## Trip Around The Loop

An interesting story, "Trip Around the Loop," by Sidney Snook, published in Tuesday's Paducah Sun-Democrat, is in part reproduced for our readers because of it featuring one of our newest industries, the Swift plant:

"Warm autumn sunshine from cloudless skies, burnished trees and a smooth, open road stretching in a slender line toward the purple haze of the horizon have called irresistibly these fine October days, to the gypsy instinct tucked away somewhere in the heart of every man. No matter how sedate, how settled, how bound around by the routine of home and office and mill, he wants to get out and play the gypsy just for the glorious fun of it."

"Now, since the colorful Roman tribes roll around in luxurious motor cars instead of covered wagons, there is no incongruity in the ordinary being, hearing the call to the open if just for a day, setting forth in his automobile. Speed, ease and a sense of freedom, and a glorious holiday for the taking. October weather is the best of the year in Kentucky, and there is no need to wander far afield for within the boundaries of this part of the state are so many sights to see, so many miles to cover, flaming reds and yellows of the forest trees, warm haze on the hillsides, harvested fields, good roads and neat towns. It is all for the mere taking, provided one can get away for a few hours."

### Trip Around the "Loop"

Many roads and many places and among the best of the gypsy journeys offered in western Kentucky is "the loop." There are "loops and loops," but this happens to be a new one, the route from Paducah down thru Ballard to Wickliffe, on into Carlisle county, through Bardwell and Arlington, thence to Hickman county through Clinton, and forward to Fulton county and the town of Fulton. Then, back to Paducah through our sister county of Graves.

### New Fulton Plant

The new plant of the Swift company at Fulton, one of western Kentucky's most recent industrial acquisitions, is of particular interest. Erected at a cost of approximately \$150,000 and opened six weeks ago, it is one of the most modern and complete establishments in this section of the state. It is a combination produce plant, handling cream, poultry and eggs. An up-to-date structure of yellow brick, concrete and steel, it stands on the Tennessee side of the street in Fulton. That is an interesting distinction of Fulton—on one side of the street, you are in Kentucky; on the other side, in Tennessee.

Opening the Swift plant has established a broad new market for dairy and poultry farmers in western Kentucky counties, an all-year-around market. Daily delivery of cream from within a radius embracing 70 west Kentucky and Tennessee towns is made to the plant, and poultry deliveries cover a territory within about forty miles of Fulton. A new and virtually unlimited market is thus offered to district farmers since the company takes all deliveries cover a territory without about forty miles of Fulton. A new and virtually unlimited market is thus offered to district farmers since the company takes all deliveries.

The Fulton plant is the company's newest and most complete, to date, and is one of only four south of the Ohio and

east of the Mississippi rivers. There is one in Kentucky at Lexington; two in Tennessee, one at Fulton and one at Nashville; and one in Mississippi, at West Point. An investment of between \$200,000 and \$250,000 is represented in the Fulton plant. There are between 125 and 150 employed at the present time and the weekly payroll amounts to approximately \$2,000.

Three carloads of produce are being shipped each week to selling houses in the east.

Dairy farmers deliver their cream to small stations throughout the territory and the cans are gathered up and brought into Fulton by truck for delivery at the station platform. Some comes in by direct rail shipment from farthest points, notably in Mississippi.

### Its Present Output

The present output of the creamery averages 25,000 to 35,000 pounds of butter a week but in the "flush" period of summer will run to between 70,000 and 100,000 pounds weekly.

Delivered at the plant, the cream is weighed, sampled and graded with the butterfat test made in a scientifically equipped laboratory. Modern, sanitary methods are employed in each step of the handling process.

An electric churn of 100,000 pound capacity is in operation and another of similar size will be added within the next two or three weeks. Three will be eventually installed. After the cream is pasteurized it is pumped from vats over cooling coils into glass-lined vats and cooled. It is kept there from 12 to 14 hours and then pumped into the churn where approximately forty minutes of churning revolutions is required for the butter "to come." It is a mass of fluffed gold, and one could but speculate on the number of hot biscuits it would spread!

From the churns it goes to the cooling room and then on sleds to the cutting and packing room where it is cut and weighed by machine in styles of one-quarter, one-half and one-pound, and two pound rolls. It is moved from the cutting machine by belt conveyor and white clad girls seated at the tables wrap it to go into the cartons. The butter then is packed for shipment in 12 pound or 32 pound boxes and loaded in refrigerator cars to go to the eastern selling houses.

The buttermilk is pumped from the churns or vats where it is adapted as feed for the poultry.

### Poultry Department

In the poultry department between 18,000 and 20,000 head of poultry are received weekly at the plant dock where they are weighed and graded into three classes on a basis of quality and vitality. Poultry farmers are making daily deliveries to the plant from the territory surrounding Fulton. Fowls are kept from seven to fourteen days for feeding on a balanced, scientific ration. After being fed and weighed the fowls are taken to the kill-room where by rapid process they are knifed, passed through hot water for thirty to forty seconds, picked and dressed. They are put into cold water and then on chilling racks. The birds are kept in the chilling room at a temperature of 34 to 36 degrees until the following day and are graded according to quality, size and finish and packed for shipment. Each of the chilling

## Indian Summer

## A Bee-hive Of Industry

### OWEN MANUFACTURING COMPANY A GROWING INSTITUTION

On our rounds Tuesday, we visited the Owen Manufacturing plant, located on State Line street, next to the O. K. Laundry, and found a bee-hive of industry. This is probably one of the fastest growing institutions in town.

You know Vernon Owen, the genial manager, captured the heart and hand of one of Fulton's sweetest society buds recently, and his sole ambition now is to capture the world's admiration for the beautiful line of pleated skirts he manufactures and there is every indication that his fondest dreams will come true. His recent visit with his bride to America's largest manufacturing centers gave him an inspiration worth while and the Owen Manufacturing plant at Fulton is destined to become famous throughout the entire country.

This plant has only been in operation little more than a year. It started on a small scale, but has grown rapidly. They are now represented by twelve traveling salesmen. A large force is employed at the plant turning out one thousand or more pleated skirts weekly. The equipment consists of modern machinery and appliances for doing high class work by skilled employees and the finished product is all one could wish for. No wonder the phenomenal growth of the business.

While not entirely new, the method of doing business is simple and pleasing. The merchant sends in the material from his own stock to the factory, designating the kind of pleat and size desired and the goods are made up into beautiful pleated skirts and promptly returned ready for sale.

### No Excuse for Disappointment

Often times a customer will enter a store for the purpose of buying a pleated skirt, but leaving program was very much appreciated:

Piano solo—Miss Doris Hud- is disappointed when she fails to find what she wants. Few disappointments can arise now when the merchant displays his shelf goods with almost an endless variety of colors and

fabrics before his patron for her to select from and the pleat like she prefers.

The merchant can economize on his investment in made up stocks and at the same time please the most fastidious customer by the Owen route.

### NICHOLS LEADS PRIMARY TICKET IN JUDGE'S RACE

Judge Andrew M. Nichols, present judge of the police court, at Paducah, ran ahead of the field in Saturday's primary election. He polled a total of 1,150 votes, 353 more than his nearest adversary, Roy Holman, Paducah attorney, received 806 votes according to the unofficial count, and finished second in the race; Carl H. Denker, third man, and W. K. Wall, fourth.

The two high men, Nichols and Holman, are the nominees for the November election, and the one who receives the largest number of votes in that run-off will be declared elected police judge of Paducah.

Judge Nichols is a brother of the Hon. Jess Nichols of Fulton, and his friends here wish him success in the November election.

### WESTERN UNION INAUGURATES 24-HOUR SERVICE IN FULTON

All day and night service is now given patrons of the Western Union Telegraph Company in Fulton, according to recent announcement made by Mrs. Ruby Reeves, the courteous and efficient manager of the local office. This 24 hour service is in keeping with other improvements made here and Fulton is to be congratulated on being in the "big city class."

