## MYSTERIOUS NEMAR IN BLINDFOLD DRIVE

One of the most mystifying and spectacular exhibitions ever staged will be the blindfold drive of Nemar through the streets of Fulton Friday at 4:00 p. m. and Saturday at 11 a. m.

In order to give everyone an opportunity to see this mystifying performance, Prof. Nemar has agreed to give two performances in this city.

Friday's drive will start on Fourth street in front of Bob White Motor Company at 4:00 p. m. The drive Saturday will begin at the same point but will be in the forenoon, starting promptly at 11 o'clock.

Nemar will drive a new Ford V8 followed in another car by the former Baby Shirley, of movie fame, who will ride on the running board of a chauffeur-driven car about 75 to 100 feet in the rear and direct Nemar by process of mental telepathy.

Before the drives start Prof. Nemar will be blindfolded in such a manner that his vision will be entirely cut off. Local physicians have been invited to blindfold Prof. Nemar. He will allow a doctor to place a half dollar firmly over each eye and then seal them with adhesive tape, over which he will place several thicknesses of black gauze, which will also be held in place by tape.

After Nemar has been thoroughly and completely blindfolded he will be placed in the wheel of the new Ford, and without anyone being in the car with him he will weave his way through traffic in the downtown business section.

This new venture contains the message of the merchants who have helped to make the Nemar exhibition possible. Many merchants of Fulton offer many outstanding bargains in order that the visit of the throng of people expected will be profitable in dollars and cents as well as entertaining.

### Vast Variety of Foods Now Come In Tin Cans

Have you ever stopped to consider the vast variety of foods that are now available in tin cans? The kinds of canned food, including the different varieties of the same product, now number about three hundred and include fruits, vegetables, meats, fish and shell fish, specialties and ready-to-serve entrees.

All these foods are prepared for you by strictly modern scientific methods. Their selection for canning is carefully made, canning plants are located in the parts of the country that are the best production areas, and the foods are harvested at their prime.

#### Canning Is Cooking

The foods are put into new cans, then sealed airtight, and the right amount of heat, applied for the proper length of time, makes them keep. No further cooking of the foods is necessary. They are ready for use as soon as opened, and are perfect foundations for making interesting and unusual dishes.

Moreover, the entire contents of every can is food. There are no trimmings to throw away, and no time is required to clean or cut them. Little or no fuel is needed to prepare them for the table, and stored at home, canned foods will keep as long as the can is unopened.

Finally, the food value of products in cans is as high as that of similar fresh foods cooked in the home, according to scientists who have studied nutrition. The liquid in the can is food, too. And vitamins are retained in canned foods as much as in similar foods cooked at home.

#### Vegetables and Fruits

The vegetables that can be obtained in cans include artichokes, asparagus, beans, beets, Brussels sprouts, carrots, cauliflower, celery, corn, hominy, kale, lentils, mixed vegetables, mushrooms, mustard greens, okra, onions, parsnips, peas, peppers, plums, tomatoes, potatoes, pumpkin, rice, sauerkraut, spinach, squash, tomatoes, turnips, turnip greens and whole wheat.

The fruits include apples, apricots, blackberries, blueberries, cherries, coconut, cranberries, currants, figs, gooseberries, grapes, grapefruit, loganberries, peaches, pears, pineapples, plums,

prunes, quince, raisins, raspberries and rhubarb.

And it must be remembered that the above enumerations do not include the many forms and combinations in which a number of these foods come in cans.

#### Fish and Meats

The fish found in cans include anchovies, caviar, clams, cod fish, crabs, haddock, herrings, lobsters, mackerel, oysters, roe, salmon, sardines, shad, shrimp, tuna and turtle, several of them in various forms.

The meats include bacon, beef, chicken, frankfurters, ham, lard, liver, mutton, pig's feet, putted meats, sausage, squab, tongue, tripe, turkey and veal, and here again the forms are varied.

#### Specialties and Soups

The canned specialties include Boston brown bread, catsup, cider, cheese, chili con carne, chili sauce, chow chow, clam cakes and juice, whipping cream, flakebolls, fruit cake, grapefruit juice, jams, Japanese crabmeat, jellies, lobster paste, malt syrup, marmalades, milk, condensed and evaporated, mince, molasses, olives, orange juice, pickles, pineapple juice, popcorn, fig and plum puddings, relish, sandwich spreads, sauerkraut juice, smoked hock, herring, spaghetti, spiced and pickled fruits, whole squab, syrup, tamales and tomato juice, paste and sauce.

The soups are asparagus, beef, bouillon, celery, chicken, clam broth, clam chowder, consommé, creamed soups, Julienne, Madrienne, minestrone, mulligatawny, mushroom, mutton broth, noodle, okra, onion, oxtail, oyster, pea, pepper pot, purée, soup stock, strained vegetable, tomato, green and mock turtle, vegetable and vermicelli.

#### Ready-Made Entrees

These include beef à la mode, chicken à la king, chicken curry, chop suey, Hungarian goulash, lobster Newburgh, a whole rice dinner and Irish stew. Of course millions of cans of vacuum packed coffee and of beer in kegged cans are also consumed, but these do not classify under the foregoing headings.

Not every grocer carries all of the varieties of canned foods, but he can and will obtain any special item in the above enumeration that you want.

#### KENTUCKY FARM NEWS

Jackson county farmers are going in for greater poultry profits in a big way. With 8,000 chicks already delivered from approved flocks, orders are placed for 12,000 more for April delivery. Ten tons of poultry feeds to be home-mixed have been spoken for, and 30 new brooder houses have been built.

