COTTON REDUCTION CONTRACT SIGNS TO BENEFIT BY CROP FAILURE INSURANCE

Cotton acreage reduction contract applications must be accepted by June 20th so that the states can make attempts to reduce the acreage of cotton by July 1st. Only those farmers who have applied for the contract will be granted the option of reducing their cotton acreage. Each farmer must sign the contract in order to guarantee the reduction.
A BULWARK OF CONSTITUTIONAL GOVERNMENT

A traveler who visits the nation's capital this summer will not fail to notice the similarity of the state of Alabama to the state of New York. Both are large and have a long history of political and economic development. However, the state of Alabama is much more isolated from the outside world than New York. This isolation is due in part to the geography of the state, but also to the political climate of the state. In Alabama, the political system is characterized by a strong emphasis on individual rights, whereas in New York, the political system is characterized by a strong emphasis on collective rights. In this article, we will explore the political system of Alabama and compare it to the political system of New York.

The political system of Alabama is characterized by a strong emphasis on individual rights. This emphasis is reflected in the state's constitution, which is one of the most liberal in the country. The constitution guarantees the right to free speech, the right to bear arms, and the right to a fair trial. The state also has a strong tradition of judicial independence, which is reflected in the fact that the state's highest court is independent of the governor and the legislature.

In contrast, the political system of New York is characterized by a strong emphasis on collective rights. This emphasis is reflected in the state's constitution, which is one of the most progressive in the country. The constitution guarantees the right to a decent standard of living, the right to a fair wage, and the right to a safe workplace. The state also has a strong tradition of union organization, which is reflected in the fact that the state is one of the most unionized states in the country.

In summary, the political system of Alabama is characterized by a strong emphasis on individual rights, whereas the political system of New York is characterized by a strong emphasis on collective rights. These differences reflect the different values held by the citizens of the two states, and they have important implications for the way in which the two states govern themselves.
