Efficient and Economical Home Heating

The Enterprise Automatic circulating warm air Heater will heat the entire house with a constant circulation of clean, warm air, insuring the same comfortable warmth in every room.

Finished in dark grained Mahogany enamel, it is in harmony with the other furnishings of the most refined taste. The fire door, ash door and all mechanical parts are concealed when the cabinet is closed.

The powerful heating unit makes it most economical in fuel consumption. The wide deep air ways from top to bottom of the cabinet permit free passage of air, which is quickly heated by passing over the heating unit, and out the top to circulate though the entire house.
