A boom appears certain

Now, as we face 1941, we see all the evidence of another boom. A fact that the experts predict a boom and even many who actually bemoaned the developments can see all the elements of a boom of some sort. And this is not mere optimism. The old landmarks are completely gone. It is a period of increasing taxation and a period of increasing national production. The old elections are determined in 1930. The period of depression is over. It is a period in which to go ahead and try to chart a safe course.

The greatest danger that we face now is in becoming too greedy in the prices which may leap upward without limit. For some time, prices have a tendency to climb and the climb must be halted if inflation is to be halted. It must be remembered that there are millions of people who would be destroyed if prices should double.}
