky, Lake Street, purchasing their opening stock from Robinson & Pettit, Louisville, Kentucky, fixtures included, at a cost of less than \$1,000.00. Since the first day have not failed to discount bills.

"Bennett Bros. continued this partnership for 32 years, when Joe Bennett bought out his brother, who retired July 1, 1922. During this partnership of 32 years, 25 per cent of the business was credit, and at the time Joe Bennett bought out his brother, there was less than \$300.00 owing to the firm. An unusual record due to the efficient collecting of the senior member, Samuel A. Bennett.

"Joe Bennett continues business at the same place on Main street, which he also owns. His daughter, Mrs. W. H. McGee, is bookkeeper, and his son-in-law, W. H. McGee, prescriptionist. Joe Bennett, Jr., has served an apprenticeship of four or five years at Bennett's Drug Store before entering Louisville School of Pharmacy, October, 1924. After graduating in June, 1926, he, too, will be engaged with his father at Bennett's Drug Store, Main Street, Fulton, Kentucky."

R. U. Campbell, wife and son, of Tampa, Fla., are in the city spending a few weeks with home folks. Mr. Campbell is a former resident of Fulton and has many friends here. He says Tampa is a wonderful city and he is carried away with the delightful climate.

## ACTIVE ORGANIZATION

Last week was an active one in the Masonic circles of the city. Tuesday night, Roberts Lodge met at a stated meeting and conferred the Master's degree. After the work was finished and the lodge closed, ice cream was served for refreshments.

Wednesday afternoon work was started in Jerry Moss Chapter, R. A. M., and continued until 6:30, when the craft filed into the dining room and seated at tables filled with the choicest of viands, and after partaking of the good eats, they returned to the hall, and resumed labor.

W. H. Tritt, of Paducah, Grand Master of the Second Veil of the Grand Chapter of Royal Arch Masons of Kentucky, was received and given grand honors, after which he made a splendid talk complimenting the chapter on the good work done, and the efficiency of its officers. D. Fred Worth made a few splendid remarks that was enjoyed by the companions, also Dr. Boyd and a number of others. The meeting was well attended, quite a number of out-of-town Masons being present.

On the following Friday evening, Fulton Commandery, Knights Templar, held a stated meeting, and after transacting the usual business, was closed, and had the pleasure of witnessing a very fine program, consisting of the following:

Waltz, Moszkowski—Piano solo by Mrs. Sisk.

Songs, "Pinin' for You," and "I Never Knew," by Miss Mabelle Hill. Piano accompaniment by Mrs. Sisk, that was sweetly sung and splendidly played.

"Bith Smith" and "Watchin' the Sparkin'" two readings by Miss Mabelle Taylor, which evoked lots of mirth and were enjoyed by her hearers.

Miss Mary Gordon Warner, a youthful terpsichorean artist, entertained the crowd with a few serpentine gyrations called "The Charleston," that was highly appreciated and enjoyed very much.

It was a splendid entertainment and the Knights certainly appreciated the entertainers' kindness, and hope they will repeat the same some time that is not very far distant.

## GEORGE W. LEMOND ON I. C. HONOR ROLL

On page 54 of the June number of the Illinois Central Magazine is the following:

"George W. Lemond, section foreman, Fulton, Ky., was placed on the honor roll, effective December 1, 1925, with thirty-five years of continuous service to his credit. Mr. Lemond has written the following short account of his career for the magazine:

"I was born June 12, 1858, in Gibson County, Tennessee. I worked on a farm until I was twenty-five years old. I began working on the section at Idlewild, Tenn., in 1884, and served as a laborer and foreman until 1889. I have been in continuous service with the Illinois Central since November, 1890, on the Tennessee division.

"Eleven children were born to my good wife and myself. Three sons are now employees of the Illinois Central, all section foremen on the Tennessee division. I also have a son-in-law, who is employed by the road. All of us think that the Illinois Central System and its officers are the best in the whole country. I have always had good supervising officers over me and through the magazine I desire to thank the management for providing me with a pension which will make it easier for me in my declining years. I shall continue to be a member of our great Illinois Central family, always ready to speak a good word for the road."

Read the advertisements in this paper.

## AIR DRIED CLOTHES

Do you realize what it means to receive a bundle of thoroughly washed and air dried clothes from a modern power laundry?

It means that at last the only remaining barrier between the housewife and the laundryman has been broken down. Because, now the modern laundry not only washes clean whatever you choose to send, but also duplicates in every respect the method of drying that the housewife has employed for time immemorial, namely, the hanging of the washing on the old-fashioned clothes line, to bask and dry in the glorious sunshine.

The greatest development in years and years, comes to this steadily growing industry in the perfection of a natural drying process. This new method of drying by air eliminates for all time that unmistakable odor which has branded the work of the power laundry in the past.

### Thousands and Thousands of Cubic Feet of Concentrated Sunshine

The scientific application of air as a drying agent in the power laundry is accomplished by the perfection of the Vorclone Drying Tumbler. This most wonderful machine harnesses clean fresh air in such great volumes that it almost entirely eliminates the necessity of heat to dry clothes with. It dries clothes by air, evenly and gently, ventilating them thoroughly, freeing them entirely of all lint, leaving them soft, fluffy and perfectly odorless. Clothes dried in this manner are never shrunk, discolored or left with a harsh feel.

The Vorclone Tumbler used in our laundry is the only drying tumbler that does not depend solely on heat to dry clothes; it is the missing link in an otherwise perfect laundering process. It puts the work of the power laundry on par with that of the housewife's own private laundry.

Be sure to see this wonder machine in our laundry anytime, feel and smell the clothes it dries, notice how fresh and sweet smelling they are.

## Phone 130

When you see the pleasing results, the economy and the convenience of this complete service, you are going to put a ban on "home wash days" throughout the year.

### Society.

#### BRIDGE COURTESY

Miss LaVerne Browder charmingly complimented her attractive house guest, Mrs. Walter Jeter, Jr., of Memphis, with a beautiful party Wednesday afternoon at her suburban home. Mrs. Eldridge Grimes, of Memphis, sharing the honor. Early summer was stressed in the flowers attractively arranged in vases and baskets, and in the frocks worn by the hostess and honorees.

Four tables were placed for the game of bridge with individual bon bon dishes. Trophies for high score went to Mrs. Mozelle Smith, Mrs. Jeter and Mrs. Grymes were given very attractive favors of the occasion.

Following the game, a lovely salad course was served. The hostess was assisted by Mrs. Herman Roberts and Mrs. Adie Paschall.

#### CIRCLE NO. 5 MEETS

Circle No. 5 of Missionary Society of the Baptist church, was delightfully entertained Monday afternoon at the home of Mrs. Carl Hasting on the Terry Road.

Baskets of sweet peas, and vases of Paul Neron roses adorned the rooms, giving a touch of grace and beauty to the occasion.

Dispensing with the regular scripture, each one present gave their favorite verse in the Bible. Roll call was answered by 21 members, naming a book in the Old Testament. After the business session, which was conducted by Mrs. Hasting,

Mrs. Clara Williams was the leader of an interesting program, being ably assisted by Mesdames Larry Beadles, Earl Taylor and E. H. Lovell. In the late afternoon a delicious ice course was served.

#### THURSDAY BRIDGE CLUB

The home of Mrs. Ramsey Snow was the scene of a pretty party Wednesday afternoon when she obtained her bridge club and a few additional guests.

The reception suite of the attractive bungalow was thrown into one spacious apartment which was swept by the fragrance and colorfulness of summer flowers in profusion.

Seven tables were filled for the game.

The club prize for high score was won by Mrs. Robert White. Mrs. Ed Thomas obtained the guest prize. Mrs. Trevor Wayne cut consolation. Exquisite handmade handkerchiefs were given to Mrs. Robert Whitnell of Dyersburg and to Mrs. Will Ezell, of Paducah.

The plate luncheon following the game was delicious and sumptuously served.

#### Elks Dance An Enjoyable Event.

The welcoming dance Friday night given by the Elks at their club rooms on Lake street in honor of their new members recently initiated into the order, was one of the most enjoyable events of the season. Two hundred invitations were sent out, and the neighboring towns were well represented by pretty girls and handsome young men. One of the best orchestras that could be found furnished the music. The entertainment committee of the lodge is to be congratulated on giving such a nice dance and entertainment.

#### POPULAR COUPLE SURPRISE THEIR FRIENDS

A wedding of much surprise to their many friends occurred Saturday night when Mr. Ru-

bert Barber and Miss Barbara Coulter, both well known young people of this city, were married at the Episcopal parsonage by the Rev. A. C. Boyd. Following a brief visit to Louisville, the couple will return to Fulton to make their home.

#### MRS. CROFT HOSTESS

An attractive affair of Tuesday was the Thimble party given by Mrs. Carl Croft, at her home on Vine street.

All kinds of summer flowers in their frocks of sunfast colors nodded gay welcome to guests, and emphasized the attractiveness of the occasion, while sewing and conversation were enjoyed in their midst.

There were two contests for diversion, which resulted in awards of merit, a white elephant tape measure being won by Mrs. Herman Cole. Mrs. Brooks Henderson won a pretty vase.

In serving a delicious ice course, the hostess was assisted by Mrs. J. A. Colly. Sweet pea corsages were given as favors.

#### BEAUTIFUL TEA COURTESY

Mrs. Burrows Butterworth, a bride of recent date, was the inspiration of another beautiful party when Mrs. J. M. Culver and Miss Blanch Waggener entertained with one of the largest teas of the season.

Yellow was the color note, and flowers everywhere graced the occasion and gave additional beauty to the Culver home. The soft shaded lights and the colorful gowns of those assisting, made quite a charming picture.

The tea table was a gorgeous picture with a silver bowl filled with the chosen colored flowers, giving the central color note. This was flanked by silver candle holders with yellow tapers.

