FULTON ADVERTISER

Vol. 3 No. 11

FULTON, KY., FEBRUARY 4, 1927

R. S. Williams, Publisher

Annual Election Tuesday Night

Tuesday night, Feb. 8, the members of the Chamber of Commerce will meet and hold its regular annual election. Ten directors are to be elected, who in turn will elect all other officers of the Chamber.

The Chamber of Commerce now has a membership of more than one hundred active members and the meeting Tuesday night promises to be one of the best in the history of the organization.

The program for the year's work will be discussed and the best plans devised to judiciously and economically use the \$6,000 budget subscribed for the advancement and betterment of the city's best interest.

Every member should be in attendance and all loyal citizens who are not members are invited to be present.

The purpose of the Chamber of Commerce is to advance the city's best interests and make Fulton a better place in which to live, and it is the duty of every citizen to take part in the work.

ATTRACTIVE DISPLAY

In the show window of the Snow-White Motor company on Fourth Street, is displayed a miniature locomotive made entirely of Ford accessory parts. Mr. R. H. Wade, member of the firm, is the mechanical genius who assembled the parts into a display causing much favorable comment by all who see it. Ninety-five pieces were used in the construction as follows:

- 6 rear hubs.
- 3 main bearing wrenches
- 2 steel battery boxes.
- 2 truck running boards, 26 model.
- 2 roadster deck boards.
- 1 battery box cover.
- 1 battery box cover lid, 25 model.
- 2 gas lines.
- 6 piston bushings.
- 1 touring car running board, 25 model.
- 3 pistons.
- 2 rear hub caps for truck.
- 3 Bendix covers.
- 1 driveshaft sleeve.
- 1 gas tank, 25 model.
- 1 outlet hose.
- 4 motor arm blocks.
- 2 hood blocks, right and left, 23 model.
- 4 hood block supports.
- 4 transmission brake drum assembly, 24 model.
- 4 transmission clutch disc drum assembly.
- 2 transmission gear shaft.
- 2 gas tank overflow pipes, 26 model.
- 1 inlet hose.
- 1 starter switch.
- 13 truck rear hub keys.
- 4 connecting rods.
- 4 triple gear flange bushing.
- 2 radius rod ball cap studs.
- 2 differential case studs.
- 4 intake and exhaust clamp stud nuts.
- 1 spotlight.
- 1 steering aid spring.
- 1 tail light complete, 24 model.
- 1 tail light bulb.
- 1 socket head lamp plug, 20 model.

MAYFIELD MAN IS KILLED BY TRAIN

T. H. McGuire Victim of Accident Sunday Morning

Mayfield, Ky., Jan. 31. — Thomas H. "Tom" McGuire, aged 61 years, former member of the Mayfield city council, was instantly killed at the Broadway crossing yesterday morning at 9 o'clock, when struck by the southbound Illinois Central passenger train known as "Whiskey Dick." His neck was broken, head severely cut, and chest crushed in the accident, while his car, a sedan

was entirely turned around by the impact and turned over. The car was not badly damaged.

Mr. McGuire had been in the western end of the city, and was driving back to the city, headed east. He observed the train when within about twenty feet of the track, and applied his emergency brake, but the street at this point was slick with mud washed on it by the rains from the side streets and railroad yards, which are dirt.

Apparently losing his presence of mind, he did not attempt to turn his car down the railroad track, onto the siding, and the pilot of the train hit the car about the front end of the running board.

MRS. ELIZA SCOTT SANDERS

Ends Life's Journey After a Busy and Useful Life

After an illness of many months, the gentle spirit of Mrs. Eliza Scott Sanders took its flight, Monday night, January 31, when the death angel entered the Binford home on Eddings street at 9:30 o'clock and severed all earthly ties. The end came peacefully at the home of her daughter, Mrs. Chas. Binford, with whom she had lived for the past 15 years. She died as she had lived — honored, trusted and loved. She reared her own monument while she lived in the hearts of all who knew her. She was a member of the Trinity Episcopal Church of this city. Her Christian life was beautiful from its beginning to its close, and during the declining days she softly whispered, "Though I walk through the valley of the shadow of death, I will fear no evil, for Thou art with me; Thy rod and Thy staff, they comfort me."

Mrs. Sanders was a native Virginian, born in Tazewell county, January 25, 1844 and was married to James Addison Sanders October 14, 1868, at Middlesport, Ohio. Later located at Columbus, Ky., where they lived until Mr. Sanders' death.

The deceased is survived by four children: Mrs. Artie Milburn, of Pittsburg; Mrs. Annie Dupree James, of St. Louis; Mrs. Chas. Binford, of Fulton, and Harry Addison Sanders, of Pittsburg; also eight grandchildren and two great grandchildren.

Funeral services were held at the Binford home, Tuesday afternoon. The Rev. J. V. Freeman, pastor of the First Methodist church, officiating, reading the Episcopal service, followed by a beautiful tribute to the memory of a true and noble woman. After the services the body was placed in the mausoleum at Fairview cemetery, and when weather conditions permit will be taken to Columbus, Ky., for interment. The floral offerings were many and beautiful.

CAYCE SCHOOL REOPENS

The high school at Cayce, this county, closed Christmas on account of insufficient funds to continue the term but the high school has opened again and will be able to continue to the end of the term. The failure of bond election to carry last fall was the cause of the school not having sufficient funds to continue but another school election took place on January 15, which carried with a vote of 110 for and 70 against it. Some of the students of the Cayce High school had started attending the high school at Hickman after that school closed but will be able to resume their studies at home now.

Big Real Estate Deal on 4th St.

R. H. Wade Buys Building Occupied by Kramer Lumber Company

The large building on Fourth street, better known as the W. K. Hall building, occupied by the Kramer Lumber Company, was recently purchased of T. J. Kramer by Ex-Mayor R. H. Wade, banker, manufacturer, farmer and financier, for a consideration of \$15,000.00. The property is admirably located in the business section of the city, with 100-foot front on Fourth street, extending 300 or more feet back.

We understand that the building will be remodeled and converted into a modern, up-to-date garage for the Snow-White Motor Company, authorized Ford dealers, who now occupy quarters adjoining the property.

It is said that the new building contemplated will be one of the most handsome garage properties in Western Kentucky and an attractive addition to the business section of the city.

The Kramer Lumber Company is desirous of a more convenient location in Fulton for their business, and probably will select a site in close proximity to the railroad. They are extended all the time necessary to find a suitable location and will do business as usual at the same old stand on Fourth street until final arrangements are made to take care of their extensive stocks.