### PREPARED FOR STORM

A lawyer who had been married many years joined three friends in a stag party one night, and arrived home long after midnight. His wife, waiting up for him, had fallen asleep in her chair, but she awakened as he stepped into the house carrying a raised umbrella.

"What are you doing with that umbrella over your head in this room?" she demanded.

"I expect a storm to break any minute, now," he answered.

## High School Notes

The Fulton Bull Dogs went down to defeat before the powerful Madisonville pigskin chasers last week to a score of 47-6. The boys report a fine trip and state that they were treated splendidly by the Madisonville people.

The Art Club presented one of the most unique and interesting programs recently that it has been the good fortune of the high school to witness. Fourteen great pictures representing the best work of the old masters were presented. The Song of the Lark, Spring Song, Feeding Her Birds, The Age of Innocence, Miss Simplicity, Mother, The Spirit of Seventy-Six, The Infanta Marguerita, The Blue Boy, Madam Le Brun and Daughter, The Angelus, Hope, Whistling Boy were shown. A number of pupils from the high school and Carr Institute were used to impersonate the characters in these pictures. A large number of patrons were present.

Grade cards will be given out at the high school Friday of this week for the first term of six weeks. The students will take these cards home for the signature of their parents Friday afternoon and return them Monday. No doubt each parent will carefully study the record of his child before signing the card.

Miss Annie Lucille Goldsby sang several songs at Chapel Tuesday. Miss Goldsby's singing is always a treat to the students.

Mr. E. C. Hardesty, manager of the local branch of the Kentucky Utilities Company, gave an address on Edison and his work at Monday's chapel. Mr. Hardesty called attention, in an interesting way, to the accomplishments of the electrical wizard, and his contributions to the comfort and happiness of mankind.

Rev. McCoy, the pastor of the Cumberland church, gave an interesting address before the student body last week.

The high school appreciates visitors. Why not come around more often and see what we are really doing up here? Just drop in about 8:20 and see the crowd assemble for checking, that tells 'em whether we are all here or not. Then drop down to the manual training

room and see Mr. Killbrow's crowd make things. After this drop into the English room and let Miss Royster refresh your memory of Hamlet, Romeo and Juliet, with something about Ivanhoe, and perhaps a mention of Leather-stockings. Of course you would naturally go next to Miss McMinn's room and watch fifteen charming young ladies learn how to cook and sew and keep house. Quite practical! don't you know, for the statisticians tell us that 80 per cent of the ladies get married and 90 per cent of them do their own housework. That justifies domestic science now, doesn't it? Then go to the music room and listen to Miss McKendree and her chorus sing "Sweet and Low."

Of course you would then want to hustle up to the French room, where Miss Crittenden keeps "watch and ward," and listen to a little talk in the beautiful and romantic tongue of La Bell France—and then, but we will continue this some other time, merely adding that at lunch time you will want to call at the cafeteria, and if Mrs. Thompson doesn't furnish you with a meal as fine as the finest, we will give you your money back that's all.

On Thursday of this week the Bull Dogs will meet the Murray Freshmen at the Fairgrounds. This promises to be a close game, full of thrills, and well worth your coming out to see.

## CLUB WORK

By H. A. McPherson, County Agent

Most of the 205 club members enrolled last spring have done very good work. The 40 corn club boys have good corn and will begin harvesting it soon. Yopp Seed Company is under contract to take 20 acres for seed.

Thomas Stone, of Hickman, has done well with his corn project. Last year Thomas selected ten ears from his acre and won first in the boys' corn contest. First in open class and champion in the corn show. I showed his ten ears at the National Dairy Show in Memphis and he won first in the Jarvis Golden Prolific class. The prize was \$10.00. He produced 65 bushels last year.

This year Thomas selected ten ears of Jarvis Golden Prolific from his acre and won first in his class, first in the boys' corn club show and first in the open class and grand champion in the corn show, at the Hickman community fair. The above goes to show that Thomas "knows his corn."

Murley Roper, Jr., probably has the best acre of corn in the county. Murley won first on Neils Paymaster at the Hickman Fair. We are all anxious to know just how much corn Murley will make. He has proven himself a good dairy club member. His heifer gave enough milk during her first lactation period to pay for herself. He lost a fine heifer calf from his cow, but she is fresh again and has a fine male calf and is milking good. Murley's cow stood ninth place last year at the Hickman fair, and she won first this year, which shows she has received good treatment.

Jones Rieves Davie, a 12 year old club member, has won more premiums than any club member in the county. He paid \$150.00 for his bred heifer and she gave enough milk during her first lactation period to pay for herself, and he has won more than \$50.00 off of his cow and heifer. He could have sold his cow for \$200.00 and his heifer for \$150.00 and the male calf could be sold for [Continued on last page]

**I. C. AIR-RAIL SERVICE**

Arrangements have been completed for the establishment of the first Lakes-to-Gulf air-rail service as the result of an agreement between the Illinois Central System and the Continental Air Services, Inc., announced J. V. Lanigan, passenger traffic manager of the Illinois Central System, Chicago, today.

The country's newest transportation project will be inaugurated Monday, October 28, when five 8-place Travelair planes will hop off from Chicago for New Orleans, making stops en route at St. Louis, Memphis and Vicksburg. Appropriate ceremonies will be held at each airport along the route.

Under the air-rail schedules to be placed in effect shortly, the southbound traveler will be enabled to leave Chicago or St. Louis in the evening on the Illinois Central's New Orleans Limited, arriving in Memphis early the next morning where he will transfer to a Keystone-Loening amphibian plane for the flight to Vicksburg or New Orleans. Northbound, the traveler will leave New Orleans on the Illinois Central's Fast Mail, or Vicksburg on the Northern Express, at night, transferring at Memphis early the following morning to a Travelair plane for the hop to St. Louis or Chicago.

Major M. D. Mann, president of the Continental Air Services, had the air schedules expressly laid out to co-ordinate with the Illinois Central's existing train schedules, and the new combination train and airplane service will enable the business man to leave the terminals at either end at night, enjoy a good night's sleep, and yet be in either terminal at the opposite end of the route in time to transact a good half day's business the following afternoon.

Travelair planes will be used on the line between Chicago, St. Louis and Memphis, while Keystone-Loening amphibians will be placed in service between Memphis and Vicksburg and New Orleans. The amphibians are used because the route below Memphis will follow the Mississippi river, which always provides a good landing field.

**INDIFFERENCE TO DEATH**

The appalling number of deaths in the United States from automobile accidents is viewed with strange apathy by the average citizen. It is estimated that around 30,000 people, many of them little children, will be killed in the next twelve months by this comparatively new vehicle of transportation.

The people of the country, including most of us in Fulton, accept the fatal accidents as a necessary toll of the automobile. We seldom stop to consider the possibility of reducing the number of the dead and injured, although it should be apparent that this can be done.

Suggestions of various kinds have been made but the best protection that we can think of would include a rigorous examination of drivers, with licenses being issued to competent operators, subject to immediate revocation upon cause. Culpable participation in two or three minor collisions, or two or three violations of safety regulations, should be sufficient cause for the cancellation of a driver's license. Any automobile collision may result in death and a driver who is responsible for several minor accidents will sooner or later be the cause of a fatal catastrophe.

Along with the driver's license should go periodical examination of all automobiles, with thorough tests as to the condition of the brakes, the horn and the lights. Nor should the tires on an automobile be neglected and no car should be operated upon the public highways that has rotten, worn-out and dangerous tires.

The value of the above provisions in reducing accidents and saving lives will depend entirely upon their adequate enforcement. Not only should they be rigorously carried out but violations of all traffic regulations should be punished positively by successively increased penalties.

We believe that the suggestions in the three paragraphs above, while general, contain the proper remedy for the horrible slaughter that occurs on the roads and highways of the United States annually. They should receive the thoughtful consideration of every citizen.

