FULTON ADVERTISER

Vol. 3 No. 34

FULTON, KY., JULY 15, 1927

R. S. Williams, Publisher

Editorial In Courier-Journal

Louisville, Ky., July 14. — (Special) — Warning against the patent efforts now being made by the present State Administration to establish a political hierarchy in Kentucky, and the attempt to build a political machine opposed to the public welfare is contained in an editorial published in the Courier-Journal of Sunday, July 10. "By threat and promises," the editorial says, "they (State officials) can become political despoils of the most dangerous sort unless the people crush this perversion of their functions in its incipency." The editorial reads as follows:

"IN A NUTSHELL"

"Campaign speeches sometimes fill hours with talk and columns with words without saying anything. Occasionally the entire scope of a campaign is summed up in the space of a sentence. That can happen only when the issues are clear-cut and the speaker is clearing the mark on them. It happened at Hardinsburg when Mr. Beckham said: 'The State Highway Commission must be freed from the contaminating influence of politics and its lockstep with the State Tax Commission and the combine with the Kentucky Jockey Club must be broken.' For terseness, clarity, precision and comprehensiveness that statement could not be easily improved. The issues have boiled down to that. The civic and material progress of Kentucky the next four years depends upon the elimination of the evils denounced."

"The profits of the Kentucky Jockey Club arise from its 'rake-out' on the money bet through the pari-mutuel machines, which it operates. This privilege is protected by statutory immunity from the law against 'setting up and operating games of chance' previously held by the court of appeals to include pari-mutuel machines. Mr. Crowe defends the statute granting immunity. Mr. Beckham said, 'I think that the law is indefensible.' It is no far-fetched assumption on the part of Mr. Beckham that he is not the favorite of the Kentucky Jockey Club for Governor."

"He did not initiate the charges of political activity by Tax and Highway Commissioners. They emanated from members of the present State Administration. Gov. Fields appointed them both and he is for Crowe. Chairman Montgomery of the Highway Commission resigned when politics intruded, and has accused the Governor and the new Chairman, Ben Johnson, of making a campaign that is 'dangerous to the interests of road building and the State.'"

"The Lieutenant Governor, in an unanswerable speech, declared that the Governor is under the thumb of one of the State Tax Commissioners, who, he said, is dictating the course in support of Crowe and devoting equal attention to the Republican primary in which the pari-mutuel question is paramount."

"The liaison is established on this authority. It is no theory concocted by Mr. Beckham; but its relevancy and plausibility are too palpable to be ignored. It is too serious a matter to be dodged or neglected by anyone who offers his services to the taxpayers of Kentucky as the head of their State Government until 1932. The Tax Commission has the final word as to how much taxes shall be paid by the people and corporations to make up the greater part of the \$26,000,000 a year annual revenue

handled by the State—\$104,000,000 during an administration. The highway commission spends \$15,000,000 of it a year—\$60,000,000 in the course of an administration—and determines where and how it shall be spent for the construction and maintenance of roads."

"The two bodies are the most potent and not the least important agencies of the State Government. They can do more than all the other departments combined to reduce the amount of taxes and increase the mileage of roads, and to equalize both; or by threat and promises, they can become political despots to the most dangerous sort unless the people crush this perversion of their functions in its incipency. The people are amply warned. They face a common danger and should not allow specious promises of local preferment or appeals to sectional selfishness to divide them and gull them into tacit, if ignorant, collusion with political machines, whose very promises to be unfair are sufficient to convince an intelligent electorate that its designs are adverse to the public welfare."

South Fulton Sewer Work.

The work of laying the sewer in South Fulton is being pushed forward rapidly, the contractors taking advantage of the favorable weather for their work. On Glen Avenue the sewer mains have been laid to the city limits, and a number of branch lines are being extended in various directions. The sewer mains on Central Avenue and also on Paschall Street are most completed, and also on McConnell Road running east and west by Holman's grocery and the South Fulton school building, these being the main lines of the system.

Prospects of an early completion of this work has given the people of South Fulton a renewed spirit of pride in the general appearance of the residence section, and it is hoped that the street improvement which will follow the completions of the new sewer system will give to that part of the city a marked improvement in general convenience as well as appearance.

Attractive Fair Catalog.

The Fulton County Fair catalog for 1927 are being distributed throughout the country this week. The programs and premium lists this year are very attractive to prospective exhibitors and the 1927 fair promises to out-class any former event.

The fair will open on Tuesday, August 23, and close on Saturday, August 27, five big days and nights filled with thrilling events, all of which go to make up a successful fair.

People throughout this territory are making preparations to be here, and judging from all reports the crowds will be larger than ever before. Free parking space has been provided adjoining the fair grounds with every convenience desired for visitors who attend.

If you haven't received a fair catalog get one at the Owl Drug Store.

A nice gift. Send The Advertiser to a friend one year—only \$1.00.

Are You Interested In Politics?

Some folks say that all politics are rotten to the core and therefore, they are no longer interested locally, nationally or otherwise. We believe that politics are the science of government and therefore believe that every loyal and patriotic citizen should be intensely interested in local, state and national politics. Good government is one of the most essential requisites to the happiness and prosperity of our country and just so sure as all good people hold themselves aloof from the political realms of our country, politics will continue to grow from bad to worse.

During the last few days the writer was visited by the Hon. Newton Bright, who hales from Eminence, Henry County, Ky. Mr. Bright is an outright farmer and a producer of the pure bred dairy cow, and is particularly interested in placing the agricultural phase of Kentucky upon higher and more progressive planes of prosperity. Mr. Bright is a strong believer in the right kind of advertising to bring the Kentucky state into its rightful place with the other progressive states of our country.

He is now aspiring to the office of Commissioner of Agriculture and says that if he is elected to this office, he will beg of the state an annual fund sufficient to ably support an advertising campaign that will give to the most remote parts of this state the kind of publicity that will attract the attention of new blood to that section. The writer carefully quizzed him along the importance of larger agricultural appropriations and found that he is in direct sympathy with all agricultural problems as regards the state's welfare and may we suggest in this connection that the office of commissioner of agriculture is one of the most important and the most comprehensive problems that confronts the people of this immediate section of the state insofar as politics are concerned. We do not know this, gentlemen, but feel it timely to suggest that this particular office should receive your most earnest thought.

Strong for Good Roads

Mr. Bright states that he has been to the Kentucky Senate four times and has always been

found to be in strong favor of good roads, stating that the good roads feature was one of the most important issues with respect to more profitable farming. We could not help but like the attitude of Mr. Bright, and trust that those of you who expect to give a part of your time to the study of political problems will look into this gentleman's record, and if found worthy of your support, it may be one of your best bets. Very truly yours, S. S. MOTLEY.

KRAMER LUMBER COMPANY IN NEW HOME

The Kramer Lumber Company are now located in their new home on Walnut street, where every modern convenience for the conduct of their business is enjoyed. It is an ideal location and an ideal home.

The building formerly occupied by the Kramer Lumber company on Fourth street was purchased by R. H. Wade. We understand Mr. Wade will remodel the property and convert it into a handsome garage building and salesroom for the Snow-White Motor Company, authorized Ford dealers in Fulton.

STREET WORK IS PROGRESSING

The streets are well torn up now in the business section of the city and work is progressing nicely on the street improvement program. The city has used much of the old oil surfaced coating in general repair work in the residential section, especially those streets traversed by the sewer system. This patchwork is only temporary but is better than nothing at all. Some of the resident streets will be given proper attention as soon as the street committee can get to them.

FULTON CONTRACTORS BUILDING NEW CHURCH IN UNION CITY

W. M. Hill & Sons, contractors and brick manufacturers, and Contractor Frank Merriam, have a large crew at work on the new church building they are constructing in Union City.

Arrives

Fulton Potatoes Keep Better

Than Those Grown Further South, and Quality is Fine

Brooks Henderson and Jess Margrave, the sweet potato kings of Fulton and Gleason, are busy emptying their storage house here, where 12,000 bushels were stored of the 1926 crop. Sixteen carloads have been shipped out of Fulton to northern and eastern markets at prices ranging from \$1.00 to \$1.25 per bushel. While said prices are much lower than that received for the 1925 crop the shippers and growers should be well pleased, in view of the fact that almost double the amount of potatoes were grown. The statistical records furnished by the United States Department of Agriculture show that the season ending May 1, 1926, for the Tennessee-Kentucky district shipped 2,500 cars of sweet potatoes against 4,771 cars shipped out for the season ending July, 1927.

