FULTON, KY., FRIDAY, JANUARY 7, 1938

NUMBER FORTY-NINE

COUNCIL IN FIRST MEETING OF YEAR

The first meeting of the new year was held by Mayor Paul DeMyer and the board of council at the city hall Monday night, with all members present. After routine business matters and bills had been discussed, plans for the new year were made.

Wholesale liquor licenses were raised from \$350 to \$500 a year. An ordinance was passed limiting the number of retail liquor stores operating inside the city limits of Fulton.

All city employees were reapportioned, and action was taken to reduce all salaries \$10 a month for an estimated savings of \$1200 a year. K. P. Dalton remains chief of police, with W. H. Reed and G. J. McDade patrolmen. Lee Roberts continues as chief of the fire department with firemen as follows: Chip Roberts, John Exum, Louis Roberts, Cotton Henderson, Albert Wright, Wallace Shankle, Harold Roberts, E. W. Bethell, Walter Byars, Jim D. Stephenson, Coffman Omar.

An ordinance providing for additional water works bonds to the amount of \$15,000 was approved, making a total issue of \$65,000 payable \$3,000 yearly from 1939 to 1953 and \$4,000 yearly from 1954 through 1958 inclusively.

Mrs. Fanny Roney, district supervisor of the Woman's Sewing Project, was present and asked that the city help furnish material in order to continue the program.

The water inspector's job was discontinued. Bonds were renewed by operators of slaughterhouses: Paul DeMyer, Weldon King, W. J. McKimney, E. H. Davis was reapportioned seat at the city cemetery.

State Farm Meeting At Louisville Jan. 12-14

Plans are being completed for the 1938 state convention of the Kentucky Farm Bureau Federation to be held at the Brown Hotel in Louisville, on January 12, 13 and 14, when President Ben E. Niles will preside. Some 500 delegates are expected to attend.

A well-rounded program has been arranged, with Governor A. B. Chandler, J. B. Hutson, Mrs. Charles W. Sewell, Miss Myrtle Weldon, George Metzger and George Mecherle, Keen Johnson, Ed O'Neil and Henry Ward slated to participate.

Fulton and Hickman counties will be represented at the convention, when plans for the new year will be discussed.

Burton Rascoe Is Sued By Labourer Burton

Attorney Jackson of Clinton has been working in Hickman and Fulton this week, gathering data for defense in a \$200,000 suit filed by Labourer Burton of this section against Burton Rascoe, well known writer. It is reported in the suit that Rascoe has defamed the name Burton in his book, "Before I Forget" and damages are sought from the writer and publishers of the book.

The book is an autobiography of the author, who lives in St. Louis, but was born and reared in this community.

Fire Loss Light Here During the Past Year

Fire losses in Fulton were light here during the past year, according to Lee Roberts, chief of the fire department, with an estimated loss totaling \$6464.45. During 1937 the department, including one to Pilot Oak, Bondurant Mill and Collins tourist camp west of the city, a total of 75 runs were made by Major fires of the year were the Sam Steele home on College-st and Paul Workman house on Maple-av.

BUSINESS TO TAKE UPSWING IN 1938

The year 1938 will bring a definite upward trend in business, according to Roger W. Dalton, this nation's premier business prophet. He sees a substantial revival in economic conditions during this year, with payrolls, prices, stocks, the real estate and jobs all to reach new heights by the end of the year.

Every business takes inventory at the end of the year to find out just what they have in stock and to make plans for the coming year. It would be just as wise for each individual and each family to take inventory right now and make plans for the new year. It would help to keep us on the right track.

It is also well to look around us and take stock of our community. See if we have done our part in the community the past year. See what improvements we would like the community to make this year. Plan what we can do to help the community make them. There is no reason to view 1938 with alarm. In a material way there is every reason to believe that before it is over it will have proved to be even better this year than 1937 for the nation as a whole and for the community.

So each of us should enter the New Year with confidence and the determination to help ourselves and our community to the best of our ability during 1938. By working together we can accomplish many things during this year and we can make our community a better and more pleasant place in which to live.

The News appreciates the support you have given it during the past year. We pledge you our best effort to make the paper even better. It is your newspaper and we are here to advance your interests. And in that spirit of friendship we extend one and all our best wishes for the New Year.