FORMER WATER VALLEY MAN DIES IN TEXAS

Wes Crutchfield, formerly a resident of this section, died a few days ago at his home in Madisonville, Texas, according to messages received by relatives. Mr. Crutchfield resided near Water Valley, and has many relatives in this section of Kentucky. He left here some 25 years ago.

Mr. Crutchfield was 71 years of age and is survived by his widow and several children; also by one brother and two sisters. He was a grandson of the late Sam Bard, and cousin of J. T. Bard, Mrs. J. E. Fields, and Mrs. Jack Hall of Fulton.

The funeral and burial took place at his home town.

FORMER FULTON CITIZENS WILL OPEN BAKERY IN MAYFIELD

We understand from reliable sources that Messrs. Paul and Alf Hornbeak and Clement West have leased the H. J. Wright building in Mayfield on the north side of Broadway, near Hunt's drug store, where they will conduct a modern and up-to-date bakery establishment. The building is now being remodeled and equipped with the newest and improved conveniences for the successful operation of a bakery establishment, and they contemplate being ready for their opening, Feb. 15.

It will be remembered that Hornbeak Brothers' Bakery in Fulton gained an enviable reputation throughout this entire section of country for their bakery products, especially Hornbeak's Cream bread. The same reputation is now being maintained by their successors, Messrs. Culver & Chambers, who purchased the business some years ago.

It will be remembered too, that Clement West was associated with Hornbeak Bros. as head salesman several years before selling their bakery establishment here and is due some of the credit for the firm's success.

We regretted very much when we lost these splendid business men and citizens, but we wish them every success possible in their new field of endeavor and heartily recommend them to the good people of Mayfield as men who can be depended upon as good citizens and business men.

PRISONER TURNED OVER TO HICKMAN COUNTY OFFICERS

Leonard Kesterson, arrested in Paris, Tenn., recently on several charges and brought to Fulton county and placed in jail, was turned over to Hickman county officers. Kesterson was wanted on two charges in that county previous to the charges against him in this county. He is alleged to have robbed two stores in Hickman and previous to that is alleged to have robbed a store in Hick-

man county at Moscow, and had been connected with a still that was captured in Hickman county, at which time he escaped. Kesterson is only 22 years old. His mother resides in the upper bottoms six miles above Hickman.

High School Notes

Aubrey Nugent of the Farmer's Bank gave the third of a series of lectures at the High school, Tuesday at the regular chapel period. Mr. Nugent's talk was interesting and well appreciated by the High school students.

Miss Sarah Leet, a recent graduate of the University of Kentucky, has been employed to take the position made vacant by the resignation of Miss Stevenson of the department of Domestic Art. Miss Leet arrived in Fulton, Tuesday.

Harry Maddox, ex-football captain of the "Bulldogs" left last week for Memphis to enter school.

Preparations are under way for an extensive field meet to be held at Fulton High School in the Spring. The program plans to eclipse in every way the meet of last year. Added features are a solo contest in voice and a dramatic contest.

The Rotary Club at their last meeting voted to equip the high school orchestra with a drum and traps. The gift is a worthy one and one which will be greatly appreciated by the students.

Basketball games of the last week-end resulted badly for the two teams. The girls were defeated at Rives on Friday evening and the All-Stars were successful over the boys team, in the high school gymnasium Friday night.

For Sale

One four-room house with modern conveniences on lot 56x170 feet at 807 Eddings street, also one vacant lot 56x204 feet adjoining.

Six vacant lots 50x150 feet near Riceville.

All of the above property is admirably located and will be sold at a bargain on reasonable terms. See T. J. Wild, Phone 597.

Send the Advertiser to a friend one year—only \$1.00.

PERSISTENCY MEANS SUCCESS

Clinton Boy Awarded Position in State University

W. C. Porter, of South Fulton, received a letter this week from his son, R. Clay Porter, saying he had resigned his position with the General Electric Company in Schenectady, N. Y., to accept a position in the Research Department of State University at Lexington, Ky.

In this connection it might be stated that R. Clay Porter, after graduating from twelfth grade high school in Clinton, Ky., was employed for a time with the Shapleigh Hardware Co., in St. Louis. While there he decided to take up a special course of study, and went to Lexington where he entered a four-year course in electrical and mechanical engineering in the University of Kentucky, and in the main part, worked his way during the four years, making the entire course without a failure in examinations. He graduated from State University in 1925, receiving the degree of Bachelor of Science. He then accepted a position with the Monarch Metal Products Company, in St. Louis, and later went to Schenectady, N. Y., to a position as electrical engineer in the testing department of the General Electric Company.

PUT OFF OF M. & O. TRAIN

Hickman, Ky., Jan. 31.—Five young men of Hickman had an unusual and harrowing experience a week ago last night when they were put off of a M. & O. train in spite of the fact they had purchased tickets, and had to walk more than 17 miles home. The young men, Harry Matson, Harry White, Joe Wiley, Pleas Fields and Harvey Bondurant, had driven to Cayce from here to catch the train for Kenton, Tenn., leaving their automobile at Cayce to drive back on their return. It is said the Cayce agent assured them that by buying five round trip tickets, the midnight train would stop at Cayce to let them off on their way back. They boarded the train at Kenton on the return but when they were a mile or so this side of Union City, Tenn., the conductor discovered they wanted off at Cayce and informed them the train did not stop at Cayce at midnight and stopped and put them off in a cornfield.

The boys walked back two miles to Union City, and after getting a lunch there, walked on into Hickman, 15 miles. It is understood they have retained Judge E. J. Stahr, attorney of Hickman, to bring suit against the railroad.

WILL WATSON SUCCUMBS TO PNEUMONIA

Will Watson, 48 years old, well known citizen, of Hickman, died at his home in that city, January 27, after a brief illness of flu, developing into pneumonia. He was well known in this city and was highly esteemed by a large acquaintance throughout the county.

He is survived by his widow and a ten year old son, also his aged mother, Mrs. Green Watson, three sisters, Mrs. Tom Prather, Mrs. Julian Choate and Mrs. R. B. Seacore and two brothers, Luther Watson, of Bakersville, Calif., and Frank Watson, of Hickman. Burial took place Saturday in Hickman at the city cemetery, with funeral services at his home.

SPECIAL OFFER

For a short time we will accept subscriptions for this paper and the Memphis Weekly Commercial Appeal—both papers one year for only \$1.25.