It was interesting for the editor to learn that potatoes grown in the Fulton district keep better than those grown further south where the soil seems to be more or less affected by the continuous plantings of potatoes. At Greenfield, Tenn., the buyers suffered considerable loss this season and thorough investigations are now under way to determine the exact cause.

Messrs. Henderson and Margrave report their losses in Fulton very small and the quality extra fine. A large force is now engaged at their storage plant on Carr street, assorting and repacking hampers for shipment and a nice lot of Nancy Hall sweet potatoes were never shipped out of this district.

Jess Margrave, and his brother, of Gleason, Tenn., are perhaps the largest buyers and shippers of sweet potatoes in the south. They have been in the business for the past ten years and are exceedingly particular about grading and handling potatoes, therefore they enjoy a tremendous business and perfect confidence of the buyers in all markets. Every car they have sold this year has been at highest market prices.

BLUE BACK SPELLER

A familiar book was brought to the editor's attention this week by H. A. Coulter, the well known book dealer of Fulton. It was a genuine copy of the old blue back speller in general use years ago and often referred to today.

Coulter & Bowers have just received a supply for all who want them.

BIG CROWD IN TOWN LAST SATURDAY

Saturday was a big day in Fulton. The streets and stores were crowded with people and every available spot for parking purposes was taken up. The stores conducting special sales report good business. A big part of the crowd was in town "just looking around" and will come prepared to shop on their next visit.

Fulton is considered an ideal trading center and our merchants are all well prepared to serve the people with quality merchandise at the lowest prices.

RUDD HOME BEAUTIFIED

W. M. Hill & Sons have just completed a beautiful piece of Kellastone work at the home of Dr. and Mrs. R. T. Rudd on Commercial Avenue, where the front porch was remodeled. The foundation was also given a coating of Kellastone.

Country Club Scene of Smart Event

Formal Opening, Feature Golf, Gypsy Tea and Dance—Many Visitors.

The weather of Tuesday afternoon and evening lent enough warmth and enough exhilarating breeze to make a perfect day for the formal opening of the Country Club. The golf tournament, starting at 2 o'clock, attracted many players, and aside from the Gypsy Tea, served on the lawn beneath giant forest trees, was the outstanding event of the afternoon.

Society turned out in large numbers for the opening dance beginning at 9 o'clock. It was a brilliant affair and the most enjoyable dance of the season. This also by reason of the number of interesting visitors from other cities who were entertained in the various tea-dance groups. Two hundred and fifty invitations were issued.

The club house is located in the suburbs of the city on a tract of land ideal for golf, tennis and other recreations. It is a beautiful home for its members, built of rustic logs with pretty interior decorations. The lovely furnishings are in keeping with the other conveniences of a modern club house and was cause for much favorable comment. The golf course could hardly be improved upon, presenting a beautiful landscape from the club house. The members of the Country Club are to be congratulated on placing Fulton in a class with other progressive cities. Long live the Country Club.

DO YOU WANT TO RENT YOUR FARM TO A TRAINED DAIRY MAN?

Secretary Motley advises us that he has on an extensive advertising campaign with the view of attracting the northern dairy farmer into our section, and is receiving inquiries from as far away as Nebraska. If you want to rent your farm for a period of ten years, go to Mr. Motley and list it with him, and he will be glad to assist you in getting your farm rented for ten years at a cash price.

EDUCATION

Not only as a means of assuring an education to his children in the event of his death, but to create a college fund for them whether or not his life is spared, many a father is investing in Equitable Educational Fund Insurance. Moderate annual, semi-annual, or quarterly premium payments provide the necessary money to make possible the education which he wishes his boy or girl to have.

PUBLIC OPINION

(Hickman Courier)

Since The Courier took up the matter of spending the \$100,000 remaining to the county of the bond issue to build hard surfaced roads, we have heard expressions of interest and concern from all parts of the county. Every person who has mentioned the subject has strongly endorsed our stand that the Fiscal Court lay out a complete program of road building so as to get every foot of hard surfaced road possible for the money, and most of them have gone us one better in demanding that the Fiscal Court appoint one man, a practical road man, to carry out this program.

With this The Courier heartily agrees. Our magistrates are public spirited citizens who want to do all they can for the county, but in the nature of things they are not paid enough to devote their entire time to the business of the county and to spend this money wisely and well, it will take the entire time of someone, preferably a practical road man who knows his business and who can obtain the most out of this money for us. We believe that the Fiscal Court will be the first to agree to this and see the wisdom of having a complete county wide program under the supervision of one man who knows road building.

It is apparent that more can be obtained with the money in that way than if each magistrate tried to supervise the construction of the roads in his own district, and it would relieve the magistrates of a great burden. We cannot ask these men, all of whom are busy with their own affairs, to give all of their time to the public business. So in fairness to the magistrates themselves, The Courier joins these hundreds of citizens who have expressed their opinion, in asking the Fiscal Court to appoint a practical man to take charge of the program when it is laid out and see that it is carried out.

Probably the entire 50 miles of gravel road, which ought to be constructed with this \$100,000 cannot be built this year, but a good start can be made and perhaps half of it completed. From all we have heard, we believe that the farmers along each route are ready and willing to help in every way to widen the roads and haul the gravel, if the county will make the road ready for graveling and furnish the gravel and supervise the job. In this way we will get many more miles of roads for our money and 90 per cent of the people of the county will be out of the mud for all time. A six inch gravel road can be constructed for from \$1,200 to \$1,500 a mile or less and this will leave some money for needed culverts, bridges and the salary of the man appointed to superintend the construction. We do not need expensive engineers or contractors, as The Courier has pointed out before but we do need a reliable practical road man to be on the job all the time.

Although we have stated the program The Courier favors before, we are going to repeat it. That is: Construction of the following roads: The Dyersburg road to the state line, the Troy road to the state line, the Dresden road to the state line, the Middle road to Fulton and the connecting roads in the bottom through Bondurant, Miller and Ledford to No. 9 Lake. This is a total of something like 42 miles and gives plenty of leeway for the construction of a few more miles if needed. We think it would benefit more people in the county than any other program and we believe it can be carried out with this \$100,000 provided that it is taken as a whole and a good man is put in charge.

COMPROMISE ON SHORTAGE

Union City, Tenn., July 2.—The shortage of some \$9,500 or more, which was found in the office of the former superintendent of the water and light plant in an audit of the affairs of the office, which was conducted early last year, has been, through the city attorney, J. A. Whipple, assisted by Attorney W. M. Miles, compromised out of court by the consent of the bonding companies agreeing to pay the full amount of the shortage and interest accruing on same amounting together to \$10,025.04.

COTTON PRICES LIKELY TO BE AROUND THE LEVEL OF 1925

Washington, July 7.—Federal authorities admit the 1927 cotton crop is subject to interesting developments.

First, it is following a year of heaviest production in the history of America's cotton industry. Furthermore, no one knows what degree of success will attend late planting in the Mississippi delta.

O. F. Cook, United States senior botanist, questions satisfactory return from fields seeded as flood waters retreated. Although farmers have learned practical cultivation methods that advance the date of maturity as much as two weeks, Cook doubts the advisability of extensive risks on second planting.

Dr. O. C. Stine, agricultural economist, foresees crop conditions similar to those of 1911-1912.

"The large 15,000,000 bale crop of 1911," he recalls, "was followed by a 13,000,000-bale crop in 1912. Last year this country produced 18,000,000 bales. Naturally, therefore, the trend now would be toward a lighter crop."

"Acreage has been reduced because of the surplus cotton supply. And, as in 1912, the present crop has suffered from flood. It is probable, however, that the flood's influence on market conditions will not be so pronounced when the new crop is harvested as it was a few weeks ago."

"Unless the coming crop is heavier than anticipated, 1927 prices will likely be comparable to those of 1925, when cotton sold for 16 cents per pound. Last year's heavy supply forced quotations down to 14 cents."

"It is estimated the United States will consume more than 6,000,000 bales this year and will export more than 10,000,000. There is a cotton surplus on hand, and if the 1927 crop were to approximate last year's the market price likely would drop to 10 cents per pound."

NEW HEALTH OFFICER

Hickman, Ky., July 4.—Dr. H. E. Prather, of Hickman, has been elected by the Fulton county Board of Health as County Health Officer, to succeed Dr. J. C. Morrison. Dr. Morrison resigned several days ago to accept a position as public health officer of the city of Paducah and will assume his duties in Paducah on August 1, at which time Dr. Prather will take charge of the public health work in Fulton county. Dr. Prather has spent most of his life in Hickman.