Picked-Up About Town

When asked why it was a girl always closed her eyes when she was kissed, Betty Norris contends it "because she doesn't have to look up into the face of the 'ugly mug' and be disappointed."

"A woman," declares Odie Rue Love "seldom wants to do better than her neighbor. All she wants is to be better looking and to have better clothes."

As Joe Kasnow sees it, the trouble with a lot of men is they work too hard trying to get something they don't need and shouldn't have wanted in the first place.

It generally takes the average man a lifetime to learn that he is his own best friend and his own worst enemy.

According to Weeley Cummins chewing gum was invented by a woman who had no one to talk to.

"Be on your guard," advises Thomas Wilson "for a talkative friend can often do you more harm than a silent enemy."

The honeymoon is about over when the groom begins to envy his acquaintances who are deaf.

Dick Hastings says the only reason why some men work is they're too dignified to beg and too nervous to steal.

"Prayers and people are a good deal alike," declares Jimmy D. Stephenson "if the latter don't work neither will the former."

Robert Davis thinks one way of furnishing relief for the corn growers of this country would be for everybody to smoke corn-cob pipes.

DEATHS

Mrs. Betsy Curlin Dies

Mrs. Betsy Ann Curlin, age 82, died Wednesday night at nine o'clock at the home of her granddaughter, Mrs. W. C. Reed on Park-av., after a short illness following a heart attack a week ago. Funeral services will be conducted Friday afternoon from the Reed home with interment at the Union City cemetery.

She is survived by five grandchildren, Mrs. W. C. Reed of Fulton, Seth Curlin of Santa Fe, New Mexico, Charles and Dollie Curlin of Hickman, Mrs. J. E. Slaughter of Memphis. Two children, Dr. C. W. Curlin and an infant, and her husband, preceded her in death.

Mrs. Curlin was born on October 27, 1855 at Hallville, Texas, near Marshall. She was married to Seth Curlin on April 18, 1877. She led an active life, having spent two years on boat on the Mississippi river. The boat was owned by her husband, and she assisted with the piloting at times. She delighted in outdoor sports and was a very good shot. She designed the first raglan sleeve oil coat.

She was of a loving and cheerful disposition and was loved by all who knew her. Friends of the family extend sympathy in their bereavement.

She is also survived by four grandchildren, Billie and Betty Ann Reed; Seth Curlin Jr., and J. E. Slaughter Jr.

MRS. DEWEY DAVIS

Mrs. Dewey Davis died at her home on College-st. in South Fulton last Friday afternoon, following an illness of pneumonia. Funeral services were conducted Sunday afternoon from Salem Church near Martin by the Rev. S. B. Dameron. PROFITABLE READING

No matter what newspaper you may pick up—read the ads along with the news and usual features. You'll not only find the ads carry much information of interest, but they also point the way to real economy. Men of wisdom no longer argue that advertising no longer pays. If it didn't pay, for instance, Henry Ford would not be spending over six million dollars a year to advertise a car that is so well known already it is a household word. Campbell wouldn't be spending around two million dollars a year to sell soups, and so on down the line with 50 or 100 other concerns spending as much as \$1,000,000 each to advertise their products for a single year. And the best part of it is it pays those who buy the same as it pays those who sell. So always read the ads—and always remember that you can profit

DON'T NEGLECT A COLD

PUR soothing, warming Musterole well into your chest and throat. Musterole is NOT just a salve. It's a "counter-irritant" containing good old-fashioned cold remedies—oil of mustard, menthol, camphor and other valuable ingredients. That's why it gets such fine results—better than the old-fashioned mustard plaster. It penetrates, stimulates, warms and soothes, drawing out local congestion and pain. Used by millions for 25 years. Recommended by many doctors and nurses. All drug-gists. In three strengths: Regular Strength, Children's (mild), and Extra Strong. Tested and approved by Good Housekeeping Bureau, No. 4367.

