An Investment In Happiness

It's Time to BUILD

Own Your Own Home
Face The Future With Confidence

Home building is starting on the biggest boom in the history of our country. Building materials and labor costs are due to rise steadily. It's the wise investor who reads the signs of the times and plans now to build while costs are reasonable. Never before has there been such an opportunity to get as much value for your money. And never before has the home-builder been so sure of a steady increase in the value of his investment.

Financing Advice and Help
The government home financing service and the Federal Home Loan service make possible new and greater convenience in home financing.

BUILD

REMODEL AND REPAIR

When you are building and increasing your property value, do you consider some of the vital things which are of much concern to you and your property?

Are you buying from a concern that at all times can furnish the same materials throughout, or will it be necessary to make a change right where it will always mar the beauty and impair the value for years to come?

Another thing to ask. Are you buying a material that your dealer has handled long enough to know that a satisfactory adjustment could be made if necessary, or is this dealer buying here and there so that in a short time it would be impossible for even them to be certain of the material's quality or origin.

All the above is worthy of your serious consideration.
