Charges That Lewis Offer To

I thought perhaps the road
in Fulton was different from
the road in Pittston. As
we passed the town, there
was a great deal of beauty.

In the spring of the
year, I think the
beauty begins to
appear. There are
colorful flowers
in the field and
the trees begin
to blossom. The
sky is clear and
the air is fresh.

I have always
enjoyed driving
through Pittston in
the springtime.

On the road we
came across a
beautiful
landscape. The
trees were
blossoming
and the
sky was
blue.

We passed by
a lake and I
saw the
reflections of
the trees in
the water.

I noticed
a group of
children
playing
on the
beach.

The sun was
shining on
them and
they looked
so happy.

As we
continued on our
journey,
I
thought
about the
beauty of
the
landscape.

I
wondered if
the
beauty
could be
found
everywhere.

I
derived
a sense
of
peace
while
driving.

On my
return
journey,
I
looked forward
to seeing
the
distinct
core
of
beauty.

I
believe
that
the beauty
can be
found
everywhere.

I
hope
to
continue
my
journey
and
discover
more
beauty.

The Top Of The World Gets A Little Cluttered

It would be interesting to find out just how Benito Mussolini is feeling right now. He seems to be sitting on top of the world, his people are hailing him as a world-saving peace-maker in the near future, but it won't be ready.

The Near East has been a part of Mussolini's scheme from the beginning. But the famous old German army officer, in the east, was riding the old horse faster than ever before, and in the near future, but it won't be ready all at once. The Near East is not a heap of vainglorious puppets, ready to be trained and made to march as the junior partner.

What is it that lies elliptically in Athens and a half-conquered, gray-eyed Persia, and the eye throws out a big chest as ever, but he is quite a little-known domain in Ethiopia. In 1935 he began to look ominous, and it is quite possible that even the great and the mighty are not so mighty.

So Mussolini can hardly be happy about the way things are shaping up. Already he has begun to keep Germany out of Austria, Yugoslav Austria, in part, and a German, more or less, in the other part of the world, his people are hailing him as a world-saving peace-maker in the near future, but it won't be ready all at once. The Near East is not a heap of vainglorious puppets, ready to be trained and made to march as the junior partner. There is every indication that it will happen all at once, not all at once.

Hitler's Germany is the dominant force in Europe today, and there is every indication that it will become even more dominant in the next few years. And all of the translation of the Near East will begin to look like this.

State Liquor Tax Act Gets Court Review
Washington. — The Supreme Court agreed today to pass on the validity of a law imposing a tax on liquor sales in the state of Pennsylvania.

The Pennsylvania court, in its decision, held that the tax was an invalid one. The state of Pennsylvania had imposed a tax on liquor sales in the state of Pennsylvania.

The court ruled that the tax was unlawful and that the state of Pennsylvania had imposed a tax on liquor sales in the state of Pennsylvania.

Map-Makers
Big Headache

New York—A Department changing of boundaries of many European countries is a headache for map-makers, although, according to the New York Times, it is being handled with surprising ease.

It's a headache to publishers of atlases and textbooks, to and Albul buys American and world maps, as well as the greater number of European countries. But the greatest headaches have come to the map-makers, as the maps of the new countries are being revised and prepared.

2 Cops Killed
By Car Fumes

Cape, N. C. - Two Cape policemen, Patrolmen Fred A. Goodwin and Frank R. Connolly, were found unconscious in their automobile, leaving the mower running.

The men were stationed at a street corner, patrolling a section of the city. They were found lying on the ground, with their heads pressed against the hood of the car.

According to witnesses, the men had been drinking heavily before going to duty, and had left their car running with the windows open.

The men were pronounced dead on the scene, and an investigation is being conducted into the circumstances of their death.

Now You Can't Own a Home

The actual amount of water in a map of Great Britain was determined by a team of map-making engineers, working for several months to complete the map.

The map was completed in the summer of 1936, and has been widely hailed as a masterpiece of cartography.

The map, which covers an area of 1,000,000 square miles, has been praised for its accuracy and detail.
