Ford, Union Approve Plan For Settlement

Labor Negotiators However

Emphasized To Con-Continue Talks

Detroit.—A Texas meeting

United Automobile Workers (UAW)

arbitration board, has been 

unlimted the demand for a 

week-end for the first time in 

months. The union, which had

previously rejected a proposal 

the company, now plans to

continue the talks with the 

Union leaders on the condi-

that the company would 

of three members of the 

in charge to handle the 

items. The union said it 

would not accept the 

proposals, which were 

sanctioned by the board.

United States Moves To Collect 

Postal Debts Owed By Europe

Washington, D.C.—In a 

move to recover debts 

owed by Europe, the 

Post Office Department 

announced that it would 

begin a program of 

collection in the next few 

weeks. The department 

had been working on the 

issue for several months 

had issued an advance 

notice of its intention to 

collect the debts, which 

were estimated to be 

$300,000,000. The action 

was taken in response to 

requests from European 

governments and the 

Post Office Department 

believed it had a strong 

case for recovering the 

debt.

Debtors listed by the 

department included 

government agencies 

private individuals. 

The department 

authorized to pursue 

collective action against 

non-paying customers.

State Called Fourth Lowest 

In Tax Rate

Frankfort, Ky.—Kentucky 

has been named the fourth 

lowest state in tax rate 

according to a recent study. 

The study, conducted by 

the American Association 

of Revenue Commissioners, 

found that Kentucky ranked 

fourth in tax rate among 

the states.

The study also 

found that the tax rate 

in Kentucky was 4.27% 

compared to the national 

average of 4.78%.

The study was 

conducted by examining 

tax rate data from all 

states and calculating 

the average tax rate for 

the country.

The lowest state, 

Utah, had a tax rate of 

3.73%, while the highest 

state, New York, had a 

rate of 5.82%.

The study concluded 

that states with lower 

tax rates tended to have 

lower state spending and 

bigger private businesses.

More Pressure For Speeding Up 

Defense Work Is Expected Soon

Washington, D.C.—Defense

officials are expected to 

place more pressure on 

manufacturing plants to 

speed up production of 

military equipment.

The Defense Department 

will soon issue new 

instructions to factories 

that are engaged in 

military production.

The new instructions 

will include tighter 

controls on production 

rates, as well as faster 

turnaround times for 

finished goods.

The Defense Department 

will also be requiring 

factories to provide 

more regular updates on 

their production 

activities.

Questions asked by

the Defense Department 

are expected to include:

1. How many units of 

defense equipment 

are completed each day?

2. How many units 

are being produced 

weekly?

3. What are the 

expected delivery dates 

for all orders?

4. How many 

employees are 

currently working 

on defense projects?

The Defense Department 

has also been working 

on improving its 

communication 

with factories to 

ensure faster 

response times.

The department 

will use this information 

to make adjustments 

in production 

strategies as 

needed.

History repeats itself.

The German blow that was to suddenly make an end to the new war was to be a disaster for all nations. This was the collapse of the collapse of Belgium and the inaction of the British and French forces in Flanders. For some reason the British expeditionary force did not take part in the fighting. It was probably the result of a second line of defense. The British, perhaps on false orders transmitted by the German, left their position on the left flank of the Greek forces to rush to the aid of their allies. The result was a disaster in the face with the Maginot Line. The evident strategy of the German was to occupy Algeria and threaten the Greeks in the Albanian theatre and then to outflank the British line by keeping control of Bizancio. This would have been the case with the Maginot Line. The most that was expected was the Italian attack and that the Germans have shown they can strike as swiftly over mountains as over plains.

The most that was expected of the Italian attack was that it would delay Hiler's and German's long expected invasion of the British lines. Earning a bicycle is quite simple. You merely save the votes which are given out with work from our laundry and the boy and girl who secure the most votes will win. Your friends and relatives will be glad to help save these votes.

Be sure to bring 100 votes to us before April 15 in order to be properly entered in the campaign.

Some boy and some girl will certainly earn a bicycle—why not get busy and be the fortunate one?
