Big Celebration November 19th

The big celebration which has been under way for several weeks now has been deferred until November 19th, when the event will take place in Fulton. The festival has been planned by the Fulton Young Men's Christian Association, and will include a variety of activities, including a parade, a beauty pageant, and a fireworks display.

In the evening, a grand banquet will be held at the Fulton Hotel, with its proceeds going to support the YWCA. The banquet will feature speeches from local leaders and entertainment from visiting performers.

The celebration is not to be missed, and all are welcome to attend and enjoy the festivities. So mark your calendars for November 19th and come out to celebrate with us!

Grandpa Gives Thanks

When all is said and done, the idea that there is a need for God in the world is still a mystery.

The world works only if and when it is directed by the power of God's grace and power.

Most people have never been more thankful for the blessings of modern times than on this Thanksgiving Day.

New England Thanksgiving

On this Thanksgiving Day, let us remember the blessings of the land.

The New England Harvest Festival is a celebration of the bounty of the land.

The State of New England is rich in history and culture.

The people of New England are proud of their heritage.

Others have contributed to the progress and prosperity of America's workers, but nothing has been the fact that the American wage earner has had more horse power than any other producer of any other industrial nation.

Electricity!
The Tireless Servant of America's Prosperity

Says Lewis E. Pierson
President of the United States Chamber of Commerce

"Many factors have contributed to the pre-eminent position of America's workers, but nothing has been the fact that the American wage earner has had more horse power than any other producer of any other industrial nation."

While the rest of the world is passing through the growth and industrial strife, capital and labor are working together on a basis that has resulted in greater standards of living than those enjoyed by any other people.

The most highly developed systems of electric power equipment and facilities in the world has helped to make this condition of affairs possible.

Because of the engineering skill and organizing ability which have gone into the expansion of America's power plants, there is available to American industry more electrical energy than is produced in all the rest of the world combined.

Nearly a million miles of transmission and distribution lines supply American industry with more than thirty million horse power. Expressed in terms of man power, this is equivalent to a million potential service of 40 helpers for every worker in this country.

Increasing, as it does, the production capacity of the worker by forty fold, this great industrial force has improved the financial status of American labor approximately fifty percent in the last fifteen years, while at the same time, materially decreasing the cost of manufactured articles.

In the light of such achievement, it is evident that the interests of American business and American family life will be served best by the careful preservation of the principle of individual initiative by which such accomplishments have been made possible.

202 Lake Street, Fulton, Ky.

Efficient and Economical Home Heating

The Enterprise Automatic circulating warm air heater will heat the entire home with a constant circulation of warm, clean, clear, wholesome air that eliminates the need for cold room corners. The warm air is forced over the entire house, and no chilly spots remain. The warm air is pure, free from dust and germs, and is supplied to each room at the right temperature.

Our Automatic Home Heaters are automatic in fuel consumption. The wide deep air ways in the cabinet permit free passage of air, which is quickly heated in passing over the heating unit, and out the top to circulate through the entire house. Let Us Show You This Boiler Today.