HALL-DAVIS

Mr. and Mrs. B. B. Jonakin, of Fulton, Ky., announce the marriage of their daughter, Mrs. Marguerite E. Davis, to Mr. Alton Taylor Hall, of Memphis. The wedding took place yesterday afternoon at the home of Rev. W. W. Armstrong, pastor of Galloway Memorial Church.

Mr. Hall is well known in this city, having been connected with the cotton business here for several years. After several weeks' honeymoon in New York, Mr. and Mrs. Hall will make their home in this city. —Memphis Commercial Appeal.

BONDURANT ESTATE WORTH \$528,566

Hickman Ky., July 2.—The First National Bank, of Mayfield, Ky., executor of the estate of Chester T. Bondurant, Hickman, Ky., by its attorney, W. J. Webb, Mayfield, today filed in the Fulton County Court Clerk's office here an appraisal and inventory of the Bondurant estate. The total value of the estate is placed by the appraisers at \$528,566.65. This did not include life insurance, which amounted to \$400,000.

O. K. LAUNDRY HAS

COMPLETE SERVICE

The modern laundry of today is an expression of complete service for the whole family. Laundering has become the approximation of an exact science. Laundrymen of today are specialists and have learned the secret of improved cleaning in the most sanitary way, and the way that will have the least wear on linens is taught every employee in the modern laundry.

This class of laundry cleans more thoroughly, makes garments look whiter, with less wear and tear than the washer-woman in the own home. Different clothes need different methods.

The laundryman sorts the family bundle and each article goes thru the process of cleansing that will give the owner the best result, both in wear and cleansing. The O. K. Steam Laundry is modern in every department and has kept abreast of the progress made in improved cleansing for every garment. They give every article you send to them a special care, which is part of the routine of their work.

They have the most up-to-date equipment to handle laundry for the whole family and teach every employee to be a specialist in cleansing, neatness and carefulness. The family bundle will receive expert laundering in their hands, as well as promptness in delivery. Now is the time to send your curtains, draperies and rugs to the O. K. Laundry for cleaning. Just telephone No. 130 and your troubles are over. The O. K. will do the rest.

Community Building

Several Reasons Why Home Ownership Pays

"We Own Our Own Home." Just this simple little phrase means much to those fortunate enough to be able to say it.

It means that they are lords and masters of their own households. It signifies that here are folks entitled to a greater measure of respect, J. H. Hildebrandt writes, in the Chicago American. It shows that they are fathers and mothers who did not hesitate to sacrifice some of the small pleasures of life so that their children could grow up in proper surroundings.

Occasionally people argue that it does not pay to own a home. If one were to reckon only in dollars and cents, perhaps in some cases it might not pay.

But what has money got to do with it anyway? How can one compare a possible saving of a few dollars with the great measure of satisfaction and contentment that is bound to be evident to the owner's home. I am willing to grant that there are unpleasant tasks, but think of the many other interesting things that the home owner can do.

Every man should have a hobby of some sort, but I wish to point out that the greatest inspiration for this sort of thing would be found around the owner's home.

If you have hesitated to own a home on account of the two reasons mentioned above better get busy at once, especially if you have sons and daughters. Living in rented quarters you are missing a lot of the busy things in life, and you are overlooking one of the best assurances that your children will grow up to be a credit to yourself and the community at large.

Let more of us adopt the best hobby of all, "Our Own Home."

Look to Protection of Home From Fire

We often hear people say that if they had a fire they would let it burn and collect the insurance. Probably the home owner who takes pride in his possessions would not do that in case of actual fire. In any case, this is not the correct or safe attitude to take.

Policy stipulations go into detail regarding ownership of property insured. They state plainly that the policy is void, unless specifically provided in a written rider attached to the policy, if the insured is not sole owner of the property; if the building occupies land not owned by the insured; if the insured knows foreclosure proceedings have been instituted; if there is any change of title other than by the death of the insured, or if the policy is assigned before a loss. If any such conditions exist or should arise the home owner should notify the agent or broker immediately.

Some Important Don'ts

- Don't build on a fill of any kind.
- Don't build on a reclaimed swamp. Let your great-grandson do that.
- Don't build on black soil. Dig it out.
- Don't take chances on narrow footings. Make them wide.
- Don't use sand from the excavation if it contains organic matter.
- Don't try to save cement in concrete for footings.
- Don't leave the footings uncovered if you build in winter.
- Don't try to level off the footing trench with loose material before placing concrete. Build from the natural ground.
- Don't guess about footings. Know what kind of soil you have and what the building weighs.

Really Belong to City

The man who buys real estate in a city becomes a permanent part of the municipality because he owns a very vital interest in the city. Even though he may be compelled to transfer his place of abode to some other locality at a subsequent date, as long as he is a property owner he cannot escape maintaining a very definite interest in the welfare and progress of his former home city.

Cheaper Lot, Better House

The less expensive the lot the more money is left for the house itself, and a well-constructed house on a cheap lot is far more desirable than an unsatisfactory house on an expensive lot. Although a house that is very much more expensive than its neighbors might be hard to sell at a good price, a very cheap house may add nothing at all to the sale value of an expensive lot.

Trade Possibilities

Andalusia citizens would do well to take a day off and get together and talk about Andalusia, her trade possibilities, her problems that are common to all her citizens. Such gatherings would promote good will and cooperation and these twin blessings are always essential to the greatest growth of any city.—Andalusia Star.

Look Well to Schools

Schools generally are the barometer of a community's progress.

POULTRY

KEEPING TURKEYS IN PROPER HEALTH

Turkeys are heir to all the poultry ailments, and treatment is about the same. But while the young are tender, the adults are able to withstand considerable hardship.

When allowed to range over fields, woods and highways they keep in the best of condition and pick up a very large portion of their food, writes Michael K. Boyer in the Farm and Ranch. As the nature of the turkey is to roam, it does not thrive in confinement.

Inbreeding is one of the worst errors and the cause of much degeneracy among stock. Indigestion is the chief turkey trouble, and this is usually brought on by improper feeding.

Looseness of the bowels may come from bad feeding, dampness, filth, and infestation with lice.

Young poulters are sometimes lost through rheumatism, caused by exposure, damp roosting places, too little green food, or poorly constructed houses.

There is a difference between ordinary leg weakness and rheumatism. In the latter the shanks remain contracted and stiff, while in leg weakness they are soft. Leg weakness is brought on by a lack of muscle and bone-forming material. In rheumatism the trouble is aggravated by the moist food, which in leg weakness is needed.

Young turkeys must not be allowed to become wet. The slightest dampness is apt to be fatal. Filth will soon make short work of the youngsters.

The delicacy of young turkeys is largely due to the rapid growth of feathers. Unlike the chick, the young turkey at once starts to put out large feathers on its wings and tail, and this heavy growth has a tendency to sap the vitality from the body, leaving it an easy prey to weakness and disease. A damp soil, such as heavy clay land, is very unsuitable for rearing the young. A very cold, exposed situation is likewise unfit.

Market Broilers Need

Two Weeks Fattening

It is a good plan to give the broilers that are to be marketed about two weeks of fattening before they are sold. This is especially advisable if something has happened during the brooding period to check the growth of these young birds. One way to fatten them is to confine a group of them in a small house—about 100 in a 10 by 12 house—for a period of two weeks just before selling them. Darken the house as much as possible, making sure there is plenty of ventilation. Remove any roasts or dropping boards that may be in the house and have plenty of clean litter on the floor to start with.

Feed them a wet mash of the consistency of pancake batter, composed of any of the good commercial fat teners moistened with milk. Fine cracked yellow corn or yellow corn meal and milk are great fatteners for poultry. Feed the birds three times a day in troughs, what they will clean up at each feeding. Keep water away from them so they will eat lots of mash. Watch sanitary conditions carefully, to prevent any spreading of feed and possible disease infection. Keep everything clean.

Free Range With Grass and Shade Is Favored

As soon as the chicks are old enough to leave the brooder—from six to eight weeks—they should be placed on free range with grass and shade if possible. If white diarrhea, gape worms or the little roundworms affected the chicks last year, place the coops on new range if possible, for these diseases are not easily gotten rid of and will remain on the ground from one season to another. This is especially true of the worms. If there is tuberculosis in the old flock keep the young chicks from going over the same ground for they contract the disease easily.

Grass will furnish all of the green feed necessary during the summer if chicks are on free range.