Agricultural College on Wheels

Illinois Central Specialists Impart Valuable Information

The Agricultural special train of the Illinois Central Railroad, consisting of six cars, four exhibition cars, a lecture and motion picture car, arrived in Fulton Thursday afternoon on schedule time and was parked on siding facing Lake street. Hundreds of persons, including interested farmers, their families, business men and others of the city, viewed the exhibitions and listened with keen interest to the personal direction of H. J. Schwieter, general development agent of the Illinois Central, Chicago, and carries with it seven agricultural

terest to the inspiring and educational development agents. The train is touring only the southern lines of the system, making nine stops in Louisiana, thirteen in Mississippi, eighteen in Tennessee and forty-one in Kentucky.

All of the exhibits are attractively arranged and of local interest to farmers in this section, the good and bad points being pointed out by the specialists in each car.

The first car, which includes pasture feed and crop exhibits, is in charge of F. L. Tenton. Mr. Tenton pointed out that blue grass in combination with white clover, makes the best pasture for this section. There are exhibits in this car showing

the profits derived from the use of limestone.

Sorghum, a member of the sorghum family is exhibited. This is a very high in sugar content. It will stand severe drouths and is 90 per cent as good as corn for feeding value.

Pastures in various parts of the south are illustrated by beautiful transparencies.

The proper types of trees are shown for transplanting, and the proper roots to use are shown in the fruit, truck and vegetable exhibits, in charge of T. O. Tackett. Mr. Tackett pointed out the ways to control the peachtree borer. He stated that three-fourth of an ounce of paradichlorobenzene in powdered form applied around the tree at the ground the first of October will generate a gas which kill the worms. He demonstrated the best way to prune peach trees and told of the best fertilizers to use in growing vegetables, etc. Oil Emulsion should be used to prevent San Jose scale on peach and apple trees, he said.

Paul Farlow, poultry expert, Chicago, is in charge of the second car which contains the poultry exhibits. He stated that the railroad company is trying to bring out the poultry industry in Kentucky by showing the people how to have more winter eggs. This can be produced only by having good laying stock and by hatching early in March and April, he said, and added that a balanced feed is very important, and that the chickens should be well housed. A house 20 feet deep and open to the south is good. A model poultry house was exhibited.

Industrial fleeces of wool are also shown in the second car. D. O. Segrest, Mississippi agricultural agent, in charge. The proper breeding will mean a better grade of wool and also a better grade of mutton as well as quantity. Mr. Segrest said. An offspring of a scrub ewe and a pure-bred Shropshire ram are exhibited in the car to show the improvement of the first generation.

Three of the most popular breeds of hogs are shown in the next car. They are Duroc Jersey, the Poland China and the Hampshire, these being of the proper type for this section of the country and are most profitable. The contrast between the most profitable and unprofitable types of hogs are shown in the exhibits.

According to figures, compiled by the railroad company, Kentucky ranks second in the southern states in the production of hogs, with 882,000 for last year. A good brood sow on the average farm will help it prosper, Mr. Segrest said.

The fourth car is devoted to a cattle exhibit where valuable information is given those interested in dairying, etc.

Taking it as a whole the exposition is equal to a state fair. The displays may not be as large, but the educational scope is unlimited. The man who views the exhibits and pays attention to the information given out should reap a rich harvest for diversification, placing him on the right road to success and prosperity.

If you want two good papers for a year, send R. S. Williams, Fulton, Ky., \$1.25 for this paper and the Memphis Weekly Commercial Appeal. This special offer is only good for a short time. Send in your subscription at once.

POULTRY

FEEDING LAYING
HEN IS REAL ART

Much of the success in winter egg production is obtained from a bucketful of feed in one hand and a bucketful of common sense in the other. Feeding the laying hen is a real art, for so much depends upon the poultryman's decision each day in the matter so that his birds will work most efficiently.

The feeder is a skilled mechanic who systematically holds the birds up to 50 to 60 per cent production from November 1 to the following fall, without causing a slump in egg production and at the same time maintaining their health and vigor.

One of the first prerequisites in feeding is to understand what the egg consists of. It is made up of a yolk, white, shell, and is two-thirds water.

The yolk is fat and is made from feeding fatty or starchy foods, as corn, wheat and oats.

The white is animal protein, which is made from material such as meat and milk.

The shell is made mostly of calcium, which is found in certain kinds of stone and oyster shell. In order to aid in the digestion of all of these foods some bulk is desirable which is green and succulent, such as sprouted oats, mangel beets, cabbage, etc.

In order for these foods to be properly digested, an abundance of grit should be available, as this acts as the hen's teeth in grinding the food in the gizzard.

Water is cheap. Have it before the birds at all times.

Legume Hay Helps Solve the Green Feed Problem

Legume hay helps solve the winter green feed problem for the chickens. Experiments in Ohio, Kansas, Texas, and California seem to indicate definitely that where no other source of green feed is available the addition of a legume hay will increase the number of eggs produced and their hatchability. It will also reduce the mortality from nutritional troubles, points out G. S. Vickers, extension specialist in poultry at the Ohio State university.

Have the hay with the most leaves and the greenest color for the chickens. An easy way to feed chickens hay is to provide a rack along the wall and keep hay before them all the time. A trough along the bottom of the rack will catch all the leaves that would otherwise be wasted. These can be fed from the mash papper.

Alfalfa meal may be used if good hay cannot be bought at reasonable prices. The meal should be used in the mash. About 10 per cent alfalfa meal will substitute for a like amount of bran. A combination of mangel beets and legume hay makes a good winter combination to use instead of sprouted oats. It may be that hay is about to take the place of our old reliable, but troublesome, sprouted oats as a winter green feed.

Poultry Hints

The laying hen never loaf.

Soy beans can be used in a poultry ration if minerals are added.

Poultry raising brings quick returns and involves a small capital investment in land, buildings and equipment.

The factors of scientific poultry housing are to keep the pens, yards and houses clean, dry and sanitary.

Thanksgiving and Christmas seasons offer good markets for capons. January and February are also good months since at that time poultry of all kinds is scarce and buyers are willing to pay top prices.

Systematic culling may profitably be practiced throughout the year. Sick birds, those lacking in constitutional vigor, and those showing any sign of physical defects should be disposed of whenever found.

Litter that is not kept loose and light is too heavy for the hens. Put a little down first; when that is broken and fine, add more.

Ducks have been successfully bred up until seven years of age. The age of vigor and productiveness in a duck is double that of the hen.

Green food in some form is essential and should be provided regularly during the winter months. Cabbage, carrots, turnips, beets or potatoes will serve.

When culling a flock one should find out whether it is the hen or the owner who is at fault.

Everything inside a poultry house should be made removable so that it can be cleaned.

