"The Bride Wakes Up" is an entirely new and different kind of Cooking School. It has romance, humor, glamour—it will hold your interest every minute you are in the audience.

For the first time at a Cooking School you will be able to see every single one of the important steps in the preparation of a recipe. Mixing, blending, stirring, boiling—all the many and varied points essential to successful cookery are shown in close-up on the screen.

And lots of new and interesting recipes are demonstrated in the model kitchens especially built for this picture.

The picture will be entertaining as well as instructive. The various characters in the picture are portrayed by talented actors and actresses—the picture was made in Hollywood.

You will see realistic situations—similar to the ones you encounter every day—actually re-enacted on the screen. You will understand the problems of a bride and see how she adjusts herself to her new life as a wife and homemaker.

There will be daily quizzes for some fortunate women, and of course free recipes for everyone.

**Defective Flies**

It would probably be safe to say that one-fifth of this species now which is growing in the West is not the same one that caused the trouble in the East. It is one that has been imported.

**Books and Playtime**

ANCIENT Florence did not get her share of the benefits of the old adage that "Money is the Root of All Evil." She could not be as cruel as those of her class who could not, under the circumstances, afford to do what they were to do.

**The Love of Money**

The longer a man lives the more firmly he becomes convinced of the truthfulness of the old adage, "Money is the Root of All Evil." The more he has of that thing, the longer he has to live with it. He is often caught by the old adage again.

**RIGHT OF WAY**

I had the right of way," is a common expression, and no one is more anxious than the mowing man to be the first one to see the other whether it is the right of way or not. Mowing the grass is a business, and some one must do it.

**An After Effect**

The after effect of the late depression is fouled up with other ideas and thoughts that come to mind when you are trying to decide the word that would be the most effective. Neglect to do this, and you will be left with a sentence that is not effective.

**In the Classroom**

The teacher is much in the same position as the driver of a car. She has to be in control of her own work, and if she is not, she will not be able to do her job in a satisfactory way.

**WINTER DRIVING!**

With the approach of cooler weather and winter just about here, it is time to turn your thoughts to getting your car in perfect running condition. This means to have your brakes checked and tested, to have your engine, for this is a highly important feature of it and to have your oil and other fluid levels checked. This is the time to do all these things and you will be running your car in comfort, to be prepared for the worst.
**ECONOMICS HIGHLIGHTS**

Even in agriculture it is dependent on weather to which the income of the farm is subject. In the recent world depression, income of the farm was reduced to a point where the farmer had to cut in order to make a living. This was due to the fact that the prices of farm products were reduced, and the cost of living was increased. The farmer had to cut back on the amount of land he cultivated in order to make a living.

The farm income in the immediate future is expected to increase, which is a good sign. This is due to the fact that the prices of farm products are expected to increase, and the cost of living is expected to decrease. This will allow the farmer to increase the amount of land he cultivates in order to make a living.