Examine the Hens

Handle the flock. There is dependability about touch which does not belong to sight. Feeling the breast bone of a fowl is an index to her condition. Looking at her tells little of her body. A hen that is out of condition may fluff her feathers like a broody hen. Wasting is common after a hard winter. Of the wasting diseases, tuberculosis comes first. Worms, lice and mites follow. The normal fowl in good health is in good flesh.

Good Chick Waterer

A good waterer for chicks can be made with a tomato can and saucer or a strap pull and pie tin. Punch holes about one inch from the upper edge of the can or pail—from six to eight holes are plenty. When ready to use fill can or pail with water, turn the saucer or pie tin over the top, hold tightly in place and invert. The water will come through the holes till the saucer or pan is full and as the chicks drink the dish will automatically be refilled.

FANCY FARM PICNIC JULY 27

Former Gov. Beckham to be One of Speakers

Everything points to a big day at Fancy Farm on Wednesday, July 27, when the annual picnic of the parish of St. Jerome's will be held. The committees in charge are preparing for a large crowd, and have invited all the district and county candidates to be present, while former Gov. J. C. W. Beckham has accepted an invitation to deliver an address there on that occasion.

To Leave New Pool Contract to Members

Twenty of the 25 directors of the Dark Tobacco Growers' association went over the proposed new contract at Hopkinsville Monday and after making a few changes ordered the executive committee shape it up in proper form and present it to the members for their approval. Each director is to discuss the contract with the members of his own county to find the attitude of the growers toward it.

Begin to Lay Out Site for Columbus.

Building lots have been staked on a hill about a half mile from Columbus, Ky., as the first move of transferring the city out of reach of the sweep of the Mississippi river which is gradually washing this little fishing town away.

Several dwellings already have been moved to the higher ground. Plans are being made to build a \$15,000 school building. The Red Cross, with the aid of St. Louis experts, is helping design the New Columbus.

The town was a heavy sufferer during the recent flood of the Mississippi. Cave-ins along the banks make the present move imperative.

"Uncle Billy" Kitts, 77, Merchant, Dies

"Uncle Billy" Kitts, 77, former Wingo merchant and peddler, died at 5 o'clock Sunday afternoon at his home near Morgan's Store at Guill hill, between Wingo and Water Valley. Death was attributed to complications as he had been in feeble health for some time.

Country Is Always Hungry For More Electric Power

The United States is continuing its steady increase in demand for electricity. The government figures for power production for the month of May have just been issued showing that the country in that month used 6,515,370 kilowatt-hours of current. This is almost exactly 11 per cent greater than the May power consumption a year ago, and one per cent ahead of April of this year.

The usual balance was maintained as between power generated by falling water and power generated by fuel-burning plants. In May waterpower produced 2,632,333 kilowatt-hours of energy and fuel 3,883,197 kilowatt-hours. In the fuel plants were consumed 3,234,000 tons of coal, 510,000 barrels of oil and 4,829,000,000 cubic feet of gas.

The nation's power plants use more coal and gas and less oil than they did in 1914. Coal consumption during May jumped from 85,000 tons to 104,000 tons a day and gas from 62 million cubic feet to 155 million cubic feet per day but oil has dropped from 23,000 barrels to 16,800 barrels.

When you buy John Deere implements you are sure of prompt repair service throughout their long life

A Big Advantage on Rough Ground

The high, easy lift of the John Deere Mower is a big advantage in rough ground. You can raise the bar high enough to clear obstructions in the field, and cut with the bar in that position.

John Deere Mower

The Mower with the High, Easy Lift

The powerful foot lift raises the outer shoe from 25 to 35 inches and the inner shoe from 8 to 11 inches. The hand lift raises the outer shoe 44 inches and the inner shoe high enough to clear any obstruction passed by the doubletrees.

The John Deere is simple and sturdy its parts are strong and long-lived and its construction is so simple that a boy can operate it safely and do good work.

If you intend to buy a mower be sure to see the John Deere. We will be pleased to show you its many fine points any time.

Clutch with 21 points insures instant starting. Special drive gear construction reduces wear and increases power. Improved construction of gear assembly insures better service and longer life. Adjustments can be easily made in the field with ordinary tools.

Teaching You Thrift

Practice makes perfect. Schoolmasters of today as well as yesterday constantly repeat that truth. Pupils learn by applying it.

Application of that principle to our everyday habits proves its practical help. We learn by practicing, whether it be a good habit or a bad habit.

This bank teaches you thrift by leading you to practice it. The lesson is easily learned once it is begun. To become perfect in it requires constant practice. A savings account is the most consistent method of practicing thrift.

Lesson for July 17

SAMUEL ANOINTS DAVID

LESSON TEXT—1 Samuel 16:1-13.
GOLDEN TEXT—Let no man despise thy youth, but be thou an example of the believers in word, in conversation, in charity, in spirit, in faith, in purity.
PRIMARILY TOPIC—A Shepherd Boy Chosen King.
JUNIOR TOPIC—God's Plan for a Boy's Life.
INTERMEDIATE AND SENIOR TOPIC—Why God Chose David.
YOUNG PEOPLE AND ADULT TOPIC—Discovering Future Leaders.

I. Samuel Mourns for Saul (v. 1).
1. Why he mourned. The death of Saul was, no doubt, a personal loss to Samuel, for Saul was a commanding and lovable personality. Then, too, the ruin of so promising a career would deeply affect Samuel. Finally the humiliation to God and God's people grieved his heart.

2. Excessive mourning rebuked. The fact that God had rejected Saul should have lifted Samuel out of his grief. Excessive grief over that which God does is a reflection upon Him and should be rebuked. When sorrow becomes a hindrance to the discharge of duty, it merits rebuke.

II. Samuel Sent to Anoint David (vv. 1-3).

1. Samuel's Fear (v. 2). Perhaps by this time Saul was becoming a desperate character. Samuel still knew that if Saul should hear that he was taking steps to appoint a successor to the throne, his own life would be in danger. Samuel was wise in submitting this hard situation to the Lord. God's servants are to be brave. However, even when going on errands for God we should not court danger.

2. The Lord's direction (v. 2).

The Lord smoothed the way. Samuel. He showed him how to perform his duty and escape the danger. Samuel was to take a heifer and announce that he was going to offer a sacrifice unto the Lord and to call Jesse to the sacrifice. The prophet was not told all that would happen. This is usually God's way with us. He gives us our work piece by piece, and guides us step by step. Samuel's purpose was known only to himself. It was to be kept a secret so that the news would not reach Saul. This was a shrewd device but entirely legitimate. We may conceal that which others have no right to know, especially when such a disclosure would be detrimental to the success of our mission. What Samuel said was true.

III. Samuel's Obedience (vv. 4-13).

1. The trembling elders of Bethle-

hem (vv. 4, 5).
Their unusual movement was an occasion for alarm. To the elders' alarming inquiry Samuel responded with the assurance of peace, inviting them to join him in worshipping the Lord.

2. Examination of Jesse's sons (vv. 6-12).

The Lord had revealed to Samuel that one of Jesse's sons was to be the new king but not the particular one.

(1) Eliab selected (vv. 6, 7).

Eliab was the eldest son and therefore he was the first presented as having first right to the place of honor. Furthermore, he was a splendid specimen of manhood, tall and majestic in appearance, so that even Samuel was captivated by him as he had been by Saul (10:24). Outward appearance is favorable, but the realities seen by God were against him. We frequently estimate men by their dress, cultural appearances, wealth and position. These are only surface manifestations and frequently lead us astray, but God looks into the heart.

(2) David chosen (vv. 8-12).

All but one of Jesse's sons had been looked upon, but still the Lord's choice had not appeared. Jesse's reply to Samuel's question as to whether all his children had appeared seems to imply that David was not of much importance. At any rate he was only a boy, while his brothers were already young men. He was considered good enough to watch the sheep, but not to be called to the feast. This is ever the way of man. He overlooks the very ones whom the Lord has chosen for places of honor and influence. Because David was faithful as a shepherd boy, he was in line for promotion when God's given time arrived.

3. David anointed (v. 13).

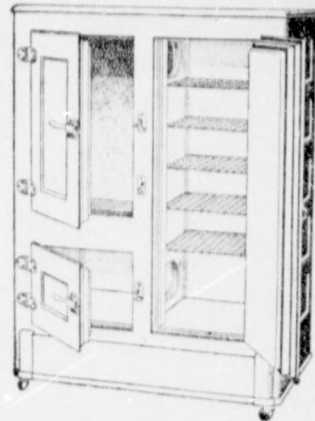

When the shepherd lad appeared, the Lord directed Samuel to anoint him. When the oil was applied the Spirit of the Lord came upon him. David was a gifted and attractive lad, but his gifts were of no avail without the Spirit of God. Only as we are anointed by the Holy Ghost can we truly do the Lord's will and work.

