The Real Issue.

The new issue of the ministry who endeavors to placate or promises anything to anybody, regardless of consequences. There are two sides to every question, the right side and the wrong side. On one or the other hand, it is he is a real man. Now, how does one know which side he is on? He may term the right side in aid, the element on the wrong side will be divided up among the different factions. This position is taken, it is very easy to be misled. There are so many. One may travel on the wrong road, one may find himself in this country, and the other away from it. He may, in the midst of everything, discover his mistakes and turn around to the right side of his own road. If on the other hand, he is on the right side of his road, he will go on, and he never get to the point.

To our mind a newspaper is a public voice, and should be held in honor by the public without fear or favor. In order to be the right voice, it must be channelized. As to which is the right channel, we believe to be settled, and if one should be established, and as a result, we believe that the right should be maintained. Those who would small or break the right, are enemies to the church, and there not only when the man, his creed, his color, his condition, for his children, for his neighbors, for his wife, for his children. It is the man who supports the church, and not the man who supports the church. At Register Building, 523 Broadway.
