Consumption of Liquor In U. S. Is Over 20 Gallons Per Capita

A significant statement was made recently by the government regarding the consumption of alcoholic beverages. It was stated that the average person in the United States consumes over 20 gallons of alcoholic beverages per year. This figure is alarming and highlights the need for stricter regulations to control the consumption of alcohol.

Chautauqua—Man Here

Mr. James A. Shaw in the City of Washington, Ill.

Believes That Pennsylvania Big First Year Chautauqua Never

Mr. James A. Shaw, the Chautauqua, was down here yesterday to look over the river and then return to the big city (Chicago). He is leaving for home today, with the intention of making his home here.

Mr. Shaw is coming here on business with the object of finding a place to build a large hotel.

The Chautauqua is to be held in the summer of 1876, and it is to be one of the most important events of the year.

The question of the I. C. running a line through the city is to be considered by the board of trade.

Mr. Shaw visited the grounds of the hotel yesterday, and while being placed in first class carriages, he was taken around the city, from the highest points, and to the lowest places.

The platform is in good shape, and the buildings are in process of construction.

Mr. Shaw will be in town today, and will be at the hotel all day.

Next Monday Mr. W. F. Wilson of Washington will give a public meeting, at which the question of the I. C. running a line through the city will be discussed.

E. T. Shahin.

The great electric light plant erected by the Chautauqua is in the hands of Mr. Shaw, and is to be completed by the end of the month.

The city council has voted to give Mr. Shaw a free pass for the duration of the season.

Mr. Shaw is to be commended for his efforts in the matter of the hotel.

The closing date for subscriptions is May 30th, and the last payment is to be made on the 30th of June.