GOOD RESOLUTIONS

Following a custom which dates back far beyond the memory of oldest citizens around Fulton the making of "New Year resolutions" are now in order, and the usual large number are indulging in this innocent pastime. We say "innocent" pastime, because as a general rule such resolutions are not of a nature to do much harm even if they're broken. But as lightly as such resolutions are usually kept there is always one than can be carried out to the letter, and that will benefit not only the one making the resolve but the entire community as well. That is a resolve to take some part during the year in adding to the welfare and attractiveness of your home-town and by deed and action helping to make it a still happier place in which to live.

No better resolution can be made by anyone as the new year gets under way than one to take a more active interest in the various movements, plans and discussions that will come up during the year. A resolve to join in and help out in all worthy public movements, instead of assuming a disinterested position and letting the other fellow do the work and the boasting is as fine a resolution as it is possible to make. A resolution to enlist in the ranks of the boosters and to in every way ignore and discourage the chronic knockers is a contribution to the community you need not be ashamed to make.

If you make but one resolution, let that be it. Your home-town needs your cooperation, your suggestions for community betterment and every good example you can possibly set during 1938. Making that kind of resolution, and then living up to it, is bound to bring you a lot of satisfaction and it will likewise help to make your neighbors still more glad you are a part of the community.

OWNING A HOME

The desire to have and to own the necessities of life is as old as the human race. It is a natural instinct that is common to animal life, high and low. It expresses a truth that is undisputed, and yet a recent survey shows that but one out of every five actually own a home. The largest majority, by far, are renters. Their chief argument for remaining in that class is that they can rent a home as cheaply as they can build one. In that they may be correct, but there is something about owning a home that far

The Coffin They Carry You Off in

By IRVIN S. COBB

IT SEEMS that a very distinguished motion picture producer—a man who is looked upon as a leader of the industry—went to call on one of his actors, who was critically ill. In fact, it was because he was told

AND SO—

that his former employee was dying that the producer visited the out-of-the-way tenement on the East Side where the actor was gasping out his life.

The great producer spent several minutes at the bedside of the dying man trying to cheer him up with the promise of a leading part in his next picture.

"Why, you'll be yourself in no time," he went on. "I'll have you out in California and I'll make a real star out of you yet."

The actor smiled a weak smile of protest. He did not have the strength to utter a syllable against the extravagant promise of his former employer.

The caller took his departure. Starting down the narrow stairs he bumped his head against the ceiling.

"Ouch!" he exclaimed. Then in perfectly audible voice he added: "I wonder how in thunder they expect to get a coffin down these steps."

more offsets any advantage in being a renter.

Those Fulton citizens who own their homes enjoy a feeling of independence the renter cannot know. Home ownership makes for good citizenship and patriotism. A man's home is his castle, and the ability to say "This roof above my head is mine" makes him a better citizen.

With the approach of spring there is going to be launched a nationwide home-building campaign, and this community is certain to hear a lot about the subject before 1938 has progressed very far. Since it is considered today the most important campaign that could possibly be launched looking toward a complete restoration of prosperity, and as it comes when the nation has a shortage of millions of houses and must take some definite action at once, it is a subject that everyone ought to become interested in. Home-building will be the biggest movement in America this year, and this year should be the logical time for every man who has been postponing the building of a home to set about it without further delay.

FOUND AT LAST

The state of Texas can now proudly boast as being the home of "the world's safest driver." His name is Allen B. Hill. By vocation he is a truck driver, is 55 years old, and was Exhibit A at the recent National Trucking Convention. Hill's record is approximately 1,400,000 miles in 30 years without an accident or an arrest. And that is a record worth hanging up anywhere, and one that should serve as a good example to every driver around Fulton as he enters a new year full of good resolutions. Hill, now a resident of Corpus Christi has driven in many states, and drove a truck in France during the World War. And here is his rule for safe driving:

Give all the road you can and take all they'll give you. "I've had to take to the ditch many times to avoid getting hit, but I've found it the best way out. Stay off of the other fellow's side of the road."

A DOG FIGHT

When a Chicago editor recently stated as his opinion that dogs do not think or plan ahead, he opened up a way to get an argument out of any man around Fulton who owns a dog. These dog owners want to know how about the shepherd dog than can round up a herd of sheep or cattle and drive them into pen or shed? Then, too,

ARE YOU ONLY A 3/4 WIFE?

MEN because they are men can never understand a three-quarter wife—a wife who is all love and kindness for three weeks of the month—but a hell-cat the fourth.