Mrs. Guy Gingles received at the door, while Mrs. Culver, gowned in tan georgette, was graciously assisted in welcoming the guests by Miss Waggener, wearing printed georgette, with lace trimming, and the honoree, Mrs. Butterworth who was lovely on this occasion in flesh georgette, elaborately

trimmed in lace. Mrs. Chas. Hester, of Memphis, in a frock of figured georgette with touches of black and Mrs. Russell Travis in rose crepe. Mrs. Hardeman Howard, assisted by a bevy of young ladies, Misses Florence Wade, Mildred Huddleston, Mary Elizabeth Beadles, Dorothy Granberry, Elizabeth Carter, Ruth Atwood, Mrs. Chas. Price served tempting refreshments. The yellow color scheme was prettily woven in the ices and mints.

Mrs. Stewart Brown and Mrs. Morris Chowning kept the register in a lovely book, which was presented the honoree in memento of the occasion. Others assisting, were Mrs. B. D. Maupin and Mrs. Smoot Morris. About two hundred called during the afternoon.

An enjoyable musical program was given throughout the afternoon by some of Fulton's talented musicians.

#### MRS. L. O. CARTER ENTERTAINS

Thursday afternoon, Mrs. L. O. Carter was the gracious hostess to a lovely bridge, when she entertained the members of her club and a few extra guests.

The rooms were gay with quantities of flowers which accentuated the charm of the environment. The company filled four tables. Mrs. Guy Snow was awarded the club prize for high score, while Mrs. S. C. Smith won low score. Miss Lorene Parker held highest score for visitors. Refreshments in salad and ice course were most enjoyable in the late afternoon.

#### MISS TAYLOR BRIDGE HOSTESS

Tuesday afternoon, Miss Maurine Taylor was the charming hostess to a lovely bridge at her home in Fair Heights.

Flowers in abundance from summer gardens did homage to the occasion and gave additional beauty to the rooms where four tables were in readiness for the game.

Favors for high and low score were given and a wonderful luncheon followed the game.

#### COLORFUL SUMMER PARTY

In the Franklin home on Third street, a pretty social compliment was paid a group of charming visitors, Tuesday afternoon, when Miss Estelle Slaughter entertained at bridge in special courtesy to her sisters, Mrs. Tom Williams, of McComb, Miss., and Mrs. H. G. Wendland, of San Angelo, Tex. Many flowers graced the spacious rooms and nine tables were arranged for the game of bridge.

For highest score, Maderia napkins were won by Mrs. Abe Jolly. Mrs. Paul Pickering made the fortunate consolation cut which was silk hose. Lovely silk lingerie was given to the honorees. Following the game, delicious refreshments were served.

#### BENEDICT-BRADBERRY

The marriage of Miss Mary Elizabeth Benedict and Mr. William Irl Bradberry, of Clinton, Ky., was solemnized at the First Baptist church in Fulton last Sunday morning at nine o'clock. The Rev. Wauford, pastor of the Clinton Baptist church, accompanied them to Fulton, and was the officiating minister.

The wedding couple was also accompanied by Mr. and Mrs. Fred Lenzer, Miss Jackson and Mr. Ira Bradberry, the latter a brother of the groom.

The bride is the daughter of Mr. and Mrs. Ned Benedict, of Clinton, and a niece of Mr. R. T. Benedict and Mrs. Joe Hillman of this city. She is a graduate of Hickman county High school and a favorite of the young social circle of Clinton.

The groom is the son of Mr. and Mrs. W. M. Bradberry, of Clinton, and is local manager of the Clinton Telephone Co., a man of splendid moral character and is recognized in his home town as a mechanical genius.

The young couple have a large circle of friends in Clinton who will join in wishing them much happiness.

After an automobile trip to Chattanooga and other points in the south, they will be at home to friends in Clinton.

## Advertising a Sale!

YOU don't leave your rig in the middle of the road and go to a fence post to read a sale bill do you? Then don't expect the other fellow to do it.

Put an ad in this paper, then, regardless of the weather, the fellow you want to reach reads your announcements while seated at his fireside.

If he is a prospective buyer you'll have him at your sale. One extra buyer often pays the entire expense of the ad, and it's a poor ad that won't pull that buyer.

An ad in this paper reaches the people you are after. Bills may be a necessity, but the ad is the thing that does the business.

Don't think of having a special sale without using advertising space in this paper.

**One Extra Buyer**  
at a sale often pays the entire expense of the ad.  
**Get That Buyer**

## The Advertised Article

is one in which the merchant himself has implicit faith—else he will not advertise it. You are safe in patronizing the merchants whose ads appear in this paper because their goods are up to date and not shop worn. : : :

### A Few Little Smiles

**THE NAME SUFFICIENT**  
"Speaking of epitaphs," writes W. R. "Mr. Roosevelt once showed a friend a gravestone in Oyster Bay which bore the inscription: 'Here lies Annas Doughty, who died in 1751.'"

### A SERIOUS ENCOUNTER

Billy—Miss Skelton turned her back on me and cut me dead.  
Philip—Gosh! and her shoulder blades are sharp enough to give you a severe cut.

### Proverbs True

On board a tossing ship  
I find it true,  
I cannot eat my cake  
And have it, too.

### Shopping Habit

"The cloth matches the sample perfectly, madam."  
"Yes, it certainly does—it couldn't be a better match."  
"How many yards do you require, madam?"  
"Oh, not any yet. You see, this is the first shop I've tried."

### Seat of the Pain

Little Natalie complained that she found it painful to swallow and her mother was worried about it. "Are you sure your throat pains you?" she asked. "Tell mother just where the pain is."  
"My tongue hurts where it was put in," replied Natalie.

**Courtesies**  
"What do you understand by the term 'senatorial courtesy'?"  
"It is not clearly defined," answered Senator Sorghum. "But to a certain extent it implies the assumed privilege of being impolite to a newcomer."  
—Washington Star.

### DOMESTIC SCIENCE

"This item says married men commit suicide more often than single."  
"Well, science enables a man to do almost anything these days."

### Polite Poesy

Old Homer was a poet rough,  
Who wrote of battle scenes,  
I fancy he'd be much too tough  
For current magazines.

### Difficult Case

"My daughter is out at all hours."  
"Can't you get her to curtail her late hours?"  
"No, the case is hopeless. Even the idea of heavy sleep doesn't appeal to her."

### Traffic Expert

"Do you understand the traffic signals?"  
"Perfectly," answered the girl who was driving with an out-of-town license tag. "When the car ahead of me starts, I do the same."—Washington Star.

### Sure Enough

"Don't throw away that old coffee pot."  
"Why not?"  
"Put it in the attic. Who knows? Within a few years it may be a valuable antique."

### Reason

"Why have you a black band around your arm? Who died?"  
"Nobody. I burned a little hole there with my cigar."

### Good Reason

Aunt—Oh, Elsie, I'm sure you never saw me behave like that.  
Elsie (four years old)—Well, I haven't known you so very long.

## Community Building

### Up-to-Date School Is Vital to Community

Every patron of the public school system owes an obligation to that system. If improvement in the schools is not keeping pace with progress in industry, in farm machinery, in general transportation, including roads, type of vehicles, and the like, there is something wanting in the school system, we may be sure. Even though it may be possible to set forth on paper measurable and tangible progress year by year, improvement must proceed continuously and school officials and patrons will be wise to form the habit of looking backward over a period of five or ten years to assure themselves that improvement in school administration and practice parallels that in other fields. A bulletin issued by the county board of education of Wilson county, N. C., recently received in the bureau of education, Department of the Interior, represents a fine piece of educational publicity. It is an account of progress from the school officials to the school patrons. It shows in pictures and in other ways the changes that have taken place in the schools of the county during the ten-year period. Among other accomplishments the number of schools has been reduced from 57 to 17; school attendance has increased 64 per cent, while the investment in school property is nearly twenty times as great in 1924 as in 1914. One-fifth of the children are transported in school in auto trucks and 17 handsome buildings replace the "shacks" of former days. It is apparent that progress of this kind representing improvement in roads, in school organization, in appearance and adaptability of school buildings, cannot be effectively exhibited in an annual report. If, however, a five or ten-year period passes and no progress is noticeable, interested citizens have reason to think that there is something wrong with their school system. Lack of development, inertia, is as serious in school systems as in business or industry. School officials and patrons should hold themselves responsible for reasonable and continuing improvement.

### Home Ownership as Basis for Strength

Unhappily, the notion is still current among many people that four walls and a roof make a house, but they do not make a home. Nearly everyone has some kind of a house, it may be a place where he eats and sleeps, while he dreams of a home, a place which he has made a sanctuary for his wife and children, and where love and happiness reign supreme. A home and a shelter are two distinct phases. But real homes with their joys and their rewards were never more within the reach of the young men and women of the community than they are today. House-keeping, through the invention of new devices for household efficiency, has become easier, and freedom is greater on the part of women, because of the strides made in equipment and labor-saving devices and knowledge, both of the importance of the home as a factor in the social life and happiness of the community, and how to maintain it, was never so widely spread.—Exchange.

### Alabama Town Awake

Aniston has just incorporated a new foundry company for the manufacture of gray iron castings of miscellaneous type. The company will employ 50 men and already has large orders on its books. All of which is an interesting news item to Alabama, but the most interesting thing about it to us is the fact that Aniston citizens subscribed all of the \$15,000 stock necessary to create this new industry, thus showing that they have faith in their town and its advantages as a manufacturing center. It is a habit that is making Aniston citizens rich. They keep at home all of the profits of their industry and thereby create permanent and lasting wealth for Aniston.—Gadsden (Ala.) Times.

### Wisconsin Cities Zoned

Fourteen Wisconsin cities have adopted city planning and zoning ordinances within the past four years, says Prof. L. S. Smith, professor of city planning in the University of Wisconsin.

Professor Smith has prepared planning and zoning ordinances for Appleton, Waukesha, and Oshkosh, two of which have been adopted. The Oshkosh ordinance is expected to be adopted soon inasmuch as its passage has been recommended by the present city planning commission and various civic bodies.

### Tree Planting in Fall

Many trees should be planted in the late fall or just as soon as they become dormant. This planting results in better growth in the spring, the tree rooting in its new location better than if moved after it has begun to show signs of life. Very few types of tree cannot be moved at this time, and the home owner who is desirous of adding to his landscape should not put off his work too long before deciding upon the trees he wishes to plant.

