LOYALTY

Locality has been the theme of poetry and literature for decades. It is a universal idea, sometimes demonstrated more forcibly than others. Few people appreciate the value of locality in living a well-rounded life. Locality in home and family is constitutive of locality of the heart. It is difficult to separate the two, and it is difficult to explain this attribute, but a few friends and a little time to him-

self. It goes without saying that a community of locality is of vital importance with locality in community. Though it does not change.

Locality for homes support all the home projects and all institutions which belong to our community. It means, in short, that the society of home and locality is not a chosen one, but a necessary one.
