An Educational Dairy Tour

Good Water One of Fulton's Greatest Assets

Fulton has often boasted being a place with sparkling water, but few realize how crucial and necessary it is to have good water in a town. Without it, many essential services would be compromised.

One such service is the dairy industry. Good water is vital for the health and longevity of dairy cattle. It also affects the quality of milk produced. Without proper water, dairy farmers could face numerous challenges, including reduced milk production, lower milk quality, and increased incidence of disease.

In this educational dairy tour, we aim to highlight the importance of good water for our local dairy farmers. By understanding the significance of water, we can better appreciate the efforts made by our dairy industry. Let's celebrate this important aspect of our community.

CARE OF CREAM IN ORDER TO PRODUCE AND SELL

A BETTER CREAM

One of the main factors a producer should watch is the quality of the cream. Better producing manufacturers, have begun to use only the cream, and to produce cream in order to make a grade of cream which is of good quality. A few ways to better and revitalize the cream:

1. Keep your equipment clean and in good running order before milking, and keep the most recently milked cow separate from the rest of the herd.
2. Keep your udder clean and dry, and use a good udder scrub before and after milking.
3. Keep all utensils scrupulously clean and dry.
4. Use a good grade of butter milk as a substitute for cream in the curdling of the cream.

A free way to better and revitalize your cream is to keep your barn clean and well ventilated. Cleanliness is the key to success.

NOTICE

In the big, little, old, red, rickety van I am in today, I see a sign on a window that says, "If you see a man in a red coat, you aren't just a type of himself. This is the man who has a special power of the same sort as his red coat." I don't know much more than how to use a road map, and it is in this I think I could help. The man in the red coat is driving the van, and he is driving the van with a steady hand and a sure touch. He seems to be the type of man who knows his way around the roads, and he has a clear understanding of the roads. He can take the van in any direction, and he can drive the van at any time of day or night. He is the man who has a special power of the same sort as his red coat.

I believe that when a man or woman is in a red coat, they are able to drive the van with a steady hand and a sure touch. They are able to take the van in any direction, and they are able to drive the van at any time of day or night. They are the type of man who has a special power of the same sort as their red coat.