We Can Choose

We cannot tell what shall be on the morrow; but we can choose what we ourselves will be. We can resolve to live faithfully whatever befalls. . . . We can walk with the bright angels, and wrestle with the dark ones, and oblige the flying hours to leave a blessing behind.—N. Y. Frothingham.

That Which We Do for Christ
That which we do for ourselves is forgotten; that which we do for Christ is immortal.

Cold Facts for Hot Weather Consideration

All Leonard Refrigerators

are finished in Golden Oak. They are the best without a question. They are scientifically built. They have all the important features necessary to a perfect refrigerator—cleanliness, odorless, free circulation, economy in the use of ice, condensation and dry air, and long life. An inspection of the LEONARD will thoroughly convince you that they are the best refrigerator obtainable for the money. We have all sizes. Come in and see our line.

Yes, we have a splendid line of ICE CREAM FREEZERS, ICE PICKS and WATER COOLERS. Small and large sizes—just the kind you want.

Flies vs. Screens.

The flies and mosquitoes are coming thick and will soon take possession of your place unless you have the doors and windows protected. We have a splendid line of screen doors and all kinds of screening for your protection. Place your order now.

"Blue Grass" Lawn Mowers.

Now is the time to cut grass, and you will want to do it easily as possible. The best and easiest way is to use the "Blue Grass" ball bearing lawn mowers, built of the best steel and iron. We have them in all sizes, made well and durable.

A complete line of "Quick Meal" Oil Cook Stoves.

The Out-Of-Town Shopper

What happens to the out-of-
town shopper when he arrives in
town is a question with which
business men of many communi-
ties are dealing as a major prob-
lem in this day of the motor car
and clogged streets, according to
the Civic Development Depart-
ment of the Chamber of Com-
merce of the United States. They
are discovering that preempted
parking space has the affect of
turning a cold shoulder upon the
desirable visitor.

In a report on this subject set-
ting forth methods adopted by
various communities to solve the
problem the Civic Development
Department says:
"The conclusion toward which
the past experience of merchants
points is that in dealing with the
problem of encouraging the trade
of the automobilist, the first con-
sideration should be to reserve
for patrons the space in front of
shops by making local merchants
and business men park elsewhere
and by having all loading and
unloading done at the rear of
buildings, or outside of business
hours. If the streets are too
narrow for parking on both sides
and existing construction does
not permit loading and unloading
at the rear it would be good and
farsighted economic policy for the
merchants to work for street
widening and other town plan-
ning features so that wherever
possible the main streets which
are shopping centers should
permit parking at an angle of 45
degrees on both sides of the
street.

"When a city or town is al-
ready too built up to permit sub-
stantial broadening of streets the
most convenient arrangements for
customers are regulations which
permit parking for not less than
two hours within easy walking
distance to the shopping center,
free parking space in the unused
interior of business blocks, on
vacant lots or in convenient
downtown garages."

Fulton, Kentucky Opportunity Offers

The Manufacturer
An abundance of raw mate-
rial—cheap power and water—
exceptional railroad facilities—
ample labor—cheap sites—
low taxes.

**The Farmer, Truck Gardener
and Stock Raiser**
Extraordinary fertile lands
of low prices—a suitable cli-
mate—suitable labor.

The Merchant
A large and increasing trade
territory—freedom from undue
competition.

The Homeseeker
Attractive but inexpensive
homes—low living expenses—
good schools and churches—a
delightful climate.

SHORT FRUIT CROP

From the latest government
reports we learn that the fruit
crop seems likely to be less
than that harvested in any re-
cent year with the exception of
1921 when late frost killed the
blossoms in the central tier of
states from Virginia west to
the Rocky Mountains.

The peach crop is estimated
at 45,396,000 bushels, which
would be approximately two-
thirds the quantity produced
last year. California, New Jer-
sey, Illinois and Colorado seem
to be the only important ship-
ping States which expect peach
crops equal to the average pro-
duction during the last five
years. Comparing this year's
peach prospects with the big
crop harvested last season, the
South expects only about half
as many bushels, the North
Central States a little over two-
fifths, the North Atlantic States
two-thirds and the Western
States nine-tenths as many as
last year.

Pear prospects are not much
better, as the United States
crop is expected to be only
about 73 per cent as large as
that of last year. Prospects
are particularly poor in the
Pacific Northwest and from
Pennsylvania and Missouri
south.

Apples trees in many sec-
tions were still in bloom on the
1st of June in the important
fruit belts around the Great
Lakes and it is too early to
make a reliable forecast of pro-
duction for the country as a
whole. General prospects,
however, point to one of the
lightest crops in years. The
condition is reported as 57.2,
which is below any previous
June apple condition in 17
years, with the exception of
1921. The uniformly heavy
crop of last season resulted in
a light bloom on some varieties
which tend to bear in alternate
years and in many States the
crop was further reduced by
late frosts. In Virginia, West
Virginia, and the South Atlan-
tic States generally only about
a third of last year's apple crop
is now expected. In Arkansas
and the other South Central
States prospects are about
equally unpromising. The
Western States report pros-
pects for less than three-fourths
of last year's apple crop. In
the North Atlantic and North
Central States prospects are
still quite uncertain but only
about 60 per cent of last year's
crop seems probable.

All Florida fruits are now
suffering from a very severe
drought and California oranges
and lemons show the lowest
July condition since 1922. The
California grape and prune
crops seem likely to be above
average, but California cher-
ries, plums and apricots are all
rather light crops. On the
whole, fruit prospects are in
marked contrast to last season's
excessive production of last season,
yet reports from some eastern
apple sections indicate that
many fruit growers have be-
come discouraged because of
the low prices received recently
and are neglecting their or-
chards this spring.

BROOKS ENDORSED BY FOUR BROTHERHOODS

Louisville, Ky.
June 28, 1927.

Hon. O. Houston Brooks,
Mayfield, Ky.

Canada.

Council Proceedings

Fulton, Ky., July 5, 1927.
The City Council met in ad-
journed session, in the City
Hall, Tuesday evening, July 5,
1927, at the regular hour, 7:30
o'clock, Mayor W. O. Shankle
presiding, and the following
Councilmen present: Smith At-
kins, Joe Bennett, Paul DeMy-
er, J. E. Hanneppin, W. P. Mur-
rell and L. S. Phillips.

The minutes of the previous
meetings were read, approved
and accepted by the Council,
upon motion of L. S. Phillips,
seconded by Paul Demyer.

The reports of the various
city officials were read, ap-
proved and adopted by the
council, upon motion of Joe
Bennett, seconded by J. E.
Hanneppin, the reports being
as follows:

Respectfully submitted,
THOS. H. CHAPMAN,
City Clerk and Auditor.

The City Council accepted
the proposition offered by Esq.
Hagler to use oil, also to repair
State Line street.

An ordinance relative to all
vehicles stopping at Third
Street extension before going
into Fourth street was duly
passed by the Council.

A delegation of business men
appeared before the Board re-
lative to the 4th street bridge
matter.

Other routine business was
transacted, following the clos-
ing of same, the Council ad-
journed to meet at 7:30 o'clock
Thursday evening, July 14,
1927.

Thomas H. Chapman,
City Clerk and Auditor

YOUR SPRING SUIT NEEDS THE WRINKLES TAKEN OUT

You know what a beauty
shop can do for faces—how it
can remove wrinkles from
cheeks and crow's feet from
eyes. But did you ever visit a
"beauty shop for suits"—a
modern dry cleaning and sani-
tary pressing establishment?
Here, again, is a "fountain of
youth"—this time for clothes.

For example, take one of
your own suits to the O. K.
Steam Laundry—one you've
worn often. If it's a light suit,
the grime is plainly visible at
collar and cuffs; perhaps there
is a bit of grease on it from
your car. If the suit is dark,
the dirt may not show—but it's
there. One cannot ride in au-
tomobiles and taxis, and not get
dirt.

But see what your dry clean-
er, the O. K. Laundry, can do
for this suit.

First, it is tumbled in warm,
drying air; the moisture is re-
moved, the dust shaken out, ob-
stinate spots loosened. An ex-
pert "spotter" then goes over
the garment by hand—stains
and spots vanish before his
skill. Next, the suit is soured
gently, thoroughly, back and
forth, in the purest of cleaning
fluids. Soil embedded in the
fabric is filtered out; grime and
grease are dissolved away.
After most of the moisture has
been whirled out, the suit is
carefully dried in a breeze of
fresh, warm, sterile air, then
with the warm air sifting thru
it, it is fluffed softly. The nap
comes to life, the cloth becomes
fresh and smart again.