And make up your mind men never will understand. There are certain things a woman has to put up with and be a good sport.

No matter how loudly your nerves scream—don't take it out on your husband.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood into womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife. Take Lydia E. Pinkham's Vegetable Compound and go "smiling through." Over a million women have written in reporting benefit. Why not give this world-famous medicine a chance to help YOU?

Here in Fulton a pacifist is a man who does not care to do any fighting himself, but will gladly contribute his wife's relative on the altar of his country.

Also remember that there's nothing you can pour into your car to

keep the finance company from freezing up.

The hardest thing a politician has to do is think up a law that will help the farmer without bringing too much pain to the city slicker's neck.

Feeling Big

Children of today probably feel as big when they are allowed to do things slightly above the level of their ages as we used to; the only difference between them and us is that the styles have changed, and, consequently, the things that made us feel very much grown up now appear insignificant to our children. When there was a working—barn-raising, wheat-threshing, log-rolling—, we small boys were allowed the great privilege of acting as water boys. Only the man who carried the corner in the barn-raising or cut the bindings in wheat-threshing felt bigger than the water boy. Elsewhere I have suggested that a monument of considerable magnitude should be erected to the memory of the water boy of all time, from the building of the Pyramids down. When father salted the meat after supper on hog-killing days, the small boy was allowed to carry the lantern and hand salt from the barrel. Then when we went across the fields to sit till bedtime, again the boy was given this enviable task of carrying the lantern. The drum major of a college may step higher than we did, but he feels his importance no more. We felt large when we were allowed to collect the eggs, especially if mother promised us some candy when the eggs were traded in at the country store. Every boy liked to make up orders, and girls were even more skillful than boys in this time honored way of selling people something they did not especially want. Father usually had to finish out the order by purchasing the packages that we could not sell. But we got our reward, in the shape of a ring that left a green band around our fingers or a water pistol or some other contraption that worried the family until a few days of use destroyed the much-sought-after prize.

Nothing appeals to the heart of a boy like the pride of ownership. Give him a personal interest in the farm and he will think more of it.

In making crop plans for 1938 do not forget strip cropping. In this way long slopes are divided into short ones and erosion losses curtailed.

A total of 677 head of cattle entered in the fourteenth annual Fat Cattle Show and Sale held at Nashville, December 8-10, sold for a total of \$42,927.77 or an average of \$63.48 per hundred weight.

Work on the farm sometimes brought us our first chance to earn something. I made my first fifteen cents by dropping tobacco plants and felt rich and important. After I got a little larger and dropped plants as a matter of course, without any prospect of immediate reward, somehow the poetry of the task faded. A similar experience came when I took the down row in gathering corn. I have always wondered whether my older brothers really could not hit the wagon with their corn or deliberately threw the ears so I would have to pick them up. Before long the down row became monotonous and even hateful. It came to be the symbol of a small boy. A friend of mine once said that an acquaintance of ours should not have gone to college but should have been kept on the down row at corn-gathering. Since corn can be gathered at only one season, I suppose that the same young man could drop tobacco plants in spring, build smudge fires in summer to keep the gnats off the cows and calves at milking time, and pick up chips for the winter kindling. Distasteful as all these tasks ultimately became, they were very alluring when we first did them.

The element of daring that sometimes entered into feeling big left many a scar, for the small boy was not always able to carry off his plan. Climbing trees against parental advice was fine and daring sport as long as one got back down without any disasters; when a torn shirt or pants or skinned knees revealed the offender, somehow the big feeling got rather small. Similarly, chewing one's first tobacco gave a large feeling that shrank pretty fast after the chew took effect. Maybe life among grown-ups is a sort of daring to do what has never been done the same way before, a grown-up version of feeling big.

In looking back over last year's work one is sure to find many mistakes that are now outstanding. There will always be mistakes in every year but the important thing is to not make the same ones year after year.

Planning time comes before planting and gathering time. A profitable harvest depends much on the land, selection of seed and cultivation before and after planting time. At a recent meeting of Bradley county dairymen it was agreed to

request a test of all cattle in the county for Bang's disease. This would require the removal of every animal that gives a positive reaction to the disease and a blood test and quarantine for all Bovine animals entering the county after the test, unless these animals are for immediate slaughter.