Summer chicks command good prices in late fall. They should weigh about five pounds to the pair. Those hatched in the fall stop growing as the cold weather sets in, and are usually small but compact in appearance.

ROYAL ELECTRIC CLEANER

Gets ALL the dirt by Air Alone

Housework Made Easy

A reliable vacuum cleaner reduces that back-breaking labor of your housework at least 40 per cent.

Overwork—household drudgery—undermines the health of thousands of wives—makes them prematurely old—steals their beauty of face and grace of figure.

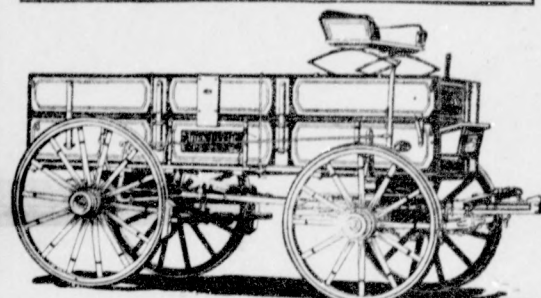

The ROYAL ELECTRIC CLEANER is efficient and reliable. It will last a lifetime. With reasonable care it will give perfect service.

Senour's FLOOR PAINT

"It Penetrates"

IN the word "penetration," is a secret manufacturing process that has made Senour's Floor Paint a popular favorite for over 40 years.

If a floor paint does not penetrate or grip into the wood it will soon begin to crack, chip and peel.

Senour's Floor Paint dries over night with a high gloss enamel-like finish, but at the same time it sinks into the pores of the wood and forms a film that will withstand the hardest usage and will withstand repeated washings without dimming the luster.

Every can of Senour's Floor Paint is guaranteed to give satisfaction if directions printed on the can are followed or money back upon receipt of empty can.

A color card is yours for the asking.

SOUTHERN FENCE

Horse-high--Bull-strong--Pig-tight
--"Weather-wise"--Rust-proof

SOUTHERN FENCE holds its own against the strongest pressure and resumes normal shape as soon as pressure is removed, because it has HINGED JOINTS. Also, it retains its shape in all weathers, as TENSION CURVES allow it to expand when hot and contract when cold. Made of the highest grades of tough, springy open hearth steel wire with extra heavy and uniform galvanized coating in which the best prime Western spelter zinc is used.

SOUTHERN FENCE IS LIFE-TIME FENCE—on the job all the while. You can get it here. We sell SOUTHERN FENCE under the guarantee of the Gulf States Steel Company, who make it.

FULTON WILL HAVE
GOOD STREETS

Good streets. Yes, Fulton will have good streets. We already have some good streets and we are going to have some better ones. Fulton will continue to progress just as it has since it was incorporated, fifty-five years ago, but just at a little faster gait. We have just completed installing ten miles of sewer system. The connections are yet to be made. The cost of connecting will be a burden to some and a little spell before their bank accounts are given another shock will be a great relief. If we all make sewer connections as quickly as possible we will have months to breathe freely in before permanent streets can be constructed in the residential section of the city. We should think seriously about good streets. We should think seriously about the hardships it will incur on some property owners. It means a great sacrifice in some instances, but the dignity, comfort and civic pride of our city is at stake. Fulton will have good streets. The wise ones will provide a way so the burden will not be near so great as we picture at this time.

Where there is a will, there is a way, and Fulton will have good streets. Let's keep our heads and control our tempers with a little patience if our neighbor fails to agree with us. Every man has a right to his own opinion. He may view the issue from a different angle. After sitting in the galleries of the Senate Chamber and hearing big issues discussed, you will agree that all men don't think alike, and often times the president of this great nation is embarrassed over issues that he thinks is best for the masses.

Fulton will have good streets. Few good things we have in this world without hardships and sacrifices. Let's get our heads together and figure out a way to make our improvements so the burdens will be the lightest. Keep in mind at all times that Fulton will have good streets.

BRIGHT OUTLOOK

Situated in the heart of one of the most fertile sections of this country, Fulton, a city of beautiful homes, of handsome business and public edifices, sits a queen among the cities of the Purchase, the fairest of them all. It is just entering upon a career that will cause it to outstrip all its neighbors, and in a few years will become the home of double its present population.

It does not require a prophet to prognosticate the future and tell that Fulton is going to be a much larger city than now, within a very few years.

In the first place it has a people as citizens who will not fail. They are ambitious, sturdy, moral, reverential, refined, cultured and possessing an indomitable spirit to succeed in whatever they undertake, and the elements, such as soil, climate and other natural resources are here to aid them.

All things considered, no city of near its size in the south has a better outlook than Fulton for a magnificent growth. It presents a most inviting field for those desiring to invest and to locate in an up-to-date little city and among the best people in the world.

**THINK!
HAVE MONEY!**
CITY NATIONAL BANK
"That Strong Bank"

Co-operation Will Aid Farmers To Work Out Own Salvation.

The farmer has been "stung" so often until it requires something out of the ordinary to get his attention.

The following extracts taken from an address delivered by Nicholas H. Dosker, prominent Louisville banker, is due careful consideration.

Friendly assistance from other branches of industry and whole hearted cooperation from his brother farmers will enable the farmers of the country to work out their own salvation.

This cooperation and not a mass of law will enable the farmers to put themselves in better financial conditions, the banker advised. If the laws that have been proposed by "politicians in and out of legislative halls in the last six years," had been enacted "the condition of the farmer might easily have been worse than it now is."

"Agriculture is the backbone of our national economic structure and the fact that agriculture as a whole has not shared proportionately with other industries of the past few years is a matter of grave concern to the people of this country."

"We cannot become truly prosperous as a nation as long as our largest single industry is forced to pay more for the things it has to buy than for the things it has to sell. Farmers are paying a big penalty for being a member of an unorganized industry which sells to and buys from other branches of industry."

"One way the farmer can bring the price of things he has to sell, provided the product is by its nature susceptible of that type of marketing, is to join with others in a well-managed, soundly organized cooperative marketing association—an association where the policy of management is to sell the product for the best prices obtainable and not to hold it for the speculative possibility of higher prices or in the futile effort to defeat the law of supply and demand."

"How to find a solution for the problems confronting the farmer and to bring agriculture back into balance with other industries is the question of the hour. The fact that it remains unsolved is a dangerous factor threatening at any time to bring about the destruction of our present period of general prosperity."

"One way the farmer can bring down the cost of production is to educate himself on better farming methods. Many farmers grow the same crops in the same way year after year regardless of the fact that by doing so they may be only contributing additional surplus products to a market already glutted. This situation would be greatly improved if the products of each farm could be so diversified that the failure of one major crop would mean financial stringency for the farmer."

