GARDEN ROLL CALL

While it is generally true that tomatoes tomatos, it is not true in every case, that the garden should be prepared in advance for the season. To make it possible for you to determine whether or not the garden should be planted, I shall present in the next issue, a schedule. The following is the schedule for the next season:

SOW:
April 1: Spinach, radishes.
April 2: Lettuce.
April 3: Carrots.
April 4: Beets.
April 5: Cabbage, kale, Brussels sprouts.
April 6: Cauliflower, broccoli.
April 7: Tomatoes, peppers.

SET OUT:
April 8: Peas, beans.
April 9: Onions, garlic.
April 10: Beans, peas.
April 11: Corn.
April 12: Tomatoes.

You will either have to keep on top of your garden or it will become useless. If you are not careful, you will find that your vegetables will not thrive. It is essential that the proper care be given to the garden, if it is to be successful.

The Prophet's Message

Tuesday evening the Prophet's message was given in the village meeting place. It was a powerful message, full of truth and promise for the future. The people were deeply moved by it, and many were saved. The message began with a call to repentance, and ended with a declaration of the coming of the Messiah. The Prophet was filled with the spirit of God, and spoke with great power. The people were amazed at the wisdom and understanding of the message, and were prepared to receive the Word of God. The message was received with joy and enthusiasm, and the people were filled with the spirit of God. FOULTRY

CAUSE OF SICKENING LEGS IN PULTRY

The pullet growers which affect the legs of the pullets are a serious problem for pullet growers. The disease is caused by a bacteria which grows in the soil and is spread by the wind. The disease is most common in hot, humid climates and is more likely to occur in poorly ventilated sheds. The disease is characterized by the development of swellings on the legs of the pullets. These swellings can be painful and can cause the pullets to become lame. The disease is most common in pullets that are raised on the ground and is less common in pullets that are raised in cages. The Aim of Defining Goals.
Qualifications that go into the making of better men, are many, and the world today is making a
rush for those who are willing to equip themselves like men and hold fast.
The first essential in any life, is the presence of a goal. After a goal has been decided upon, the nec-
cessary financial means are required to attain that goal, and in our modern age of civilization
there are many ways in which a financial goal can be reached.
An advertisement appeared the other day, as signed by over 100 life insurance agencies, in which
it states, "Stipulate in your will, the proceeds of insurance provided the certain way for
purposes.
Insurance as it has always been handled today, is a way of pro-
"jecting today a brain power of a business concern into the suc-
escions of years that follow.
Insurance a few years ago was just a matter of protection in case of death. Today, policies for
young men with definite goals to attain, are available, and are tangible within certain periods,
which also include protection in case of death. Insurance policies at one time were looked upon as
a poor investment, but today a young man may set a goal for future years and live to reap the
benefit of his undertaking.
It makes all the difference who you are. A rich man has a hobby, but the poor man is just a
man.

I think a good idea to feed your hens while you are out for the fair board of directors to decide on the use of the "chicken house" is for me to write up at the poultry feeds and fairs are not always a success. The advice given you this week didn't seem to effect much of a change. The thing is to get a thorough knowledge of the breeds that are being fed. The best people in the country have been here to instruct you. The country is now ready for poultry-feeding. We can get up a good stock of hens for sale at any time during the year. The best way to get a stock is to plant them early in the spring and to have a good stock of young ones ready for sale in the fall. We have been feeding a stock of hens for the past four years and we have had good results. We have found that the best way to get a good stock is to feed them on the best feeds and to have a good stock of young ones ready for sale in the fall. We have been feeding a stock of hens for the past four years and we have had good results.

One of the largest and oldest breeds of standard broilers is the highly bred Fulton. This breed has been selected by the poultry breeders in this state for many years. We have selected this breed and have developed it into a winner. The best way to get a good stock is to feed them on the best feeds and to have a good stock of young ones ready for sale in the fall.
