FARMERS COOPERATIVE
AND OTHER COTTON COMMUNITIES

From the cotton growers of the United States in the order to come as a result of the continued high demand for cotton. At the same time, the price of cotton has been on the rise, and there is every reason to believe that it will continue to rise. The reason for this is that the demand for cotton is greater than the supply. The makers of creole cotton can't always get what they want, and they are forced to pay a higher price for their cotton. It is the policy of the cotton growers to plant the best grades of cotton to meet the demand. This is necessary to the survival of the cotton industry.