**High School Notes**

Last Friday the Bull Dogs journeyed to Martin, Tennessee, and defeated the football team of Martin high school. The score was 20-0, or as some claimed 20-6, there being a question as to whether or not Martin was entitled to one score. Be that as it may the Bull Dogs won in one of the most brilliant games of the season. A large crowd of students and faculty members accompanied the team.

Three football games have now been played and the locals have captured two victories. Not a bad record to date.

Rev. McCoy, pastor of the Cumberland Presbyterian Church, gave an interesting address in chapel Monday. Mr. McCoy is an excellent speaker and we hope that he will visit us often.

Terry Norman School now have a radio as a part of their school equipment. Last Friday the school enjoyed Walter Damrosch's concert given for school children. This series of musical treats will extend thru the entire school year and will be enjoyed by thousands of schools. Terry Norman also plans to have an outside drinking fountain.

The football team of Fulton high school will journey to Madisonville, Friday, to play the strong team of that school. This will be the first long trip that the Bull Dogs have taken this year.

Professor Holland made an interesting talk in chapel Tuesday regarding the history of football. It seems that our favorite sport is much older than we thought. As a college game football dates back about one hundred years, but a similar game was played by the Greeks and Romans more than two thousand years ago.

This week marks the close of the first six weeks' term. Soon we shall know our grades for one sixth of the school year. Perhaps some of them will be lower than we like, but let us determine to make them better the next time. Most of us want good grades, and are exceedingly proud of a high mark when it comes our way, but somehow we shrink, or a good many of us do, from the hard study and the consistent effort which makes good grades a matter of course.

Our friend and school mate, Ruth Hill, is now home from the hospital, where she was recently operated on for appendicitis. We hope to welcome her back to school in a few days.

The High School and Carr Institute P. T. A. held their monthly meeting Tuesday afternoon. A good program was rendered and provisions made for the purchase of some things badly needed by the school.

Wednesday was Club day, and at chapel time the different clubs met under their sponsors. Every student should belong to some organization, out in the big world beyond the school, and why not begin now? At present the dramatic club has the largest enrollment.

The high school enjoyed a splendid musical treat last Thursday when a Mrs. Cloud from California, and an artist from New York state gave a program. The program was under the direction of Miss McKendree, musical supervisor of the city schools. Mrs. Rucker furnished a very fine victrola for use on this occasion.

The pupils of Prof. C. M. Whalin's arithmetic class have prepared a splendid blue print of the school buildings and grounds. This is a very useful and worthwhile piece of work. Our manual training depart-

ment is moving along nicely under the able management of Prof. Uel Killbrew.

Why cannot we have chapel singing every day? We have musicians in abundance. We all love the fine old melodies such as "My Old Kentucky Home," "Old Black Joe," "Massa's in the Cold, Cold Ground," "America, the Beautiful," etc. Why not have a chorus daily of two hundred voices? This would be a good step toward our part in making America musical.

**Markham Men**

(Continued from first page)

Thus Markham policies spread to New England.

Mr. Markham's latest presidential nomination was to fill the vacancy on the Central of Georgia created by the resignation of Mr. Pelley. His choice fell upon Albert E. Clift, who had risen from general superintendent to senior vice-president of the Illinois Central System under Mr. Markham's administration.

In all, more than 21,000 miles of railroad in this country are today being operated under the direction of railway presidents who received their preliminary training on the Illinois Central under Charles H. Markham.

**Advanced Charles M. Kittle**

Nor has Mr. Markham's influence been confined to the railway field. In 1924 Julius Rosenwald, head of Sears, Roebuck & Company, the largest mail-order merchandising establishment in the world, decided to take the chairmanship of the board of that company. He wanted a comparatively young man of outstanding ability to take over the presidency of the firm. Looking to the Illinois Central organization, his eye fell on Charles M. Kittle, senior vice-president of the Illinois Central System, who had advanced under the tutelage of Mr. Markham from the post of freight claim agent of the railroad. Mr. Kittle gave up the opportunity to succeed his chief, Mr. Markham, as president of the Illinois Central System, in order to become president of Sears, Roebuck & Company and he filled that post with distinction until his untimely death in 1928.

Thus, as a maker of successful business executives, Mr. Markham occupies a position of outstanding leadership.

**Turk Held to Grand Jury**

(Continued from first page)

the rule. The defense and Commonwealth witnesses were separated and required to go into different rooms.

**Relatives Surround Turk**

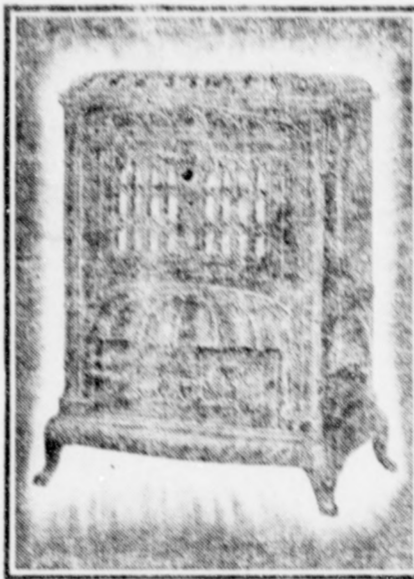

Turk, somewhat pale from his long illness, was seated at a table with his four lawyers. At his side sat his two sisters, Mrs. Edith Hobbs and Mrs. Stella Baucum, and his brothers Morris and John Turk. They conferred with their brother and with the attorneys now and then, in a low tone of voice.

At another table sat the widow of W. S. McCloy, and her daughter, the wife of the defendant, Mrs. Turk, a young and pretty woman, talked with her mother and exchanged a few words with the prosecuting counsel. Mrs. Turk has filed suit against her husband for divorce since the killing of her father. She also seeks alimony amounting to \$36,000.

The prosecution announced that it would call only four of its numerous witnesses. The first of these was W. P. Watson, a rural mail carrier. Watson swore that he was seated in his car, parked on the main business street of Bardwell, at the time of the duel. He said he saw Turk shoot McCloy.

The arraignment before Judge Edgington was a preliminary trial only. The court has jurisdiction to either dismiss the case or hold Turk to the grand jury. The next Carlisle county grand jury convenes in November. Turk had been in jail at Paducah without bail. He was recently taken from Riverside hospital to the McCracken county jail. The sheriff of Carlisle county brought Turk to Bardwell from Paducah.

## Demand these 2 features in the Parlor Furnace You Buy!

Here is one style Charter Oak Parlor Furnace. It will fill the whole house with warm, moist air, burning any grade of hard or soft coal or wood. Comes in beautiful Walnut Enamel, the steel parts grained to imitate wood and the cast parts burl. Equipped with night check latch.

**1. Coal Saver****2. Heat Deflectors**

Here are the latest improvements that now give you more heat with less coal. An actual saving of half a ton or more every year is made with the new Charter Oak Parlor Furnaces.

**Automatic Heat Control**

The Coal Saver, included as standard equipment on every Charter Oak, not only makes a remarkable saving in coal but it gives automatic, uniform, heat control. It opens a check draft when the fire burns too rapidly and closes it when the stove cools down. This checking and quickening is continuous and so well regulated that you cannot feel changes in the temperature of the room. Nothing to wind, nothing to get out of order. The Coal Saver will work automatically for years without attention.

**Keep Your Floors Warm**

The floor around the ordinary heater is cold and drafty, but the Charter Oak heats the floor with heat that the ordinary furnace wastes. The patented heat deflectors send out an abundance of excess heat to keep the floor warm and prevent drafts which are the cause of so much sickness.

For the health and comfort of your family, insist on getting a Charter Oak. These features don't cost you any more. They are on every Charter Oak no matter what the size or how wide the cost. Used by Four Generations in Millions of Homes

We invite your early inspection.

## Paducah Host to U. D. G. in 1930

Receives More Votes Than Lexington and Louisville

Earlington, Ky.—Paducah will entertain delegates to the 1930 convention of the United Daughters of Confederacy, Kentucky division, having received more votes than Louisville and Lexington, other city contenders at the 33rd annual convention's second day session last week.

