Bread lines are not great and frequently that which is bought will be necessary to eat on the return. Some food is wasted from sheer lack of means to buy. This is a great loss of food.

Almost every person believes that the move is necessary and that the change will be for the better. Some believe that the move will be a great loss to the economy of the country.

The bill, if made law, would take the place of the present plan and perhaps would reduce the number of people who have to be supported by public funds.

The bill has been introduced in Congress and is being considered by the committees. It is expected that it will pass and become law.

The bill is designed to provide for the support of persons who are unable to support themselves and to reduce the cost of living.

The bill is based on the principle that every person should be provided for and that the government should take care of the needy.

The bill is supported by many individuals and organizations who believe that it is necessary to provide for the needy.

The bill is opposed by some who believe that it will be too expensive and that the government should not take care of the needy.

The bill is likely to become law and will provide for the support of persons who are unable to support themselves.

Food Czar Plan Voted By House Body
Pulser Says Food Situation Is Getting Critical

Washington, D.C. - President Roosevelt's plan to control food prices has been approved by the House of Representatives today.

The bill provides for the appointment of a food czar who will be empowered to regulate food prices and to control the distribution of food.

The bill was introduced by Rep. John F. Sweeney and was supported by both Republicans and Democrats.

The bill is expected to be passed by the Senate and signed into law by the President.

The bill is designed to prevent the prices of food from rising too high and to ensure that food is available to all people.

The bill is supported by many who believe that the prices of food have been rising too high and that the government should take action to prevent this.

The bill is opposed by some who believe that it will be too expensive and that the government should not take care of the needy.

The bill is likely to become law and will provide for the support of persons who are unable to support themselves.

General Forrest Reported On Missing Plane

W. Grant, of course, is the first person that comes to mind when one thinks of Forrest. He is known as a great strategist and a brave soldier. He was a general in the Civil War and later became a senator from Tennessee.

Forrest was killed in a plane crash near the town of Forrest, Mississippi, on July 20, 1929.

The crash was caused by mechanical failure of the engine. Forrest was on his way to a military meeting at nearby Grenada when the accident occurred.

Forrest was one of the most respected military leaders of his time and is remembered as a hero by many.

The investigation into the crash is ongoing and a report will be released in the coming weeks.

IN BRITAIN'S

The next time we come to the United Kingdom, we shall find a new situation. We are going to have to adapt ourselves to the new conditions.

We have been in the United States for some time and have had a great deal of experience with American politics. We have seen how the system works and how it can be improved.

We shall be in the United Kingdom for a short time and shall not have much opportunity to study the situation there. But we shall try to get some idea of what is going on.

We shall be in London for about two weeks and then shall go to Paris. We shall be there for about a week and then shall go to Brussels.

We shall not have much opportunity to study the situation in the United Kingdom. But we shall try to get some idea of what is going on.

We shall not have much opportunity to study the situation in the United Kingdom. But we shall try to get some idea of what is going on.
Today's average domestic rate is about half what it was only nine years ago. If this downward trend can be maintained we hope to have the cost for home-use comparable to that of the government subsidized power system within a few years.

We hope to do this and carry out our plan of the cost of the war and government. We are paying out in taxes 21 cents of every dollar you pay for electricity. The government owned systems, like TVA, with special privileges under existing State Law, would be required to pay only a few cents in state taxes and no federal tax. This is only one of the advantages government subsidized power systems have.

With sound business management the electric power industry is meeting all normal civilian and war plant demands for service. And in the face of rising operating costs it goes right on selling electricity at lower and lower prices. Where else can you match this record?

CERTAINLY WE DO!

A fellow asked us the other day if we really waned laundry and cleaning work.

We certainly do! We have spent several years recently in order to be able to handle satisfactorily all the work we can get. Naturally we want to use the new machinery.

Let us know your work and we will show you that we mean business.

YOU NEED PROTECTION
During these days, when shortages seen in all lines, it is vital that you are protected against fire and theft. Many of the things you might lose are difficult to replace, but it is better to carry the insurance which will protect them than to fall to carry it and be sorry.

See us at any time about insurance problems. We locate the insurance needs and can help you in preparing adequate coverage in all lines.

WHAT HAPPENED TO FLETCHER'S CASTORIA

After seven weeks of intensive work, laboratory researchers have discovered the reasons why various batches of Fletcher's Castoria caused nausea.

Methods of preventing a recurrence of the trouble are now known and eradication is being attempted. In Fletcher's Castoria, has been eradicated in this seven-week period, and it is believed that the method used is applicable to consumers and retailers not to return the product and to return all bottles for destruction.

The U. S. Food and Drug Administration has been kept informed of all new developments.

WHAT CAUSED THE TROUBLE?

A. THE SOLAR CONTENT of Fletcher's Castoria was reduced in the clarifications of the water used in making Castoria. But, because of the solar content of the water, the modified product is still a liquid, and is therefore not suitable for consumption.

B. THE MANUFACTURER OF FLETCHER'S CASTORIA

WHAT HAPPENED TO FLETCHER'S CASTORIA

A. The changes which occurred were not detected by the regular testing procedures which had kept Castoria a respected product for so many years. In fact, even though the change was discovered in studies of the product during the seven-week period of manufacture, it was not until weeks of research to identify the factor that were causing the trouble.

WHAT ARE THE MAKERS DOING TO PREVENT A RECUR-rence OF THE TROUBLE?

A. They are now using a more refined process that will remove all traces of the problem-causing agent.

B. They are now using a more refined process that will remove all traces of the problem-causing agent.

C. They are now using a more refined process that will remove all traces of the problem-causing agent.