## HUDSON COACH

\$1259

### "At Your Door"

Nothing Else to Pay

Brougham - \$1519

7-Pass Sedan 1750

All prices include freight, tax and the following equipment:

Front and Rear Bumpers  
Automatic Windshield  
Cleaner, Rear View Mirror,

## A WORD TO HOUSEWIVES.

You have at your command an institution which, with its modern equipment, makes it possible to give you an extra holiday in each week of the year. "The Home of Cleanliness" cares for your family wash in a clean, modern, sanitary way—no hanging of the clothes outdoors to catch germs circulating in the air, or in rooms where sleeping and eating are done, but clean tables and assorting bins care for your clothes until they reach you spic and span.

This extra precaution and insurance toward cleanliness costs no more. Why not take advantage of this extra day each week by sending the family wash to "The Home of Cleanliness?"

Choose one of our family wash services and make a holiday out of the wash day, with a guarantee for every precaution in safeguarding your clothes.

### DRY WASH SERVICE

For those who prefer to do their own ironing at home we now take the family washing and return it home clean and dry (not ironed) for 6 cents a pound. You will find many of the pieces so perfectly washed and dried that ironing will be unnecessary.

The Vorclone Tumbler used in the O. K. Laundry is the only drying tumbler that does not depend solely on heat to dry clothes, it is the missing link in an otherwise perfect laundrying process. Be sure to see this wonder machine at the O. K. Laundry any time, feel and smell the clothes it dries, notice how fresh and sweet smelling they are.

### ROUGH DRY SERVICE

Clothes washed, flat pieces, such as table cloths, sheets, towels, pillow cases, napkins, bedspreads, ironed and ready for use. Starch pieces starched and dried ready for ironing. This service for 10c per pound; 50c minimum package.

### FINISHED FAMILY SERVICE

Clothes washed, all pieces ironed and pressed ready for use. This service 10c per pound, with an additional cost of 10c per pound for the ironing of the starched pieces.

Choose the service best suited for your need and let us prove the economical way of answering your wash day problems. Don't be burdened with that worry.

### FOOD LIKE YOU GET AT HOME

This is truly a home-like restaurant because it has endeavored to break down the prejudice based on the theory that restaurants could not serve food like you get at home. Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat. Years of catering to the appetites of particular people make it possible for us to serve appetizing meals. The next time you want to eat away from home, bring your family here.

### Smith's Cafe BIG DINNER EVERY DAY 50 cents

### Chestnut Glade

Child Welfare Day last Tuesday was quite an interesting day for the mothers and the 32 youngsters examined. Dr. Heller was quite up to our expectations. So jolly with the little folks and ready with helpful advice for the mothers, Miss Bedford, nurse from Gibson county, assisted Miss Garrison and Dr. Moody in registering, weighing and examining the little ones.

The ice cream supper given by the P. T. A. Saturday evening was quite a success. All the ice cream was sold. The orchestra furnished music readings were given Wayne Lamb and Guy Finch entertained with jokes.

Those interested in the "City of the Dead" at Sandy Branch will meet Thursday before the first Sunday in July to give it the annual cleaning.

The Union meeting will convene at Sandy Branch Baptist church, Saturday before the Second Sunday in July and will continue three days. The protracted meeting will follow, continuing perhaps the rest of the week.

Bro. Morrison will arrive in the Pleasant View community Wednesday before the Second Sunday in July. Start the protracted meeting Wednesday night and perhaps continue throughout the next week.

Mrs. Ben Kimberlin is very ill with appendicitis and an operation seems eminent.

The entire community is saddened by the untimely death of little Alvin Bran, who was run over and instantly killed by a truck in front of his home in Detroit, Mich. The accident occurred last Thursday about noon. The remains were brought to the home of his grandfather, Mr. Milton Bran, last Saturday. Interment took place at Mt. Moriah Sunday morning at 11 o'clock. Elder Prince conducting the service.

Mrs. Bran is the daughter of Mr. and Mrs. Tom Jones, of Detroit, who formerly lived here. Little Alvin was 4 years, 8 months and 13 days old. A beautiful little boy, seemingly in perfect health. He leaves to mourn his loss, father, mother, grandparents, great grand

parents, great grand aunts and other relatives. We extend sympathy to the bereaved. Mrs. Ridgeway has returned from her visit to her daughter, Ina Pickle at Big Springs, Tex. She reports a pleasant visit. Everybody well and very much pleased with Texas.

Mr. and Mrs. Barrax spent a day in Jackson, Tenn., last week. Misses Rubye Taylor and Mamie Milam accompanied them. While there, they called on Miss Latta, who is in school at Union university, and Rubye's aunt, Mrs. Ivan Vaughan. Mr. Vaughan was a former teacher at Chestnut Glade who now holds a position in the business college at Jackson. They insisted that Rubye spend the next several days with them, promising a trip to Shiloh National Park, and attendance at the Chautauqua, which comes off this week. This proved to be so alluring, she hurried home, packed her grips and took the next train for Jackson where she is enjoying this intellectual treat this week.

Miss Anna Thompson and Katherine Phillips are in school at Martin.

Ripe tomatoes reported by E. J. Brundage, Omar Pounds, and Jesse Moore. Picking will begin next week.

### SICKLY, PEEVISH CHILDREN

Children suffering from intestinal worms are cross, restless and unhealthy. There are other symptoms, however. If the child is pale, has dark rings under the eyes, bad breath and takes no interest in play, it is almost a certainty that worms are eating away its vitality. The surest remedy for worms is White's Cream Vermifuge. It is positive destruction to the worms but harmless to the child. Price 25c. Sold by

Bennett's Drug Store, Fulton, Ky.

### Smith's Cafe

Neat and Attractive Service and Food the Best

It is a pleasure to go to this cafe for a lunch or full meal.

### REFRESHING DRINKS

Orange Julep, Grape Julep, Cherry Julep, are some of the refreshing summer drinks being served at Smith's Cafe. Here you get the pure fruit juices ice cold for five cents.

## A. HUDDLESTON & CO.

Porcelain-enameled tray under the burners—removable for cleaning. Tilting chimneys—easier to light, clean and rewick. Automatic wick stop. Solid brass burners. Patented wick cleaner. White porcelain enameled warming cabinet. Truly the best oil cook stove on the market today.

Come to us with your Hardware Problems.

AMERICAN Zinc Insulated FENCE IMPLEMENTS

## Senour's FLOOR PAINT

### "It Penetrates"

IN the word "penetration," is a secret manufacturing process that has made Senour's Floor Paint a popular favorite for over 40 years.

If a floor paint does not penetrate or grip into the wood it will soon begin to crack, chip and peel.

Senour's Floor Paint dries over night with a high gloss enamel-like finish, but at the same time it sinks into the pores of the wood and forms a film that will withstand the hardest usage and will withstand repeated washings without dimming the lustre.

Every can of Senour's Floor Paint is guaranteed to give satisfaction if directions printed on the can are followed or money back upon receipt of empty can.

A color card is yours for the asking.

FULTON, KY.

### Crutchfield, Ky.

Mrs. Traywick is visiting Mrs. Mollie L. Turney. They are cousins and she visited her 19 years ago.

Mr. and Mrs. Earl Williams, of St. Louis, are here visiting and looking after the hay crop. Mrs. Ollie Bruce, who has been very sick, is getting better now.

Mr. Bud Gaskins carried Mr. T. M. Watkins and family a head of cabbage that tipped the scales at 6 lbs., and an onion that weighed 12 ounces.

Mrs. Rose Estep, on route 1, is at the point of death, with dropsy.

Mr. T. M. Watkins and family and Richard Jeffries took dinner with Mr. and Mrs. O. T. Sayne Sunday and visited with them all afternoon.

Mrs. Irvine Jeffries is visiting relatives in Arkansas in hopes of recovering her health.

Mr. Jim Kearby is at Hot Springs, taking the baths and treatment, in an effort to regain his health.

Miss Mary Benedict and Mr. Ira Bradbury, of Clinton, motored to Fulton Sunday and got married. Their honeymoon trip will be a visit to Mrs. Bradbury's uncle in Georgia, and other points in the south.

Mr. Bradbury is an efficient electrician and a working member of the Baptist church of Clinton, and his wife is the accomplished daughter of Mr. and Mrs. Ned Benedict. We wish for them a happy and prosperous life. After this trip south they will be at home to their friends in Clinton.

Mrs. Rose Estep, on route 1, is at the point of death, with dropsy.

### Hickman News

Hickman, Ky., June 21.—Rev. E. L. Miley, who was pastor of the Christian church of Hickman for a number of years leaving here just about three years ago, has taken charge of the Christian church in Union City, succeeding G. J. Daniel, who went from Union City to Springfield, Tenn. Rev. Miley has been in Fostoria, Ohio, for some time past.

Rev. Miley was much beloved by the members of his church here and did excellent work while in this pastorate. Through him the old church was torn down and a beautiful new church erected, which debt has already been paid off, and also during his pastorate in Hickman he was instrumental in the buying of a nice parsonage for the pastor of that church. He more than doubled the membership while here, making an excellent record.

Ayrus Alfred Watson, residing several miles above Hickman, died at his home yesterday after a long illness, resulting from tuberculosis.

L. C. Adams and Miss Christine Gore of Fulton, were married in Fulton Saturday. The groom is a flagman on the Illinois Central railroad. The

### Handwork Gives Class to Simple Tub Frocks

Needlework, done by hand, puts the stamp of elegance on simple summer frocks of voile or linen. Here is a pretty affair in light colored linen, adorned with drawn work, applique and a touch of embroidery that give it class.

Hand us a dollar bill and get your name on the Advertiser list as a regular subscriber.

bride is 17 years old.

Rev. H. C. Butts, pastor of the First Methodist church, of Hickman, and who closed a big revival in this city on June 13, at which there were some 339 conversions and reclamations, left yesterday for Texas, where he will hold a two weeks' revival.

Mrs. Mary Kirk, widow of R. H. Kirk, died Saturday evening about 7 o'clock at her home in the county, death resulting after more than a year's illness, her health having started declining about three years ago. Mrs. Kirk was past 72 years old and had resided in this city the past few years, going back to her old home a short time ago.

