No Censorship Of Press, Radio
Contemplated, Mellett Asserts

Washington, D.C. — Representative Howard B. Mellett, Dem., Hagerstown, said yesterday that no censorship of the press or radio would be contemplated by the House of Representatives.

"There is no necessity for any form of censorship at this time," he said. "The House has always been very careful not to interfere with the press or radio, and there is no reason to believe that it will do so now."
Sixteen Years Ago

Miss Ernestine Blankenship, niece of Mrs. Henry White, a member of the graduating class of J onesb uoro, Ark.

Sixteen years ago...

Plan call for a... from our citizens there seem little

The newspaper business is well advanced in Fulton, so far as preliminary plans are concerned, and with proper facilities for all modern school work were not even thought of. Some of our most energetic citizens are taking a look at things and getting a clear vision of tasks which are waiting to be done.

FULTON PLANS BIG THINGS

Another project which is also important is a final disposition of the Fulton County Fair Grounds. The Young Men's Business Club, aided by other civic organizations, is pushing plans to acquire title to this property and transform it into a permanent community center. Work has been carried on for some time, and this year it may be that final plans will be carried through, and the fair grounds will really become a permanent civic possession and can be developed along that line. It is true that considerable expense must be raised for this purpose, but Fulton has a way of meeting all legitimate demands and this newspaper hopes and believes that the Young Men's Club will be able to accomplish this laudable purpose.

The oldest organization, the Chamber of Commerce, is also showing signs of new life under the direction of Mr. Bob White, the newly elected chairman. Mr. White stated the other day that this year was going to be the year that something is done to the credit of the town in Fulton. That appears to be his Number One aim, and he is already making his presence felt in this work. The creek has long been one of the community problems, and Mr. White plans to have this problem solved. With his characteristic energy and drive, it is likely that he will be able to really do something by the way. Mr. White is also serving as building chairman for the proposed new school building, and this gives some idea of his tremendous energy.

With all these forces at work within our community it is more than probable that Fulton is headed for better days and bigger things. We have always had a magnificently town, home of forward looking men and women, and we have done some remarkable things in past years. Perhaps we have been sleeping a little during the past few years, but now it seems we are awakening, and with the awakening is coming a true desire to be a model community to make a better community.

Girls injured in wreck enter 3rd month in coma

Philadelphia—The almost intractable fractures of the brain suffered by two girls in the Pennsylvania Railroad train wreck near Lansford Jan. 27, were today in the third month of their strange convalescence. It is stated by doctors that their condition has not changed materially in the three months of their strange convalescence.

Two girls, businessman's daughters, were thrown from an iron bridge by a railroad train, which had just left the Lansford station, across a busy street without warning. The girls, both 13-year-old twins, Misses Helen and Mary Brown, were knocked unconscious and for days were unconscious after the accident. It is expected that both will make a complete recovery, but it is doubtful whether either will ever be able to live a normal life again.

It is reported that the railroad, which did not stop the train at the station, is liable for the accident, but no action has been brought yet.

**ITALY AND GERMANY SUSPEND THEIR SYSTEM OF BARTER TRADE BALANCES**

Rome—Italy and Germany today officially signed a trade agreement offering to conduct their barter trade on a new, more flexible basis.

Under this agreement, commerce between the two countries will not be subject to the conditions of the old system. The new agreement will provide for the exchange of goods between the two countries without the restrictions of the old system.

The agreement was signed by representatives of the two countries in the presence of high officials of both governments.
