**$85,000 Church Building Drive**

Methodists Organize Their Forces To Raise Funds.

The Methodists of the city have been busy for some time raising money for their new church. The sanctuary was built by the women of the church, and the men are now working on the interior. The money was collected in various ways, including a special collection held on Sunday. The total amount raised was $85,000.

Efficient and Economical Home Heating

The Enterprise Automatic circulating warm air House will beat the same house with a constant circulation of clean warm air, insuring the most comfortable warmth in every room.

Finished in dark stained Mahogany wood, it is in harmony with the other fixtures of the most elegant taste. The fire door, ash door and all mechanical parts are concealed when the cabinet is closed.

The powerful heating unit makes it most economical in fuel consumption. The wide deep air ways from top to bottom of the cabinet permit free passage of air, which is quickly heated in passing over the heating unit, and are so situated as to circulate through the entire house.

AIR DRIED CLOTHES

Do you realize what it means to receive a bundle of thoroughly soaked and air dried clothes from a modern power laundry?

It means that at last the only remaining barrier between the housewife and the houseman has been broken down. Because now the modern laundry not only washes clean whatever clothes you send there, but now there is no need for you to remember the method of drying that every housewife has employed the time immemorial, namely, the hanging of the washing on the old-fashioned clothesline, to dry and dry in the glorious sunshine.

The greatest development in years and years, comes to this steadily growing industry in the perfection of a natural drying process. This new method of drying, we believe eliminates for all time that unmistakable odor which has branded the work of the power laundry in the past.

Thousands and Thousands of Cubic Feet of Concentrated Sunshine

The scientific application of air as a drying agent in the power laundry is accomplished by the perfection of the Vorclone Drying Tumbler. This new and wonderful machine harnesses that fresh air in such a great column that it almost entirely eliminates the necessity of heat to dry clothes with. It dries clothes by air, evenly and gently, rendering them thoroughly, freeing them entirely of all dirt, leaving them soft, fluffy and perfectly finished. Clothes dried in this manner are never shrunk, discolored or left with a harsh feel.

The Vorclone Tumbler used in our laundry is the only drying machine that does not depend solely on heat to dry clothes; it is the missing link in an otherwise perfect laundering process. It puts the work of the power laundry on par with that of the housewife's own private laundry.

We urge you to see this wonderful machine in our laundry room, feed and smell the clothes it dries, notice how fresh and sweet smelling they are.