Nor is this dry cleaning
"magic" limited to men's suits
and overcoats. Hats and gloves,
women's coats, suits, dresses
and blouses, children's clothes
—almost every article of wear-
ing apparel can be given this
same renewing, refreshing
treatment. And how much
longer clothes wear when they
receive it. Truly dry cleaning
pays its own bills.

Of course, we make a spe-
cialty of dry cleaning draperies,
rugs, etc. Don't overlook this
when you begin your Spring
housecleaning—just phone 130
and we will do the rest.

O. K. STEAM LAUNDRY
J. J. Owen, Proprietor.

The Ox Woman

On an East Indian farm, where the crop is tea, a wooden
plow turns up the rich black soil. A woman drives, an-
other woman pulls—and a black ox pulls beside her.

Many American women often work as hard as their
Oriental sisters. They toil at the washtub, they carry
water, they churn by hand—all tasks which electricity
can do.

The release of the American woman from physical
drudgery is coming about through the increasing use
of electricity in the home.

Drop in and let our salespeople show you various
ways in which electricity can be made to work for you.

KENTUCKY UTILITIES COMPANY

Build Bigger Pigs— with Less Feed

A 100 pound sack of Purina Pig Chow will
build as much pork as 250 pounds of midds or
shorts—and costs just half as much.

Pig Chow is Easy to Feed

The directions are simple. Feed
a double handful night and morn-
ing with any feed you have on
the place.

Apply them right over old shingles!

HERE'S the way to settle
the roof-repairing prob-
lem for once and all—
Lay an ETERNIT Asbestos
Shingle roof right on top of
your old shingles. Then you'll
have the finest roof ever in-
vented by man for protecting
his home against the ravages
of wind, rain, snow, fire and
time.
Made of long, tough, African
asbestos fibres and Portland
cement, ETERNIT Asbestos
Shingles are tough and strong.

At the same time they are
resilient rather than brittle.
Consequently, they make a
roof that will last as long as
the foundation stands.
Supplied in five attractive
colors, ETERNIT Shingles offer
wonderful opportunities for
beautifying the appearance of
an old home. Whether you
wish to roof a new house or
re-roof your present home,
see us about the economy of
using ETERNIT Shingles.

WHAT ABOUT YOUR
SWEET CLOVER
FOR PASTURE?

Do you intend to have a sweet clover field for your dairy cows? If you do, now is the time to begin making ready for an early fall seeding. The best results obtained in seeding sweet clover is to prepare your seed bed during July and August, break the land well, and work it down to a firm seed bed by continually harrowing and disking, give the field an application of about two tons of commercial limestone finely ground, then about the 10th to 20th of September, plant your sweet clover, do not pasture until spring.

We have an interesting report from W. L. Van Buren of Morris county, Kansas, who says that he always figured one cow to 4 acres of ordinary pasture, but now has sweet clover and figures two cows to one acre of sweet clover. Mr. Van Buren's statement is very much like many other stories which we get from those who have tried the sweet clover for dairy cows. Count the value of your land and you can soon tell if sweet clover will pay for dairying.

Fulton Chamber of Commerce.

GOING TO ANOTHER
FIELD OF WORK

J. R. Manser, Secretary of the Union City Chamber of Commerce, has resigned to take up the work of field secretary of the American Automobile Association, in connection with the Memphis branch, a position carrying very favorable business connections and compensation. Mr. Manser is one of those who represent very high public business pressure and recognizes standards. He is a man of business qualifications and fine personal qualities, and he carries with him the highest endorsements of the people of Union City, with whom he has been associated. He will no doubt be the man of all the applicants that the Association is looking for. Good fortune to Mr. Manser.—Union City Commercial.

FAMILY REUNION

Mr. and Mrs. S. A. McDade entertained July 8 with a dinner in honor of Mr. and Mrs. George Knox, Mrs. Wilburn Murphy, Mrs. Carlton Coleman and Miss Lillian Murphy, of Florida.

A number of relatives and friends enjoyed the dinner with them.

Those present besides the honorees, were Mr. and Mrs. Charles Brann and family, Mrs. J. C. Brann and daughter, Rebecca, Mrs. J. C. Cheek, Mrs. W. F. Boyd, Mrs. Wilmon Boyd, Mrs. George Crafton and children, Mrs. Sophia McFerrin, Mr. and Mrs. Lewis Burke and family, Mr. and Mrs. J. W. Gibbs and family, Horton Brann, Mrs. Ida Taylor, Mrs. Brown Moss and Mrs. John Brooks and son, of Martin.

The dinner was spread on the lawn and consisted of all the delicacies of the season and all enjoyed it to the fullest extent.

The afternoon was pleasantly spent in social pleasure and the day will long be remembered by the honorees and hosts.

Do You Know

A better plan for success than the systematic accumulation of a portion of your earnings?

Life is either a series of stepping stones or a treadmill. Some get on and some stand still.

"Thrift" is a broader word than merely "saving." It involves an intelligent and profitable use of your savings.

To get the highest earning power, consistent with absolute safety, you should buy stock in the FULTON BUILDING AND LOAN ASSOCIATION.

BRIDGE PARTY

One of the largest and most beautifully planned bridge parties of the season was given on Friday afternoon at the Usona Hotel by Mrs. Henry W. Ford and Miss Beatrice Broome, honoring Misses Aurelia Walsh of Memphis, Margaret Crocker of Detroit, Arlene Baird of Dyersburg and Mary Sue Dulaney, of Louisville, attractive guests of Miss Broome.

The dining room was artistically decorated with many beautiful flowers. Delicious punch was dispensed throughout the game by four charming young ladies, Misses Dot Ford, Kathryn Reid, Mary Nell McDade and Louise Hill. At the conclusion a delicious ice course was served to the guests present.

Mrs. Harold Owen was the lucky winner of the first high score, a bottle of imported perfume. Miss Mildred Huddleston, second high, a French vanity and consolation was cut by Mrs. Gid Willingham, a box of stationery. Each honoree was presented a bottle of perfume as a memento of the occasion.

PATMON-TURBEVILLE

Cupid shot from his bow one arrow that went not astray, for the little dart brought happiness to the hearts of two Fulton people, namely Mr. H. M. Patmon, and Miss Laura Turbeville, who on Sunday morning, July 10, at 10 o'clock, stood at the hymeneal altar, and were united in the holy bonds of wedlock.

Rev. H. L. Hinch tied the knot that bound the two lives together with a cord not to be severed only by the scythe of old Father Time.

Immediately after the ceremony they left by auto for Memphis, accompanied by the groom's two brothers, where they will spend a few days, and then take an extended tour through the west, returning to Fulton the latter part of August where they will continue to make their home.

The groom is a prominent citizen of the city, and a locomotive engineer of the I. C. R. R.

He is Commander of the Fulton Post of the American Legion, a member of the several bodies of the Masonic Fraternity also of the R. R. Brotherhoods. He is an exemplary young man and very popular with his associates.

The bride was formerly of Martin, but of late has been making her home in Fulton and her numerous friends wish her much happiness in her matrimonial venture, feeling she will be a great helpmate to the one with whom she has cast her lot.

SURPRISE DINNER

The home of Mr. and Mrs. J. K. Passmore, four miles south of town, was the scene of an enjoyable affair July 7, when friends and relatives of Mr. Passmore surprised him with a dinner in honor of his 75th birthday.

Each family represented brought a well-filled basket and the contents were placed on a long table on the lawn and at noon every one present was invited to eat all they could. Several baskets were taken to sick friends who were unable to come. The afternoon was spent in pleasant conversation and at a late hour all left for home, leaving behind pleasant memories and best wishes for many more happy birthdays.

