Hiking tips poster

Before you go...

Start small
Be sure not to push yourself too hard when starting out. Find trails equal to your level and always consider distance and elevation.

Check weather
Always check the weather from multiple sources before you go out.

Go with someone
It's always best to hike with a partner incase of any emergencies or accidents.

Give out your location
Before you go, be sure to give your location to a friend incase of any emergencies.

Know the trails
Always be sure you know the trail or have a map to avoid getting lost.

Pack essentials
Always carry the essentials: navigation tools, lighting, first aid, extra water, food, knife/multitool, sun protection, weather-appropriate clothing, lighter.

Hydrate!
Be sure to stay hydrated and healthy before going out and pack plenty of extra water.

Leave no trace
The beautiful trails we love will only stay beautiful if we care for them. It's up to us.
