Washington, D.C. — The Department of Commerce has announced that the July end-of-month price indexes have been released.

The indexes show that the cost of living, measured by the department's Consumer Price Index, increased 0.3% in July compared to June. This marks the fourth consecutive month of inflation.

The index for urban wage earners and clerical workers (WAC) rose 0.2%, while the index for all urban consumers (CPI-W) increased 0.3%. The index for all items except food and energy (CPI-X) also rose 0.3%.

The increase in July follows a 0.4% increase in June.

The indexes are used to measure changes in the cost of living and are released monthly by the department.

Frank Fiftech Leaves Today

Frank Fiftech, managing editor of the New York Times, resigned today after a five-year term as publisher of the newspaper.

Fiftech, 65, announced his resignation last week, citing family reasons and the need to spend more time with his wife and children.

He was appointed by publisher Arthur Sulzberger Jr. in 1979 and has served as managing editor since 1984.

The newspaper said in a statement that Fiftech will remain an important part of the Times' family and will continue to contribute to the organization in various ways.

Fiftech is a native of New York City and a graduate of Harvard University.

He joined the Times in 1959 as a reporter and has held various editorial positions, including editor of the Sunday magazine and editorial page editor.

Fiftech is the son of the late Charles Fiftech, who was a prominent journalist and editor in his own right.

The Times said in a statement that Fiftech's contributions to the newspaper have been invaluable and that he will be missed by everyone at the paper.

Fiftech is also the author of several books, including "The New York Times: A History of a Newspaper."
The good doctor is making every effort to secure the confidence of as many of these "babes" as possible. Naturally he will not be able to get them all. But for many of them have moved away to other places, and since some have died before they could be tested, several hundred will be present at the barbecue.

An interesting program is in process of preparation, and will be announced later. One feature which will be noticed is that several babies will be brought in by Dr. Rudd who have just been born since 1895, and in these years have been the doctor at almost 2500 births.

FORTY-FIVE YEARS IS A LONG, LONG TIME TO STAND IT AGAINST HIS FLUORIDE.