"Another way to bring down costs of production is to apply important business principles to farming. Farming is a business. It is an important business. It requires just as much careful thought and scientific planning to manage a farm profitably as it does to manage any other business profitably. Many farmers keep no adequate system of farm accounts and consequently have no idea what the cost of labor, materials and supplies are doing to them."

Taken as a whole, he said, American agriculture has made great progress toward better farming and better marketing methods.

"If the agricultural situation is to be improved, the farmer himself, not legislation, is going to improve it, in other words, I bank on the intelligence, industry and common sense of the American farmer to work out the agricultural credit situation."

HELP WANTED

Experienced cigar makers on shape or straight work. We can also place 15 or 20 girls in learning department. Apply AMERICAN CIGAR CO. Third and Fourth Sts. Fulton, Ky.

THE MODE PLACES EMPHASIS ON
THE TRANSPARENT BLACK FROCK

MORE and more the mode asserts the smartness of black. For coats, the very latest is black suede trimmed in black wolf or lynx. The black velvet toque strikingly draped answers the call of the millinery mode. For dressy wear, in spite of the flare for gay colors, the sentiment for the all-black frock is very pronounced.

What the all-black party or formal afternoon frock lacks in color it makes up for in dainty grace of diaphanous draperies and alluring transparencies. A black georgette frock like the one in the picture, inset with black lace and with a deep lace cape collar is a desirable possession. It serves so charmingly for so many and varied occasions.

Worn over a flesh-colored satin slip it is ideal for the informal party or for afternoon tea. Posed over a black silk slip it becomes a costume of quiet elegance. The charm of the transparent black dress is that it affords so many delightful effects with the hair.

changing of various colorful costume slips.

The latest entree among black dinner gowns is that all of lace with long tight-fitting sleeves, for sleeves to the wrist are fashion's latest whim for the sheer evening dress. The skirt is bouffant with an intricately contrived girle.

Black tulle evening gowns also come in for fashion's favor. The full skirts are a mass of fluttering tiers and the hemlines are always scalloped or pointed or gracefully irregular.

Recently arriving imports accented voices of exquisite white or metal lace, with black as an outstanding number on the present style program.

The fringe-trimmed black chiffon frock is also an interesting interpretation of the all-black mode. The fringe is arranged in tiers on the skirt portion and appears in clever appointments on the sleeves with little or none on the bodice.

OFTEN THE CLOTH COAT MERELY
SUGGESTS THE BLOUSE EFFECT

armhole without destroying the straight up and down lines of the coat, for in spite of the obstacles to be overcome, the final ultimatum from fashion headquarters is that both the blouse and the deep armhole must have their place in the season's modes. And they have! Most successfully, too, for proof of which let the coat in this picture again bear witness. It is an elegant model made of dark green suede cloth, with collar of natural gray fox.

Referring to this collar, it is of exceptionally high-grade fur, appealing to a discriminating taste which prefers a restrained use of the best rather than a lavish display of quantity sans quality. Many of the season's better coats are notably of worthwhile cloth, collared and perhaps cuffed with fur of a most superior sort.

Out of the confusion of styles launched at the beginning of every season there is always some one which stands out prominently—becomes a pronounced vogue. Such is the black or richly colored coat of either suede or deep pile weave, which is trimmed with light fluffy fur—the kind which flatters in its becomingness. In selecting the midwinter cloth coat one will be according to the dictates of the mode by selecting either a deep wine or dark green cloth trimmed with creamy colored badger or gray fox or wolf.

Efficient and Economical
Home Heating

The Enterprise Automatic circulating warm air Heater will heat the entire home with a constant circulation of clean, warm air, insuring the same comfortable warmth in every room.

Finished in dark grained Mahogany enamel, it is in harmony with the other furnishings of the most refined taste. The fire door, ash door and all mechanical parts are concealed when the cabinet is closed.

The powerful heating unit makes it most economical in fuel consumption. The wide deep air ways from top to bottom of the cabinet permit free passage of air, which is quickly heated in passing over the heating unit, and out the top to circulate through the entire house.

AIR DRIED CLOTHES

Do you realize what it means to receive a bundle of thoroughly washed and air dried clothes from a modern power laundry?

It means that at last the only remaining barrier between the housewife and the laundryman has been broken down. Because, now the modern laundry not only washes clean whatever you choose to send, but also duplicates in every respect the method of drying that the housewife has employed for time immemorial, namely, the hanging of the washing on the old-fashioned clothes line, to bask and dry in the glorious sunshine.

The greatest development in years and years, comes to this steadily growing industry in the perfection of a natural drying process. This new method of drying by air eliminates for all time that unmistakable odor which has branded the work of the power laundry in the past.

Thousands and Thousands of Cubic Feet of Concentrated Sunshine

The scientific application of air as a drying agent in the power laundry is accomplished by the perfection of the Vorclone Drying Tumbler. This most wonderful machine harnesses clean fresh air in such great volumes that it almost entirely eliminates the necessity of heat to dry clothes with. It dries clothes by air, evenly and gently, ventilating them thoroughly, freeing them entirely of all lint, leaving them soft, fluffy and perfectly odorless. Clothes dried in this manner are never shrunk, discolored or left with a harsh feel.

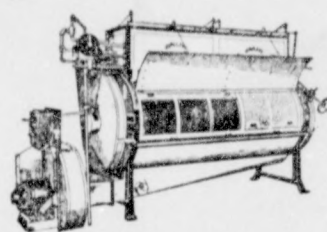

The Vorclone Tumbler used in our laundry is the only drying tumbler that does not depend solely on heat to dry clothes; it is the missing link in an otherwise perfect laundering process. It puts the work of the power laundry on par with that of the housewife's own private laundry.

Be sure to see this wonder machine in our laundry anytime, feel and smell the clothes it dries, notice how fresh and sweet smelling they are.

Phone 130

When you see the pleasing results, the economy and the convenience of this complete service, you are going to put a ban on "home wash days" throughout the year.

RAILWAY STATION IS CARRIED OFF

Handsome Structure in Florida Razed by Negroes.

Jacksonville, Fla.—A complete railway station was carried off at Magnolia Springs, near here, recently.

The station, a large and handsome building, erected as an addition to the Magnolia Springs hotel, which burned down recently, was missing when W. G. Spiker, the owner, went to ascertain if it needed repairs.

First appearances denoted that the station had been burned down but further investigation showed it had been razed and the material carted off.

