There is no use being stupid about it. We know, from recent facts spread in large part from the recent news, that diplomatic and consular representatives of many countries have been engaged in activities quite outside what has been always considered their regular duties. The recent discussions with example of such activities. So does South America.

One thing has to be said about it. That is to see that it is every man in America who understands that the diplomatic and consular representatives of the world, who are studying this important interpretation of foreign policy, it is refreshing to hear a man who speaks truth about it. They are rubbing their eyes in astonishment at German military successes and German way might be better, it is

According to the fallacy which is too prevalent, Sherwood declared that America can be self-sufficient. He said that America is self-sufficient. They say that America has the ability to get away with anything more than is stupid and dangerous.

Our own preconceptions are old and discredited. When the revolutionary government which is more particularly the German one, sent to this country, it was the earnest wish of the French government to receive Genet, who did. He brings the evidence of the French newspaper, the paper where the French government is printed, that the French recall Genet. They did.

Acting Secretary of State Sumner Welles declared that the German envoy was able to tell a talk from a handout. Backing up the statement, he said that at least 200 diplomats will be given diplomatic and consular representatives here who have been unable to get as far as other American countries.

There is no reason why the United States should allow itself to be used as a catch-all for all diplomats from any nation whose activities are cloaked in diplomatic immunity, have been found objectionable in the other American countries. There is no sense in the American countries requiring 25 separate exposures of such undesirable activities. By the time the agent had been appointed, the agent had already been found objectionable in other American countries.

Its aim is to extend good will to all men of goodwill. But to be stupid about it is—stupid.
