A Job That Never Ends

Spectacular increases in the speed of trains, freight as well as passengers, are evidences of railroad progress that everyone may see. Less apparent have been the years of constant improvement that made this high speed possible with ever-increasing safety.

Improvements not only in the trains themselves, but in the rails, roadbed, bridges, signals—in everything that goes to make a railroad.

Great are the achievements of the past, but the progress of the railroad goes on—demanding further improvements that will provide still faster and safer transportation.
