CROSSING ACCIDENTS

A large majority of crossing accidents are caused by a failure in the vigilance which drivers of automobiles seem to have for the safety of pedestrians. Most of the deaths on the roads are from the failure of the automobile driver and the operator to perceive the automobile driver's intentions. Most of the accidents are due to the failure to heed the signs which are posted.

POTATOES

Potatoes are a major crop in the region. They are grown for both fresh market and processing. The potato harvest is usually in late summer and early fall.

THE NATION GIVES

The country for a second year in a row has given the farmers amounts that will keep the nation in food. The United States Department of Agriculture has reported that the country will produce about 100 million bushels of potatoes this year, an increase of about 25 million bushels over last year.

Potato prices are expected to remain steady or to rise slightly. The demand for potatoes is expected to remain strong as consumers continue to increase their consumption of the vegetable.

SUGAR PRICES

SOAK SKYWARD

While Louisiana producers continue to earn part of the state's economic pie, the sugar is being processed in Washington. The price increase in the raw sugar market will benefit the state's sugar producers.

SUGAR PRICES

After years of declining prices, raw sugar prices have been rising sharply in recent months. This is due to a combination of factors, including a decrease in the world supply of sugar, increased demand from consumers in developing countries, and a strong U.S. dollar.

More than 10 years ago, when the sugar industry was at its peak, raw sugar prices were in the $40-$50 range. Today, prices have climbed to nearly $250 per ton. This has had a positive impact on the Louisiana sugar industry, which is a major contributor to the state's economy.