Subsequently, Francis Richards, negro, was found with ten wagonloads of lumber in his yard. Another negro had a similar amount. They said a man who gave the name of McConnell issued orders for the station to be razed. He told them they might have the lumber for their trouble.

Since McConnell represented himself as an employee of the Atlantic Coast line and said he had been ordered by officials of the railroad to raze the building, the negroes proceeded openly with their destructive work, they said.

The Atlantic Coast line officials declare they have no such man in their employ, and have assigned detectives to hunt McConnell.

The missing building was 46 by 25 feet with wings and had many valuable decorative features.

At Last Smokes Cigar

Given Him 63 Years Ago

Greenville, Ohio.—T. J. Burns smoked his first cigar on his seventy-seventh birthday.

And as he smoked, memory pictured for him in the fragrant blue haze a scene in a little cross-roads store at Gettysburg, on his fourteenth birthday, when the proprietor presented him with a "ten-center."

In those days, a "ten-center" was considered quite a cigar. Burns decided to keep it "until after supper." After supper he decided to save it until he was older and better able to appreciate it.

And the longer he saved it, the more attached to it he became. He lavished every kindness on it. He wrapped it carefully in cotton, and moistened it now and then to keep it from cracking.

He decided at last to smoke the cigar which had furnished him so much anticipatory cheer during sixty-three years.

"I was afraid I might not be here to smoke it next year," he said. "Oh, yes, I been smokin' all my life, but this was my first cigar. Right good one, too."

Uncle Sam Preserves

Indians' Burial Ground

Yakima, Wash.—Melndoose Island in the Columbia river, burial ground for western Indians for uncounted generations and particularly sacred to the Yakimas, has been set aside by the government as a red man's city of the dead.

Since the days when thousands of Indians from western plains and mountains made annual pilgrimages to the fishing grounds of The Dalles and the "tum-water" of the Columbia, bringing their dead with them, the island has been a holy ground for the aborigines. Formerly it was covered with large "dead houses," built of cedar, on the shelves of which reposed the mummified bodies of the red men.

Snow-wrapped bows and stone-tipped arrows were deposited with some of the older remains and more modern weapons with some of the more recent.

Device Trains Shell

Directly on Plane

San Pedro, Calif.—A new fire-control instrument for the operation of antiaircraft guns, recently perfected by the Navy department, has proved "highly satisfactory" in its first service tests made aboard the U. S. S. Maryland, naval experts revealed.

The device, which transmits electrically all firing data to the antiaircraft batteries, is said to direct shell fire with such accuracy that antiaircraft gunners can anticipate the path of a flying plane and by merely setting the fuse of an explosive shell can fire so the shell and plane will meet at a previously calculated point. The instrument, described as having 40,000 working parts, is so designed that since the altitude of the plane is determined, the only action required is for one observer to follow the target's elevation and another its direction. This is done through telescopes mounted on the instrument.

Holds \$30 Bill Issued in 1778; Legal Tender

New Britain, Conn.—A bona fide \$30 bill is held by Bernard L. Hoppe of this city. Local banking houses pronounce it authentic, and Hoppe has refused many times its face value.

The note, dated September 26, 1778, and signed by "A. Lawrence, Secretary of the United States Treasury" is numbered 217,395. It is about one-fourth the size of a modern dollar bill. Bankers say it is still legal tender.

Community Building

Put in Water System Without Much Outlay

People living outside of water zones will undoubtedly be interested to learn how one similarly situated secured a water and sewer system for less than \$1000. The man tells about it in a letter published in Liberty, in connection with an article on home-building, after explaining that when he moved into the country from a city home the family missed running water.

"We had a fine driven well," the man writes, "and talked of a windmill and a big tank. One day an idea came to me. I had heard of septic tanks for sewage, and investigated and found they were easy to build. I built mine in a series of three tanks of concrete, and ran the outlet into the field far below the house. In town one day I picked up, for a dollar, a discarded hundred gallon tank which had been a heater. I got this to the roof of our rear porch, and connected pipes down from it to the sink, the lavatory, and the bath. Then I connected it with the well and installed a hand force pump.

"It required more than 300 strokes of the pump's piston to fill the tank night and morning, and I got plenty of exercise. We pumped by hand for a year, then I bought a little electric pump as soon as the lighting company extended through our district and supplied us with light."

Community Grows With Surrounding Country

A community is somewhat like a man. Sometimes a man waits and hopes for something to turn up that will give a boost. He lives to learn that such things happen very seldom. Our community has tried to land mechanical industries, but such enterprises want the community to put them in business and let them make the profits. Our farmers have solved the problem. They have taken their first lesson in diversification and it is worth more to the community than all the cotton mills we could locate and every man finances himself, and is supposed to know how much to invest. The \$20,000 that came to our truckers this year was practically a surplus, as each farmer who grew berries made his usual crop besides. Now the onions will soon bring in more spot cash—how much we cannot say until they are sold. But this new means of getting ready money enables us to feel independent of foreign industries, for we only prosper as the farmers prosper.—Guntersville (Ala.) Democrat.

Placing Shrubbery

In massing shrubbery near the house it should be set about two and one-half feet from the foundation in order to assure plenty of room for roots and foliage. Vines often can be used with good effect around porches and on trellises near the windows. It is not well to plant trees in rows on lawns. Often they, as well as shrubbery, are desirable for hiding defects, for framing vistas and for the shade they furnish. Too much shade, however, will kill the grass and will keep needed sunshine from the house. A dark, damp house makes a good breeding place for disease germs. Shrubbery and trees properly placed give a house a look of permanency. The idea is to make the home an integral part of the landscape, to give it the appearance of belonging to the place where it is located.

Regional Planning

In more than a dozen cities "definitely organized regional planning agencies" have been set to work. These are in addition to other bodies which have limited planning functions, including park commissions. That much more activity in this field may be expected soon is seen by the recent enactment of legislation in New York designed to facilitate regional planning by cities and towns of the state. The rapid growth of this movement seems to indicate that the lesson of costly delay, taught by belated steps toward planning within the cities, is being taken to heart. The daily convenience and general welfare of the increasing numbers will be promoted as regional planning gains headway.

Civic Responsibility

Every house along its residence streets, as well as every building in its business blocks, is responsible for that city's good name. One shabby, neglected house can spoil the appearance of an entire neighborhood.

When home owners everywhere cooperate with the city fathers in preserving and improving private as well as public property by frequent painting the beauty of American cities will keep pace with their growth.

Need for Board of Trade

A strong board of trade or similar civic organization which unites all the industrial, business, civic and social interests of the community for the purpose of concerted action in supporting those activities which are broader than any single business or industry, but which promote the interest and welfare of the community as a whole is an essential part of every growing town.