While in Memphis, a few days ago, Steve Stahr, of this city, bought 1,000 acres of land. This land was sold "under the hammer," and was purchased by Mr. Stahr for \$9,500. This tract is located on Wolf Island, some twelve miles above Hickman, the largest island in the Mississippi river.

The four-year-old son of Mr. and Mrs. Charles Rinehart, of this city, suffered a number of painful cuts on his face when Mr. Rinehart's car collided with a car driven by J. W. Noble, the accident occurring on a curve five miles out from town Saturday afternoon.

### TUNNEL CAVE-IN KILLS FOREMAN

Two Workmen Injured, One Probably Fatally, On I. C. Cut-Off

Metropolis, Ill., June 21.—One man was killed and two men were injured, one probably fatally, when a section of a tunnel on the new Illinois Central cut-off near Grantsburg, nineteen miles from here, caved in this afternoon eighteen hundred feet from the entrance.

The dead man is Lyman Dofison, foreman, Sparta, Ill.

The injured are: Cecil Tatten, Omaha, Nebraska, who suffered serious external injuries, and is not expected to live, and Robert Warcheck, Vienna, Ill., who suffered cuts and bruises.

The men were working in the tunnel which is being driven through the Ozark Hills, when the roof caved in, pouring more than twenty yards of rock on them.

## INVESTIGATE

The man with the proper civic spirit investigates before he criticizes. He takes the trouble to look into the future of his own home town before he condemns it.

The trouble with most critics, as with the knocker, is that they do not know enough about the things they criticize. Constructive criticism is valuable because it carries with it a full knowledge of the situation, but just mere knocking is ignorance on a rampage.

There is nothing elevating or enlightening in continually finding fault, yet the small city frequently has this type of citizen with which to contend; a small minority which thinks the town is not good enough for them. But if it depended on their efforts, there would be no town at all.

If you know any one in Fulton who cannot see the advantages of making this a bigger and better town, get him to investigate some of the good things here our booster friend has done, and maybe he will drop the ax, for he will see fruits galore, enough for him and everybody in town.

## AMERICA FOR AMERICANS

Every means that could be devised by alert men has been employed to keep America for Americans, and the immigrant has been restricted for the protection of the American laboring man.

Now comes a new call for practical Americanism from the National Association of Manufacturers, which has opened a campaign to keep industry on the move and offset foreign encroachments:

"If every person in this country, when buying goods, will ask the question, 'Are they made in the U. S. A.?' he will not only circumvent those who are deliberately attempting to substitute foreign-made articles for the home produce, but he will be turning back to his own people millions of dollars annually that will go into the payrolls of American industry and keep this country at its present high standard."

The manufacturers maintain that an intelligently discriminating attitude continually maintained in purchases on the part of American buyers with the view of patronizing home industry, at least when its products are not inferior to imported competitive goods, would have a more stimulating effect on many classes of American manufacturers than an increase in the customs tariffs on those articles.

Some may view this as a selfish move on the part of the manufacturers. The demagogue may attack it as capital-

Aroma Invites Taste.  
The Mere smell of

## Goldbloom Coffee

begets a desire to taste it, after which you naturally become a regular customer of it. We invite you to try a tin. If you can resist the combination of aroma and taste, you differ from other coffee lovers.

At All Grocers.

istic, but the plea is sound economically and deserves consideration by all true Americans. America has a community of interests. What affects one class of business eventually affects all. Inversely, when one business prospers, others are benefited.

The same principle applies as in spending money in the community where it is earned. If all, or even a large per cent of wages, salaries and profits of Fulton men and women were spent elsewhere, Fulton would in time cease to exist and would no longer be a place where productive employment would yield returns.

Trade is the life of any community, just as it is the life of the nation. Communities and nations as well that zealously guard their commercial interests and endeavor to foster them, will thrive and grow.

Help make your home community prosper by spending and investing what you have at home. If you make this a rule, it will naturally follow that you will have a desire to be loyal to American-made products.

## SMILES

The smile is advance agent of friendliness, a token of good will, a messenger of kindness and evidence of satisfaction.

Of course, smiles must have foundation in some worthy thought, some good motive, for "One may smile, and smile, and be a villain," as Shakespeare made, the Danish prince to say in "Hamlet." And a smile may be meaningless, as in Julius Caesar:

"Seldom he smiles, and smile in such a sort

As if he mock'd himself, and scorn'd his spirit  
That could be mov'd to smile at anything."

Smiles have been the subject for poets and composers. "There's the smile that makes me happy and the smile that make me blue," as one old song once ran.

But the smiles that the Fulton boosters are calling for are the sincere smiles of contentment, the smiles that are induced by a spirit of good will and that are an indication of well being and prosperity.

The smiles—not forced or intended to deceive, but the smiles that are grounded in a faith in the community and a desire to let others know that living in Fulton is a joy that should be appreciated.

Neighborhood and good fellowship are worthy attainments for every community, and where such abound in large measure as in Fulton, an appeal for smiles should be very productive. It's easier to smile than frown. The former takes the least effort.

So why not smile, then, when there's something to smile about, and keep smiling the whole year through? It's a good healthy habit and it's "catching" too.

## THE COST OF PRIMARIES

One of the reasons advanced for primary elections, to nominate political party candidates, in the days before the primary was general, was that it put the poor and the rich on the same basis, in seeking public office.

Events of recent years have proved that those who promised such an improvement were false prophets. Senator Newberry lost his seat in the senate because it was shown that he spent \$190,000 to win the nomination.

But even that was mild to the Pennsylvania primary, according to evidence which was brought out at the senate investigation. Close to one and a half million dollars was expended, the Philadelphia headquarters of one candidate alone showing expenses of \$615,000.

The primary is not the panacea for all political ills. This has been amply well demonstrated in every state where it has been tried. It has been abused just as the convention system was abused by the politicians.

The primary requires candidates for offices of any consequence shall spend large sums of money to make any headway. They have to appeal to a large mass of voters rather than a selected list such as the convention delegates represented. It is doubtful if its advantages outweigh its disadvantages.

The man who devotes all of his time to criticizing others is unable to see his own shortcomings.

Perhaps some people wear tight shoes because they feel so good when they take them off.

All too often those who leave an impression that they mean what they say never say much.

The fellow who wants to share in the profits is never very keen about sharing in the losses.

Every man knows what he would do if he had the money but few do like he thinks he would.

Trying to get even very often makes a man seem odd.

Love makes the world go around to the furniture stores.

The height of fashion is more in the price than anything else.

One thing some folks save for a rainy day is rheumatism.

Buttons are hard discs that never escape the clothes wringer.

It's not so much what a man stands for as what he helps with.

When it comes to bank rolls, "Roll your own" is a good motto.

You can tell summer by the

increase in the vacation advertisements.

All signs point to the hottest summer since the summer of 1925.

No cities are bidding for the convention of reckless automobile drivers.

## FULTON ICE PLANT

No commodity for home consumption requires more care to maintain its purity than ice. Fulton is especially fortunate in this respect. As the products sold by the Fulton Ice company are made from water pumped from their own deep artesian wells, and every safeguard looking to its purity surrounds the manufacture of ice.

The Fulton Ice company was established in 1898 and has since been one of Fulton's leading industries. It enjoys a large business and hundreds of cars of ice are shipped out of Fulton to neighboring towns and sometimes to the larger cities. The consumer is especially anxious to get Fulton ice because they know it is made from pure freestone water coming from a considerable depth in the earth. There is no deposit of any kind in it and it is of the clearest, purest crystal, with a solid body.

R. H. Wade, manager of the plant, is one of our best known citizens. He has been identified with Fulton's growth and development for more than a quarter of a century, and has served the people loyally.

## J. E. RANKIN LEAVES FULTON

J. E. Rankin and family left this week for Columbus, Ga. For the past 23 years Mr. Rankin has resided in Fulton. Eight years employed at the city water plant, part of said time as

superintendent. He is a natural-born mechanic and will continue in this line of work. He has several flattering offers for his services in the West, but was undecided which to accept when leaving Fulton. The best wishes of his friends go with him.

**Horse-high--Bull-strong--Pig-tight**  
**--"Weather-wise"--Rust-proof**

SOUTHERN FENCE holds its own against the strongest pressure and resumes normal shape as soon as pressure is removed, because it has HINGED JOINTS. Also retains its shape in all weathers, as TENSION CURVES allow it to expand when hot and contract when cold. Made of the highest grades of tough, springy open hearth steel wire with extra heavy and uniform galvanized coating in which the best prime Western spelter zinc is used.

SOUTHERN FENCE IS LIFE-TIME FENCE—on the job all the while. You can get it here. We sell SOUTHERN FENCE under the guarantee of the Galt States Steel Company, who make it.

Fulton Hardware Co  
Fulton, Ky.

### Watch Your Diet, Says Prima Donna

Cyrena Van Gordon.

Cyrena Van Gordon, prima donna of the Chicago Opera company, believes in the flapper and her privileges. She believes in the practice of this much-discussed person in wearing no corsets, in wearing short skirts, going in for athletics and outdoor life and in thoroughly upsetting the theories and practices of her mother and grandmother.

Miss Van Gordon, who is, in private life, Mrs. S. Hogart Munns, the wife of Doctor S. B. Munns, says that all of these things are woman's right and are necessary if a woman is anxious to keep her youth and beauty. But exercise is not the only thing that is necessary for the woman who is desirous of being attractive. She must watch her diet and be careful not to eat anything that will, in any way, be fattening.

There are certain dishes to which Miss Van Gordon is partial and to which she gives the credit for the retention of her beauty. These dishes, she prefers to prepare herself and, when on tour with the Chicago Opera company, she carries a small electric stove in order that she will not be deprived of the food she deems necessary. These dishes are easily prepared.

Miss Van Gordon uses for:

**Celery and Cheese Casserole.**  
1 cup cheese 1 tbsp butter  
2 cups chopped celery 1 cup cooked spaghetti  
1/2 cup evaporated milk 1/2 cup buttered bread crumbs  
1/2 cup water 1/2 tsp salt  
2 tbsp flour

She makes white sauce of milk, water, butter, flour, and salt, and mixes it with all ingredients except crumbs. She then places it in an oiled baking dish and covers with crumbs, baking in a moderate oven until brown.