The convention closed with an historical program. Mrs. Josephine Turner, Louisville, delivered the principal address. There was a pageant, "The Hope Chest of the South," under the direction of Mrs. Charles Harris, Louisville.

## NOMINATE LIST OF CITY OFFICERS

No Opposition Expected In the Clinton Election

Clinton, Ky.—City officers, who will serve during the next two years, were nominated at a mass meeting of citizens of Clinton at the court house. The election which is non-partisan, will be held November 5. The nominees will probably enter office unopposed.

The list of nominees follows: for mayor, H. M. Vance; for councilmen, W. C. Hutcherson, Ed Featherstone, Elmer Kaler, S. J. Vivrette, C. D. Byassee and Lesley Watson; for city judge, L. L. Hindman; for city attorney, S. V. Craig; for city clerk, W. G. Utterback; for treasurer, Roy Toombs; for assessor, Harry Jordan; for city marshal, Joe Evans.

## Woman Protects Dog As She Kills Self

San Francisco.—Before Mrs. Pearl Alsbaugh turned on the gas and lay down to die, she took precaution that her pet dog should survive.

When G. C. Alsbaugh, her husband, employed at night in a laundry, returned home, he found his wife dead from the gas fumes. The dog also was unconscious, but later was resuscitated.

Alsbaugh could ascribe no reason for the suicide save that his wife had been in ill health.

## MAKES QUEER DEAL FOR GIRL OF 13

Trade Involved Four Mules and Log Cabin.

Hopkinsville, Ky.—A queer bargain of the hill country, in which a thirteen-year-old girl was bartered as a bride for four mules, a log cabin and a wagon, has been revealed to authorities here.

An investigation resulted in the arrest of the girl's father, Henry Gibbs, on a charge of converting the property of another.

Some weeks ago Edward Green of Detroit, father of four children by a former marriage, took thirteen-year-old Louise Gibbs of Cadiz, Ky., and married her, showing the clerk a letter purporting to be from her father, giving parental consent.

Gibbs said the letter was forged. He threatened Green with criminal action. The parental wrath subsided, however, when Green gave his new father-in-law two teams of mules, a wagon and a log cabin.

Louise, a slim child weighing about 100 pounds, quickly tired of married life and left her husband at Detroit, returning here to relatives. Green, is forty-three years old, ten years his father-in-law's senior.

Green pursued his child bride here and when she refused to return to Detroit with him, he demanded back his peace offering—only to find that Gibbs had sold mules, wagon and all for \$225.

Gibbs thereupon had Green arrested on a charge of forging the letter of permission under which the marriage was performed. Green made peace in some way, and the charge was withdrawn. Then he turned around and had Gibbs arrested for selling the wagon and mules.

The case is to be investigated by the county grand jury.

## Girl, 3, Killed by Bear Which Breaks Into Home

Winnipeg.—The three-year-old daughter of Fred Gorricieuk, Lowland, Man., was killed there recently when a large black bear, driven out of the neighboring bush by fire and hunger, broke into the Gorricieuk home and carried off the little girl.

Leaving her three children in the house, Mrs. Gorricieuk had taken her husband's supper out to him in the fields. When she returned she found the front door of the house battered in and the children missing. Crying to her husband, she rushed around to the back of the house and out into the yard, where she found the body of the little girl.

The other two children, seven and four years of age, had run to a neighboring farm, where it was learned later from the eldest child that the bear had attacked her first, but she had eluded it and, with her younger sister, had fled from the house.

## Dies Among Strangers as Relatives Hunt Him

Raymond, Wash.—John Carlson, sixty-one, Naselle, Wash., died among strangers and was buried as an unknown only a few miles from relatives bending every effort to locate him.

He left Astoria, came here and registered at a local hotel. The clerk, in signing for him, wrote "John Koski" by mistake. The next day he was found dead in the room from natural causes.

His long stay from home caused anxiety to his family and a search was made. Trailing him to the hotel, Arthur Carlson identified the clothing of the dead man as that of his father.

## Bandit Is Chivalrous When Widow Is Victim

St. Louis, Mo.—Chivalry on the part of a bandit saved Mrs. Caroline Baldwin, a widow, of this city, from the loss of her money.

"Surely you wouldn't rob a poor defenseless widow," she exclaimed when the culprit walked into her confectionery store and brandished a pistol in her face.

"So you're a widow?" he replied, haltingly. "No I couldn't rob you then." He walked from the store.

## Golfer Drives in Ditch; Ball Kills Big Snake

Fayetteville, Ark.—W. M. McRoy of Fayetteville killed a snake with a golf ball. McRoy drove and followed the ball into a small ravine. A snake, several feet long, was in its death wriggle. The ball had struck it squarely in the head and administered the fatal blow.

**YOU MUST STOP WASTING HAVE MONEY!**

What have you got in your head—Thrill or waste?

Plain, hard common sense tells us all what to do—to save a part of what we earn, as large a part as is consistent with modest living until we can afford to spend more of it.

Our bank offers you a SAFE place to put and keep your spare money. Spare as much as you can for your bank account.

We invite YOUR Banking Business.

**FOOD LIKE YOU GET AT HOME**

This is truly a home-like restaurant because it has endeavored to break down the prejudice based on the theory that restaurants could not serve food like you get at home. Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat.

Years of catering to the appetites of particular people make it possible for us to serve appetizing meals.

The next time you want to eat away from home, bring your family here.

# Why the Laundry Should Do My Washing?

Because the laundry is equipped to do washing cheaper, better---more sanitary---prompt collections and deliveries. You don't have to worry---you know it will be delivered when promised and you devote the day to more alluring tasks than washing. Blizzards, storms, heat or cold, none of these affect Laundry service---you get service rain or shine.

WE OFFER THE FOLLOWING SERVICES:

<b>Damp Wash Service</b> Means we wash your clothes and wring them dry enough to be ironed <b>at 5c pound</b>	<b>Dry Wash Service</b> Means everything washed and dried. No pieces starched---all flat work is ironed. Same as in Rough dry. <b>at 8c pound</b> Can't sour or mildew.
<b>Rough Dry Service</b> Means everything washed; starches and dries the starched garments, and irons all flat work <b>at 10c pound</b>	<b>Finished Family Service</b> A COMPLETE service---whole bundle ironed when bundle received, weighed and a charge of 10c is made---wearing apparel is weighed separately and an additional charge of 10c per pound is made for the ironing.

ALL FAMILY WASHING WEIGHED---MINIMUM CHARGE - - - 50c

You Are Only Fooling Yourself When You Purchase Home Equipment!

## ← JUST A COMPARISON →

Home equipment will cost around \$175.00 when you get it. It does only a WET WASH---you do the work or pay some one to do it.

This \$175.00 spent with us (75c each week) will give YOU a 15-lb WET WASH each week for 4 years and 6 months. Besides we DO THE WORK, and YOU take a day of rest. It will cost you around 6c a pound to do your washing with home equipment, not counting any other time you may use. We get the wash and deliver it at 5c a pound. Why spend \$175.00 for the privilege of doing your own washing. Just a few facts. Think them over. We can give you a better laundry and cleaning service.

LAUNDRIES ARE BETTER AND CHEAPER BY FAR.

## Sunday School Lesson

(By Rev. D. B. FLETCHER, D.D., Dean  
of the First Baptist Church of Chicago  
U.S. Office, Western News Service, Chicago)

Lesson for October 27

THE CHRISTIAN'S VIEW OF RECREATION

LESSON TEXT---JER. 2:12, 13, Zech. 8:12, Mark 2:13-28, Mark 6:30-32, John 2:1-11.  
GOLDEN TEXT---I am come that they might have life and that they might have it more abundantly.  
PRIMARY TOPIC---The Right Way to Play.  
JUNIOR TOPIC---The Right Way to Play.  
INTERMEDIATE AND SENIOR TOPIC---What Play Does for Us.  
YOUNG PEOPLE AND ADULT TOPIC---Recreation in Community Life.

