Most Beautiful Flowers are Grown From Plants Which are Well Fed

Remember that your garden can be the pride of the neighborhood. To get the most out of your garden, feed the plants. In a lighter soil, use 2 or 3 pounds of fertilizer per square yard. In sandy soil, use 1 or 2 pounds. This recommendation is based on the soil analysis of the University of Kentucky.

**Ask Us About This New 2-Row Shifting-Gang Cultivator for Farmall 20 and Farmall 30 Tractors**

This new McCormick-Peating No. 22-G Cultivator was developed to meet the demand for a lighter-fuelled cultivator for the Farmall 20 and Farmall 30. It features shifting-gang construction with the front arm mounted ahead of the side. The arms are connected to the steering mechanism in such a way that they swing easily, when plowing under, to avoid tearing the soil. It is built with all steel, in place of the mower's steel working edge. The Cultivator is simple in construction and can be adjusted or secured in a few minutes.
