want to plant more wheat
because the top price the
farmers can get for a bushel is
more. The quality is the best
for years, and while the
wheat is some of the finest
wheat to be grown, the cost of
harvesting and shipping it is
not large this year, some of our

harvested a good yield. Ernst

FOOD LIKE YOU GET AT HOME

This is truly a home-like restaurant because it has endeavored to break down the prejudice based on the theory that restaurants could not serve food as appetizing as that which you get at home. Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat.

Years of catering to the appetites of particular people make it possible for us to serve appetizing meals.

The next time you want to eat away from home, bring your family here.

If the word "penetrates" is a common word, then the Senour's Floor Paint is a popular favorite for over 40 years. If a floor paint does not penetrate into the wood, it will soon wear off like shellac. However, every can of Senour's Floor Paint is guaranteed to penetrate or money back upon receipt of empty can.

Trade among Friends
No matter what some folks say to the contrary, there is certainly a lot of sentiment in business. Friendship, for instance, makes more satisfactory sales than all the cleverness and argument in the world.
You like to deal at a certain store—not because its counters are arranged in a scientific way, but because the folks who serve you are always friendly and helpful.
Just that very thing—FRIENDLY SERVICE—is the power that draws people together into communities like this, where everybody can enjoy the many benefits of neighborhood cooperation.
And FRIENDLY SERVICE is the sentimental reason why you find it very much to your advantage to trade with our advertisers—to buy where you feel at home, where your friends will see that you are well satisfied.

This oil range has focused heat!

Cooking in Comfort
With Focused Heat.

Fleming kitchens are cool and comfortable for the simple reason that the cooking heat goes into the cooking—not out into the kitchen. The beams of the Flemings are scientifically designed to FOCUS the heat directly on the bottom of the pot.

The top of the sheet, which is the flame burner in only 1 1/2 inches below the cooking. Not that you'll see. Fleming beams form air inside the flame giving a quick and most intense heat. Instant heat up when under the cooking. This is focused heat.

For sold pack cooking, for sterilizing jars, for the gentle cooking that keeps food whole and tempting, you can select the Flemings same to any height you need, simply by turning a lever. And the heat still constant.

Of course it's impossible to live long on rice that leaves the kitchen cool. It's cheaper and quicker, too.