In Knott county, the goal has been set to have a purebred bull in every community, or at least 50 of the county before the end of 1936. A number of farmers are in the market for high-grade Hereford stock.

This is the first time Knox county merchants have not had to import large quantities of hay, but have been able to market home grown Jespedeza for \$15 a ton, reports County Agent J. F. Moore. Large acreages are being seed this year.

With Simpson county farmers concentrating on sheep raising, it is believed that the 3,000 head of sheep now in the county will be increased by at least 1,000 ewes. Every Pike county homemaker have been studying accessories in the home. This project has come under five heads: flower arrangement, decorative lighting, more attractive household fabrics, closets and closet arrangements, and slip covers. "We

know better what to buy to get the best for our money," they report. Poultry objectives to increase profits, as set up by Warren county negro farmers, are as follows: More purebred flocks, through buying day old purebred chicks, or incubating eggs from BWD tested flocks; better housing and culling; control of parasites; better feeding and record keeping.

**CASH FARM INCOME UP**  
Cash farm income in Kentucky in 1935 was 40 percent greater than in 1934. This gain was due in large measure to better management on Kentucky farms and to the Agricultural Adjustment Program.

We look forward with confidence to another fine gain in 1936. What can each farmer do to get his share of increasing farm earnings? First, it is our suggestion to get a clear understanding of the new AAA program from county agents. Then plan your farm program to get the most out of a combination of the New AAA payments and crop raising. Next stock every acre of idle lands and woods with broods mares, sheep, cows and hogs. Kentucky is the finest place in the world for live stock raising.

If you do not have the money, borrow it from the Production Credit Corporation. Of course, buy at

the right price, for money well invested is money made. If an additional farm hand will increase farm earnings, give a good man a job. Many good men are out of work, and farm labor is cheap enough.

No state is more wonderfully blessed with abundant limestone than Kentucky. More than three-fourths of the land being farmed in Kentucky is in need of lime. Lime is lacking because it has been sold from farms in crops, livestock and livestock products, and because of erosion and leaching.

In 1934, forty-one per cent of the progressive farmers of Pennsylvania used lime at a cost of \$3.37 per ton, and found it profitable. Lime cost to the Kentucky farm is about \$1.50 per ton. If lime produces a profit in Pennsylvania, at a cost of \$0.87 per ton, consider how much more profit it would be to us at \$1.50 per ton—Kentucky Farm Home Journal.

#### PRESIDENT ROOSEVELT'S MESSAGE TO FARMERS

"The new farm act provides for financial assistance by the government to those farmers who wish to shift from the production of unneeded surpluses to the production of needed, soil-building crops."

I believe that farmers will find the new program is in the national interest, and in their own individual interest, too.

If farmers for any reason should fail to take advantage of the new

act, the consequent excessive production of such cash crops as cotton, wheat and tobacco might result in more in the wrecking of their prices and the mining of their soil.

—FRANKLIN D. ROOSEVELT.

Fred Lanzer is manager of the new radio and electric shop on Walnut-st. known as Tittsworth Radio Shop. The interior of the old Bennett-Lanzer stand has been completely revamped to present a most attractive appearance. Mr. Lanzer states that they will handle the Norge electric refrigerator.

#### HOBBY PARTY AT WOMAN'S CLUB

The Woman's Club was the scene of one of the most beautifully conducted and interesting parties that has been arranged here this season, when a hobby party was sponsored from 3:30 to 9 p. m. on Thursday of last week. It was well attended.

The various collections or hobbies were tastefully displayed for exhibition. Models in the fashion show depicted old and new ensembles belonging to local people and merchants, in which the modern miss and he miss of 25 or 50 years ago were most interesting as it gave a vivid portrayal and contrast in what was popular in styles many years ago and today.

Many participated in the hobby!

contest, with all collections most interesting. After everyone had enjoyed looking over the various hobbies, visitors were asked to cast their vote on which they believed to be the best. Sue Clement, with a collection of 64 open-face salt

clars won first; Mrs. John Earl took second with a milk glass collection; Jimmie Lewis won third with his hand-made airplanes; and Phillip Clement took fourth prize with his collection of kodak pictures.

**QUALITY PAINTS**  
**Premier and County Fair**

"PAINTS THAT PROTECT AND BEAUTIFY AT SMALL COST"

THIS is a high standard of quality paint that is giving satisfaction to thousands of our customers who have used it for years.

County Fair House Paint is not a "cheap" false body paint, but is made from carefully selected pigments and colors of the most durable quality, thoroughly ground together with pure Linseed Oil and thinned ready for use. The hap-hazard results obtained by hand mixing are entirely eliminated, for we employ only skilled paint makers, and use only the most modern machinery.

County Fair House Paint spreads freely, covers well and dries with a fine, durable gloss, therefore it is an economical paint to use.

"The Superior Paint" for Outside Use. Hand mixed White Lead and pure Linseed Oil cannot be made to equal Premier Paint for durability, beauty and economy. Premier Paint is a properly proportioned combination of Pure White Lead, Zinc Oxide, Silicate of Magnesia and Pure Colors and is better and more durable than White Lead alone.

These pigments are thoroughly mixed with pure linseed oil and ground by our modern machinery to a degree of fineness and perfection that hand mixing cannot equal.

Premier Paint is for use on fine homes, schools and churches, or wherever the best is required. We recommend its use.