**Chicken a la King.**  
2 cups cold chicken, diced 1 cup evaporated milk  
2 tbsp butter 1/2 lb mushrooms  
2 tbsp flour 1 cup chicken broth  
1/2 green pepper, shredded 1 egg yolk  
1/2 pimiento, shredded Salt and pepper

Cook the peppers (also mushrooms, if they are used) in the butter for 15 minutes, keeping them covered while cooking slowly. Add the flour and seasonings, also the milk and broth. Stir to a smooth sauce. Put chicken in sauce to heat, and just before serving, stir in beaten egg yolk. Cook in double boiler to prevent curdling.

### Health and Home

#### WHAT IS EVAPORATED MILK?

Did you ever stop to figure out the exact meaning of "Evaporated Milk"? The word "evaporated" may give you the idea that in the process of evaporation the milk has lost some of its valuable qualities. It hasn't. It has lost only water. Sixty per cent of the water is evaporated from the milk after it comes fresh from the cow.

The first step in processing the milk is the evaporation, when a portion of the water content is removed. The second step is the homogenization which insures the cream being distributed evenly throughout the milk. The third is the canning. The fourth is sterilization, which takes place in the can when the milk is subjected to sufficient heat to destroy the bacteria. Thus evaporated milk remains as pure and fresh in the container as when it foamed into the pail in the farmer's barn.

Evaporated milk is now generally recognized as the freshest milk available to those not living on farms and producing their own milk. For freshness in milk means purity.

Transportation of milk from the dairy country to the city is well systematized and rapid and yet owing to the immense quantities of milk that must be rushed in daily, much of it must be obtained at considerable distances and a large per cent is necessarily some days old when it is delivered by the milkman.

Evaporated milk, on the other hand, is last night's and this morning's milk. From the dairy barn, always under rigid inspection, it is hurried by farmers to factories located in the heart of the dairy country and delivered when it is fresh. Evaporated milk is canned just at its "freshest moment," when it is in its finest state. It is never allowed to get old. The whole process from cow to can requires only a few hours. It may be interesting to know that the process of sterilizing takes place after the milk has been sealed in its containers. Once in its sterilized containers, there is no possibility of deterioration.

The sterilizing of evaporated milk insures its purity—it makes a safe milk for the children. Evaporated milk is boiled milk, and this makes it more digestible.

It may be used for any milk need with safety and economy. For ordinary cream needs, use it just as it comes from the can. When a rich milk is desired, add an equal part of water. For cooking and baking, two parts water and one part milk will usually suffice.

### An Unfortunate Affair

RAYMOND CARVER TERRORIZES THE ROBERSON HOUSEHOLD

The inmates at the home of Mrs. Leander Roberson were terrorized and thrown into a state of excitement Saturday night when Raymond Carver, well known young man of the city, visited the home and fired a number of shots from a revolver.

Reports say that Mrs. Carver, who had been separated for several months from her husband, with her three children, were visiting her grandmother, Mrs. Robertson, when her husband came to the home and asked to see the children. After kissing the youngest child, he started off with one of the little girls and when interfered with, while leaving with the child, began shooting. None of the shots took effect, however, and it may be that the shooting was more to frighten and terrorize than anything else.

Carver left the premises but was soon apprehended by officers.

After a preliminary hearing he was placed under bond to await the action of the grand jury.

### What is the Chamber of Commerce?

The Chamber of Commerce is the voice of the city.

It reflects the ideals of the community.

It expresses the aspirations of the people.

It gives direction to the aims of the Citizenship.

It combines the efforts of those who think in terms of helpfulness.

It reduces unorganized elements to an organized unit.

It speaks in defense of the good name of the city.

It defends the city against the traducer.

It is the spotlight that reveals activities that are worthy.

It leads in behalf of the voiceless.

It is the center of worth while enterprise.

It is the magnet that draws the outside world to your midst.

It is the clearing house of civic pride.

It is the power house of progress.

It is a composite picture of a city as its citizenship would have it.

### Everybody is Talking

About Culver's Improved Sweet Cream Ice Cream

Culver's Improved Sweet Cream products are strictly pure and wholesome, made in a factory where sanitation reigns supreme and is delivered well packed in ice so it will keep for several hours at your home or out on a picnic jaunt. The same careful consideration will be given special orders for parties, picnics and Sunday dinners.

**A SPLENDID FEELING**  
That tired, half-sick, discouraged feeling caused by a torpid liver and constipated bowels can be gotten rid of with surprising promptness by using Herbine. You feel its beneficial effect with the first dose as its purifying and regulating effect is thorough and complete. It not only drives out bile and impurities but it imparts a splendid feeling of exhilaration, strength, vim, and buoyancy of spirits. Price 60c. Sold by Bennett's Drug Store, Fulton, Ky.

#### 1ST AMERICAN YOUTH ENTRY

Edith May Adams, eighteen-year-old Barrington, N. J., girl, presenting her entry blank to Mayor Kendrick in his office at City Hall, Philadelphia. The American Youth and Teacher Award was established as a tribute to American youth and teachers by the Board of Directors of the Sesqui-Centennial International Exposition, through which the people of the United States and the world at large will celebrate the 150th anniversary of the Declaration of American Independence. The exposition will run from June 1 to December 1. Miss Adams' entry blank cited her for heroism displayed recently when she remained inside a burning building helping doctors render first aid to injured firemen. She is a candidate for the Golden Eagle, the highest gift within the hands of the Girl Scouts. Each state will elect a girl and boy and one teacher to represent them and the successful candidates will be the guest of the Sesqui officials from June 28 to July 5 at the exposition. This will also include a trip to Washington where they will be received by President Coolidge and presented with medals.

Mr. W. L. Hampton, of Hickman and Mrs. Annie Williams, of near Water Valley, were Sunday guests of Mr. and Mrs. Sam Bard.

Mr. Jim Walker spent Sunday with his uncle, who was ill near Moscow.

Children, grandchildren and friends honored Mr. J. F. Bard with a surprise birthday dinner last Tuesday.

## Gay New Blouses Enliven the Modes

Whether for wear with the sedate tailored suit or the afternoon costume, it is the privilege of blouses to be gay and colorful. Here is one, in pale, salmon-rose silk, made to accompany an almond green tailored suit. Collar and cuffs are of dull silver cloth.

## FEDERAL RESERVE HELPS FARMERS

How Its Aid to England's Return to a Gold Standard Benefits American Agriculture.

By M. A. TRAYLOR  
Second Vice President American Bankers Association.

There has been no more important event for the American farmer and stock man since the recent return of Great Britain to a gold standard.

It seems a long distance from the Montana farm to the Bank of England, but the price the farmer gets for his wheat and cattle depends not a little on that gold.

The farmer sells his wheat to the elevator man and yet the real buyer in many cases is an Englishman, a Frenchman, a German, or an Italian. About one-third of the wheat crop is usually sold abroad and this part is a large factor in fixing the price of the entire crop. Between the farmer and the foreign buyer there are many steps. In recent years the most important step has been that at which the foreign buyer has to pay the American exporter, for the international mechanism of payment has been badly out of order because Europe was off the gold standard. It was just as though an English buyer drove up to your farm house, bargained for your wheat and drew up the contract. But when you discussed payment, he said: "I'm sorry I haven't any good United States money to pay you with; I'll have to pay you in my English paper money, which isn't worth its face value in gold. I don't know what it may be worth next week, but that is your risk."

A Deadly Foe of Trade  
How many would be willing to sten contracts on this basis? Yet that is the way most of the world's trade has had to be carried on since the Armistice. In practically all countries except the United States the currencies have had no fixed value in gold, but have changed in value from day to day. Whenever one country sold anything to another country, somebody had to take the risk of loss because the value of the money might change before payment was made. Such uncertainty of payment is a deadly foe of trade, and people were afraid to do any larger international business than they had to.

Exports of food stuffs from the United States fell from two and a half billion dollars in 1913 to eight hundred millions in 1921, and the difficulties of European buyers in making satisfactory payment for American farm products was one of the large factors in the drop in the prices of farm products. But now the recent action of Great Britain in declaring that it will again redeem its paper money in gold means that British buyers of American products can pay for them with money which is accepted the world over at its face value in gold. With the return of Great Britain to the gold standard, a majority of the countries of Europe have paper currencies equal to gold.

How Reserve Banks Helped  
American bankers have assisted in the British return to the gold standard by giving a \$100,000,000 credit to the British government. But more important than this was the action of the Federal Reserve Banks in granting the Bank of England material co-operation. They placed \$200,000,000 gold at the disposal of the Bank of England for two years, to be used by it, if necessary, in maintaining the gold standard. The readiness of the Reserve Banks thus to co-operate was an important influence in the willingness of the British to take this all important step.

This action of the Reserve Banks was a most constructive step in aid of American farmers and producers who will benefit greatly by the removal of this element of uncertainty from their export transactions. If all the sins of omission and commission charged against the Federal Reserve System by banker, business man, live stock man or political blatherskite in the last five years were true, and practically none of them are, the service rendered commerce and industry by the System in connection with the restoration of the gold standard in so large a part of the world would far outweigh any mistakes that those in charge of the System may have made. No banker, business man or farmer should permit any self-serving declaration by favor-seeking demagogues to sever him from a determination to see that the System is maintained for the future welfare of the country.

Fundamentally conditions are very sound and we are doing a very large volume of business, no little part of which is due to the equalizing and stabilizing effect exercised by the Federal Reserve System on the credits of the country. Throughout all the stress of the last five years there have been no times of either stringency or plethora of bank credit. Rates have run along on a rather level keel and in my judgment have had much to do with the stable volume of business which we have enjoyed, and which is quite contrary to the old experience of the aftermath of panics. With a credit structure such as only the Federal Reserve System can guarantee, I feel we need have no apprehension but of the contrary sound optimism for the future.

## Young At 60, Or Old At 40? Diet Decides

Women are as old or as young as their state of health. A woman may be young at sixty years or old at forty. It all depends on her physical well-being.

Youth and beauty have a foundation in sound health. And food is easily the most important item in health. In giving consideration to the subjects of diet and beauty, women should not forget the food essentials that make for the preservation of teeth, hair, figure and complexion.