In the last lesson we saw that work was God's primal law for man. In work there is a certain breaking down of cells which needs constant repair; therefore, in order that work may continue there must be recreation. Recreation means re-creation. Failure to discern this truth has made of recreation dissipation. In this light let us view the salient points in the scripture selected.

I. The Coming Golden Age (Jer. 3:12, 13).

Though Jeremiah was the weeping prophet, and presented dark pictures of Israel's condition, God gave him a vision of Israel's golden age. He made known how that through the mighty hand of God the chosen nation should be delivered from bondage and brought into their own land where peace, prosperity and gladness should prevail. The source of all real recreation is right relationship with God. God is the source of all joy. Nothing so powerfully affects the physical organism in its renewal as joy in God. In this coming age the streets of the city will be safe for old people and children (Zech. 8:4, 5).

II. The Christian's Relation to Fasting (Mark 2:18-23).

1. A question asked (v. 18).  
The very joyfulness of the disciples of Christ in contrast with the disciples of John and the Pharisees, moved an inquiry as to the reason. The law of Moses only required fasting on the Day of Atonement. John the Baptist was in prison, therefore it is clear as to why his disciples were fasting.

2. Christ's answer (vv. 19, 20).  
He declared that the children of the bride chamber could not fast as long as they had the bridegroom with them. The joy of present companionship with Christ prevented their fasting. This shows that Christ is the real source of joy. He recognized that when the bridegroom was absent, there was occasion for fasting. Christ is now away, therefore fasting is permissible. In times of great need the early church fasted. Before sending out the first missionaries they fasted and prayed (Acts 13:1, 2). More fasting and less feasting would be helpful today in the ordination of Christian workers.

III. The Christian's Relation to the Sabbath (Mark 2:24-28).

The disciples were charged with lawlessness because they plucked ears of corn as they walked through the fields on the Sabbath day. In Christ's defense against this charge, He

1. Cites a precedent (v. 26).  
It was the case of David, their great king, who in time of need ate the shewbread which was only lawful for the priests. The principle set forth is that the higher law of human need warranted David in doing this which was out of the regular line of duty.

2. Showed the nature of the Sabbath law (v. 27).  
The Sabbath was made for man, therefore its right use is determined by what it contributes to man's good. The Sabbath should not be man's cruel master, but his helpful servant.

3. Jesus is Lord of the Sabbath (v. 28).  
It was He who instituted it when creation was finished; therefore He had the right to use it as it pleased Him for man's good.

IV. The Need of a Vacation (Mark 6:30-32).

The tragic death of John the Baptist had just occurred, and the disciples had just returned from a strenuous missionary tour. Christ, perceiving their need, invited them to come apart with Him for rest.

V. Jesus Attending a Wedding (John 2:1-11).

This is a striking sidelight on the spirit of Christ. A marriage feast was graced by His presence. In this act He set a mark of honor upon marriage, which is the most joyous of earth's occasions. In this act man's holy Reformer lifted the holy ordinance of marriage into its dignity and beauty. In the course of the feast when the wine was exhausted, He wrought His first miracle rather than have its festivities marred.

Glorious  
Earth has not a spectacle more glorious or more fair to show than this---love tolerating intolerance, charity covering as with a veil even the sin of the lack of charity.---F. W. Robertson.

Overcoming Obstacles

An easy life is not likely to be a very valuable life to itself or to others. Strength comes by overcoming obstacles, and it is the strong life that can best help those about it.

**KENFLEUR'S PILGRIM CRESCENT**  
Sugar Creek's 3-year old entry for honors at National Dairy Show. Pilgrim started his show ring career as a calf and has many honors to his credit. Most recent, October 2, 1929, First Prize, Memphis Tri-State Fair.

## Two Rubens Go To Town

(By J. T. Watkins)

Last Wednesday morning bright and early two Rubens arrived in the City of St. Louis to take in the Dairy Show and at the same time the National Poultry and Rabbit Shows. After a hurried breakfast at one of the numerous hash houses across from the depot, they hied forth to begin their work of judging cattle, chickens and rabbits, also anything else that needed judging by competent judges. After they arrived at the show they were somewhat astounded at the greatness of the buildings and awed at the immense crowd, for by nine o'clock there were thousands already in the grounds and car after carload disembarking at the gates as fast as one street car could make room for another. They forgot for a while that their duty was to judge cattle, etc.

They decided before they did any judging, they would walk through the barns and look them over and believe me were in all 1,200 head of the finest dairy cattle from all over the States and a large herd of Jerseys from Ontario, Canada. In numbers the Jerseys lead the parade with over 450 head, but were followed real close by the Holsteins. The Ayrshires were the smallest entry but what they lost in numbers they made up in class.

These two Rubens were so long in looking the cattle over, the officials had to get other judges to work so they decided to go over to the chicken house but here also, they were too late, for they had gotten tired of waiting and when the two arrived, the poultry had all been judged, and this made the two rubes mad and they would not even attempt to judge the rabbits.

The new arena is the largest building under one roof we have ever seen. The roof is 135 feet from the tan bark of the arena and is self-supporting, covers a building over 500 feet long and 300 feet wide and there is not a post in the whole building. It seats 21,000 people and on Wednesday night when we wanted to go to the horse show, all had been sold out and 2,000 turned away.

Beginning Thursday morning it was all profit, for after the horse show Wednesday night there had been enough money turned in to completely pay all the expenses of the entire show. And still some people say shows and fairs don't pay. They will pay if you give the people what they want.

Over at the chicken show there were 1,600 chickens of all breeds, although there were not as many as I expected. There were club meets of the eight different classes of Wyandottes but some of the breeders did not come in like they should have done. We ran across our old friend Ralph Sturdevant, the originator of the Buff Wyandotte, and am glad to say he won four firsts, two seconds, two thirds and one fourth, also won the best production hen in the entire show. Some honors, I say. This is the man that sold me my start in Buff Wyandottes.

The classes of Plymouth Rocks and Rhode Island Reds should have been very large, also the Leghorns, but they were just the opposite for as large a show as this, very few, in fact, I guess we had as many Reds and Leghorns at our little show, as they, and I know we had more Banded and White Rocks. There was a new breed shown that has not been admitted to the standard as yet, but I guess it will be a go. I don't know the make up of this fowl but it looks like a cross between a White Rock and White Leghorn, it has the shape and appearance of the Leghorn but almost as large as the Rock. Looks as if it will make a real good breed in a few years.

After wandering around for two days these rubes decided they had seen enough so decided they would go down to Cairo and see that everything passed

off all right at the dedication of the new bridge, so they boarded the crack Chickasaw and woke up in Cairo. They enjoyed the change very much and as was to be expected, everything passed just as it should have.

The streets were thronged with people who began to congregate on the most desirable points to wait for the big parade. My, oh, my, this was a beautiful parade for a small town. There were about five bands and about the same number of bugle and drum corps scattered in the line of march, with about fifty beautiful floats depicting agricultural communities and about ten of them decorated in the surrounding towns of Missouri and Illinois, each with their queen and her retinue. I was glad we were not called to be a judge here for we would have fallen down on the job. The queens were truly Queens, and I doubt if we could have decided by now.

When I was a young fellow going to school I learned a piece of poetry about the elopement of Lord Ullin's daughter and always felt sorry, for this poet led us to believe the young lady was drowned in the lake, but bless you, this was not so, for the little town of Ullin, Illinois had a beautiful float in the parade and seated upon a throne was Lord Ullin's daughter as one of the queens. She was attended by a about six young ladies dressed in fowl but it looks like a cross between a White Rock and White Leghorn, it has the shape and appearance of the Leghorn but almost as large as the Rock. Looks as if it will make a real good breed in a few years.

After wandering around for two days these rubes decided they had seen enough so decided they would go down to Cairo and see that everything passed

were three races of two five-mile heats and gave everybody all the thrills they wanted. At night there was a great display of fireworks.

