May Be More Cars Than Roads Can Accommodate

Some people seem to think that we are going to be "crammed" with cars shortly. The more people who can drive, the better. It is much better than none. The trouble is that the roads are not ready for the cars. The roads need straightening, better grading, better surfacing and better drainage. Money is needed for the roads and much of it is being held up because of the big finance raid of the States. The facts are that now when there are only a few cars on the road there is no need to spend a million dollars for roads. If our roads need $100,000,000 of money, why don’t we start with the high roads first. May be more cars than roads can accommodate.

AUTHORITIES NOW CONTROLLED BY VOICE

It will take five minutes for a person to learn the voice-controlled automobile. After that, voice control will be a big advantage. B. J. Watson, inventor of the Watson-Morse and Morse-Gordon voice-controlled automobile, says voice control will be the future of the automobile industry.

REMARKABLE VALUES!

You can’t go anywhere and find used cars that will give the service that ours will for the money we sell them for.

We sell on easy terms and will take your old car in trade.

**FOR BOYS**

We have many plans for boys this week before we have the boys town meeting where they would like to see. We will only do this once a year and we will try to have the boys show up in every town meeting.

**TIME TO BE**

It's our nature for American citizens to love all around and take it for granted that the government is doing more good than we realize. The government has been responsible for many changes over the country and it's a good thing to do so. We are not going to try to be critical of the government since 1929, we see no occasion for criticism of the government. We are trying to do the best we can to make the government a better place to live.

**HERE'S AN EYE OPENER**

We are going to get some more interesting information like this pretty soon, when the census figures are published and we can get a good idea of what we are going to find out in this big business. We are all, that is, we're going to learn that this is a big difference and this richness is not, as so many imagine, confined to the larger cities of our state. As a matter of fact, we feel sure the average Farmer will not be as much poorer as he feels he is.