Blame for round shoulders, flat chest and poor teeth among women is due in large measure to faulty diet, or, specifically, to a lack of lime and phosphorus. Milk, or evaporated milk, which is simply cow's milk with 60 per cent of the water taken away, is especially rich in lime.

Because of the concentration of evaporated milk, which is regulated by government standards, it is of

double the richness of ordinary market milk, as is shown in the following table:

Ordinary Milk.	
Fat (lactose).....	3.5 to 4.5 per cent
Sugar (lactose).....	4.5 to 4.75 per cent
Proteins.....	3.5 to 4 per cent
Minerals.....	0.7 to 0.75 per cent

Evaporated Milk.	
Fat (lactose).....	7.5 to 8.2 per cent
Sugar (lactose).....	9.5 to 10 per cent
Proteins.....	7.5 to 8.2 per cent
Minerals.....	1.4 to 1.6 per cent

A quart of milk a day for adults is recommended by doctors not only because of its high mineral content, but for the reasons that it helps keep the digestive tract in proper condition, strengthens the body to resist disease, and gives proper balance to the diet.

Salads also play an important part in the diet. Some sort of a salad, lettuce, tomato, fresh fruit, cabbage or vegetable, should be eaten at least once a day. Neither is the daily menu complete without a generous quantity of coarse, leafy vegetables, valuable for their high vitamin content. Fruit juices also have very beneficial properties.

If a woman follows out the rules of diet, birthdays to her will be nothing more than an excuse for a celebration.

## First 24 Hours of Life Baby's Hardest Time

By MARIE K. JOHNSON

Undernourishment is one of the most common of the causes of infant mortality, according to a survey recently undertaken in Chicago. Statistics show that of 4,722 babies under one year of age that died in 12 months, 988 died in the first 24 hours.

Eight hundred and four seventy-six died in the first six days, exclusive of the first 24 hours, and 1,708 died from the seventh day to the sixth month. Eight hundred and sixty died in the last six months of the year. The survey indicated that a surprisingly large number of infants are artificially fed, which condition doctors agree, had a marked bearing on their undernourished conditions. Naturally, no one food may prove satisfactory in every case, although the survey showed that evaporated milk in many cases had proved an excellent substitute for mother's milk. This may be explained by reason of the fact that evaporated milk is simply pure, concentrated cow's milk from which 60 per cent of the water has been removed. It contains practically every element necessary for good health and is consequently an excellent builder of bone and tissue.

Although authorities on health recommend evaporated milk as a baby food, like other substitutes for the natural supply, it should not be considered as a food complete in itself. Addition of orange or tomato juice, barley water or lime water is important in providing adequate diet for the infant.

For babies, milk of dependable purity is essential. Market milk will not keep for any length of time and is liable to contamination, especially in hot weather, while evaporated milk, hermetically sealed in sterilized containers, remains as fresh and pure as on the day it was canned.

Sterility in evaporated milk, authorities agree, is one of the most important points in its favor. In processing, evaporated milk is subjected to 240 degrees heat for a half hour, thereby removing all possibility of bacterial life being present in the milk. Heat is the only preservative for this type of milk and the heat has the further beneficial effect of making the curds of milk more flocculent and easier to digest.

## A Year of Continuous Telephone Progress

THE big job on which the Cumberland Telephone workers are engaged is expected to result in a net gain of 19,000 telephone stations, involving gross additions to plant of approximately \$13,200,000.

Kentucky is enjoying a substantial share of this growth and of this expenditure, and your telephone service is now more efficient, more extensive and more valuable to you than ever before.

Although telephone plant, representing an investment of millions of dollars, is at your service day and night, the average subscriber rarely sees more of it than the equipment he uses and a few cables in his neighborhood.

Last year, for instance, new poles, cable, copper wire, iron wire and underground conduit, costing more than \$1,403,100, were added to the telephone plant in Kentucky alone.

There were 114 carloads containing 5,702 poles, 75 carloads containing 1,048 reels of cable, 5 carloads containing 1,132 miles of copper wire, 4 carloads containing 995 miles of iron wire, and 38 carloads containing 194,485 duct feet of underground conduit.

While this work was in progress, the telephone service was maintained at a higher standard of efficiency than ever before, as evidenced by the company's records and the recommendation of subscribers.

The successful accomplishment of the big task now under way depends in a great measure on your considerate co-operation which encourages the telephone workers to continue their efforts to serve you better.

## Sunday School 'Lesson'

(By REV. P. B. FITZWATER, D.D., Dean of Day and Evening Schools, Moody Bible Institute of Chicago.)  
(© 1924, Western Newspaper Union.)

Lesson for June 27

REVIEW: WHAT WE HAVE  
LEARNED FROM THE BOOK  
OF GENESIS

GOLDEN TEXT—We know that all things work together for good to them that love God, who are the called according to his purpose.—Rom. 8:28.  
PRIMARY TOPIC—Favorite Stories From Genesis.

JUNIOR TOPIC—Stories of the Patriarchs.  
INTERMEDIATE AND SENIOR TOPIC—Favorite Characters in Genesis.  
YOUNG PEOPLE AND ADULT TOPIC—Permanent Messages of the Book of Genesis.

The method of review must always be determined by the department of the Sunday school and by the teacher's preferences. For the young people and adults, perhaps the best method will be to assign the task of finding the most important teaching of each lesson.

The following is suggestive of the method of review recommended:

Lesson for April 11—God created all things. The things which are come to be by the creative act of a personal God. God created man in His likeness and image, which means that man bears God's likeness morally and intellectually.

Lesson for April 18—The explanation of the fits and sorrows of the world can only be made on the basis of the historical fall of man as recorded in the Bible. The prime actor in this tragedy was the personal, cunning, malicious being called the Devil. Because man is a free being, possessing the power of contrary choice, sin entered through man's belief of the Devil instead of God.

Lesson for April 25—Because the human race is an organism, Cain and Abel through the law of heredity came into the world with sinful natures. God taught them that the way of approach unto Him was through a bloody sacrifice, typifying the supreme sacrifice made by Jesus Christ on Calvary. Abel believed God, took his place as a sinner and presented his offer accordingly. Cain in proud self-will brought the fruit of the ground, thus ignoring God's appointed way of approach unto Him. Cain's offering therefore was rejected because he did not recognize himself as a sinner and come to God in the way which God had appointed.

Lesson for May 2—Noah, coming forth from the ark, faced the responsibility of repopulating the new world. In recognition of that obligation and out of gratitude for God's grace in saving himself and family, he erected an altar and worshipped before the Lord. God responded and entered into covenant relationship with him.

Lesson for May 9—Lot's selfish choice involved him in trouble. Abraham, because of his separation from Sodom and unto God, was able to go against a mighty king and rescue his unfortunate nephew.

Lesson for May 16—God manifested Himself visibly to Abraham in the form of an angel. This angel was none other than the Son of God. Abraham thus met Jesus Christ. Christ no doubt referred to this when He said, "Abraham saw my day and was glad."

Lesson for May 23—Isaac, a child of the covenant given in the old age of his parents, was a gentle and peace-loving man. He suffered wrong rather than strive with his enemies.

Lesson for May 30—Jacob was chosen of God. Because of this God was with him. God will keep, protect and prosper His elect ones even in spite of their weakness and failure.

Lesson for June 5—Esau because of living under the sway of his appetite sold his birthright for a mess of pottage. He afterward repented and sought to undo his deed. Though sincerely regretting his act, it was impossible to change conditions. Our acts and choices are irrevocable.

Lesson for June 13—Joseph was peculiarly beloved by his father. Because of this Jacob unwisely expressed favoritism. This favoritism incited the jealousy of his brothers, who at the opportune time sold him as a slave to merchantmen going down to Egypt. Because of the false accusation of a wicked woman he was imprisoned.

Lesson for June 20—Because of Joseph's fidelity God raised him to a position of honor and power in Egypt. While in this position he made provision against an awful famine which came upon the land and became a means of saving from starvation not only the Egyptians, but his brethren who came down from Canaan. Though they had wronged him he graciously forgave them and provided for them in their need.

### Neglecting Christ

Men who neglect Christ, and try to win heaven through moralities are like sailors at sea in a storm, who pull some at the bowsprit, and some at the mainmast, but never touch the helm.—H. W. Beecher.

### Worth Thinking About

Have you any compelling purpose in life? Is that purpose God's purpose for you? Are you co-operating with God in the carrying out of his purpose?—James F. Riggs.

## Learn Thrift the Dry Cleaning Way

You'll be surprised at the fresh new beauty your frock takes on after dry cleaning—with our modern equipment. Never discard a garment until we have passed judgment upon it. The cost is trifling compared to the added service it will give you.

When you call No. 130 you get in touch with the livest organization in the city of Fulton. We clean anything, and when we clean an article, we mean to say that we take the dirt out. General laundry work, French Dry Cleaning and Pressing, Rug and Carpet Cleaning—in fact, cleaners for the entire community.

# Taking the Profit Out of War

By BERNARD M. BARUCH

Reprinted from The Atlantic Monthly.

[The February issue of the Atlantic for 1925 carried a paper by Mr. Sisley Huddleston dealing with the general subject of "Taking the profit out of war," which Mr. Huddleston called "An American Plan for Peace." The first quoted phrase was put into the language by the War Industries Board toward the end of the World War through its efforts to eliminate all war profits. Mr. Huddleston's article came to the attention of Mr. Bernard M. Baruch, chairman of the War Industries Board and administrator of the non-profit plan, and (as he writes us), since it seemed to indicate a growing interest in the subject, induced him to make practical means to bring about a full comprehension of taking the profit out of war in the various great countries of the world. To this end he responded to a suggestion of Mr. Owen D. Young, of the Page School of International Relations at Johns Hopkins University, that he establish a course of lectures there to expound the War Industries Board plan in detail. Later he will proceed to make similar arrangements at leading universities in Great Britain, France, Germany, Italy, and Japan. Agreeing with Mr. Baruch that the subject calls for public knowledge and discussion, it was natural for the Atlantic to turn to him for the following paper.—THE EDITORS OF THE ATLANTIC MONTHLY.]

WAR was once described as Prussia's most profitable industry.

