WHERE THE MONEY GOES

Where on earth does all the money go?

That household question makes the whole world his. It is one that demands an accounting, whether pennies or millions of dollars are involved.

Here is an answer to 1. This is what became of every $100 received by the Illinois Central System in 1926:

- The operation of trains, stations and other traffic equipment cost $4.36 for fuel, $1.72. That left $88.8.
- The upkeep of locomotives, cars and other equipment cost $4.93. That left $83.9.
- Rent of land and buildings $79.4. The operation of trains, stations and other equipment cost $1.97. That left $52.35.
- Salaries of clerks and other general service employees cost $5.81. The salaries of clerks and other general service employees cost $1.24. That left $40.1.
- The expenses of valuation work was 27 cents. The salaries of clerks and other general service employees cost $1.88. That left $38.20.

Compared with this, taxes took $6.33. After dividing that sum, there was left $32.02.

The operation of trains, stations and other equipment cost $7.76. That left $24.28.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $18.92.

Compared with this, there was left $15.12.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $9.76.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $4.4.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $3.42.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $2.8.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $2.22.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $1.64.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $1.0.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $0.4.

There was put aside $5.36 in preparation and repayment charges to pay for the wearing out of property. That left $0.

Ordered to keep this in mind after dinner every day. The operation of trains, stations and other equipment cost $5,99.

Terms made known on the day of the sale.

If the weather conditions are bad on the above date, sale will be held on the following day.

P. G. SANDERFER.
AIR DRIED CLOTHES

Do you realize what it means to receive a bundle of thoroughly washed and air dried clothes from a modern power laundry? It means that at last the only remaining barrier between the housewife and the laundryman has been broken down. Because, now the modern laundry not only washes clear whatever you choose to send, but also duplicates in every respect the method of drying that the housewife is accustomed to for time immemorial, namely, the hanging of the clothes to dry in the glorious sunshine.

The greatest development in years and years, comes to the soaring growing industry in the perfection of a natural drying process. This new method of drying by air eliminates for all time that disagreeable odor which has blighted the work of the power laundry in the past.

Thousands and Thousands of Cubic Feet of Concentrated Sunshine

The scientific application of air as a drying agent in the power laundry is accomplished by the perfection of the Vertical Drying Tumbler. This most wonderful machine transforms clean fresh air in such great volumes that it almost entirely eliminates the necessity of heat to dry clothes with. It dries clothes by air, evenly and gently, scrutinizing them thoroughly, leaving them entirely of all lint, leaving them soft, fluffy and perfectly odorless. Clothes dried in this manner are never shrunk, discolored or left with a harsh feel.

The Vertical Tumbler used in our laundry is the only drying tumbler that does not depend solely on heat to dry clothes; it is the missing link in an otherwise perfect laundering process. It puts the work of the power laundry on par with that of the housewife's own primitive laundry.

Be sure to see this wonder machine in our laundry anytime, feel and smell the clothes it dries, notice how fresh and sweet smelling they are.