Those present were Mr. and Mrs. G. W. Robey and children, Mrs. Horace Jarman and daughters, Helen and Sarah Mae, Mr. and Mrs. J. W. Robertson, Mrs. Carl Robertson, Ed Heatcott, Mr. and Mrs. Jim Norman, Mr. and Mrs. William Robinson and daughter, Christine, Mr. and Mrs. Tom Council and children, Mrs. Albert Hutchens and mother, Mrs. Bowers, Mrs. Isam Conner and sons, Austine and Weldon, Mrs. Fannie McClain, Mrs. Emmett Reese and son, Robert, Elder A. B. Ross, of Martin, Tenn., Mrs. Frank Hefflin and daughter, Audrey, of Detroit, J. W. Passmore, Roy Craver, Mrs. J. P. Hefflin, Mrs. Dennis Paine and daughter, Geraldine, of Union City, Mr. and Mrs. C. J. Black and children, Mrs. Paul Puckett, Mr. and Mrs. L. C. Brown and daughter, Almada,

Mrs. Ernest Norman, Mr. and Mrs. Ernest Heitcott, Mr. and Mrs. Roy Adams and sons, John and James, of Fulton, and Ralph Farside.

McFadden News

A birthday dinner was given in honor of Mrs. O. C. Wolberton and Mr. Henry Sams at the home of Mr. Sams near Rock Spring church. The following were present:

Mr. and Mrs. Ernest Willey, of Highland; Mr. and Mrs. Jake Smith of Moscow.

Mr. and Mrs. Herbert Howell, of Beelerton.

Mr. and Mrs. T. H. Howell, of Beelerton.

Mr. Jim Howell and Miss Cora Dillon, Mr. and Mrs. Luther Elliott and son, Herschel, Mr. and Mrs. O. C. Wolberton and family, Mr. and Mrs. Rolley Howell and son Cleon, Mr. and Mrs. Percy Moore and family, Mr. and Mrs. Pink Dillon and sons, Fort and William, Mr. and Mrs. Tim Sams and children, Mr. Herman Sams, Miss Addie Auston of Fulton, Mr. and Mrs. George Sams, Mr. and Mrs. Priestly Holt and daughter, Christine, of Fulton, Mrs. Fannie Smith, Miss Inez Belew, Mr. Charlie Moore, Mr. and Mrs. Marshall Byrd and son, Harold, Mrs. Bird's sister, cousin and grandmother Howell. All reported a good time and enjoyed the afternoon with singing.

Mrs. Bill Averetts and son, Nevil, of La Center, Ky., are spending this week with Mr. and Mrs. Jim Bard and other relatives.

Mrs. Annie Oliver and son, Clarence, Mrs. Alice Cooke and Miss Roxie Kyles spent Sunday with Mr. and Mrs. Jim Walker.

Mrs. Sam Bard and son, Layman, and Miss Hattie Hampton spent Sunday with Mr. and Mrs. Jimmie Sullivan near Fulghum.

Jack Boulton spent Saturday night with Benard Pickering.

Mr. and Mrs. Herbert Howell spent Saturday night with Mrs. Jim Powell.

James Martin Bard spent Saturday night and Sunday with Mr. and Mrs. Clarence Bard in Fulton.

Mr. and Mrs. Lundy Wilson were Sunday afternoon guests of Mr. and Mrs. Jim Walker.

Marshall and Laura Mae Pickering spent Sunday with Richard and Bessie Childers.

Mrs. Jim Bard and daughter, Lillian, Mrs. Bill Averetts and son, Nevil, and Miss Clevia Bard spent Monday afternoon with Mesdames Herbert and T. H. Howell.

Mr. and Mrs. Cleveland Bard and family spent Sunday afternoon with Mr. and Mrs. Clarence Bard.

Chestnut Glade

Literary Society was organized Saturday evening and the following officers elected:

President, Mr. Barrax; Vice President, Wayne Rhodes; Secretary, Christine Taylor; Chaplain and critic, Wayne Lamb.

The next meeting will be Saturday evening, July 23. Subject for debate: Resolved that Dredge Ditches Do More Harm Than Good. Aff. Maynard Reed, Mamie Milam; Neg. Wayne Lamb, Ellen Rowles.

A movie show will be given in the school auditorium July 15 in the evening, for the benefit of the athletic association.

Protracted meeting at Mt. Moriah was postponed till the second Sunday in August.

Bro. Owen of Fulton will preach at Mt. Moriah on the fourth Sunday at eleven.

Prayer meeting each Sunday evening at eight o'clock at Mt. Moriah.

Elizabeth Ward is at home for a few days and getting along nicely.

Mr. and Mrs. Raymond Craft are entertaining a new girl. Their first.

Mrs. Carlisle Ridgeway of St. Louis, who has been spending the summer with her sister, Mrs. Mace McDade, presented her husband a little son. Letcher Watkins spent last Sunday with his sister, Mrs. Ruth Finch.

Mr. T. D. Butts is not well. Mrs. Oina Watts is under the care of a physician at present. Lots of sickness about,

Political Advertisement

Democrats, Think About This!

The following is submitted for the consideration of Democratic voters in the primary of August 6:

What Mr. Crowe is For—

Completing the program of the highway commission and respecting all its obligations to the counties.

Keeping the charitable and penal institutions out of politics.

Upholding the record of a Democratic administration which has reduced the state debt.

Protection of labor in its just rights.

Fairness to all citizens of Kentucky.

Carrying on the fight for clean elections in Louisville and all the state.

Regular financial audits and a budget system.

Saving coal industry from destructive taxes.

Reduction in the tax rate on real estate.

Increasing the road funds by continuation of the 5-cent gasoline tax made fair by reduction of the motor license tax.

What is Mr. Beckham For?

He filed suit to repudiate debts of \$3,564,497.71 which the highway commission owed, a suit which, if successful, would have stepped bankrupted contractors.

When he was governor, Percy Faly, as chairman, used the board of control to build up a political machine, used in primaries.

He and his backers, Haly and Bingham, have done all in their power to harass the Democratic administration.

The Kentucky state federation of labor opposed him in 1920 and opposes him now.

He voted against woman suffrage.

The record of the old Beckham-Haly machine in primary elections would nullify the Democratic fight for clean elections.

Believes general assembly "should give thought" to modernizing state government's business methods.

Against a coal tax AT PRESENT, although Bingham, Haly and Hamilton led the fight for it.

Vague about gas and motor license taxes, though "Courier-Journal" and W. C. Montgomery attack Crowe plan.

Mr. Crowe Can
Win in November

He has never lost a race.

He can unite the Democratic party.

He can carry the city of Louisville as Fields carried it.

He has made no bitter enemies, since he has been fair to all.

He has given wholehearted support to the Democratic nominees in the past.

He will not repudiate the record of an efficient and progressive Democratic administration.

Can Mr. Beckham
Win in November?

He was defeated by Senator Ernst when Cox carried the state. He was succeeded by a Republican Governor. W. O. Bradley defeated him for the senate. No subsequent action has enhanced his political strength, though it has been considerably impaired.

His opposition to the road program, the vicious attacks of the "Courier-Journal" on sections of Kentucky and the fear of Percy Haly will alienate many Democrats.

He lost the city of Louisville by 14,000 in 1920.

He is the candidate of a faction which has bitterly assailed the Democratic record of the past four years.

How many Democrats have heard Beckham speak for a nominee in recent years? The "Courier-Journal" did not support Stanley, Fields or Barkley.

Beckham, Bingham and Haly have been the outstanding enemies of the Democratic administration, their policy being that of rule or ruin.

Beelerton News

Mrs. Callie Gardner and granddaughters, Ida Bee, and Callie Mae, spent Sunday with Mr. and Mrs. Edgar McMorris.

Mrs. Bettie McAlister is visiting her daughter, Mrs. E. S. Hicks this week.

O. K. LAUNDRY HAS
COMPLETE SERVICE

The modern laundry of today is an expression of complete service for the whole family. Laundering has become the approximation of an exact science. Laundrymen of today are specialists and have learned the secret of improved cleaning in the most sanitary way, and the way that will have the least wear on linens is taught every employee in the modern laundry.

This class of laundry cleans more thoroughly, makes garments look whiter, with less wear and tear than the washer-woman in the own home. Different clothes need different methods.

The laundryman sorts the family bundle and each article goes thru the process of cleansing that will give the owner the best result, both in wear and cleansing. The O. K. Steam Laundry is modern in every department and has kept abreast of the progress made in improved cleansing for every garment. They give every article you send to them a special care, which is part of the routine of their work.

They have the most up-to-date equipment to handle laundry for the whole family and teach every employee to be a specialist in cleansing, neatness and carefulness. The family bundle will receive expert laundering in their hands as well as promptness in delivery.

Now is the time to send your curtains, draperies and rugs to the O. K. Laundry for cleaning. Just telephone No. 130 and your troubles are over. The O. K. will do the rest.

