AGISRIPTION was counted and verified to have good turn-ins Saturday. Candidates who were unable to attend were represented by proxies. As it stands today, the race is being fought on several levels. It is very likely that the next standings will show many changes.

Never before has the race been so close. In many instances there has been such a large number of votes cast that it is difficult to see who will come out on top. As it stands today, the race is being fought on several levels. It is very likely that the next standings will show many changes.

THE PIG POINTERS

by H. S. Faye, Anderson County Agent

The hog is such an efficient feeder that it can be given to the porker on a very liberal scale. It should be allowed to eat one pound of corn for each pound of hog gained. The hog should be fed twice daily, and the feed should be of good quality and palatable. It is very likely that the next standings will show many changes.

BUSINESS IS ALWAYS QUIET

With concerns that are quiet about their business.

But let the public know what you have got by using the advertising columns of THE NEWS and you will soon be too busy to worry about the general state of business.

Newspaper advertising leads all others in productivity, and when well-directed is a real investment—not an expense.

IN FACT, IT IS MORE COSTLY NOT TO ADVERTISE.

THE FULTON COUNTY NEWS
Cigarette stubs are dangerous. While other sections of the woods and fields are safe, the feet remain that in some sections in winter than in wet, follow their daily papers close.

ECONOMIC HI-LIGHTS

To quote a leading business man: "It will affect almost everything else and all the way back. Naval construction, unless our shipyards can start a new program, perhaps get government orders, and do a job now, will have to go down in the future—so on in continuous decline. Automation will see a glut of labor as the percentage of unemployment is increased.

An editor's prayer for the New Year is that the newspapers will do as much for the teeth as the teeth do for them. Only the best and long-established company can do for your teeth what a $330 Colt can't do for your money.

Don't throw them away. We can save you money! Bring your shoes to us to be repaired. We can help you solve your financial problems.

We are prepared to write a policy to cover every one of your insurance needs. We represent the best and longest-established companies. No obligation on your part when you ask for our representative to call.

THE OLD WATER MILL

No single water mill is better preserved in this state than the one at Paducah, newly restored by Mr. and Mrs. Eugene Wayne. Unquestionably, it is the best example of a mill of this type found anywhere in the state. The mill is situated on the edge of a small city park and makes a beautiful scene.

The mill was built in 1870. It is a grist and saw mill and is almost identical to the Calloway County mill which was built about 1874. Mr. Wayne has spent many years of his life restoring and preserving this mill.

The mill was in use until 1938 when it was purchased by the state for the park. It is now open to the public.

The mill has been restored and is now operating. The sawmill is also in operation.

The mill is a beautiful example of the type of mill that was once common in Kentucky.

Bottom Farmers Need High Land for Safety

The theoretic interest and thought that has been given to the question of high land for safety is not important, but the question of safety for the highest land farmers is of the utmost importance. The question of safety for the highest land farmer is of the utmost importance. The question of safety for the highest land farmer is of the utmost importance.