RURAL ELECTRIFICATION
GAINS IN KENTUCKY

Kentucky is building 2,859 miles of rural electric lines, as the Bluegrass State is setting poles, hanging transformers, stringing wire, wiring houses and attending to many details of its new rural electrification program.

At the beginning of 1937 there were 9,763 farms in the state receiving electric service. When present plans are completed 12,000 additional farms in 43 counties will have substituted electricity for other forms of energy for light, heat and power. The total estimated cost is about \$2,900,700 or an average per customer of approximately \$241.

Since the Rural Electrification Administration was established by Congress it has allotted \$2,422,000 to 12 cooperative projects with 9,892 customers on 2,396 miles of line in 31 Kentucky counties. It has also allotted \$71,700 to the Kentucky Electrification Company which is serving 231 customers on 56 miles of line in Wleming, Lee and Owsley counties.

Utility companies, such as the Louisville Gas and Electric Company and the Kentucky Utilities Company, are contributing to the program of construction of about 300 miles of line to serve not less than 1,228 customers in seven counties.

KENTUCKY STEALS
NATIONAL SHOW

Winning two out of ten national contests, Kentucky stood out at the recent national convention of the American Farm Bureau Federation. Miss Lucy Featherstone, Hickman county, won first in the contest for voluntary membership solicitors. She signed up 475 members during the year which is a national all-time record.

In addition Kentucky ran New York State a close second for the largest numerical increase in members for state federations. In per-

centage increase Kentucky stood second in the nation to New Mexico, with a percentage gain of 126.6 per cent compared to 199 per cent. Kentucky is rapidly assuming a position of leadership among the states in the American Farm Bureau Federation.

The Fulton County Farm Bureau started with 108 members in 1934. The membership had grown to 217 in 1935, 255 in 1936, and 462 in 1937. In addition this county has the only separate Farm Bureau composed of 46 negroes.

TERHUNE WARNS DOGS
AGAINST CHILD PLAYMATES

"The average puppy is an ideal playmate for any child, but the average child is a horrible playmate for any puppy," says Albert Payson Terhune in the January issue of Woman's Day, the new magazine available in all A&P Stores January 6.

Terhune literally came out of retirement to write his article "Should a Child Own a Pup?" About a year ago he announced that he was through forever with the writing of books or articles, except for an occasional radio broadcast or his syndicated stories. He decided to write this article because in his own words, "it deals with a theme on which I am slightly rabid."

TEACHING THRIFT

On more than one occasion space has been devoted in these columns

to suggesting that teachers around Fulton make use of every opportunity they have to teach thrift in the schools. The wisdom of it becomes more apparent than ever now a survey covering school savings funds throughout the country has just been finished. It reveals that during the school year of 1936-37 pupils in this country's schools practiced the savings habit to the extent of more than \$16,000,000—a staggering total. And most of it, practically all of it, saved in pennies and nickels. It is something that should set older heads to thinking, too. If saving pennies will pile up such a sum, what will saving a few dollars each week mean? Thrift is in the air in this country now and the school child isn't being taught it is going to lag behind the procession when he gets out into the world.

MORE BIKES

Reports by the bicycle makres of the country show that they turned out 1,250,000 of them during 1937—an even greater number than in the boom year of 1929. The auto was supposed to have driven first the horse and then the bicycle into oblivion, but this doesn't look like it. And both bicycles and horses are as numerous as ever before. The auto is not affecting the bike to any extent, but the bike is setting up a new problem for the auto. It is making it still more dangerous to drive and while most motorists recognize the added danger the cyclists, most of whom are of the teen age, fails to realize it. As a result riding a bicycle has become a pretty dangerous proposition both on the streets of Fulton and on the neighboring highways. Motorist will do their utmost, of course, to avoid collision with a cyclist. But the motorist must not be expected to assume all the responsibility. It is up to the parents of boys and girls who ride bicycles to make that fact plain to them, otherwise the increasing popularity of the bike will

be a source of tragedy instead of a healthful and enjoyable form of outdoor recreation.