When you buy John Deere implements you are sure of prompt repair service throughout their long life

A FARM WAGON THAT IS GUARANTEED

The amount of satisfactory service that a wagon will give depends entirely upon the material and skill the manufacturer puts into it. We want to show you a wagon that is built of the best materials by men who know how—

THE JOHN DEERE WAGON The Wagon That is Guaranteed

A special machine automatically measures the inside of the skinn of the John Deere farm wagon and shapes the axle to fit accurately. The skinn is set in red lead under high pressure. It has exactly the right pitch, and the axle has the right gather to make the John Deere wagon run lighter than other wagons. With the John Deere sand- and dust-proof skinn there is no wearing of bearing surfaces—the oil stays in—the wagon is always smooth-running and light-pulling. Only carefully-selected oak and hickory are used in the

John Deere Wagon, and every piece of wood is air-seasoned under cover in our own yards for at least two years. The tires are set hot under hydraulic pressure and under a gauge that assures proper dish—the load is always carried on plumb spokes. And don't forget this other big feature—the heavy malleable fifth-wheel with corrugated coupling—no bending or breaking of kingbolt—bolster does not get out of line and rock—no danger of tipping when handling large, top-heavy loads.

Come in and see this wagon—read the guarantee on the tool box. Let us explain the many fine points embodied in it.

DAIRY FACTS

SELF-FED COWS SHOW NO GAINS

Self-feeding dairy cows so that they got all the grain, hay and silage they wished increased the amount and cost of feed eaten by the cows without swelling their milk production in an experiment by Dr. W. H. Nevens, assistant chief in dairy cattle feeding at the college of agriculture, University of Illinois. Results of the tests have just been published in a new bulletin, "Experiments in Self-Feeding of Dairy Cows," which the college now has ready for free distribution to interested persons.

Cows used in the experiment were only of moderate dairy ability and it is possible that self-feeding might prove useful with high-producing cows, although this point remains to be proved, Doctor Nevens said. Limiting cows to feeds containing high percentages of protein seemed to depress milk production.

Since fattening cattle and swine usually gain faster when fed by the self-feeder method than when hand-fed, it was thought that dairy cows might produce more milk if given free access constantly to several different kinds of feeds. Eight different feeds were kept in individual box stalls containing a feeder having several different hopper compartments. Supplies of grains and mill by-products were provided constantly in the compartments, and hay and silage in other larger feed boxes, so that a cow might select as much of one or several feeds at any time she chose. The cows were gradually accustomed to the method at the beginning during a two to three-week period.

Surprising as it may seem to those who have found that cows become ill through overeating, no harmful results were apparent in these cows even though self-fed the year round. More feed than necessary was consumed, however, making the cost of feed greater than when the cows were hand-fed. The cows laid on additional weight, thus increasing the amount of feed necessary to maintain them.

The method proved useful in studying the relative palatability of different feeds. Much more of some feeds was eaten than of others, and in some cases the ration consisted of only one or two feeds, even though four or more other feeds were present in the stall. A greater quantity was eaten when the feeds were offered separately than when they were mixed. Cows showed very decided

preference for certain feeds, and these preferences often extended over long periods. Greater feed consumption was secured when careful attention was given to catering to the cow's likes. Not two cows had the same preference for all feeds.

Amount of Water Needed for Average Milk Yield

The amount of water required to produce milk will depend to a large degree upon the cow, the kind of feed given her, and the amount of milk she is producing, size, weather conditions—whether it is hot or cold, rainy or dry—and many other things which may arise to increase or decrease the consumption of water, so it would not be wise to say what we would allow the cow, whether only 30 pounds of water per day, or 50 pounds, etc.; but it would be highly advisable to give the cows free range to pure, fresh water, and they will take care of the amount needed.

Professor Eckels of Minnesota found by experiments that a cow producing 27 pounds of milk per day drank 77 pounds of water. The same animal, when dry, drank only 15 pounds per day. Another cow, producing over 100 pounds of milk per day, used during the test period an average of 250 pounds of water. The story of these figures shows that the water requirement is about 2.5 pounds of water per pound of milk. No doubt this is a fair average.

Natural Methods Upset in Teaching Young Calf

In modern dairy farming, because of the value of whole milk and butter fat, the dairyman upsets the natural method which the calf would follow in feeding and separates the calf from the cow soon after birth. For the first few days the calf is left with the cow, because of the properties of the milk, which puts the calf's digestive apparatus in good working order. Most dairymen leave the calf with its mother for 48 hours, unless the calf is weak, when it is best to allow it to remain longer. The longer the calf remains with the cow, however, the harder it is to teach it to drink.

Conical Type Cooler

The so-called conical type of milk cooler is used to a considerable extent on farms. This type of cooler is made and sold for a comparatively low price and when properly used is efficient. The conical part of the cooler is hollow; this allows a space for ice and water. The receiver, which sets on top of the conical part of the cooler, contains a number of small holes which allow the milk to flow over the conical surface, being cooled by the ice water within.

Jim Lathbury's Ghost

By CLARISSA MACKIE

(Copyright)

"BUT I do not love you, Henry," protested Elsie Freeman, drawing back from Henry Flagg's nearness. "I thought that you understood that after Jim's death I could never care for any man in that way."

Henry Flagg frowned darkly. "Elsie," he said patiently, "you and Jim were only engaged to be married."

"I am afraid, Henry, that I could not be happy unless I truly loved you," said the girl calmly.

"Why can't you love me?" he demanded furiously—"Jim Lathbury was my own cousin, and people said we were enough alike to be twins—so why can't you care for me—as well as you did for him?"

Elsie stared at him with wide-open blue eyes. Then, the lids suddenly drooping, she slipped from her chair to the floor, unconscious.

Henry rang for a maid. "You better get her to bed, Minna," said Henry.

Minna brought some tea, and Elsie picked up a magazine, but always between her eyes and the printed page appeared the brave, handsome face of her lover, Jim Lathbury, who had been an aviator during the World war. Jim had been reported killed, but his body was never recovered.

Five years had passed since that time, and still Elsie, who had been his promised wife, mourned him, and the property went to Henry Flagg, Mr. Lathbury's nearest relative, a cousin.

That evening Henry came to inquire about Elsie.

"Henry," she said, "did you really mean what you said about seeing Jim's ghost at the house?"

"Yes," he said. "I believe you," she said frankly. "And I want to see it, too, Henry—say tomorrow night."

"Very well—of course you know it will not be until midnight."

She nodded. "I will bring Minna with me—mother is going to New York for a couple of days with father."

The next night at eleven o'clock Elsie drove over to Lathbury house while Minna shivered inside the little car. It was a bright starry night, and the dewy fragrance of many flowers came from the big gardens that would have been Elsie's if she and Jim had been married. Elsie thought she saw a man's figure down in the rose garden, and she decided that she would speak to Henry about it, but when they reached the front door, there Henry was waiting. He hurried them up to the picture gallery. Elsie tossed her coat and hat on a seat and sank down in the deep chair. She confided to Minna the reason why she had come, and Minna sat down in a remote corner to wait.

About five minutes to twelve a servant summoned Henry to the telephone, and with a promise to Elsie to return at once, Henry disappeared.

Elsie was thankful to be alone for if her lost lover was to be there, even in spirit, she wanted to be alone.

Then, suddenly, Jim Lathbury was there!

Elsie sat stunned, noting his khaki uniform, muddy and wet, saw Jim's despairing face, white under the aviator's close hood. Then, the lights dimming to a mere grayness, he vanished, and then the lights were on again, and Henry stood beside her holding her hand in his cold one.

"You saw him, dear?" he whispered hoarsely.

"Yes," wailed the girl, "and before I could speak to him, Jim had gone away—Oh, Jim, Jim, Jim!" and the girl tore herself away and Minna's strong arms were around her and held her up.

Then there was a confusion, for a man suddenly dashed into the gallery and knocked Henry to the floor where he remained too inert to arise. Elsie, giving one glance at the stranger, found it was no stranger at all—it was Jim Lathbury, her own true love in the flesh.

"It is Mr. Jim! The real Mr. Jim!" exclaimed Minna.

But Elsie knew by the warm kisses that covered her face, that at last her belief in Jim being alive was vindicated. He whispered a story of being wounded, captured, and of his not knowing even his own name or identity. He had remained in Germany working as a farmhand all these years, until a great doctor saw him, recognized him and effected a cure.

He had returned to find his parents dead and his estate in the hands of his cousin. Tonight he had just arrived when Elsie saw him in the rose garden, and he had come into the house—it was Elsie's scream of "Jim—Jim—Jim!" that had brought him into action.

So the ghost of Henry's imagination materialized and claimed his promised bride.
