A Road of Rails

Required track— the foundation of railway worship must have been strengthened from time to time in order to handle heavier and faster trains safely and economically. Because of the Illinois Central System, proved as it is, for 74 years in time, by the many advantages of having a railroad inside the city, and the ability to continue providing light transportation.

FOOD LIKE YOU GET AT HOME

This is truly a home-like restaurant because it has endeavored to break down the prejudices based on the theory that restaurants could not serve food like you get at home.

Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat.

Years of catering to the appetites of particular people make it possible for us to serve appetizing meals.

The next time you want to eat away from home, bring your family here.

Have Your Own Garage

The many advantages of having a garage of your own more than offset the small cost of building it. Come in at your earliest convenience and let us show you the structural engineering that will meet your needs— estimates that won't strain your purse.

Service That Saves

Our experience with materials— our knowledge of the least cost in building— our error-proof plans— our low prices— these will nearly reduce your cost to the lowest possible figures— whether you build a garage, boathouse, barn or other building.

Let us explain this service fully

FULTON

The high, easy lift of the John Deere Mower is a big advantage in rough ground. You can raise the bar high enough toclear obstructions in the field, and cut with the bar in that position.

John Deere Mower
The Mower with the High, Easy Lift

The powerful foot lift raises the same bar that has 45 to 55 miles and the cutter bar from 5 to 8 inches—the best lift I have ever seen. The bar is raised from the ground up to 9 feet high enough to clear any obstruction passed by the doubletrees.

The John Deere is simple and steady; it goes over rough and long grain and the construction is so rough that a boy can operate it safely and do a good work.

If you intend to buy a mower be sure to see the John Deere. We want you to see our display of John Deere mowers, and be easily made in the field, and cut with the bar in that position.

Dean of Men, University of Illinois.

In a large way, the Pennsylvania Railroad saved the nation. Curves and grade crossings were overcome by the use of high, easy lift. The John Deere is the only mower that makes it.

The life of a railroad begins with the ties, and the design chosen by the Illinois Central System for their ties alone is nearly one of a million ties, and their length would be different from the other. They were laid end to end. The railroad represents the impetus of mankind, the best example of a man-made structure. It is often said of the Illinois Central System that it is one million miles long.

Dean of Men, University of Illinois.

As the oldest and largest of the railroads, the Illinois Central System has been the leader in many of the important developments of railroad construction, and it has been the first to put the highest type of service to the public. Because of this fact, the company maintains a strong reputation and investment must run into many millions of dollars.

We are never too busy to be pleasant.

BIGGEST 4th OF JULY CELEBRATION IN THE HISTORY OF REELFOOT LAKE
Strawberry Growers

Get $58,165.45

Checks totalling nearly $58,165.45 were received last week by 2,030 members of the McCracken County Growers' association, which was the aggregate from the first 1927 strawberry crop. The checks were mailed out Thursday after the people's council issued the same, a corresponding sum was issued from the association's state aid fund to each member, according to the number of boxes handled by each member. The associations shipped 382,000 boxes during the season. The results attained are regarded as satisfactory in view that the weather conditions were extremely unfavorable and the crop poor in quality. The gross average return per case was $3.59, and the net average after deducting the cost of crates, packing and handling, and shipping expenses was $3.08 per crate.

The summary statement of the associations showed that $16,382 was paid the farmers toward the association. So far as is known, the average of the McCracken association is the highest attained by any association in the same season. Reports show that the average in the Ozark district was approximately $3.25 and in the Pembroke district was $3.40, as compared with the McCracken average of $3.09.

A hat price of 55 cents per crate was received on some of the McCracken county berries this season, while the lowest price was $2.50 per crate, the sales agents reported.

In addition to the crop returns the association is $2,067,000 above the cost of the association. No action was taken by the association on the McCracken average of $3.09 per crate.

Beautifully printed, this page of the Fulton Advertiser contains announcements and advertisements. One announcement highlights the need for citizens to vote in an upcoming election. An advertisement promotes the benefits of using asbestos shingles for roofs, emphasizing their durability against weather elements such as wind, rain, snow, and fire. Another ad touts the convenience of using electric appliances, pointing out how they can help save time and effort in the home. The page is a snapshot of late 19th-century American life, reflecting the social and economic changes of the time.