NEW BULLETIN TELLS
HOW TO MAKE MATTRESSES

"Homemade Mattresses, Bed Spreads and Comforts," is the name of a new publication No. 204, recently issued by the Agricultural Extension Service. The publication is designed to help homemakers in utilizing cotton, wool or feathers in making comfortable mattresses and attractive covers at low cost.

According to Miss Lillian L. Keller, U. T. Extension Home Management Specialist and author of the publication, comfortable and attractive mattresses can be made at comparatively small cost. She tells in the publication how this can be done.

Beginning with cotton mattresses, she gives a list of materials needed, directions for measuring and making the tick, and the preparation of cotton. She also takes up in detail the making of wool mattresses from the preparation of raw wool to the complete mattress.

Directions for making wool comforts, feather mattresses and pads as well as suggestions for suitable bed spreads and how to make a bed properly for the most pleasing ef-

fect is also discussed in the publication.

Anyone wishing a free copy of this publication should either ask their county demonstration agent or write the U. T. Extension Service, Knoxville, for a copy.

Middle-age is that period in a man's life when he learns

that no matter in which direction a tax is hurled it's sure to hit him.

They say over 300 tons of sugar are wasted every year in the bottoms of teacups. That ought to cause a stir.

Most Fulton men studied safety when they were boys. They studied how to make a face at the teacher without getting caught.

CHRISTIAN SCIENCE

Sunday, January 9th

"Sacrament" is the subject of the Lesson-Sermon which will be read in Churches of Christ, Scientist, throughout the world on Sunday, Jan. 9. This includes the Christian Science Society of Fulton which holds regular services Sunday at 11 A. M. and Testimonial Meeting on Wednesday at 7:30 P. M. Reading Room at 211 Carr-st open Wednesday and Saturday from 2 to 4 P. M. The public is cordially invited.

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Blessed are they which are persecuted for righteousness' sake: for theirs is the kingdom of heaven." Mat. 5:10.

"THE NEWS" WEEKLY SCRAPBOOK

Week Best Recipe

Apple Tarts—6 firm tart apples; 3-4 cup granulated sugar; 1 cup water; 1-4 cup red cinnamon candies; 1 tablespoon lemon juice; 4 tablespoons orange juice. Wash, pare and core apples and place in baking dish. Combine sugar, water, cinnamon candies, lemon and orange juices and heat, stirring constantly until cinnamon candies have melted. Pour syrup over apples. Cover and bake in a moderate oven (375 degrees F) until tender. Turn apples in syrup during baking so they become pink throughout. Remove apples from syrup and cook syrup until it thickens. Pour thickened syrup over apples and serve after cooling.

Kitchen Kinks

A teaspoon of sugar added to cream will keep it from turning to butter. . . . Water in the lower part of a double boiler will not boil over if the water in the bottom does not touch the top compartment. . . . If fowl are roasted breast down the juices will flow toward the breast and keep it from getting too dry.

With Your Needle

To mend lace curtains, baste tissue paper under the worn places and darn or stitch back and forth on the sewing machine, later removing the paper. Or cut a patch in irregular shape, matching the pattern of curtain as nearly as possible and moisten in cold starch. Lay over hole in curtain and press. It will hold itself in place until the curtain is again laundered.

The Woman Driver

To keep the automobile windshield free from rain or sleet use an ounce of water, two ounces of glycerine and one-eighth ounce of salt. Dip a cheesecloth or gauze into this solution and rub over windshield.

The Family Doctor Says

Never add sugar to the baby's water to make him take it. Never sing, tell stories or bribe a child to

eat its food. Never take up a child from bed and display him to friends. Never give soothing syrup to children. They are unnecessary and may cause serious illness.

An Inspiration

"If Wisdom's ways you wisely seek, Five things observe with care: To whom you speak, of whom you speak, And how and when and where."

FULTON HOSPITAL

Mrs. Frank Mack and baby were dismissed Thursday.

Mrs. Mat Thomas is getting along nicely.

John W. Hornsby is resting nicely after his operation last Friday.

Mr. Charles Fry, whose hand was accidentally shot last Friday to the extent of amputation is reported better today.

Mrs. Ed Cashion remains the same.

The critic seems wiser than any great leader. You see, he needn't form an opinion of a new scheme till he sees how it turns out.
