UNIVERSITY KY. ALL-STARS HERE SATURDAY NIGHT

Playing before an enthusiastic crowd which packed the Science Hall, the University of Kentucky All-Stars swamped the picked team of all-stars from Murray College, the Louisville Colonels and the Indianapolis Indians now training in this section. The score in the game here Saturday night was 59 to 24 in favor of the University All-Stars.

Dave Lawrence, the all-Southeastern forward of the Wildcats led the scoring with 18 points as Big LeRoy Edwards was pinned by two men and held to 13 points. Jack Tucker, the able rebound man of the Wildcats, Ed Tierney, Ralph Carlisle and C. D. Blair all participated in the scoring.

Edwards completed his Western Kentucky tour with 69 points, an average of 23 points per game.

Coach Adolph Rupp's athletes made a big impression with Fulton fans who received them royally. In the first preliminary game a team of high school seniors picked from the sixth district beat a similar combination from the fifth district 28 to 26. Then the stars of those two districts banded together and lost to the great Jackson, Tenn., high school team, 27 to 12. In the first game Collier scored 12 points and Peck and Dyeus 10 each.

The best way to kill time is to work it to death.

It doesn't take a man long to make a monkey out of himself, but it takes an awfully long time for a monkey to make a man of himself. A man may start many things but that which he finishes is all that counts.

Rich, indeed, is he who possesses both knowledge and friends.

Remember: When you are in the right you can afford to keep your temper; but when you are in the wrong you can't afford to lose it. He who chops his own wood warms himself twice.

If you would have a thing done, go yourself; if not, send. What we need most in life is someone to make us do the best we can.

IT WON'T BE OUR WAR

The action of the Hitler Government in tearing up the Treaty of Versailles and openly denouncing to the world that Germany intends to conscript a huge army and mobilize an immense fleet of military airplanes is the most serious threat to world peace since 1914. It is difficult to see how this can lead to anything but another European war.

For months the other European nations have been aware that Germany was secretly arming, in defiance of the provisions of the Versailles treaty. Negotiations were under way, indeed almost at the point of conclusion, which would have relieved Germany of most of the more onerous restrictions imposed upon her by the Peace of 1919. But the Hitler Government, apparently under the domination of the military element, was not content to wait.

It would be foolish to say that a new European war would not touch the United States. There is only the most remote possibility of our being drawn into the actual conflict, but such a war would inevitably affect our foreign commerce, which is beginning to pick up. It would put an end for all time, it is likely, to any lingering hope of getting back from the European nations the money we lent them with which to fight the last war. Nor would there be the profitable business in supplying munitions to one side or the other which America enjoyed for nearly three years, before we actually entered the last great war, the three years in which the DuPonts were selling gunpowder, Bethlehem Steel was building submarines, every rifle factory in America was working overtime making weapons for the British and the Russians, and every American ship that would float, even though it leaked like a sieve, was under charter to carry food and war supplies to the Allies.

No European country can float a war loan in America again, as England and France did through the international bankers in 1914-15. We have more money than we had then, but we are not going to lend it on the doubtful security of national promises.

We probably would not and could not refuse to sell food and non-military supplies to any nation, war or no war—for cash. But as for financing their wars, or lending them money again for war purposes, the United States is through with that sort of thing.

MAN, THE CONQUEROR

By climbing up into the stratosphere, four or five miles above the earth, Wiley Post flew his ancient "Winnie Mae" airplane from Los Angeles to Cleveland at 340 miles an hour, though at normal heights her speed is only 180 miles.

Across the Pacific ocean will be installed equipment for five or six "stepping stones," flying fields on islands, to enable aviators to refuel and repair their planes as soon as regular trans-Pacific flights begin, this coming Summer.

A mysterious "rocket" plane, equipped with practically automatic controls is being tested in experimental flights by the United States Navy on the Pacific Coast.

On top of the report, probably incorrect, that means have been found to stop an airplane in flight by projecting a radio beam that would put the electric ignition system out of business, comes the more probable report that Germany has perfected a type of Diesel engine, requiring no ignition system, for airplanes.

And Senor Cierva, the Spanish inventor of the autogiro, has succeeded in building one of his "windmill" planes that will rise without a forward run, making it possible to take off from any flat roof.

Those are just a few items in a week's news concerning the progress mankind is making in its conquest of the air. They seem to us pretty thrilling. "A little lower than the angels," is one of the Biblical promises that, physically at least, seem about to become true.

WHY PLANT A GARDEN.

The number of good citizens in Fulton who will hopefully undertake the attempt to make two vegetables grow where one blade of grass grew in the garden are optimistic souls, or our experience has been signally unsuccessful.

Some years ago we decided to grow fresh vegetables in the old back yard. We prepared the soil and purchased such utensils as seemed necessary after conference with reputedly successful gardeners. In time we strained our back muscles with labor, and our eyesight looking for the first tiny shoots to stick up their heads.