Sunday School 'Lesson'

(By REV. F. H. FITEWATER, D.D., Dean of Day and Evening Schools, Moody Bible Institute of Chicago.)
(See 1937 Western Newspaper Union.)

Lesson for February 6

THE PRACTICE OF CHRISTIAN STEWARDSHIP

LESSON TEXT—Matt. 25:14-30.
GOLDEN TEXT—Thou hast been faithful over a few things, I will make thee ruler over many things. Enter thou into the joy of thy Lord.
PRIMARY TOPIC—The Story of the Three Servants.
JUNIOR TOPIC—Three Stewards and How They Kept Their Trust.
INTERMEDIATE AND SENIOR TOPIC—What It Means to Be a Steward.
YOUNG PEOPLE AND ADULT TOPIC—The Scope and Spirit of Christian Stewardship.

Stewardship here includes oneself and substance. Stewardship in money is only a small part of our responsibility. This parable like that of the ten virgins is associated with the second coming of Christ. In both instances the unpreparedness for His coming on the part of the people is exhibited. In that of the ten virgins their unpreparedness consisted in their failure of inward life—absence of the Holy Ghost. In this of the talents it consisted in their failure to properly use the gifts which had been entrusted to them. The first was failure to watch; the second was failure to work. By talents is meant whatever gifts and powers one possesses as gifts from God, whether of nature or grace, such as strength, reason, energy, knowledge, influence, time, money, ability to speak, sing, etc.

I. The Distribution of the Talents (vv. 14, 15).

1. It was a sovereign act. He called his own servants and distributed to them his own money. As the One who created us and absolutely owns us, He has assigned us our places and given us our several powers, intending that we put them to the best possible use.

2. It was an intelligent act. "According to his several ability." The God who made us knew our ability to use gifts, therefore has made the distribution upon that basis.

3. It was a purposeful act. The talents were given to be traded with. They were not given to be used for one's own gain and profit, but as stock in trade for the enrichment and glory of the Master.

II. The Employment of the Talents (vv. 16-18).

1. All the servants recognized that the talents were not their own—that they were responsible to the Lord for the use made of them.

2. Two servants used their talents. The five-talented man put his to use and gained five more. The two-talented man put his to use and gained two more. This shows that God's gifts can be increased. The exercise of any gift increases it. The faithful use of what we have in the place we are will prepare us for greater usefulness and honor.

3. The one hid his talent. The fact that one possesses but one talent should not discourage him, but should make him strive harder. God does not reward according to what we possess, but according to our faithfulness. The crime of the one talented man was not that he had but one talent, but that he hid the talent which the Lord gave him.

III. The Accounting for the Talents (vv. 19-30).

1. Its certainty. There is a day coming when we all must give an account of our stewardship.

2. The time. This will be at the coming of the Lord. If we have done well, we shall then have praise. If we have been unfaithful, we shall then be cast out from the presence of the Lord.

3. The judgments announced.

(1) Reward of the faithful. (a) Praise—"Well done." We all like to be praised. From childhood on through life commendation is pleasing. (b) Promotion—"Be thou ruler over many things." Promotion is desirable to all. (c) Entrance upon the joy of the Lord. The five talented man and the two talented man received the same praise and the same promotion.

(2) Punishment of the faithless. The one talented man lied when brought to account. The talent when dug up was not the same as when it was buried—it was not of the same weight. Gifts unused are lost. (a) Reproach—he was called slothful and wicked. To be called lazy is a reproach which even the lazy man dislikes. (b) Stripped—the talent which was given to him was taken from him. (c) Cast out—he was condemned on his own ground. The very fact that he knew the character of the Lord should have been an incentive for him to have exerted himself.

Pray More

If God's children would learn to pray more before making ventures, they would not need to pray so much after they are made.—Echoes.

The Cross

In conversation, the cross is the will; in sanctification, the cross is the affections.—Echoes.

Salvation makes no man lose His mind, but restores the wrecked mind.—Echoes.

Good Money In Poultry

And Now is the time to start with an

Prayer meeting.
Friday at 7:00 p. m.—Com-
munity Bible class.
The public is cordially invit-
ed to all our services.

CREATION OF THE UN- VERSE IS BEING DIS- CUSSED

For the night services at the
Central Church of Christ, the
minister, J. G. Malphurs, dis-
cussing the first part of the
Book of Genesis, especially
God's work in creation. The
second lesson of the series was
delivered last Lord's day night
to a large and attentive audi-
ence. At this time God's work
for the first three days was dis-
cussed, creation of light, forma-
tion of the firmament, forma-
tion of dry land, and creation
of the vegetable kingdom.

"Let there be light." Light
was the most important of
God's work, excepting the
making of man and animal life.
Light is simple, pure, active
and powerful. How important
it was for LIGHT to be the first
of God's creative power. As
this light shined on a dark and
chaotic universe, even so Jesus
"the light of the world" shined
on man lost and ruined in a
dark world. In heaven all is
light, no darkness; in hell all
is darkness, no light. God
gives man a mixture while in
this world, part light and part
darkness.

The earth, said the minister,
was in a fluid state, and he
used for his proof 2 Pet. 3:5.
"For this they willfully forget,
that there were heavens of old,
and an earth compact out of
water, and amidst water, by
the word of God." The shape
of the world proves it to have
been a liquid mass, for all li-
quids, on being given the proper
motion will assume the form of
a sphere. When God divided
the land from the seas he had
in mind the welfare of man. He
divided earth's surface in the
proportion of three parts of
water to one of land. This ar-
rangement is found very con-
venient, for much more water
than land is needed to regulate
the climate for man.

God then commanded and
the earth brought forth grass
and fruit, each producing seed
after its kind. We see the
providence and wisdom of God
in creating the grass and fruits
before he made animal and
man, so that they would find
abundance of food ready for
their use.

Next Lord's day night the
creation of the sun, moon and
stars will be discussed, harmo-
nizing their creation with the
creation of the spiritual king-
dom of the New Testament. We
would be glad for you to join
us in this study which gives us
the genesis of all things.

SPECIAL OFFER

For a short time we will ac-
cept subscriptions for this pa-
per and the Memphis Weekly
Commercial Appeal—both pa-
pers one year for only \$1.25.

S. Stansbury, Superintendent.
11:00 a. m. Holy Communion
and Sermon.

Every one cordially invited
to attend these services.

Church News

Dr. Boyd, while far from
well, was able to hold service
Sunday morning, and also to
attend church school.

