AIR DRIED CLOTHES

Do you realize what it means to receive a bundle of thoroughly washed and air dried clothes from a modern power laundry?

It means that at last the only remaining barrier between the housewife and the laundryman has been swept aside. Because, now the modern laundry is not only clean. By choosing to send, but also duplicates in every respect the method of drying that the housewife has employed for time immortal, namely, the hanging of the washing on the old-fashioned clothes line, to bask and dry in the glorious sunshine.

The greatest development in years and decades, comes to this steadily growing industry in the perfection of a natural drying process. This new method of drying by air eliminates for all time that undesirable odor which has marked the work of the power launderers in the past.

Thousands and Thousands of Cubic Feet of Concentrated Sunshine

The scientific application of air as a drying agent in the power laundry is accomplished by the perfection of the Vorchme Drying Tumbler. This most wonderful machine harnesses clean fresh air in such great volumes that it almost entirely eliminates the necessity of heat to dry clothes with. It dries clothes by air, evenly and gently, ventilating them thoroughly, freeing them entirely of all last, leaving them soft, fluffy and perfectly odorless. Clothes dried in this manner are never shrunk, discolored or left with a harsh feel.

The Vorchme Tumbler used in our laundry is the only drying tumbler that does not depend solely upon the character and fitness of the men elected to the construction of public roads, which I was instrumental in securing for helping to enact some of which Western Kentucky has received to date.

The manufacturer of the Vorchme Tumbler used in our laundry is the only drying tumbler that does not depend solely upon the character and fitness of the men elected to the construction of public roads, which I was instrumental in securing for helping to enact some of which Western Kentucky has received to date.

Building Your Wealth

A bank works for you night and day, week after week, adding cents to your dollars. Little by little the amounts grow till each addition is a respectable sum.

Where does the gain come from? Not from your pocket. Nor from ours. It is the result of production. Money placed in a bank is given an opportunity to work and to produce.

Thus a bank builds your wealth.

Start with a small deposit if you will. Add to it when you can — regularly if you can do so. It will not be long till you can fairly see it grow.