It needs only a scant examination of history to learn that other countries were open to the same indictment. The methods of the robber barons did not pass with the end of feudalism. Annexation by conquest did not cease. But when America entered the World War President Wilson fathered a doctrine that shall always govern us—that never a foot of territory should be added to our boundaries by force.

So, as America has taken the lead toward making impossible national profit through war, it too may be America's privilege to point the way toward making impossible individual profit through war. To take the profit out of war is to take a long step toward creating an economic detestation of war. The experience of the United States in the World War affords a basis for the belief that the plan herein discussed is practical. In fact, it is more than a belief—it is a certainty, although not widely known.

The world is such a busy place, and the value of human activity has been so greatly enlarged because of modern inventions, that it is not strange that there are but few people who are content with what was quietly but effectively taking place in this country in the mobilization and use of its material resources in the World War—a process that would have eventually eliminated all improper profits.

Strength is given to the public advocacy of industrial mobilization under both President Harding and President Coolidge—Mr. Coolidge as recently as last October in his Omaha speech to the American Legion—by the fact that the plan they advocated as a part of the regular national war agencies had once been set up and successfully operated under the War Industries Board.

Proceeding to the President's recent clear exposition of this subject, some degree of public interest had been engendered by an exchange of letters between Owen D. Young (of Duquesne fame), in behalf of the Walter Hines Page School of International Relations, and the writer. The correspondence resulted in the establishment of lectures at the Page School of Johns Hopkins University on this theme. Previously the Atlantic Monthly printed an article by Sisley Huddleston, who pointed out that Europe saw great strides toward peace in the American idea of "taking the profit out of war" in a systematic way. His basic reference was to the plan of the War Industries Board.

The resources of a country might be referred to as the five M's: (1) man power; (2) money; (3) maintenance or food; (4) material resources (including raw materials, manufacturing facilities, transportation, fuel and power); and (5) morale. The intelligence with which the first four are directed and coordinated as a whole will determine the fifth, the morale of the community.

In the war emergency it early became evident to those who were charged with the responsibility of mobilizing the resources that there was a just sentiment among the people against profiteering. Profiteering might be willful and profit making might be involuntary; but whatever the form, there was a set determination it should cease. So it became necessary to fix prices where the supply was limited.

Wherever the government created a shortage by its demands, prices were fixed, not only for the Army, Navy and the Allies, but for the civilian population as well. And in addition to price fixing on war essentials (such as steel, wool, copper, and so forth), the balance, after the war program had been decided, was rationed or distributed according to the priority needs of the various civilian demands. In other words, where the price of the product of an industry was fixed that industry had to deliver the part which the government did not need in the civilian population, not in the way the industry chose, but as the government directed.

It must be remembered that when the war came there was no adequate preparation. Indeed, it is doubted by the best authorities whether any effective form of preparation then known would have been of much avail in view of the widespread and engulfing results of the war and the lack of knowledge of the various instruments of destruction which were being devised and which it became necessary to combat.

Our own Army had several divisions competing one with another for mate-

rials, transportation, housing, and so forth. On top of that there prevailed the demands of the Shipping Board, with the slogan that ships would win the war, and of the Food Administration, with the slogan that food would win the war. Further, there was the Railroad Administration with its need for material and labor, and finally there was the feverish quest for labor and supplies on the part of the munition makers—all competing for labor, money, materials, transportation, fuel, power, and each insisting on the greater importance of its activity. All this while the labor supply was being lessened by the flow of men into the Army.

While an endeavor was being made to bring order out of chaos, the great undertaking had to go on. Men, ships, munitions, food, material, had to be provided. Old organizations, bureaus and traditions had to be met and changed, but not destroyed until the new was set up. The wonder of it all is, not that there were so many mistakes, but that so much was accomplished.

At the time we entered the war prices were at their peak, and tending higher because of the war's insatiable demands. The problem was not alone to secure the materials and labor and to stop the confusion, but to do it in such a way that the morale of the people would be maintained. The prices of some things, like steel and copper, were fixed far below prevailing rates, and the wages of labor in those industries were standardized. The more highly organized an industry, the easier it was to arrange. Order did not commence to appear until the Army funneled its needs through one man sitting with a section of the War Industries Board and until the Navy, Shipping Board, Allies and Railroad Administration did likewise. Each department satisfied its requirements through a central authoritative body. This was called the War Industries Board, controlling and directing all materials and co-ordinating through its chairman the whole system of governmental and civilian supply and demand. It was created by executive order in March of the year 1918.

Briefly, this board endeavored to mobilize the industries of America so that the fighting forces of the Allied and associated nations could draw from the United States—the last reservoir of men, materials and money—the things needed for the winning of the war at the time the things were needed and with the least dislocation of industry and the least disturbance of the civilian population.

The War Industries Board was organized like any other supervisory committee, with a chairman, vice chairman, members in charge of various activities, bureau chiefs, and subordinate workers. It surveyed and sought to arrange the whole industrial war field under the plenary powers conferred by the President and the Congress. How well it did this is a story for others to tell. What it did is the basis of the plan I am here drawing.

It was comparatively easy to fix prices and to distribute materials, and indeed to stabilize the wages of labor in those industries in which prices were fixed. The labor situation, however, became increasingly difficult, particularly when General Crowder found it necessary to withdraw men for a desperate campaign of 1918 after 4,000,000 soldiers had already been taken.

Much has been said about the profiteering of labor. It is an unjust accusation. It is only fair to say that this condition was primarily brought about through the inexperience of the organization within our own governmental departments and by the furious bidding of munition makers and shipbuilders for services. That situation, together with the increased prices of the things that labor had to buy with the results of its work, made it inevitable that labor must get higher wages.

So it became evident that the price-fixing program had to go even further, and the War Industries Board, when the Armistice came, was proceeding with a campaign to fix the prices of all the basic things that labor had to buy. Some had previously been fixed. I speak of labor in a much broader sense than manual labor, for the unorganized so-called "white collar" part of our community—clerks, teachers, government employees, professional men—were less able to meet the situation than labor in the narrower sense. For the protection and relief of such groups certain plans were devised. To illustrate—

One of them provided that manufacturers, jobbers and retailers of shoes could make and sell shoes only of a specified quality at a fixed price, effective July, 1919. No one who did not have a card of the War Industries Board in his window could sell shoes, and only the standardized shoes could be sold. No jobber or manufacturer could sell shoes to anybody who did not have this card. The shoes were to be of the quality prescribed and sold at the price fixed. The country was so organized in every district that there could be immediately reported to Washington the name of any shoe retailer who did not carry out the regulations of the War Industries Board as to price and quality. Through restrictions on his labor, money, raw materials and transportation no manufacturer would have been permitted to sell to any dealer violating the regulations. The Armistice stopped the execution of this plan.

Another plan of this nature: The manufacturers of men's and women's wearing apparel had in 1918 been called to Washington, together with the retailers of various goods, and notified that regulations would have to be made in regard to retail prices and standardization of clothing.

The rulings by the board were made known through the issuance of official bulletins at irregular intervals and were widely distributed by the press, which co-operated in this most necessary work with a wholehearted purpose that gave to the orders of the War Industries Board the instant and broad circulation they required.

Mr. Hoover already was doing much to perfect his control of food products and prices. There was also talk of fixing rents, and in some cities this was done.

If we were to start, in the event of another war, at the place where we were industrially when the World War ended, the President, acting through an agency similar to the War Industries Board, would have the right to fix prices of all things as of a date previous to the declaration of war when there was a fair peace time relationship among the various activities of the nation. It would be illegal to buy, sell, serve or rent at any other than these prices. Breakers would be applied to every agency of inflation before the harmful process started. An intelligent control of the flow of men, money and materials would be imposed, instead of having the blind panic heretofore ensuing on the first appearance of the frantic demands of war.

The War Industries Board would have before it the rulings of the priority committee, together with the estimated needs of every business and profession in its relationship to the conduct of the war, and men would be selected accordingly. The Draft Board could more intelligently decide, with the advice of the priority committee, many of the problems with which it would be faced. There would be no sending of men to the trenches who were needed for expert industrial work and then bringing them back again. Businesses not necessary to the winning of the war would be curtailed. The Draft Board would have that information before it.

The prices of all things being fixed, the price fixing committee would make any necessary adjustments, as was done during the war. Under the system used in 1918 these prices were made public and adjusted every three months, so that any consumer or producer had his day in court when he considered prices unfair. Then he complained that during the war prices were too high had this ready recourse to hand.

In the meantime all the industries of the country would have been mobilized by the formation of committees representative of each industry as was done in the World War. Over them would be placed a government director or commodity chief. The various government departments would appoint committees representing their requirements, so that on one committee the resources of the nation would be represented and on the other the demands of the government. The government director would stand between to decide, in conjunction with the priority committee, to what department supplies should go.

Money would be controlled and directed like any other resource. "Taking the profit out of war" is not synonymous with "conspiration of wealth," as it is sometimes regarded. The latter is a theoretical project prohibited by our Constitution, contrary to the spirit of our social and political institutions, and impossible in practice. Taking the profit out of war is an orderly and scientific development of the economies and conduct of modern war, necessary to the effective mobilization of national resources and indispensable in equalizing the burdens of war among the armed and civilian populations. Born of experience and proved by practice, it removes some of the most destructive concomitants of modern war—the confusion and waste incident to war time inflation.

This term "conspiration of wealth," used by so many, has created a hope among those of socialistic tendencies, and a fear among those who, like me, believe in our system based upon personal initiative and reward, of a taking of money without payment, for the use of State. Neither the hope nor the fear is justified by the recommendation herein contained or by our experience in the war. The use of money should be controlled and directed in a national emergency. A man should no more be permitted to use his money as he wishes than he should be permitted to use the production of his mine, mill or factory except through the general supervising agency. This was being done toward the end of the war.

During the final phase of the World War no man or corporation or institution could raise money without the approval of the Capital Issues Committee of the Treasury Department, which committee in turn would not permit the borrowing of money unless the War Industries Board approved the use to which it was to be put. This the City of New York was not permitted to spend \$8,000,000 for the building of schools. The City of Philadelphia was prevented from making improvements that in peace time would have been necessary, but in war time were not. Various states, counties and cities, and a vast number of private concerns, were denied the use of money and materials for purposes not necessary for the winning of the war. Each part of the community had to adjust its wants to the whole great undertaking.

