THIS WAR BUSINESS

Everyone is discussing the world situation as it prevails in Europe today. For a while it looked like averted disaster, but the situation is so grave that the world is on the verge of war.

Hitler's demands, the trouble may be avoided, but this is mere wishful thinking. The world is on the verge of war.

France and England have abandoned their neutralist policies and are now ready to enter the war.

I want you to know that this is not a threat, but a mere wishful thinking. The world is on the verge of war.

If an European war should arise, it will be inevitable. The situation as it prevails in Europe exists for the present, at least, because the Czechoslovakian and German nations are more powerful than ever before.

The determination of France and England to maintain their neutrality has been a source of consternation to the world. The Czeckslovakian and German nations are more powerful than ever before.

WHY CHIROPRACTIC?
Chiropractic is the medical science of the nervous system, its interrelationship with the body and its function in health. It is a natural, scientific, and non-invasive approach to healing the body. It is based on the premise that the body has the inherent ability to heal itself and that the function of the nervous system is essential to this process. Chiropractic seeks to remove stress from the nervous system, allowing the body to self-correct and achieve optimal health.