In the end, as best we could figure, our beans cost in excess of four cents each, our corn about a quarter an ear and other products in proportion. It would take about \$2.50 worth of our vegetables, figured on a cost basis, to make soup for two. As a money-making venture the family vegetables were dismal failures, but, (here comes the main point) read the next paragraph.

Now, in spite of the facts suggested above, we urge everybody to get busy with the back yard garden. If you are a good gardener you will make money and if you are a poor gardener you will learn a lot about nature and get some exercise that you probably need. If you are a man with a family you can interest

the youngsters very much and this is part of their education, to know nature and her ways and there is no better place for them to learn than in their own yard under the direction of their father.

HONORING MOTHERS.

Men and women who wish to pay tribute to their mothers can do so by joining in all efforts to make motherhood safe for mothers.

The annual loss of life through improper pre-natal and post natal care is a reflection upon our people which should not be permitted to continue.

It is fine to remember one's mother on Mother's day but how much more fitting would it be if through our efforts some little child was given the life of his or her own mother. If adequate care is assured, thousands of American mothers will be alive at the end of 1936 and taking care of their children. Without needed attention they will be dead.

PERPETUAL MOTION.

It takes thirty-six States to ratify an amendment to the United States constitution but the Child Labor amendment, rejected ten years ago by twenty-five States, is still popping up before various legislatures.

In other words, once a State ratifies it is eternally bound, but if it rejects the proposal the question can continue to come up until ratification wins. Without discussing the merits of the Child Labor proposal but only referring to the process involved there ought to be a time limit on State action.

Good times will not return to any individual without some hard work. Prosperity doesn't come out of the air like a rabbit from a magician's hat.

You can do your part in the up-building of Fulton by helping to make it the best town in Kentucky in which to raise boys and girls. No city has a greater challenge than this.

THE BOOK

... the first line of which reads: "The Holy Bible," and which contains Four Great Treasures.

by BRUCE BARTON

JOHN THE BAPTIST
IF one were to seek out the most unselfish hero of history it would be difficult to name another worthy to stand even close to John the Baptist. He inaugurated a great movement which he might very easily have utilized for his own use; just how great it was we can imagine from the fact that St. Paul, coming to Ephesus a full quarter of a century after the crucifixion of Jesus, found a little group of men who were still disciples of John and knew hardly anything about Jesus. We find the same situation existing in far-away Alexandria, and we know the potency of John's name from the fact that Jesus used it in the last week of His earthly life for His own protection. The priests, His hecklers and baiters, were silent when He spoke it, fearing the people "for all held John as a prophet."

Go back to the very beginnings of the Gospel; how did it start? By the preaching of John.
The beginning of the gospel of Jesus Christ the Son of God; As it is written in the prophets: Behold I send my messenger before thy face, which shall prepare the way before thee.
The voice of one crying in the wilderness, Prepare ye the way of the Lord, make his paths straight.
John made his camp by the banks of Jordan, clothing himself in skins and eating locusts and wild honey; and there he began to announce the coming of the kingdom of heaven and to all upon men to depart from sin. How did he know that the kingdom of heaven was at hand? Who told him to proclaim the dawn of a new day?

John's success was almost instantaneous. Crowds went out from the city to attend his meetings; he became a sort of fashionable fad, attracting not only the leaders of the smart set but a sufficient number of thoughtful and important people so that even the Pharisees began to give respectful attention.
One day an impressive committee went down the long winding road from Jerusalem to the Jordan, and after putting up at the most reputable tavern in the vicinity and removing the traces of their travel they waited on John in solemn array and asked him to declare whether he was the Christ, and, if not, what honorable title they might confer upon him.
And he confessed, and denied not; but confessed, I am not the Christ. And they asked him, What then? Art thou Elias? And he saith, I am not. Art thou that prophet? And he answered no.
He had his chance to claim the great place for himself and he refused it. He was only a "voice crying in the wilderness," he said, the forerunner of a Greater One to follow.

Designed in Sizes 36, 38, 40, 42, 44, 46, 48, 50, 52. Size 44 requires 4 1/2 yards of 39 inch material, plus 1 yard contrasting.

DAYTIME FROCK
Pattern 8419: Smart women of larger size choose frocks of dignified beauty to best enhance their charm, because anything "kittenish" quite ruins their appearance. Quiet distinction and conservative but attractive styling characterize the frock sketched, which is modish and up to date in all its details and has a great deal of feminine appeal.

The simple, rolled collar has a

quite high V neckline and pretty jabot arrangement. The saddle shoulder of the sleeves insure a good fit and have a slim fitted long cuff below the gathered fulness at elbow. Tucks at each side of the waist front add interest. The yoke and panel front and back of the skirt are smooth and slenderizing. Inverted pleats finish the panels and give fulness at the lower edge.

For Pattern, send 15 cents in coin (for each pattern desired) your Name, Address, Style Number and Size to Patricia Dow, The News Pattern Dept., 115 Fifth Avenue, Brooklyn, N. Y.