There have been a great many bills introduced into Congress on the subject of industrial mobilization, some sponsored by great organizations like the American Legion, and others by newspapers and publicists. But it is surprising how little knowledge there was on the part of those who drew up the bills of the practicability and feasibility of so mobilizing our resources that it would be impossible to make as much profit in war as in time of peace. Take into consideration the fact that the following things were being done in 1918:—

General Crowder, who was in charge of the draft, had asked the chairman of the War Industries Board where he could obtain additional men needed for the Army in France with the least possible dislocation of the war making industrial civilian machinery, and we were in the process of replacing machine tools with women. By a system of priorities the Board was allocating to our own Army and Navy to the Allies, and to the essential war industries the things they required. It was making priority rulings as to transportation, and they were being followed out by the Railroad Administrator. The Fuel Administrator distributed fuel only on the rulings of the War Industries Board. The Board was engaged in dismantling and restoring of financial conflicts and competitive efforts involved in labor and buildings that had previously occurred because of lack of any coordinating agency. It was allocating power and making regulations for the hitching up of scattered units of power. It was changing munitions orders from congested to less congested districts. It had actually carried into effect an order that no building involving \$2,500 or more could be undertaken without the approval of the War Industries Board. No steel, no cement, no material of any kind could be used for any purpose whatsoever unless the War Industries Board permitted it. No steel company could sell over five tons of steel unless approved by the Director of Steel. The Treasury would not permit the raising of money for any industrial or financial operation unless it was approved by the War Industries Board. The President issued an order that no commandeering should be done by the Army, Navy, Shipping Board or Food Administration without the approval of the chairman of the War Industries Board. Every raw material industry, and indeed practically every industry in the country, was organized through appointment of committees, and none of these industries would do any business except under the rulings promulgated by the Board. Standardization in every industry was rapidly proceeding. These rulings were made known through the issuance of official bulletins at irregular intervals and were distributed by the press. We were endeavoring to arrange it so that the fighting forces were to receive those things which they needed and no more, so that whatever was not actually required at the front was left to civilian purposes. Industries were curtailed, but never destroyed; skeletonized, but never killed. Indeed, the use of men, money and materials was rapidly being brought into exactly that condition which I have previously stated to be necessary in case of another war.

If, in addition to this, the President in the future has the authority to fix prices and distribution of materials and labor, rent, and the use of man power, transportation, fuel and all the things necessary for the conduct of the war, any rise in prices will be prevented, even in anticipation of war. There are many who claim that war is caused primarily by the desire of profit. I am not one of those. But if there is anything in this contention this plan will remove the possibility of anybody urging war as a means of making profits. Even if there are no men who desire war as a means of making profit, the fact that profits would be less in war than in peace, and wealth and resources would be directed by the government, might have some active deterring influence on men of great resources. Instead of being passive, they might become active advocates of peace.

There are many people who, for various reasons, afraid to discuss the subject during peace time and prefer to wait for war. There are also some great manufacturers who oppose any such plan because they were seriously interfered with during the war time. Indeed, it has been the experience of some of those responsible for the industrial mobilization in the World War to remain the objects of venomous attack begun during the time that the necessities of the nation made it imperative to control activities and profits. Some critics were prominent manufacturers, who said: "Tell us what the government wants and we will fill the orders, but don't interfere with the sale of the part of our product that the government does not want to use." That was unthinkable. President Wilson decreed that fair

## A FARM WAGON THAT IS GUARANTEED

The amount of satisfactory service that a wagon will give depends entirely upon the material and skill the manufacturer puts into it. We want to show you a wagon that is built of the best materials by men who know how—

### THE JOHN DEERE WAGON The Wagon That Is Guaranteed

A special machine automatically measures the inside of the skinn of the John Deere farm wagon and shapes the axle to fit accurately. The skinn is set in red lead under high pressure. It has exactly the right pitch, and the axle has the right path to make the John Deere wagon run lighter than other wagons. With the John Deere axle and dust-proof skinn there is no wearing of bearing surfaces—the oil stays in—the wagon is always smooth-running and light-pulling. Only carefully-selected oak and hickory are used in the loads.

Come in and see this wagon—read the guarantee on the tool box. Let us explain the many fine points embodied in it.

prices for the government were fair prices for civilians. I must say, however, that the vast majority of American manufacturers rose to the situation in such a splendid way as to bring the following commendation from Woodrow Wilson: "They turned aside from every private interest of their own and devoted the whole of their trained capacity to the tasks that supplied the sinews of the whole great undertaking. The patriotism, the unselfishness, the thorough going devotion and distinguished capacity that marked their toilome labors day after day, month after month, have made them fit mates and comrades to the men in the trenches and on the seas."

There are many men who are afraid that the adoption of this plan by Congress would give an impetus to socialism or communism or socialism or whatever they may call it, because, they say, "if you show it can be done in war time there will be a demand that it be done in peace time." It cannot be done in peace time. There can be no great undertaking without a strong moving cause. In peace time the moving cause is personal initiative and payment for services performed. The substitute for that in war time is the common danger.

The War Industries Board was the foremost advocate of price fixing and distribution, and it had great power in this field, but when the Armistice came it recognized that peace conditions were being restored, and it was the first to change the war time order of things and to leave to the people themselves the readjustment of their affairs. I am satisfied that it is impossible for the government to do in peace time what I am advocating, although it becomes absolutely necessary in order to conduct a modern war successfully and to conduct it on a non-profiteering basis.

The application of this plan, besides making the nation a coherent unit in time of war, would impress upon every class in society a sense of its own responsibility in such event. If it were known that this universal responsibility would be enforced, no class—social, financial or industrial—could fail to understand that in case of war it would have to bear its share of the burdens involved and would have to make sacrifices of profit, convenience and personal liberty correlatively with those made by the soldiers in the field. To this extent the plan would act as a positive deterrent to any hasty recourse to force in an international controversy.

One thing that has definitely come from the war is the necessity of arranging affairs so that a portion of the population shall not be sent to the front to bear all the physical hardships and their consequences while others are left behind to profit by their absence. If applied at the outbreak, the War Industries Board (as it was functioning at the close of the World War) would prevent this and, less, if not remove, the social and economic evils that come as the aftermath of war.

## Trade among Friends

No matter what some folks say to the contrary, there certainly is a lot of sentiment in business. Friendship, for instance, makes more satisfactory sales than all the cleverness and argument in the world.

You like to trade at a certain store—not because its counters are arranged in a scientific way, but because the folks who serve you are always friendly and helpful.

Just that very thing—FRIENDLY SERVICE—is the power that draws people together into communities like this, where everybody can enjoy the many benefits of neighborly cooperation.

And FRIENDLY SERVICE is the sentimental reason why you find it very much to your advantage to trade with our advertisers—to buy where you feel at home, where your friends will see that you are well satisfied.

Wed., 7:00 p. m.—Teachers' meeting, room No. 4, at the church.

8:00 p. m.—Prayer meeting.

Thursday—Choir practice, Miss Goldsby, director.

We had the pleasure of having with us in our evening service last Sunday, a large number of our friends from Union City. We were very glad to have them worship with us, and extend to them a cordial invitation to visit us again.

Mrs. C. H. Warren and children have returned home, after spending ten days with friends and relatives in Paducah.

Mrs. H. M. Butcher, of Hickory Valley, Tenn., is visiting friends in the city. It will be remembered when Mrs. Butcher was a resident of Fulton, she was a teacher in the intermediate department of our Sunday school. Her many friends are glad to have her with them for a few days.

At the meeting of Circle No. 5, last Monday afternoon, at the home of Mrs. Hastings, in the suburbs, it was decided to have a gypsy tea at Union next Tuesday evening. All members of the circle, together with their husbands, are expected to attend and carry a well-filled basket.

The pastor's study is now located in the new quarters in the church building. It is a very conveniently arranged room and of easy access. Within a few days a telephone will be installed and all persons wishing to communicate with or see the pastor will find him in the study at the church from 9 a. m. till noon.

The work on the installation of the organ is progressing very satisfactorily, and the pews should be here within a few days, and the members of our congregation are looking forward with a great deal of anticipation to the time when we will be able to worship in our new auditorium, and get our various departmental organizations functioning.

## BIRTH ANNOUNCEMENT

A sweet, new blossom of humanity arrived at the home of Dr. and Mrs. L. A. Methvin on May 17. It was a fine boy and his name is Charles Roberts Methvin.

## CARD OF THANKS

We wish to express our appreciation and thanks to each and every one, who has been so kind to us in hours of grief for our dear little daughter, Francis Marguerite Caldwell, who was suddenly killed by a cross tie, while out watching old Indians go through town that they might not stop and bother any one. Every kind deed and loving word of sympathy and all the beautiful flowers presented to her, helped us bear our great sorrow.

May the Lord bless everyone of you, and that such an awful accident shall never happen to you nor yours, and may the Lord bless you every one, and when trouble overcomes you may you have the consolation of friends, such as you have been to us.

We wish to especially thank Bro. Holland, Bro. Whitaker and daughters, Bro. Winstead and Bro. Jones, for their services, kind deeds and words to us. May God bless you every one forever more.

Mr. and Mrs. L. T. Caldwell.

Do Better Work  
With Less Effort

Many thousands of farmers know of the good work, easy handling and simple adjustment of the John Deere DG Cultivator. So easy to operate that your boy will do mighty good work with it.

You can cultivate all row crops with the DG, for the simply-adjusted arch permits a variation of 16 inches in the wheel tread.

The hugging device aids in holding the rigs to the row when hilling or "laying by" the crop, counteracting the tendency to drift either to or from the row. This does away with the hardest work of cultivating.

Simple depth control insures even cultivation—just a turn of the tail bolt does it.

Your DG is ready at our store. Come in and see it.

Improved cone coupling—no adjustment required except to take up wear.

Wheels have oil-tight, dust-proof bearings.

Pole does not extend behind axle—plenty of room for adjusting arch, rigs or shovels; provides good view of work.

Hang-up hooks attached to arch and are adjustable, up or down, in or out.