These two rubes decided they would not tell about any of the bones that either pulled but here is one too good to keep. The first night we went to the hotel, I decided I would write my better half a letter so she would know we were not lost. Joe decided he would go to bed, so the porter led him to the elevator to take him up to his room and he took one look inside of the elevator and came over to the desk where I was writing and said, "I'm not going to have that room, it hasn't got any bed in it." A few words of explanation and he went on upstairs and when I got up there he was snoring same as if he was at home, perfectly contented.

Well, we got home Friday morning tired, but perfectly contented, and will be ready to go again next year.

### FOUR OF ONE FAMILY DIE IN AUTO WRECK

Three Others Hurt When Train Hits Car

Paducah, Ky., Oct. 20. — Four members of one family, returning from a birthday party, were killed and three other members injured when their automobile was struck by an Illinois Central train near here tonight.

Those killed were: John Fleming, 30, baggage man for a local taxicab company.

His wife, Frederica, 28. A son, Rupert, 8. A son, Jesse Eugene, 3 weeks.

The family party had been at the home of Mrs. Fleming's father, near here, at a party celebrating her birthday. It was raining at the time of the

accident.

Those injured were Robert, 6, who suffered probable internal injuries; William, 4, who suffered a severe head cut and the loss of several teeth, and John 3, cut and bruised. Doctors said Robert may not live and that William had a chance to recover.

Since the above was written Robert died Tuesday from injuries received in the horrible tragedy of Sunday night.

### AMONG THE COUNTY AGENTS

Three Jersey bulls from high production cows were purchased by Madison county farmers last month. The county agent is conducting a campaign for more clover growing.

Sixteen litters of pigs in Taylor county weighed from 2,038 to 2,606 pounds when 180 days old. Cost of production ranged from \$5.50 to \$8 per 100 pounds.

Rockcastle and Southern Madison county farmers have organized a Golden Hoof Club, with 62 members and a goal of 100 members by January 1. A pumpkin weighing 78 pounds, said to have been the largest ever seen in the region, was exhibited at the Bath County Fair.

Ninety-three Bracken county farm girls are studying sewing under the direction of 11 local 4-H club leaders. They meet twice a week.

Larue county junior club members won \$480 in premiums at the Larue County Fair and \$80 at the State Fair. At the end of six months of testing, one McCracken county cow had returned its owner \$118 above feed cost, while another cow in the same association had returned its owner \$18. Another cow purchased at a cost of \$110 returned a

profit of \$88 in four months.

A livestock and poultry show in Meade county stimulated interest in plans for a county fair next year. Fifty-one Jerseys, 20 head of beef cattle, 25 sheep and many chickens were exhibited.

### Appearances Add Much to Real Estate Values

Agreements on the part of real estate developers to maintain sold and unsold property in a presentable condition by setting out trees, shrubbery and flowers, of grading parkways and keeping weeds out on individual lots form one of the strongest factors which make for increased realty values, according to a prominent Chicago real estate broker.

"Property values rise through an influx of purchasers," he says, "and purchasers are attracted to an unbelievable degree by the physical appearance of the property itself. People of means insist on well-kept surroundings, and it is a fact that every development around Chicago which has been operated under maintenance agreements as regards the upkeep of appearances has not only been populated quickly, but has undergone noticeable increases in realty values. "The appearance of property is actually part of its value, for its desirability depends to a great degree on looks and the prospective owner should insure that the looks of his neighborhood will not be allowed to deteriorate."

### Beautiful Small Garden

Within the smaller garden there is no room for the larger architectural features such as the pergola or garden shelter, but there is always a place for a bit of furniture or ornament.

Such an object may occupy the center of the garden. For example, a sun dial or statue standing alone may be the principal factor of the design. Or possibly a bird bath may form the focal point of a vista, or may be considered a sufficient motive for the direction of a walk.

Other objects may mark an entrance gate to the garden by symmetrically flanking either side. A series of smaller objects might determine the outer corners of a formal flower bed, thus aiding materially in emphasizing the design.

## Route 4, Fulton Ky. (New Hope Community)

Mrs. Jennie Rickman of Pilot Oak is visiting Mr. and Mrs. F. C. Irvine for a few days.

Mr. and Mrs. W. B. Finch, Mr. J. B. Phillips and Miss Serilla Phillips attended church services at Crutchfield, Sunday afternoon.

This community was very well represented at the 4-H Club Dairy Show held at Clinton, last Saturday.

James A. Everett won first prize on Jersey cow and calf, and James Lewis Eskew won first prize on Holstein cow. The latter also won prize of a pig for having kept the best record on the cow.

Several from here attended the county school fair at Clinton, Friday.

The pie supper at the school house Friday night was quite a success. The proceeds will be used for beautifying the interior of the building.

The Homemakers' Club will hold its monthly meeting at the home of Mrs. C. A. Craddock, Friday, October 25.

## Route 5 News

Whooping cough is becoming epidemic around Oak Grove.

Many families are afflicted. Quite a number are home from Detroit, Mr. and Mrs. Gaylon Etherige, Mr. and Mrs. D. J. Jones, Renzo Palmer, Mr. and Mrs. Otis Palmer.

Members of Oak Grove church met last week, built a flue, recovered the church, papered the walls and will paint and refinish floors and wood-work next week.

Elder R. R. Brooks filled his appointment at Oak Grove Sunday afternoon at two-thirty. His subject, "God's Goodness Manifested to Man," which was ably and interestingly presented.

Come out and hear Bro. Brooks next Third Sunday afternoon at 2:30. He is an able evangelist and is at present in a fine meeting at Mayfield, Ky., with 45 additions up to the present.

Burial service at Mt. Moriah church Sunday afternoon for Mr. Bethel of the Dukedom vicinity.

The following program will be presented by the pupils of Ridgway school:

Welcome Song—Children. Reading—Harold Halladay. Hallowe'en Song—School. Reading—Mildred Yates. Harmonica Selection—Harold Halladay.

Jokes—Boys.

Song—Boys.

Reading—Two Children.

This will be followed by a Hallowe'en party. Come in fancy dress and mask, if you will. Fun and frolic will be the order of the evening.

Supper and other refreshments will be served by Welfare Workers' Ladies' Club. Everybody invited to come and enjoy the evening with us.

Mr. Malcom Johns is having chills. Mr. Butts is able to be out again.

Mr. and Mrs. Cleveland Butts are at home again after a couple of weeks at Red Boiling Springs.

Potato digging, cotton picking, saving Lespedeza seed, sowing rye, etc., is keeping everyone busy.

Mr. Hinson Jones and Miss Thacker were visitors in Dresden, Friday.

Mr. and Mrs. Roy Watts are making quite a few improvements in their home preparing to move in next week. The ladies of the Welfare Workers Club are lending a helping hand.

Fulton, Kentucky, under the Act of  
March 3, 1879.

### Community Progress

While Fulton has much to boast of as it considers past achievements, it would be sheer folly at this stage of its community development to rest content with past laurels and cease striving for further advancement.

Fulton's present high standing among centers of equal population has been won by foresight and aggressive policies in the past. This generation should be just as eager to assure an enviable future for the community as were those men of former generations who often fought a stiff, up-hill fight to gain those things upon which the city's present prestige rests.

Never before in its history has Fulton been in such good position to go forward in rapid and substantial development as right now. It has all its pristine attractions plus many of relatively recent acquisition.

But to do the things that must be done if the community is to progress along desirable lines of commercial, industrial and residential expansion and betterment there must be no diminution of that spirit of cooperation and willing effort on the part of a considerable number of citizens which has been manifested in all its past accomplishments.

And just as men and women of vision and civic consciousness have always been available in the past, so will they come to the service of the community in future hours of need.

### Pride and Martyrdom

Consider the turkey fattening for Thanksgiving day's dinner. How he swells and puffs himself and struts in impressive dignity across the barnyard—infated with pride in his breadth and depth of chest and large hip measurements. And the tragedy of it is that those things constitute his death warrant. The gifts of which he is so proud doom him to the oven.