Clara Elizabeth, the little
daughter of Dr. and Mrs. Boyd,
is suffering from an attack of
mumps and an ulcerated jaw.
The small patient was suffering
considerably Sunday and Sun-
day night, obliging both Dr.
and Mrs. Boyd to be up a large
part of both nights. Opiates
were required to afford relief.
The sufferer was better on
Monday afternoon and contin-
ues to improve.

Bishop Woodcock returned
to Louisville to attend the Dio-
cesan convention last week.
He has been in Hagerstown,
Md., for the past several weeks
assisting in the bishop's cam-
paign.

Supt. Stansbury has recovered
from his recent accident and is
again in charge of the church
school.

Mrs. Boyd, secretary of the
church school, was unable to
attend last Sunday, owing to
the illness of Clara Elizabeth.

A meeting of the mission
board was held on the 23rd,
immediately after the morning
service and passed on some ur-
gent business.

The annual report to the an-
nual convention was somewhat
delayed by the illness of Dr.
Boyd and Secretary Boyd, but
reached Louisville before the
convention opened.

The unprecedented rainy
weather of the past two weeks
materially reduced the attend-
ance at both the church school
and the church services.

Miss Kallina Cole returned
Wednesday of last week from
a two weeks' visit to Chicago.

Should the attending physi-
cian permit, Dr. Boyd will re-
sume full duty next week, but
good friends of the doctor are
hoping that the "medico" will
not permit the patient to re-
sume work too soon.

Mrs. Lyda Sanders, mother
of Mrs. Charles W. Binford,
passed away Monday night at
9:30, at the home of her daugh-
ter, 203 Eddings street. Inter-
ment will be made at Colum-
bus, her old home.

CONTINUE FARM AGENT CAMPAIGN

(Hickman Courier)

The campaign to obtain the
additional members to the Ful-
ton County Farm Improvement
Association needed to get a
county farm agent will be re-
sumed in a few days. The
Courier has learned. The drive
was suspended for a time be-
cause of the bad weather and
the condition of the roads and
also because the goal was so
nearly in sight it was believed
that the additional names could
be obtained easily enough when
needed.

Mr. Kilpatrick, assistant state
agent, informed The Courier
this week that he would be in
Fulton county shortly after the
first of February to complete
details for a county agent and
to consult the Fulton commit-
tee on finishing their drive,
which is not so far along as the
drive in this end of the county,
it is understood.

The state will pay part of the
agent's salary and expense and
Mr. Kilpatrick is anxious to get
Fulton county a good man who
can show results, while the men
who have signed up for the
three-year program are anxious
to get the agent in here as soon
as possible. Mr. Kilpatrick
sent a letter of congratulation
to the Lions Club and the local
committee on the fine showing
they have made so far and ex-
pressed the hope that we would
have our end of the county
completely signed up before his
next visit.

With projects on foot to in-
crease the number of cows in
the county and to sign up a
strawberry growing associa-
tion, the need for a county
agent is greater than ever and
one of his first moves will
probably be to organize the
farmer to market their crops
co-operatively.

Chestnut Glade

Mr. and Mrs. C. S. Earp, of
McConnel, visited Diamond
Square Farm last week and
took home a setting of Mrs.
Finch's fine Ferris Leghorn
eggs for their incubator. Mrs.
Earp is a poultry enthusiast
and has recently visited the
Latta farms near Crutchfield,
and the Manley Poultry Farm,
near McKenzie.

Mrs. Dennie Cummings is in
a very serious condition. An
abcess came under her arm a
few weeks ago and it is now
thought it is of cancerous ori-
gin.

Mr. Roy Bowden was called
to his father's bedside near
Bennett's school, Wednesday
evening.

His father had fallen in the
lot about five o'clock and only
lived till a little after eight.
Mr. Bowden was well known
in this community, having
spent most of his life in this
region.

Burial will be at Sandy
Branch, Saturday.

Mrs. Mason is hardly so well
at this writing.

The chief topics of con-
versation here are the weather
and roads.

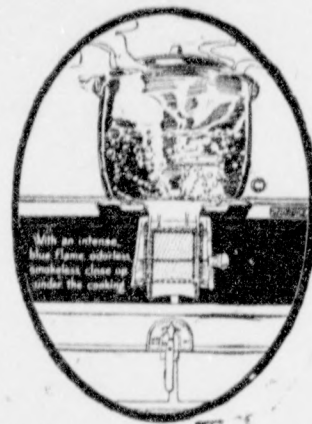

The rain falling almost in-
cessantly for 9 days, has filled
the creeks and so soaked the
earth that the roads are almost
impassable. School wagons
have four and five horse teams
and it is a dead drag at that,
often taking two hours to make
the trip from the end of the
route. Brigades are washed out.
Mail comes two or three times a
week and carriers go horseback
in two horse hacks or just any
way to deliver the mail. They
are making a valiant effort to
serve and we must be patient
even though our papers are a
few days late.

A SPLENDID FEELING

That tired, half-sick, discouraged feel-
ing caused by a torpid liver and consti-
pated bowels can be gotten rid of with
surprising promptness by using Herbine.
You feel its beneficial effect with the first
dose as its purifying and regulating effect
is thorough and complete. It not only
drives out bile and impurities but it in-
spires a splendid feeling of exhilaration,
strength, vim, and buoyancy of spirits.
Price 60c. Sold by
Bennett's Drug Store, Fulton, Ky.

FULTON HARDWARE CO

Lake Street

George Beadles, Manager

Fulton, Ky.

Its Spring Pressure Feature Insures Better Disking

We have in stock, ready for your inspection and use, a sup-
ply of disc harrows that are noted for doing a better job of
disking their entire width when going over ridges or depres-
sions, or on side hills, as well as on level land. Come in and
inspect the

JOHN DEERE Model "B" Disc Harrow

By means of the third lever,
spring and John Deere pivoted
yoke, this harrow can be given
the required pressure to penetrate
at even depth its full width under
all the above conditions.

It is a really flexible harrow—
penetrates, pulverizes and packs
in conditions where rigid harrows
fail to work all the soil. Each
gang works independently, like
separate harrows, and both can be

given the proper angle to pulver-
ize under varying conditions.

It is strong—will last years
longer than ordinary harrows be-
cause of its all-steel main frame
and double-bar, riveted gang
frames. It has oscillating scrapers
with lock-down and lock-off fea-
tures, and the most convenient
grease cups—easy to fill and out
of the dust and dirt.

We can furnish the John Deere Model "B" with
rear gang and hitch to convert it into a double-
action, horse- or tractor-drawn harrow—a good
way to save money and yet get good results.