Some may see in the gobble's vanity a striking illustration of the proverbial pride that is followed by a fall. Others, who look at the matter fairly, will see something more. All who recall the last good turkey dinner served them must admit that a well-fattened gobble has something to be proud of. Nor in his fall he serves mankind. In his death he becomes a true benefactor of the hungry. His pride in life is not unbecoming and in death he is a martyr to a glorious cause.

What jumps out of reach quicker than a promising future?

The height of ignorance is buying two neckties just alike.

What this country needs is socks guaranteed for 10,000 miles.

Many men act as if asking them to pay a bill they owe were an insult.

People smoke so much now it is hard to tell when to call the firemen.

It is all right to follow your natural bent unless it makes you crooked.

The burning question of the hour is "Who will get up and start the fire?"

When a woman plans a party, the fun consists in making a list of those she won't invite.

### Five Men Injured When Car Crashes

Five men were injured, two seriously and another perhaps fatally when an automobile owned and driven by L. Yarbrough turned turtle in the ditch on the state highway near Clinton.

All five men were employees of a construction company doing government work and were on their way to their homes in Cairo where they lived. Ernest Hunt, foreman, had skull fractured and may not live. Ray Cowan had hip broken and bad cuts while Yarbrough was badly injured. All three were taken to St. Mary's hospital at Cairo.

Two others, Walter Leech and John Cowan, escaped with slight injuries.

Yarbrough said he pulled out to pass a truck and dust blinded him.

### BANDIT SHOOT

#### HESTER PIRTLE

Hester Pirtle who operates a filling station on Highway 45, about four miles north of Fulton was shot and seriously wounded Monday night at 8:30 when a masked bandit attempted to hold up the station. The bandit escaped after shooting Pirtle, and after Pirtle had emptied his pistol at him without known effect.

Pirtle was preparing to close his place of business and was out in the front taking down a lantern which hangs in front of the station. His wife was with him and she remarked that she believed a man was hiding near the corner of the building. At that instant a masked man stepped out from the shadows, with leveled revolver and ordered the pair to throw up their hands.

The victim stated that the bandit fired at almost the same instant that he spoke, firing two shots. One struck Pirtle in the chest and went through emerging at the back. Pirtle, although badly wounded, managed to draw his pistol and began firing. His wife who was almost in the line of fire was in danger but luckily none of the bullets struck her. The bandit made his escape in the darkness. Local officers went to the scene, but no trace was found of the robber. Pirtle was taken to the Mayfield hospital and was resting well at last reports.

### STEPHENSON-ALLEN

Miss Dorothy Allen, daughter of Mr. and Mrs. A. C. Allen of Fulton, and Wiley Stephenson, son of Mr. and Mrs. B. B. Stephenson, were married at the Methodist parsonage in Hickman by Rev. R. P. Duckworth of the First M. E. church last week. The mothers of both the bride and the groom accompanied them to Hickman to witness the ceremony. Mr. Stephenson is railway express agent here and a young man of sterling qualities.

Their many friends wish them a long life of married bliss. The young couple will make their home here.

### Hickman Lashed by Wind, Hail Storm

Hickman, Ky.—A terrific wind and hail storm struck this section late Sunday, doing considerable damage to crops, especially cotton, and blowing down trees and small outhouses. The new steel stack on the upper mill of the Mengel Co. plant, which was being erected to replace the one knocked down by the electric crane a week ago, was blown down with all the scaffolding around it, smashing a large section of the mill roof, and doing damages estimated at several thousand dollars. The new stack was a complete loss. Several workmen had narrow escapes when the stack came down with a crash.

Municipal pride is at its best when a town first begins to worry about its traffic problem.

### NATION JOIN IN CELEBRATING GOLDEN JUBILEE OF LIGHT

Radio fans were given a real treat Monday night in the world-wide radio hook-up broadcasting the "Golden Jubilee of Light" program from Dearborn, Mich.

The entire ceremony was intended as the scientific world's tribute to Thomas A. Edison, inventor of the electric light and was staged with all the ingenuity that engineers could evolve. Graham McNamee, the world's greatest radio announcer described the scene in his characteristic way.

Besides the response of the Wizard of Menlo Park, talks by President Hoover and other notables marked the formal dedication of the Edison School of Technology, founded by Henry Ford as a perpetual tribute to his friend, Thomas Edison.

Mr. Ford has reconstructed the original laboratory and machines used by Edison when he invented the electric light. Not only the old wooden laboratory but also the original laths, work benches and lamps are there as a nucleus around which the new school is built.

While hundreds of the most distinguished citizens of the nation watched him—while millions of people listened to the vivid description as it was broadcasted Edison, himself re-enacted the historical scene of perfecting his first successful lamp. The original old engine was there to supply the power, the old dynamo hummed the same tune it sang in 1879, supplying electricity to light the first lamp.

## Community Building

### Homes Made Possible by Loan Associations

Statistics made public by the building loan and savings associations of the United States show that in the last eight years the 13,000 thrift associations scattered through the country have financed 3,793,000 homes, valued at \$13,144,000,000. The number has steadily increased and it was estimated that 700,000 homes were financed last year, to the value of \$2,200,000,000. More than one-seventh of the entire population of the country is now housed in buildings financed by these associations, the number provided for being 18,965,000. Of the 3,793,000 homes, 2,600,000 are being paid for on weekly or monthly payments. There are at present more than 12,000,000 members of these associations and the current assets are \$8,155,000,000.

Approximately \$2,000,000,000 of the expenditures of the associations was paid out to workmen and artisans who helped to construct the homes. More than 92 per cent of the money invested went to finance home owning. This latter result was not accidental, but due to the reason that the primary purpose of these associations is to help people in owning their own homes.

### Smith's Cafe

Neat and Attractive Service and Food the Best

It is a pleasure to go to this cafe for a lunch or full meal.

## Gold Horseshoes

Expense is not efficiency. Don't pay for gold horseshoes when you buy your printing.

Sensible printing on sensible paper—Hammermill Bond—will save you money and get results for you.

That is the kind of work we do and the kind of paper we use.

## Yes the Coleman IS Different

You'll quickly see that the Coleman Cooker is different from other stoves the minute you see the Gas Preheator demonstrated. This exclusive Coleman device is years ahead—the result of more than a quarter century of Coleman engineering skill. It lights instantly and in a minute or less the burners are ready with a clear, clean, hot blue flame.

## Coleman Cookers Make Their Own Gas

Besides this miracle of speedy cooking convenience, you'll find many other features that make the Coleman different—features that make a big difference in your daily preparation of meals.

Just think what a difference it would make in each day's household duties to have gas service for cooking... with its speed, its comfort and its economy. The Coleman gives you that wonderful convenience... no matter where you live. It makes and burns its own gas from regular clear-white gasoline. No piping, wiring or installation expense whatever.

And what a difference to have your kitchen free from soot, dirt... blackened pots and pans. The Coleman Range brings you that freedom. Ceilings, curtains and walls stay clean longer when you have this modern range.

You'll find the Coleman makes a difference in the cost of preparing each meal, too. Cooks a meal for the average family on less than 2 cents' worth of fuel.

There are other features about the Coleman Range that make cooking entirely different. Come in and see them. Pick yours. There's a style and size for every cook and kitchen.

## Brother of Fulton Men Meet Tragic Death

Funeral services for Simeon F. Taylor, who met a tragic death when crushed by an overturned tractor he was demonstrating, was held at his home in Memphis Wednesday.

Mr. Taylor had been in the employment of the International Harvester Company for 25 years. He was a member of the Union Avenue Church of Christ.

Surviving Mr. Taylor besides his widow are his son, Doyle C. Taylor, and a daughter, Miss Butonne Taylor.

Mr. Taylor was a brother of Lynn, John W. and Robert T. Taylor of Fulton, all of whom attended the funeral. Others going from here were Mrs. Lynn Taylor, Miss Fern Taylor and W. L. Taylor.

## ALL MOTORISTS OWE HONOR TO THOS.

A. EDISON

Thomas A. Edison made the first incandescent light 20 years before the automobile came into use; now, when the fiftieth anniversary of Edison's achievement is being observed, there are 100,000,000 and more incandescent bulbs in the motor cars of the United States and Canada—a tribute to the inventor that no other single industry can equal.

Every motorist should join in spirit, in the Edison celebration. If a driver reflects a moment, he will realize that he is indebted to Edison and the electric light for a great measure of the safety comfort and pleasure of motoring. Anyone who drove one of the early automobiles will have no difficulty in picturing the improvement wrought by the Edison invention—for, although the electric light came a long time before the automobile, it was years before cars were electrically lighted. The lamps had been invented, but the developing of the storage battery and generators came later.

At the end of last year, there were 25,550,000 automobiles registered in the United States and Canada. The average number of bulbs per car would hardly be less than five (two head-lights, one instrument board, one tail, one stop), and the average likely would be higher, for side-lights are almost universal. But even with only five lights, that means 127,750,000 electric lights bulbs in use.

The next time you drive out at night, give a thought to the motor cars indebtedness to Edison. You find city streets and rural highways illuminated by his invention; incandescent flashing green or red give you the right of way and protect your progress; the lamps in your own car light your road, protect your rear, signal your stops, illuminate the instrument dials, and flood light your touring maps.

Surely, a motorist owes much to Edison and should be most enthusiastic in doing honor to the great American in the world's observance of the 50th anniversary of the incandescent electric light.

## RADIO STATION WHAS DOUBLES POWER

Radio station WHAS, of Louisville, owned and operated by The Courier-Journal and the Louisville Times, has become one of the most powerful broadcasting units in the United States through the action of the Federal Radio Commission.

A license was issued to the station on October 7, authorizing it to broadcast on 10,000 watts power instead of 5,000 watts, which it had been using.

The commission had granted the station a construction permit to install the high-power equipment and, following an inspection and test by the Radio Division of the Department of Commerce, it was found to meet all requirements. Issuance of the license followed immediately.

The station broadcasts on a and has this channel all to its frequency of 820 kilocycles.

**Rucker's Music Shoppe**  
215 MAIN STREET, FULTON, KY.

### Economical Entertaining

A LIMITED budget shouldn't kill hospitality. Many hostesses find it merely a stimulus to the imagination. For it is not the price of food which counts in entertaining, but the quality and the way in which it is prepared.

Get a can of the best quality of salmon, for instance, and have salmon soup for your guests or salmon and peas in cream sauce. The recipes are simple. For the soup, drain the oil from one-third can of salmon, and remove skin and bones. Rub fish through a sieve, and add one tablespoon butter, two tablespoons flour, three-fourths teaspoon salt, a few grains of pepper and three cups of milk. Served in bouillon cups, this is enough for four.

For the second salmon dish, bone the contents of a tall can of salmon,

and drain the liquid from a can of peas, saving it for use in soup at another meal. Make a cream sauce, using a tall can of evaporated milk diluted only to half quantity, and seasoning with parsley, onion, celery salt and salt and pepper. When dinner is almost ready, drop the salmon and peas into this sauce, and serve as soon as they are hot.

#### A Corn Combination

Corn assumes a dignity of its own served with green peppers as corn scallop. To make it, remove the seeds from the pepper and cut in strips about one inch long. Sauté the pepper and a chopped onion in two tablespoons butter. Add gradually two tablespoons flour and one cup of milk, then a can of corn and salt and pepper to taste. Cover with buttered bread crumbs and bake in a moderate oven.

### GOVERNORS SEVER RIBBON TO OPEN NEW CAIRO SPAN

Mile-Long Bridge Over Great River Is New Link to the South

Kentucky sent many guests to the dedication of the new traffic bridge over the Mississippi river at Cairo Friday at noon. Impressive ceremonies marked the opening of the mile-long span which links Illinois with the South, through Missouri. The governors of Illinois and Missouri met on the bridge, midway of the stream, and cut a silk ribbon that figuratively severed the barrier of water that had divided the two states.

The new bridge at Cairo was built by private capital and cost more than two millions of dollars. The toll rate is \$1.25 for each car and 15 cents extra for each passenger, one way; \$1.50 for each car and 25 cents for each passenger, round trip.

Both governors addressed the crowd which assembled on the bridge.

Hand us a dollar bill and get your name on the Advertiser list as a regular subscriber.

### FULTON COUNTY CROP DEVELOP

Harvesting Advancing Rapidly In Western Section

Hickman, Ky. — With ideal fall weather prevailing the past few weeks, harvesting of crops in this section is proceeding at a rapid rate, and more than 2,500 bales of cotton have been ginned by the five gins in this territory already. Cotton is opening rapidly and every available picker is being used, many of the larger plantations, such as Dodds and Johnson with 1,800 acres, importing pickers from Tennessee and Arkansas. The largest cotton yield in some years is reported throughout this section.

Bumper crop of corn, hay, soy beans, tomatoes, potatoes, etc. are also being reported as weather conditions have been ideal all season. Very little of the corn crop has been harvested or even cut, as is the custom farther north, as corn is allowed to cure in the fields and is harvested directly. Preparations are being made, however, to handle the largest car shipments of corn from Hickman in ten years. The canning factory has been running day and night and it is expected their output will run over a half million cans of tomatoes this year.

Business has taken a definite upward trend in this section in the past few weeks, according to local merchants.

### Pool Growers Soon to Get Final Checks

Approximately \$3,200,000 to Be Distributed to Association Members

Hopkinsville, Ky. — Calculations are now being made at headquarters of the Dark Tobacco Growers' Co-Operative Association here in preparation for final payments to members of the organization on the crops sold during the five years of operation.

Approximately \$3,200,000 will be distributed, of which about 1,600,000 will be to the members in the eastern and western Dark Fired Sections for the 1922 crop.

Several weeks will be required to complete the calculations necessary to make payments.

### Kills Self After Learning of Suit Filed by Woman

Retired Farmer, 66, accused by Woman, 18, of Making Improper Proposals.

Madisonville, Ky. — O. G. Cox, 66, a retired farmer, killed himself with a shot gun here after learning that an 18-year-old married woman had filed a suit against him for \$10,000, alleging that he made improper proposals to her.

The suit was filed by Mrs. Elizabeth Eppley, wife of Lowell Eppley, who charged that Cox forced his attentions on her. The Eppleys had been living at the Cox home.

Cox read of the suit in an afternoon paper, then went into the rear yard of his home and shot himself. His widow and four children survive.

### JUST LIKE HOME FOOD

Smith's Cafe is in reality a home-like restaurant because it has been trying to overcome the prevalent idea that restaurants can't serve food like you get at home.

Scores of patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they eat here so regularly.

Years spent in catering to the appetites of particular people make it possible for us to serve wholesome, tasty meals.

The next time you feel like eating away from home, bring your family here.

SMITH'S CAFE  
Albert Smith, Prop.

### OUR MESSAGE OF SERVICE

There is going to be a lot of activity in the building line this year. Architects and contractors, carpenters and masons all, are busily sharpening up their pencils and their tools, and getting set for business. It is not the young married folks alone who are going to build homes—who dream dreams of happiness in homes of their own—but many others who have long, too long, been renting the roofs over their heads are going to try this year to realize their desire to have a home of their own.

### Whatever you plan to do by way of BUILDING — REMODELING REPAIRING

we want you to feel perfectly free to come in and consult our service department without the slightest obligation. Whether it's a big house or a bungalow, a new garage, new roof or new floor, a sun parlor or a sleeping porch, an alley fence, or built-in fixtures—we are prepared to give you unequaled service and low prices on Quality Material.

### LET US HELP YOU MAKE YOUR DREAMS COME TRUE.
